On the 21st day of May, 1975, at a hearing on the motion to dismiss, it appeared that full dress consideration was desired on the issues of standing and ripeness. Time was allotted, therefore, to develop evidence, and a hearing, four days in length, was conducted on September 27, 29 and 30 and October 1, 1976, on these subjects. Briefs were subsequently filed and the case is ready for decision.

THE PLAINTIFFS

Plaintiffs are a group of people with a common interest in protecting themselves, and other present day citizens and their children, against what they see as the deterioration and destruction of their property and the world they live in....

* * * THE PRICE-ANDERSON ACT

The Price-Anderson Act was adopted in 1957. In pertinent part, 42 U.S.C. § 2210(e), it provides:

(e) Aggregate liability for a single nuclear incident. The aggregate liability for a single nuclear incident of persons indemnified, including the reasonable costs of investigating and settling claims and defending suits for damage, shall not exceed (1) the sum of \$500,000,000 together with the amount of financial protection required of the licensee or contractor or (2) if the amount of financial protection required of the licensee exceeds \$60,000,000, such aggregate liability shall not exceed the sum of \$560,000,000 or the amount of financial protection required of the licensee, whichever amount is greater: Provided, That in the event of a nuclear incident involving damages in excess of that amount of aggregate liability, the Congress will thoroughly review the particular incident and will take whatever action is deemed necessary and appropriate to protect the public from the consequences of a disaster

of such magnitude..."

In other words, \$560,000,000 is the maximum amount that all persons injured could recover for injury, death or property damage in the event that a domestic nuclear

power plant got out of control.

The Act authorizes the Commission to pay the first \$500,000,000 incurred in investigating and settling claims and defending suits from such an accident, but allows the Commission to require that the power companies themselves provide indemnity for at least the first \$60,000,000. The Commission is authorized to require that this indemnity by the power companies be increased as the Commission may decide up to an amount of \$500,000,000. Some such increase in power company shares in this indemnity have been required, but the \$560,000,000 overall limit remains

Detailed provisions are made for handling claims. One provision of particular interest is § 2210(0), which says that if, upon petition and showing, a cognizant United States district court determines that a particular incident has produced losses that exceed the \$560,000,000 limit of liability: (1) payments going beyond 15% of that limit (\$84,000,000) may not be made without court approval; (2) payments above 15% must be under a

plan of distribution or found to be not prejudicial to the subsequent adoption of such a plan; (3) claims for later discovered and future injuries must be provided for; and (4) all further distribution must be determined by the district judge.

Plaintiffs have shown that the Price-Anderson Act has been an indispensable element—a "but for" cause—of the construction of atomic power plants and their threatened operation, and that without the Price-Anderson Act, either there would be no nuclear plants or there would be insurance or other security to cover their threatened losses; they are entitled to challenge the Price-Anderson Act on its merits.

THE PRICE-ANDERSON ACT IS UNCONSTITUTIONAL

The Price-Anderson Act limits the total liability for a single nuclear incident, including defense costs, to \$560,000,000; establishes a claim handling procedure which contemplates that the entire problem of adjusting claims will be dumped in the lap of a cognizant United States District Judge if it looks as though losses may exceed the liability limits; payments beyond 15% of the limit (\$84,000,000) may not be made without court approval; such payments above \$84,-000,000 must be made pursuant to a "plan of distribution" (or found by a court not to interfere with a future plan); claims for later and future injuries must be provided for and decided by the judge; some such claims may not mature for several decades, and in the meantime uncertainties will cloud settlement of fully matured claims.

For a number of reasons, the Price-Anderson Act violates the Equal Protection and Due Process provisions of the Fifth Amendment to the United States Constitution.

DUE PROCESS

The Act violates the Due Process Clause because it allows the destruction of the property or the lives of those affected by nuclear catastrophe without reasonable certainty that the victims will be justly compensated. Considerations that lead to this conclusion include the following:

1. The amount of recovery is not rationally related to the potential losses. Abundant evidence in the record shows that although major catastrophe in any particular place is not certain and may not be extremely likely, nevertheless, in the territory where these plants are located, damage to life and property for this and future generations could well be many, many times the limit

which the law places on liability.

2. The Act tends to encourage irresponsibility in matters of safety and environmental protection rather than to encourage responsibility on the part of builders and owners. This is contrary to the purpose of the Atomic Energy Act, which declares the policy of the United States to encourage "widespread participation in the development and utilization of atomic energy for peaceful purposes to the maximum extent consistent with the common defense and security and with the health and safety of the public." 42 U.S.C. § 2013(d). (Emphasis added.) It is true that power companies have other incentives to build carefully, because a core melt down or other major disruption of a nuclear steam generator would be a devastating blow to the treasuries of even the largest power companies such as Duke. Nevertheless, when a low ceiling is placed on accountability to the public, the tendency of such low ceiling is to diminish rather than to heighten steps necessary to protect the public and the environment.

3. There is no quid pro quo. The defendants contend that the limitation of liability is justified by an exchange of burdens and benefits, and that although there may be a limit on recovery, this is compensated for by certainty of recovery, prompt release of funds, extension of [some] short statutes

of limitation, and elimination of some theoretical defenses. They cite as authority workmen's compensation acts (New York Central Railroad v. White, 243 U.S. 188 (1917)); longshoremen's acts (Crowell v. Benson, 285 U.S. 22 (1932)); the Warsaw Convention (limiting liability for death in international air traffic) (Indemnity Insurance Company of North America v. Pan American Airways, 58 F. Supp. 338 (S.D.N.Y. 1944)), and others. These authorities do not support the Price-Anderson Act. The reasons, among others, are these:

(a) Those who operate nuclear reactors give up nothing of consequence when they waive defenses of negligence, contributory negligence, assumption of risk and governmental or charitable immunity. Assumption of risk and contributory negligence to not citizen from recovery for damage bar a caused by trespassing radioactivity. Power companies don't have governmental or char-itable immunity. Under the law of North Carolina, for example (and I understand it to be essentially like that of other states), people who handle highly explosive or dangerous substances are liable to others for damages caused thereby, even in the absence of traditional negligence. The principle goes back to the British case of Rylands v. Fletcher, L.R. 3 H.L. 330 (1868), which held the owner of the dam liable to downstream landowners whose property was damaged when the dam burst

The courts of North Carolina have adopted the principle of Rylands v. Fletcher and hold those who engage in ultrahazardous activities to a standard of strict liability. North Carolina law has been used to impose llability without proof of any negligence on those engaged in rock blasting. Guilford Realty v. Blyth, 260 N.C. 69, 131 S.E. 2d 900 (1963); on those engaged in quarying rock, Paris v. Carolina Portable Aggregates, Inc., 271 N.C. 471, 157 S.E. 2d 131 (1967); and on those who fly airplanes at supersonic speeds causing sonic booms, Nelms v. Laird, 442 F. 2d 1163 (4th Cir. 1971), rev'd. on other grounds, Laird v. Nelms, 406 U.S. 797 (1972).

The courts of North Carolina have not yet had the chance to apply the rule of strict liability to nuclear power plants. However, the considerations that have led to the application of strict liability are all present in the generation of nuclear energy. It is an intrinsically ultra-hazardous activity, and, when done near large population centers, it is "impossible to predict with certainty the extent or severity of the consequences." Trull v. Carolina-Virginia Well Company, 264 N.C. 687, 691, 142 S.E. 2d 622, 624 (1965).

The philosophy behind the imposition of strict liability is that "[t]he law casts the risk of the venture on the person who introduces peril into the community. Blasting operations are dangerous and should pay their own way." Trull v. Carolina-Virginia Well Co., 264 N.C. at 691. This allocation of risk is applicable to the generation of nuclear energy as it is to blasting.

The doctrine of strict liability for abnormally dangerous conditions and activities is discussed in Prosser, The Law of Torts (4th Ed. 1971), at pp. 505-516. In that section Prosser concludes:

"Although rockets already have made their appearance in the field of strict liability, the first case raising the question as to the use of nuclear energy has yet to reach the courts. When it does, it may be predicted with a good deal of confidence that this is an area in which no court will, at last, refuse to recognize and apply the principle of strict liability found in the cases which follow Rylands v. Fletcher." (Emphasis aded.) Id. at 516.

Thus, in case of nuclear catastrophe, giving up the requirement that plaintiffs prove negligence is giving up nothing of substantial value.

(b) An airline passenger or a shipper of

freight does in theory have an option; he can stay home or travel or ship by other means; there is some basis to justify the limitation on liability when he puts his own body or his property aboard the conveyance. By contrast, the neighbor of a nuclear power plant, or the person caught by chance in the contaminated area, has no option at all.

(c) Prompt release of funds without prolonged litigation is not afforded. The promotes uncertainty rather than certainty and delay rather than promptness in the settlement of claims. Once settlements pass a total of \$84,000,000 (15% of the ceiling), payments stop and the whole problem is referred to a nearby district judge. Thereafter, claims can not be settled on their own merits, but must be settled in terms of a "proportion" of the available funds. These settlements have to be partial or contingent for times that may extend into decades in order to comply with the Act's provision for reserves for late developing claims or lately discovered damage. Since later generations may be involved in such claims, the one thing certain about this procedure is uncertainty.

(d) Unlike claims under workmen's compensation and the Warsaw Convention, the amounts of the potential small recoveries allowed by the Price-Anderson Act are not even certain; since the maximum total liability does not vary with the number of people injured, the recoveries must be simply proportions of the fund, bearing more relationship to the number of people injured than to the severity of the injury of the

individual

(e) The Warsaw Convention was a treaty rather than an Act of Congress; treaties with other nations don't follow the same rules as lawsuits or ordinary Acts of Congress. Moreover, plaintiffs point out that the United States in 1965 denounced the Warsaw Convention and resumed endorsement of it a year later only after agreement was reached sharply increasing liability to United States passengers to \$75,000 instead of the \$8,500 which had theretofore obtained.

(f) The omnibus nature of the coverage (providing payments for injuries caused by even financially irresponsible wrong-doers) is not a redeeming feature; omnibus coverage could be provided under a fair plan just as

well as under this unfair plan.

(g) Waiver of [some] short statutes of limitations affects only the time when the potential remedy can be asserted by suit and does not affect the fairness of the underlying right. Many statutes of limitations, see, for example, North Carolina General Statutes § 1-15(b), already provide for tolling of rights of action where damage is hidden or not discovered until later.

(h) A further problem with Price-Anderson is that the limit is absolute and applies to nuclear catastrophe even though it may be the result of wilfull conduct or gross

negligence.

(i) It was argued orally that in the event of a nuclear catastrophe, somebody by executive action or Congress by special Act under the 1975 proviso to § 2210(e) might make some "relief" immediately available. Mr. Micawber would like that idea. It may well be so, and I hope it would be. However, the fact that a future Congress might be more generous than past Congresses have been wise would still leave the Price-Anderson Act short of providing the "reasonable, certain and adequate provision for obtaining compensation" which due process of law requires. Regional Rail Reorganization Act Cases, 419 U.S. 109, 124-25; Cherokee National v. Southern Kansas Railroad Company, 135 U.S. 641, 659 (1890).

EQUAL PROTECTION

The Act violates the equal protection provision that is included within the Due Process Clause of the Fifth Amendment because it provides for what Congress deemed to be

a benefit to the whole society (the encouragement of the generation of nuclear power), but places the cost of that benefit on an arbitrarily chosen segment of society, those injured by nuclear catastrophe. This conclusion is reached by considering the reasons that lead to the holding that the Act violates the Due Process Clause, plus the following:

1. The statute irrationally places the risk of major nuclear accident upon people who happen to live in the areas which may be touched by radioactive debris. No necessity is suggested for using such geographical happenstance as the basis for allocating the bur-

den of loss.

 The Act irrationally and unreasonably places a greater burden upon people damaged by nuclear accident than upon people damaged by other types of accidents, such as motor vehicle or electrical accidents, involving power companies.

3. The Act unreasonably and irrationally relieves the owners of power plants of financial responsibility for nuclear accidents and places that loss upon the people injured by such accidents who are by definition least

able to stand such losses.

4. The limitation is unnecessary to serve any legitimate public purpose. Other arrangements rationally related to the interests asserted could easily be devised. For example, a liability pool could be established, requiring either contributions in advance, or liability for assessment on a unit basis or otherwise, of all power companies building or operating nuclear generators. This would effectively place the responsibility upon the group most directly profiting from any im-provement in the costs or usefulness of electric power-the power company stockholders and the customers themselves. Another rational alternative would be to make such accidents a national loss and to pay those damaged out of the federal treasury. This would spread the loss among those who benefitted indirectly by having the nation's power supply increased as well as among those who presumably benefitted directly.

No federal case in point on the equal protection issue has been cited. Perhaps Congress has never before (without compensating factors absent here) passed a law placing

the . .

CONCLUSION

Plaintiffs are threatened with certain injury of relatively minor nature, and with reasonable likelihood of major and perhaps catastrophic injury, without assurance of adequate compensation if that should occur. But for the limitation of the Price-Anderson Act, the nuclear power plants would not be being built and those threats would not exist. Plaintiffs are actively pursuing the case. They have a live stake in the controversy and are sufficiently aroused that their position has been well and adequately pre-sented. A live case or controversy exists; they have standing; the issue is ripe for decision and there is no need to wait until a reactor accident occurs before deciding the case. The time to put on the roof is before it starts raining. The question of the constitutionality of the Price-Anderson Act should be decided now.

Injunctive relief is not sought and is not contemplated; at the time this action was filed one federal district judge had no authority without the concurrence of one of two other judges to issue an injunction based upon the unconstitutionality of an Act of Congress.

The question is, however, whether or not to declare the constitutional rights of the

parties.

Granting declaratory relief in this case is not likely to interrupt the operation of the statutory scheme before the parties can seek to have the Supreme Court finally adjudicate the issue. Kennedy v. Mendoza-Martinez, 372

U.S. 144, 154-55 (1963). A direct appeal lies should the parties choose that route. 28

U.S.C. § 1252.

This court like other courts has a duty to "faithfully and impartially discharge and perform all the duties incumbent upon [a] United States District Judge . . . agreeable to the Constitution and laws of the United States" The Constitution is the "supreme law of the land." Only by forthright recognition of rights reserved to the people by the Constitution and laws can those rights be made real to the people whom government officials are chosen to serve.

I therefore hold and declare that the provisions of 42 U.S.C. § 2210(e) and any other provisions necessary to implement the \$560,000,000 limitation of liability are unconstitutional and unenforceable insofar as they apply to nuclear incidents occurring inside

the United States.

Counsel may tender any further order or judgment appropriate under the foregoing memorandum of decision.

This 31 day of March, 1977.

JAMES B. McMillan,

U.S. District Judge.

THERE SHOULD BE ONLY ONE STANDARD IN WEIGHING OP-PRESSION, REGARDLESS OF RACE OR NATIONALITY: THE U.N. AND O.A.U. APPARENTLY HAVE TWO STANDARDS

HON. EDWARD I. KOCH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 5, 1977

Mr. KOCH. Mr. Speaker, recently I came across two articles in the Washington Post describing atrocities perpetrated by Uganda's Idi Amin. Normally disclosures such as these would be plastered across the front page, but, because mass murders and brutalities are commonplace in Uganda under Amin's Nazisstyle rule, they were burried in the front section. The atrocities, however, are nonetheless heinous, and the decent people of the world have a duty to voice their outrage over them. Amin would like nothing better than to have the international press let him out of the limelight, by limiting their coverage to his weekly basketball games and tea parties. Like all repressive dictators, Amin is more secure if his evil purposes can be worked in relative secrecy.

While much of the world was expressing dismay over the reign of terror in Uganda, some voices were heard to ask, "Why single out Idi Amin." All violations of human rights should be condemned. Moreover, just because we know there are other offenders in the world, it is not right to sit back and say nothing about systematic violations that are thrust into the public view. It is true that there is a great deal of torture in other countries, but that increases our obligation to condemn it wherever we find it, and it happens that Uganda is the

worst offender right now.

Just as the decent people of the world have an obligation to speak out against violations of human rights wherever they occur, those that remain silent out of indifference or self-interest should also be censured. I am disgusted by the hypocritical silence of the United Nations and the Organization of African Unity in face of Amin's flagrant and bloody repression of his own countrymen. I fully support the condemnations by these two

organizations of the racist regimes in South Africa and Rhodesia, but for them meanwhile to voice no criticism of the mass torture and executions taking place

in Uganda is unconscionable.

Apparently there are two standards of human rights at the U.N. and the O.A.U.—one for white oppression and a different one for black oppression. For me there is only one standard, regardless of the race or nationality of the oppressor or the oppressed.

The Post articles I referred to follow: FORMER AIDE SAYS AMIN ORDERED DEATHS HIMSELF

(By Roger Mann)

NAIROBI, March 27.—A high-ranking Ugandan army officer who held senior posts in President Idi Amin's government until he fied to Kenya earlier this month says that "Amin personally gave the order that all Lango and Acholi soldiers should be killed."

The officer, who refused to be identified, is one of the most important Ugandans to have left the country in recent weeks. He said that the orders were circulated throughout the country to army commanders via military radio a few days after the death of Anglican Archbishop Janani Luwum and two Cabinet ministers last month. He said he also was given the orders directly by one of President Amin's secretaries.

The officer escaped from Uganda earlier this month after he had been forewarned that his name was on a death list. "They were hunting Christians not because we made mistakes but just for the sake of killing Christians," he said.

The officer, who has served with President Amin in the army since 1960 before independence, said that when Amin, a Moslem, took over in 1971 less than 5 per cent of the army was Moslem. The figure is now probably over 20 per cent, he said.

"That 20 per cent is terrorizing the other 80 per cent whose morale is very low," the officer said. About 15 per cent of Uganda's people are Moslem, while 50 per cent are Christian and the rest Animist.

He blamed the current wave of Christian killings on jealousy. "Christians are better educated than Moslems and by virtue of their education and ability they have been holding positions of responsibility." he said.

Most of the Moslems, he said, are found in the dread State Research Bureau, which is the army's intelligence unit and is reportedly responsible for most of the killings in Uganda. There are very few Ugandan Christians in State Research, which is made up predominantly of members of Amin's own Kakwa and related West Nile tribes and mercenaries from the Sudan, Zaire, Rwanda and Burundi.

The main function of State Research is "to insure the security of the president, not the country. Its members have full powers to kill people who are suspected of being uninterested in the government," the officer

Other Moslems are now commanding officers. Some of these, including the vice president, Gen. Mustafa Adrisi, are reportedly illiterate, although Uganda once had the highest standard of education in East Africa. Amin himself is believed to have left school after the fourth grade.

The officer believes he was on State Research's death list because he was a Christian in a high position.

The main targets are the Lango and Acholi in the army. The officer was unable to give precise figures and said he saw only 40 bodies himself but from reports he is convinced that "very many," perhaps 1,000 Lango, Acholi and other Christian soldiers have been killed since Anglican Archbishop Luwum died six weeks ago.

"It is not a new thing to see dead bodies along the roadside in Uganda," he said. When Amin seized power from Milton Obote in 1971, Lango and Acholi comprised about half of the country's 10,000-man army. Most of them were suspected of being loyal to Obote, a Lango, and many of them were killed in

1971 and 1972.

When the recent wave of killings began last month just after the death of Archbishop Luwum, only the 3d Infantry Battalion had significant numbers of Lango and Acholi. The officer said "they were merely shot or butchered like cows."

WEEKEND OF TERROR (By David Martin)

LUSAKA, ZAMBIA, March 28.—Lira's residents awoke on Saturday Feb. 5 to find that one small but ominous change had taken place in the town overnight.

A squad of officers from the State Research Bureau, led by a short, balding Nubian former taxi-driver named Mahammod,

had arrived during the night.

The State Research Bureau, which has its headquarters in Uganda's capital city, Kampala, is the most dreaded of President Idi Amin's four identified killer squads.

The bureau, which has Soviet and Palestinian advisers, comes under Amin's direct control. Its members are Kakwa (from Amin's own West Nile tribe), southern Sudanese and Nubians. They have been directly responsible for the murders of thousands of Ugandans. By 8 a.m. most of the town knew that a State Research Bureau unit had arrived in their familiar Toyota cars with UVS license plates. Within minutes the first "disappearance" occurred.

Although Lira has been sealed off since then, one man—who cannot be identified now because of the probability of reprisals against relatives and friends still in Uganda—has escaped with a full account of what occurred in the next 48 hours.

The first man to "disappear" on Feb. 5, this man says, was Omara Obua, managing director of the local bus company. He was arrested at his home. At 9 a.m. a local businessman, Otim Obuni, was arrested at his shop.

Next the secret policemen went to the shop of Wacha Olwol, the refuge said. When they did not find him they went to his house five miles outside town, broke in, stole money from the safe and tortured his mother, who is in her 60s, until she disclosed that her son was in Kampala.

Before midday they were back in Lira, where they arrested two married women.

One of the women was dragged onto the pavement outside her shop on the main street.

"Some were clubbing her with rifle butts. Others stepped on her and some kicked her. The beating lasted between five and seven minutes, and she was screaming all the time," the refugee said.

"Omara and Otim were so badly beaten that I didn't believe they would live. Otim could hardly sit, and his face was covered with blood."

The two women were thrown into the rear of one of the two State Research vehicles and driven away, he added. Four days later their mutilated bodies were found five miles south of Lira on the road to Kampala. They had been beaten to death.

At 3 p.m. that same Saturday, Y. A. Engur, a former Cabinet minister in the Amin gov-

EXTENSIONS OF REMARKS

ernment who had been released three weeks earlier after 18 months in prison without trial, was arrested at his home.

"He was sitting under a tree in his garden playing with his children when the squad arrived," the witness said. "They pointed guns at the children and ordered them to put their hands up. Then they dragged their father away."

By now the streets of Lira were deserted. The arrests continued the next day. The first to go, at 10 a.m., was another businessman, Rashid Eton, of the Public Safety Unit, another of the known killer squads.

A State Research officer tricked him into coming out of his house, where he was having breakfast, the witness said. Six other officers lay in wait outside. He was thrown to the ground, beaten unconscious, his hands were tied behind his back and he was pushed into the rear of a Land Rover, where the seven men sat on him.

Two more businessmen, George Atyam and his brother Wacha, followed, the refugee said. Next to go were two headmasters, John Okuja of St. Katherine's Girls' School and a man named Omwomy from Comboni Secondary College. They were also beaten.

At 4 p.m. the witness decided that things were becoming too difficult and went into

hiding.

"In 1971, when they were slaughtering Acholi and Lango in thousands, they had never beaten publicly on the streets like this," he said. In that year three of his brothers had been killed and another had fied into exile.

He contacted a Kakwa friend thinking that the friend might be able to offer him the most secure hiding place. The man warned him to get out of town fast, saying that the killings would continue for some time.

The man said that he had seen a list containing the names of 47 Lango who were to be eliminated. The witness' name was on the list. It was signed by Amin and addressed to Col. Francis Itabuka, head of the State Research Bureau.

The witness went into hiding immediately. On Monday he learned that the State Research Bureau had broadened its hunt to the village of Lango district and he decided to try to escape into exile.

Lira was surrounded by roadblocks manned by military police (another killer unit) and State Research officers, but he managed to slip through the bush to Kampala and finally made his way out to Kenya.

He is the only person known to have escaped from Lira. The town is still sealed off.

None of the people arrested in those first 48 hours has been heard of, the refugee said. All are presumed to have been killed, along with hundreds more who were subsequently arrested.

DELTA STATE WOMEN NATIONAL CHAMPIONS

HON. DAVID R. BOWEN

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 5, 1977

Mr. BOWEN. Mr. Speaker, I would like to bring to the attention of my colleagues the outstanding accomplishments this year of the women's basketball team at Delta State University in my hometown of Cleveland, Miss. Recently, at the Association of Intercollegiate Athletics for Women tournament in Minneapolis, the Delta State team coached by Margaret Wade won

its third consecutive national championship by sweeping to four straight victories.

All of us in Mississippi are very proud of Coach Wade and this fine group of young women athletes, and I am particularly so, since not only is the university located in my hometown, but three of the five starters are constituents of mine, graduates of high schools in our own Second Congressional District of Mississippi. In fact, 5 of the 12 players on the Delta State team are from the Second District.

Members of Delta State's national championship team include Lusia Harris, who also was a member of the silver medal U.S. Olympic team last summer in Montreal, Cornelia Ward, Melissa Ward, Ramona Von Boeckman, Debbie Brock, Wanda Hairston, Lauri Anne Harper, Jill Rhodes, Janie Evans, Jackie Caston, Tish Fahey, and Lynn Adubato. Coach Wade, who is recognized as one of America's great basketball coaches, is ably assisted by Jimmy Butler and has the full support of the university administration, including Dr. Kent Wyatt, president, and Horace McCool, athletic director.

The Lady Statesmen, as the team is called, have the enthusiastic backing, not only of the student body at Delta State, but also of the citizens of Cleveland and the entire Mississippi Delta area. Nearly 1,000 supporters of the team made the long trip to Minnesota for this year's tournament, where they were rewarded with victories over the University of Minnesota, Southern Connecticut, the University of Tennessee. and finally, for the championship, Louisiana State University. The victory over LSU concluded a 32 to 3 season, and brought the three-times national champions' mark to 93 to 4 during the three championship seasons. In fact, during Coach Wade's 4-year tenure at the helm, Delta State has an amazing 109 to 6 record, unequaled by any other women's team in the Nation during this span. By winning three consecutive national titles. Delta State tied another

The Lady Statesmen drew sellout crowds to many of their home games this season at Sillers Coliseum on the Delta State campus, and in their appearance at Madison Square Garden in New York, drew over 12,000 for their game with Immaculata, a record for a women's basketball game in the United States. They were the first Mississippi team to play in Madison Square Garden, and win, defeating Immaculata this year and Queens College last year.

Not only is the team a winner on the court, but its members have compiled outstanding academic records in their classrooms. They have brought a great deal of favorable publicity and national attention to the university, the State of Mississippi, and themselves.

I am pleased and privileged to have this opportunity to offer this public salute to them and wish the individual team members, the coaches, and the entire school the very best of luck in the future. WOMEN'S CRUSADE FOR COMMON SENSE ECONOMICS

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 5, 1977

Mr. KEMP. Mr. Speaker, I would like to bring to the attention of my colleagues today an outstanding organization called the "Women's Crusade for a Common Sense Economy."

This organization is dedicated to the proposition that America needs a strong and free economy in the interest of all Americans and that the American economy—once the marvel of the world—is being choked by Government deficits, high taxes and excessive Government regulations.

These leading women-Women's Crusade for a Common Sense Economy, National Organizing Committee: Chairman, Mrs. Harriett M. Wieder, Mayor, Huntington Beach, Calif.; Mrs. Lorraine L. Blair, founding president, Women's Finance Forum of America, Chicago, Ill,; Mrs. Helen K. Copley, chairman and chief executive officer, The Copley Press, Inc., La Jolla, Calif.; Miss Patricia M. Howe, partner, L. F. Rothschild & Co., San Francisco, Calif.; Mrs. Mary G. Roebling, chairman, The National State Bank, Trenton, N.J.; Mrs. Clara Shirpser, former Democratic national committeewoman, San Francisco, Calif .; Mrs. Leone Baxter Whitaker, president, Whitaker & Baxter International, San Francisco, Calif.—want to reverse this trend by marshalling the efforts of women across the United States who are in favor of halting the Government's excessive encroachment on our free economy. I believe that this is a most admirable goal and I hope all will take the time to read the statement of principles which recently appeared in the San Diego Union, a Copley newspaper of which its outstanding executive officer, Helen Copley, is a cochairman of this 'Crusade.'

[From the San Diego Union, Nov. 10, 1976] THE GREAT AMERICAN WOMAN-POWER POLL

Labor leader Samuel Gompers said it best:
"When the economy is in trouble we are
ALL in trouble."

Today the Economy is in Trouble. And Nobody Knows It Better Than Women—Women in the Home, Business, Professions, Arts, Education, Public Service.

WOMEN ARE MOBILIZING

Today the Women's Crusade for Common Sense Economy invites you to add your voice to those of a million thoughtful women mobilizing:

To help strengthen the foundation of the Nation.

To protect the family paycheck. To secure our children's future.

WHAT WORRIES WOMEN?

Thoughtful women today are concerned about the excesses that undermine the soundness and sap the strength of the Nation's and the family's economy. They are concerned about:

Runaway budgets—local, state and federal—for the average family pays the huge

The failure of Government to work as

hard at the job of living within its income as every citizen must.

Explosively expanding public payrolls. Increasing encroachment of Government into private lives.

The Promise-More, Borrow-More, Spend-More political mania. Thinking women see this cannot go on forever, and are sick of politicians who pretend it can.

JOBS-AND FAMILY SECURITY

The economic stability of the family

concerns women today. They see:
Unhealthy discouragement of business enterprise-the main source of jobs, taxes and all public services in America.

Proliferating boards and bureaus-local, state and federal—assuming new powers, delaying new growth and restricting expansion desperately needed to head off unemployment.

The ideological attack on our dynamic enterprise system, assaulting its founda-tions rather than correcting its faults—the same mistake that today imperils Britain in its slide toward economic ruin.

Red tape, paper work and over-control of industry, little and big, hindering productivity and limiting new jobs.

WHAT IS OUR NATION'S FUTURE? OUR CHILDREN'S?

To women determined to inspire high vision among America's youth, to build and strengthen our foundations for the future, the trend is frightening.

CALL TO ACTION

The American system has produced the greatest human advances, security and opportunity for more millions at home and abroad than any other system the world has seen. Yet today it desperately needs support, repair and sustenance if it is to endure. Responsible women across the country are rallying to lend their names, their energy, their time and money in a simple plan to help in this task—the Women's Crusade for a Common Sense Economy.

The Women's Crusade is non-political and nonpartisan. It will support no candidate, and no political Parties. All contributions are fully tax-deductible.

HOW WILL THE CRUSADE WORK?

- 1. The Women's Viewpoint, a continuing survey of women's thinking, will seek directives from women themselves on economic matters, and disseminate them broadly. It is believed that women at home, in business, in public office, education, the arts and professions have more common sense knowledge about balancing budgets and other economic basics than generally credited. Backed by the moral muscle and vocal tools of a million women, the Crusade viewpoints will have a profound impact on the Nation's decisionmakers.
- 2. A National Speakers Bureau will open wider platforms to articulate women whose paramount economic concern is their Nation's and their children's future.
- 3. A Women's Economic Conference Series will invite foremost thinkers in public affairs, education, labor, economics, industry and other fields both to share their views and hear women's ideas on what is functioning, what isn't, what needs change, improvement, support, new thinking.
- 4. Supporting Action, endorsement and concerted effort will be sought vigorously from all manner of groups, organizations and public leaders.

WHAT CAN WOMEN DO?

Women who want to see the same common sense rules their homes and businesses live by applied to Government will:

Speak out to family, friends-and from every rostrum.

State their views to decision-makers, boards and bureaus.

Write their legislators urging plain common sense in economic matters.

Participate in the Crusade Economic Conferences.

Secure endorsement from women's and other organizations.

Circulate Crusade petitions, to add names to the "Committee of One Million."

Send in their own ideas to publicize and advance the Crusade objectives.

WHAT IS WOMAN-POWER?

Why will the Crusade plan work? Well, frankly, there are more women than anybody else.

Women have more votes more money and sufficiently persuasive voices to dent the toughest tribunal-when they care to use

With the force and strength of a million women behind them, the conclusions reached in the Crusade will not be ignored.

Women's views, voices and actions in behalf of ALL America can affect decisively the road America travels. And the Women's Crusade plans just that!

MESSAGE TO WOMEN

Whether business woman, homemaker or both whether Democrat, Republican or Independent-if you believe thoughtful women should have a chance to show what women can do for our country's and our children's future, please help establish the crusade di-rective from women themselves. Please mark and send in the Woman-Power Poll today! WOMEN'S CRUSADE FOR A COMMON SENSE ECON-

OMY-NATIONAL ORGANIZING COMMITTEE

Mrs. Mary G. Roebling, Chairman, The National State Bank, Trenton, New Jersey.

Mrs. Clara Shirpser, Former Democratic National Committeewoman, San Francisco, California.

Mrs. Leone Baxter Whitaker, President, Whitaker & Baxter International, San Francisco, California.

Women's Crusade for a Common Sense Economy, P.O. Box 38360, San Francisco, California 94120.

IS HOPE A CRIME?

HON. GEORGE M. O'BRIEN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 5, 1977

Mr. O'BRIEN. Mr. Speaker, the issue of Laetrile is a controversial one, unfortunately, because of the ban imposed by the Food and Drug Administration against interstate transportation of that substance. The subject is discussed in a thoughtful editorial, "Is Hope a Crime," appearing in the April issue of the Medical Tribune, which I recommend to my colleagues for their consideration. The editorial follows:

In 1975, a U.S. District Court in Oklahoma ruled for a plaintiff against the FDA holding that Laetrile was harmless and was "not necessarily void of effectiveness." The court's finding went on to say that this may be limited to the hope that the patient may derive some benefit from it "but if the drug relieves his mind of pain, then it is effective.

Judge Luther Bohanon, of the U.S. District Court in Oklahoma City, recently ordered the FDA to come up with proof that Laetrile should be subject to their regulations, commenting that regardless of the controversial nature of the substance, "depriving a terminally ill cancer patient of a substance he finds therapeutic, whether such benefit is physical or psychological, creates a very real risk that irreparable injury might be sustained." It is to be regretted that once again our courts have to "lecture" our health agency on what should be fundamental humanity.

On Dec. 24, 1975, MEDICAL TRIBUNE noted editorially, "Considering the multifaceted character of malignancies, it would be rash "Considering the multifaceted to conclude that no single individual may benefit either from a biochemical or psychic mechanism of a drug in which a patient deeply believes." In the same editorial we noted that "No government agency prohibits people from exposing themselves to known, proven carcinogens. On the contrary, the U.S. government not only does not restrict the sale of such carcinogens as cigarettes but actually subsidizes the growth of tobacco."

CRIMINALIZED PATIENTS

A recent report, most sensitively written by Bill Richards of the Washington Post (Feb. 14, 1977), described some of the patients who are being turned into criminals by the FDA's regulations!

Pray," said the elderly woman as she tucked several vials of the banned supposed anti-cancer drug Laetrile into her handbag for an illegal trip across the border. "Pray that God will stay with us until we get across.

"The woman, a cancer patient whose doctor told her recently she has less than a year to live, climbed into a car with two other elderly women and headed back toward the U.S. Customs station at the California bor-der."

Bill Richard's report went on to point out that "Custom officials said they usually can spot those who have been to the Laetrile

'You can tell when a person is dying of cancer,' said the station's acting chief in-spector, John Young. He recalled that one man came through crying and carrying an emaciated little girl in his arms.

'We knew right away he was taking his daughter home from the clinic, but he said he didn't have any Laetrile with him,' Young said. 'If I decided he was smuggling, I guess I'd have to search him. But you use your own discretion sometimes.

"'Our job is to enforce the law, and the law says they can't bring Laetrile in,' said Young. 'We take it away, but we try to treat these people with all the dignity they de-serve. After all, it's not like we were dealing with heroin smugglers."

SOMETHING VERY WRONG

Right you are, John Young, and we can thank heavens we have John Youngs in America. But there is something wrong when we convert cancer victims into cancer criminals.

There is something very wrong when dying patients have to seek hope in other coun-

There is something wrong when our laws making a drug claimed to have anti-cancer effects "the second biggest smuggling prob-lem after narcotics," and when an FDA spokesman acknowledges that Laetrile "has a higher make-up than heroin." There is something wrong when an FDA

regulation crates a new criminal drug market in which cancer sufferers are victimized. U.S. government regulations against Laetrile are based upon the fact that its efficacy has not been demonstrated in controlled studies. The American Cancer Society and others have called Laetrile "a criminal hoax." On the other hand, there are now thousands of Americans organized into 400 chapters of a committee for Freedom of Choice in Cancer Therapy who believe to the contrary. There are apparently thousands of cancer victims who, knowing clearly the decision of the Food and Drug Administration, believe they have the right to get Laetrile or any other substance to treat their malignancy.

We do not know whether there are or are not individuals who may have benefitted from Laetrile. The claim that Laetrile is a delusion and a dangerous one should be examined in the light of other illusions: that cigarette smoking is a machismo gesture—we do not prohibit cigarettes; that offering an alcoholics beverage (sometimes even to alcoholics) is a gesture of true hospitality—we do not prohibit alcohol; that cosmetic preparations can restore the bloom of youth—we do not prohibit either their sale or advertising; that prepared foods will confer familial happiness—we do not censor those messages.

All the above are illusions and all have potential for harm. They are certainly not comparable to the crying need for even the illusion of hope in a patient dying of can-

ONEROUS LAWS

Virtually a day does not pass when we do not see some of the dangerous side effects and inconsistencies, too often heart-rending ones, of our present Food and Drug Laws our FDA regulations and thoughtfulness efforts in their enforcement. It is high time that something be done. We have laws on our books that leading American scientists as well as cancer sufferers find onerous, unfair and painful. As Maurice B. Visscher succinctly put it in his letter to Science ten long years ago, "That was not the intent of Congress." If we can tolerate and encourage the sale of cigarettes with its watereddown, almost misleading warning, if we can tolerate the constant proliferation and sale of new alcoholic beverages without either warning or listing of content, then it would seem to us that the time has come to change the laws so that if individuals wish to take substances which are by far safer than these commonly abused agents, that they may do so with the clear warning on a label that "This substance has not been found to be effective by the FDA."

We repealed prohibition when a law made criminals out of scores of millions of Americans. There is more reason to repeal laws and regulations which make criminals out of cancer victims and convert hopes into crimes.

OPEN LETTER TO THE PRESIDENT

HON. GENE SNYDER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 5, 1977

Mr. SNYDER. Mr. Speaker, recently I received a copy of an open letter to President Carter, a letter written by Mr. Ed Wimmer, Jr., a constituent and longtime friend of mine. I would like to share it with you now for two reasons. First, I think the sentiments voiced by

Mr. Wimmer mirror the feelings of many Americans—a growing number of citizens concerned about the rights and independence of the "little man," the small business, and the individual in general.

Second, I would like this letter to serve as something of a memorial to the writer's father, the late Ed Wimmer, Sr., who for so many years served as a dedicated spokesman for the small businessman. There could not be a tribute any more fitting than the continuation of his life's work, through his son.

Mr. Wimmer's letter follows:

FORWARD AMERICA, INC., Covington, Ky., March 1, 1977.

Hon. James Earl Carter, President of the United States,

Washington, D.C.

My Dear Mr. President: This letter would have come to you from Ed Wimmer, as President and Founder (1932) of Forward America, Inc., had he not died suddenly a few days before you were elected to the Presidency. Had he lived, he would have reached out to you as a farmer, small businessman, an experienced scientist, and now our President; to let the people know you care about the plight of the Independent businessman.

For every Independent businessman and small farmer that goes under, so goes our American free enterprise system, and so will our form of government. We must protect the right of the Independent to survive. Their future will determine the destiny of America.

An all-out effort by a non-partisan President and Congress, working together with the American people, will return this country to the free enterprise, representative government concepts of Thomas Jefferson, as set forth in the Declaration of Independence. The Constitution, and the Bill of Rights. We cannot afford to compromise on this critical issue if we want to reopen the closing gates of opportunity. If we fail to meet this challenge now, Mr. President, the opportunity will not come again.

We must turn away from the dependence theory gripping the nation; turn away from the tides of monopoly-socialism. There are those who say it is too late. It is not too late, and we believe you can become the "Engineer" who can get us back on the right track. . . There were great men in our past who literally made a new country, a country dedicated to a strong middle class society. Our great Republic cries out for great statesmen who are not afraid of freedom's foes, for the man who pretends to be freedom's friend but fears freedom's foes, is, in my opinion, no man's friend.

It is the intent of Forward America, Inc., to continue to fight for Independence With Independents. There is no room in a Republic for monster business, monster labor or monster government.

The results of a recent survey in Sylvia Porter's column showed a cross-section of the nation's brightest teenagers believing in free enterprise but fearing big business and big government. We must reassure the American people that a total decentralization program will begin and once again restore faith, honesty, initiative and self-pride in our market place. . . The Bible offers the principles of life, the Constitution provides a way of life free of monopoly control. Our prayers are with you and the First Lady and this beloved Country. The opinions of our members will be sent you on a regular basis.

Very truly,
ED WIMMER, Jr., President.

TERRORISM: CHRISTIAN SCIENCE MONITOR OVERVIEW, PART II

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 5, 1977

Mr. McDONALD. Mr. Speaker, here is the second part of the excellent article on international terrorism by Christian Science Monitor correspondent David Anable. The article reviews training centers for terrorists maintained by the Soviet Union and its satellites and surrogates. The role of Libya's Colonel Qaddafi in financing a wide variety of leftist and nationalist terrorist groups is also reviewed. The Libyan dictator has been on increasing good terms with the Soviet Union particularly with the outbreak of the Lebanese civil war last year. Libya is particularly close to the Rejectionist Front faction of the Palestinian terrorist movement, and is reported to be supporting subversion against a number of more moderate Arab governments whose overthrow is desired by the Soviets

Libya's dealings with "Carlos," the Soviet trained Ilich Ramirez Sanchez, who was in contact with Cuban intelligence agents in Paris when his "cover" was first blown, is illustrative of the fact that the principal terrorist groups operate with the supportive resources of governments who are the enemies of western civilization. I commend the article to my colleagues:

[From the Christian Science Monitor, Mar. 15, 1977]

TERRORISM: HOW A HANDFUL OF RADICAL STATES KEEPS IT IN BUSINESS

(By David Anable)

A few miles along the coast from Libya's capital, Tripoli, a modest "hotel" looks out over the blue Mediterranean. It and other Libyan villas like it have seen a curious variety of nonpaying "guests."

Arch-terrorist Ilich Ramírez Sánchez, bet-

Arch-terrorist Ilich Ramirez Sanchez, better known as Carlos Martinez or just plain "Carlos," has stretched out there luxuriously with his Palestinian friends. He probably is there right now. The five members of the Japanese Red Army (JRA) who attacked the American Consulate in Kuala Lumpur, Malaysia, in 1975 later did their jerky calisthenics on one of the villa's roofs—together with five JRA colleagues they had forced the Japanese Government to release.

West German anarchist Hans Joachim Klein, after treatment in a Libyan hospital for wounds received in December, 1975, during the Carlos-led kidnapping of the OPEC (Organization of Petroleum Exporting Countries) oil ministers from Vienna, convalesced along the same sunny coastline. Wilfred Base, another of Carlos's associates, knew it well before he was killed by Israeli commandos rescuing hostages he had helped hijack to Uganda.

The Abu Ali Iyad training camp spreads over several square miles of central Iraq. Equipped with its own small arms factory, the camp is filled with Palestinians and others puffing and panting through various stages of guerrilla and terrorist training under the expert guidance of al-Fatah defector Abu Nidal.

During the past six months terrorists have

fanned out from there to attack targets in more moderate Arab states such as Jordan and Syria. They call their Iraqi-backed group "Black June"—in memory of Syria's massive thrust into Lebanon during that month last year.

Libya, Iraq, and a handful of other radical states fuel the flames of terrorism. They are the sanctuaries and supply bases, the training grounds and arsenals, the bankers and morale boosters of the terrorist cause. Without them the task of transnational terrorists such as Carlos would be far more difficult and dangerous.

SOVIETS IN BACKGROUND

But by far the largest of the world's "subversive centers," says Brian Crosier, director of the London-based Institute for the Study of Conflict, is the Soviet Union. The Russians, however, prefer to keep well in the background. They have no desire to have their carefully cultivated image of respectability tarnished by an association with terrorism. They are well aware, too, that they have a huge potential problem of their own with dissident nationalists.

In Mr. Crosier's analysis, outlined before the now-defunct Senate subcommittee on international security, there are two streams

of Soviet subversion.

The first is through the training and indoctrination of orthodox Communists from around the world. They are processed, says Mr. Crosier, through the Lenin Institute in Moscow, where they are given, among other things, courses in guerrilla warfare, sabotage,

explosives, and sharpshooting.

The second stream draws on national liberationists from the developing world. These are processed through the Patrice Lumumba Friendhip University in Moscow, where students from around the globe are enrolled in a wide variety of straightforward academic studies. But the tall monolith of a building is also the recruiting ground for potential guerrillas and terrorists who are extracted and trained in Tashkent and other parts of the Soviet Union.

For instance, in 1975 Dutch police arrested four armed Syrians shortly before they could attempt to carry out their plan to kidnap Russian Jews aboard a train traveling from Moscow through the Netherlands. Under questioning the four, thought to have been Lumumba University students, admitted they had been trained in weaponry, explosives, and propaganda at a small town near

Moscow.

Carlos himself, son of a wealthy, life-long Venezuelan Communist, attended Patrice Lumumba. His later expulsion from the university in 1970 is assumed by many Western officials to have been merely a cover for his subsequent activities. Carlos's background and the connection of the Soviet Secret service, the KGB, with terrorism are detailed in a new book by Colin Smith entitled "Carlos, Portrait of a Terrorist" (Holt, Rinehart & Winston).

EAST GERMAN CAMP

As a rule of thumb, Western security services assume that the KGB works through and controls the secret services of most of its

East European allies.

It is inconceivable, for instance, that the KGB would know nothing of Bulgaria's role in training guerrillas and terrorists of the Turkish People's Liberation Army, not to mention the dispatching of arms to them across the Black Sea. The East Germans run a sabotage training camp near Finsterwalde and are reported to have aided West German anarchists and other terrorists with funds and documents.

Again, it is difficult to believe that the KGB was unaware of the arms deal between the provisional Irish Republican Army (IRA), an American arms dealer, and the big Czech manufacturer Omnipol. This was uncovered in 1971 when four tons of weapons were seized by the Dutch police at Schipol Airport.

It is equally hard to believe that the Czechs, and hence the KGB, were altogether ignorant of the plans of the two Palestinians who in 1973 boarded a train in Czechoslovakia, kidnapped Russian Jewish émigrés aboard on arrival in Austria, and thereby succeeded in forcing the Austrian Government to close the emigration center for Russian Jews at Schonau Castle.

The KGB also is considered in the West to have been in complete control of Cuba's secret service, the Dirección General de Inteligencia or DGI, since the late 1960s. After Carlos narrowly and violently escaped arrest by French security agents in 1975, killing two of them and an informer, the French promptly expelled three Cuban diplomats. The three were accused of being members of the Cuban DGI. Top French officials dropped heavy hints about the well-known KGB-DGI connection.

Meanwhile, the number of radical countries ready to risk their own images by opening their doors to international terrorists has been declining. Algeria, for example, has pulled back noticeably in recent years.

RADICAL NATIONS

Left in the terrorist business are a hard core of radical states, nearly all of which have close ties with Moscow. Among them: North Korea, Cuba, Iraq, Somalia, South Yemen, and Libya. (Following Egyptian President Anwar al-Sadat's ouster of his country's Soviet advisers, Libya's anti-Arab-establishment Col. Muammur al-Qaddafi has gone out of his way to woo the Russians in spite of his personal anti-communism. Libya has become a huge arsenal of Soviet weaponry, from tanks and missiles to jet fighters and even warships.)

North Korea has long been a meeting place and training center for thousands of guerrillas, liberationists, and terrorists from Japan, the Middle East, and Europe. Some of its diplomats overseas, besides engaging in narcotics smuggling (for which they have been expelled from Scandinavia and elsewhere), are thought to have helped coordinate the activities of terrorists in Europe through an agent in East Germany.

Cuba has been a well-worn guerrilla-terrorist training ground for years. Carlos is among those who gained proficiency with guns and sabotage through Cuban courses. About 300 Palestinians even now are reported to be training there.

And Cuban instructors have long been active in the Mideast camps of the Popular Front for the Liberation of Palestine (PFLP), an extreme group which rejects compromise with Israel. Carlos is associated with this group.

South Yemen once was a favorite base of Waddieh Haddad, the PFLP's operations chief and Carlos's immediate boss. The Japanese Red Army raiders both of the Shell Oil refinery in Singapore and of the Japanese Embassy in Kuwait together sought refuge in South Yemen's sprawling port of Aden. So did the five members of the Baader-Meinhof gang, including weapons specialist Rolf Pohle, freed by West Germany in exchange for the life of kidnapped West Berlin politician Peter Lorenz. The PFLP's South Yemen training camp numbers among its many graduates the Japanese Red Army membèrs who seized the French Embassy in The Hague in 1974.

African countries such as Somalia and Uganda also play a role. Somalia where roughly 1,500 Cubans reportedly act as military advisers in this hitherto heavily Sovietinfluenced country, was Waddieh Haddad's base during the PFLP's spectacular hijacking of Air France flight 139 to Entebbe, Uganda, in June-July 1976.

HIJACKERS WELCOME

In Uganda, several hundred Palestinians reportedly fly that country's Russian MIG tets and act as bodyguards for President Idi Amin. As for Field Marshal Amin, he wel-

comed personally the hijackers of the Air France jumbo jet and allowed the hijackers to be reinforced by a local contingent of Palestinians plus Carlos's Ecuadorian pal Antonio Dages Bouvier. And it was apparently Uganda that supplied three Palestinian terrorists with heat-seeking SA-7, or Strela, missiles with which to attack an El Al airliner landing at neighboring Kenya's Nairobi airport last year; the men were arrested before they could fire.

Libya, however, with its huge oil revenues and its massive stockpiles of Soviet weaponry, remains the traditional haven, armorer, and bank-roller of the international terrorists. Over the years Colonel Qaddaf's Muslim and nationalist fanaticism has prompted him to aid a multitude of dissident and rebel groups. Among those profiting are groups in Eritrea, Syria, Somalia, South Yemin, Chad, Morocco, Tunisia, Thailand, the Philippines, Panama, Sardinia, and Corsica.

Libyan aid to the "Black September" organization, which carried out the Munich massacre of Israeli athletes at the 1972 Olympic games, is reported by Western sources to have totaled many millions of dollars. And some intelligence sources claim that Carlos was rewarded with between \$1 million and \$2 million by Colonel Qaddafi for kidnapping the OPEC ministers. The wounded Hans Joachim Klein is said to have reaped a further \$100,000.

Libya's backing for the provisional IRA came dramatically to light in 1973 with the Irish Navy's capture of the Cypriot coaster Claudia. The ship's holds were stuffed with arms obtained from the Libyans through a West German arms smuggler by Joe Cahill, Belfast boss of the "provos." Cahill, who was arrested on board, is the man to whom the New York-based Irish Northern Aid Committee has dispatched hundreds of thousands of dollars raised in the United States. INAC is being sued by the U.S. Government for violations of the Foreign Agents Registration Act.

Libya is considered almost certainly the source of Soviet rocket-launchers that the IRA provos have used against police and military outposts in North Ireland. It was the source, too, for the pair of Strela missiles found, fortunately before they could be used against air traffic, in the possession of Palestinians arrested in 1973 near Rome Airport. Three of the terrorists were later flown back to a warm reception in Tripoli.

One of the most dedicated "rejectionists" (rejecting compromise with Israel), Libya has used terrorism both to undermine more moderate Arab governments and to try to

wreck peace moves.

It was a Libyan-sponsored group that killed 32 people in a bloody attack on Rome Airport in December, 1973. Members of the group questioned later in Kuwait said that the original aim had been to disrupt Arab-Israeli peace talks due to start that month by assassinating U.S. Secretary of State Henry A. Kissinger on his arrival in Beirut. When this was thwarted, the terrorists, supplied with weapons shipped through a Libyan diplomatic pouch and acting on the orders of a Libyan diplomat, switched their assault to Rome.

A more bizarre affair concerned Colonel Qaddafi's reported order in 1973 (when Libya and Egypt theoretically were federated) to an Egyptian submarine commander to torpedo Britain's liner Queen Elizabeth II as it cruised toward Israel filled with Jews celebrating Israel's 25th anniversary. Egyptian President Sadat is said to have promptly countermanded that order.

Although Libya remains perhaps the most overt sanctuary for terrorists, there are signs that Colonel Qaddafi is becoming concerned about his image. Recently he persuaded Chad's rebels (whom he has supported) to let long-captive anthropologist Francoise Claus-

tre and her husband return to France, and he has been trying to mediate in the Philippines' Muslim insurrection (which he had earlier backed).

BACK-DOOR WARFARE

Meanwhile, Iraq (another vigorous "rejectionist") has taken a more active role on the terrorist scene. "Black June" terrorists operating out of Iraq appear to be responsible for a string of recent incidents: the attempted assassination of Syrian Foreign Minister Abdel Khaddam last December in Damascus; the attack on Amman's Intercontinental Hotel a month earlier; assaults on Syrian embassies in Rome and Islamabad in October; and the attack on Damascus' Semiramis Hotel in September.

It appears that Iraq is using "Black June" terrorists for a form of surrogate, back-door warfare against more moderate Arab states. The "Black September" organization started in much the same way, initially concentrating its fury against Jordan, which had routed the Palestinian guerrillas in September, 1970, and later broadening its scope internationally, with Libyan support. At the same time, Iraq now seems to have become one of the main bases for the extreme PFLP and its terrorist master-planner Waddieh Haddad as well as for Palestinian "rejectionists" fleeing Syrian-controlled Lebanon.

A curious sidelight in Iraq's role emerged in New York a couple of months ago. Agents of the U.S. Treasury's Alcohol, Tobacco, and Firearms (ATF) division discovered the purchase through a Greek middleman of 200 fully automatic submachine guns by the Iraqi mission to the United Nations. These "Mac-10s" are small, compact, 45-caliber weapons described by weapons experts as "ideal for terrorists."

When discovered, half of the order had been delivered to the Iraqi mission. But only 70 of the 100 weapons were handed over to ATF agents last Dec. 11. Some informed sources suspect that the 30 missing Mac-10s had been smuggled out of the country in the Iraqi diplomatic pouch. Since then, Iraqi mission diplomat Alaeddin M. al-Tayyar quietly has been declared unwelcome and recalled home.

Perhaps as the world settles into some new and more stable post-colonial, post-cold-war framework, the bitter rage of would-be terrorists will ebb. Meanwhile, the effort to strengthen national defenses, to build more effective international agreements, and to shift world public opinion against terrorism faces formidable obstacles—not least the overt more subtle opposition of a handful of states.

A CHRONOLOGY 1970

September—Mideast: Popular Front for the Liberation of Palestine (PFLP) tries to hijack five airliners in one week: An attempt on El Al is foiled; Pan Am plane is flown to Cairo and blown up; Swissair, TWA, BOAC jets hijacked to Dawson's Field, Jordan, and

September—Jordan: Army crushes Palestinian guerrillas.

1972

May—Three members of Japanese Red Army (JRA) kill 25 at Lod Airport.

September—Munich: 11 Israeli athletes are killed when Black September Organization (BSO) attacks Olympic quarters. Weapons allegedly brought in by Libyan diplomatic pouch.

October—Munich: Lufthansa airliner hijacked, forcing release of three BSO survivors of Olympic attack; terrorists all flown to Libva.

1973

March—Khartoum: BSO seizes Saudi Embassy, executes a Belgian and two U.S. diplomats. Terrorists later reported moved to Libya.

July—Amsterdam: JRA and four Palestinians hijack Japan Air Lines 747 to Libya, where it is blown up.

August—Athens: Two Arabs attack passengers, killing three, wounding 55.

September—Rome: Police arrest five Palestinians with Libyan-supplied SA-7 missiles near airport; three are later flown to Libya. September—Austria: Two Palestinians kid-

September—Austria: Two Palestinians kidnap three Russian Jews, forcing Austrians to close Schonau Transit Camp; the Palestinians are later flown to Libya.

October-Mideast: Arab-Israeli war.

December—Rome: Libyan-sponsored group attacks U.S. and German planes, killing 32 people.

December—London: PFLP (probably Carlos) nearly kills Joseph E. Sieff, leading British Zionist.

1974

January—Singapore: Two Japanese plus two PFLP attack Shell refinery, seize hostages.

February—Kuwait: Five PFLP storm Japanese Embassy, seize hostages; Singapore and Kuwait terrorists flown to South Yemen.

July-Paris: JRA courier arrested with forged documents.

September—The Hague: Three JRA (with PFLP aid) seize French Embassy; all three, plus courier, flown to Syria.

September—Paris: PFLP (probably Carlos) kills two, wounds 34, with hand grenade outside Le Drugstore.

1975

January—Paris: PFLP carries out two attacks on aircraft at Orly Airport; first group escapes, second seizes hostages and is flown to Iraq.

February—West Berlin: Politician Peter Lorenz is kidnapped; five West German terrorists flown to South Yemen in exchange for his release.

April—Stockholm: Six West Germans attack their embassy, which is blown up when demands denied.

June—Paris: Carlos escapes French agents, killing two, three Cuban diplomats expelled.

August—Kuala Lumpur: Five JRA trained in PFLP camps in Lebanon attack U.S. Consulate, force Japan to release five other JRA; all 10 flown to Libya.

September—The Netherlands: Four Syrians planning to kidnap Russian Jews are arrested; they had trained in Soviet Union. December—Vienna: Carlos, PFLP gang kid-

nap OPEC ministers and end up in Libya.

January—Nairobi: Three PFLP arrested with SA-7 missiles apparently from Libya via Uganda.

June—Lebanon: Major Syrian interven-

June—Entebbe: Air Force jumbo jet hijacked to Uganda by PFLP group; refuels in Libya; July 4 Israelis rescue hostages, killing seven terrorists.

August—Istanbul: Two PFLP trained in Libya attack airport lounge, four are killed, including aide to Senator Javits.

September—Belgrade: Carlos visits Yugoslavia en route to Iraq and back to Libya.

September—Damascus: Semiramis Hotel attacked by "Black June" group trained in and backed by Iraq.

October—Rome and Islamabad: Syrian embassies attacked by Iraqi-backed "Black June."

November—Amman: Intercontinental Hotel atacked by "Black June."

December—Damascus: Attempted assassination of Syrian Foreign Minister by "Black June."

1977

January—Paris: Abu Daoud, accused of planning 1972 Munich Olympic massacre, arrested, then allowed to fly to Algeria.

INTRODUCTION OF COMPREHENSIVE IMMIGRATION LEGISLATION

HON. EDWARD R. ROYBAL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 5, 1977

Mr. ROYBAL. Mr. Speaker, I have today introduced a comprehensive immigration bill that is designed to eliminate many of the existing inequities in the Immigration and Nationality Act.

The bill represents an expression of my longstanding and deep concern over the problems and inequities that have arisen and been exacerbated through our piecemeal amendment to what is admittedly a complex area of law. My bill seeks to deal with the problems by solutions that recognize the competing real world interests such as family ties and community relationships, and yet at the same time, the bill seeks to prevent these problems from arising again.

Specifically, my bill provides that most undocumented aliens in the country before January 1, 1977, will be able to adjust their status to become permanent residents by making an application for adjustment within 1 year of the passage of the bill. The only people who will not be entitled to take advantage of this procedure are certain specified groups presently excludable under the Immigration and Nationality Act.

An undocumented alien who makes application for an adjustment of his status will be granted written authorization by the Attorney General to accept or continue employment while his application is pending. Any adjustment of status made pursuant to this one-time program will not have an effect on the numerical limitations contained within the Immi-

gration and Nationality Act.

In order to insure that the problem of the undocumented alien does not recur, my bill provides that every applicant for a social security card would have to sign an affidavit swearing that he is a citizen, lawful permanent resident, permanent resident under color of law, or authorized to work in this country. A false statement in the affidavit would subject the signer to a possible fine and/or jail sentence.

To insure that undocumented aliens do not get social security cards, the thumbprint of every applicant would be kept in an index. Before a social security card is issued, the applicant's thumbprint would be checked to determine if he had previously been excluded from the country as an illegal alien.

Only persons and organizations expressly authorized by law, such as the Internal Revenue Service, could request a social security number from an individual.

My bill also makes four changes that will bring equity and fairness to the the Immigration and Nationality Act. First, the bill would raise the immigration ceiling for the Western Hemisphere to 170,000, the same as is now enjoyed by the Eastern Hemisphere. At the same time, the bill would abolish the 20,000 per-country limitation now imposed on Western Hemisphere countries.

Second, my bill would allow a person applying to become a naturalized citizen to take the citizenship test in the language in which he is most fluent, rather than in English, as is now required.

Third, the bill provides that an individual who is serving in the Armed Forces or who has been honorably discharged from the service can become a naturalized citizen without having to meet the residency requirements or pass the examination on American history.

Fourth, my bill provides that an alien would have to be granted a hearing and be found deportable before being given the option of a voluntary departure. This will insure that aliens legally in the country are not deported. If an undocumented alien worked in this country, the Attorney General has the responsibility to collect any wages due the alien, pay any outstanding Federal, State, or local income taxes and FICA taxes, and then give the alien any money remaining.

Finally, my bill provides for the establishment of a 4-year Presidential Commission on United States-Mexico Immigration Policy. This commission will conduct studies, develop recommendations, and report to Congress concerning immigration between the United States and Mexico and its effects on domestic and international features.

international affairs.

Mr. Speaker, there has not been an overall reappraisal of our immigration policy in the past decade. During that time, numerous inequities and ambiguities have crept into the law. The passage of my bill would correct the most serious of these inequities and at the same time insure that similar problems do not recur.

Following is a section-by-section anal-

ysis of my bill:

SECTION-BY-SECTION ANALYSIS, ROYBAL COMPREHENSIVE IMMIGRATION BILL

TITLE I

Title I provides that undocumented aliens in the country before January 1, 1977 would be eligible to become permanent resdents if application for adjustment of status is made within one year of the enactment of the bill.

The bill would continue to exclude from amnesty certain groups of individuals: for example, those convicted of certain crimes, such as illicit possession or sale of hard drugs; persons who have advocated a form of politics which would seek to overthrow our form of government or all forms of law; persons with certain mental disabilities; prostitutes; and polygamists.

These people are now excluded from admission to the United States by specific provisions of the Immigration and Nationality Act. However, there are some other categories of people who will be able to qualify for amnesty, even though they are currently excludable from admission. These include persons who would normally need labor certification; persons who might become public charges; and persons who have previously sought to enter, or have entered the United States by seeming fraud or without appropriate documents.

Title I further provides that an undocumented alien who makes application for an adjustment of his status will be granted written authorization by the Attorney General to accept or continue employment pending a decision on his application.

Finally, the title provides that an adjustment of status will not have an effect on any numerical limitation in the Immigration and Nationality Act.

TITLE II

Title II of the bill provides for the equalization of hemispheric immigration quotas by increasing the Western Hemisphere ceiling to 170,000 from its current 120,000. Another provision in the bill would abolish the 20,000 per-country limitation imposed upon Western Hemisphere countries.

TITLE III

Title III provides that a person applying to become a naturalized citizen would be allowed to take the citizenship test in the language in which he or she is most fluent. The present law provides that the test must be taken in English.

TITLE IV

Title IV provides that an alien would have to be granted a hearing and found deportable before being given the option of a voluntary departure.

Under current law, when an undocumented alien is arrested, he may opt to depart voluntarily rather than having a hearing and being deported. However, there are many individuals who are not aware of their rights, and who, therefore, depart voluntarily when, in fact, they are not even deportable. By requiring hearings for these individuals, this

bill would ensure due process.

If the undocumented alien has worked in this country, the Attorney General is charged with the responsibility of collecting and paying any wages due the alien. However, the Attorney General must pay any Federal, State or local income taxes or FICA taxes owed by the alien from the proceeds before turning the remainder over to the alien.

TITLE V

Title V provides that an individual who has served in the United States armed forces, and who, if now separated from the service, has been honorably discharged, can become a naturalized citizen without having either to meet the residency requirements or to pass the examination on American history.

TITLE VI

Title VI provides that each applicant for a Social Security card would have to sign an affidavit swearing to his citizenship, lawful permanent resident, permanent residence under color of law, or authorization to work.

If the applicant knowingly makes a false statement in his affidavit, he will be subject to a maximum fine of \$2,000 or 5 years in iall or both.

Also, the thumbprint of each applicant for a Social Security card will be taken. This thumbprint is to be checked against others kept in an index to ensure that a person has not previously been excluded from the country as an undocumented alien. This is to ensure that a person who is excluded cannot get back into the United States.

Further, the bill provides that Social Security numbers can only be requested by those individuals and organizations that have express legal authority to do so. This provision will allow government agencies such as IRS and employers to use the number, but will not allow it to be used generally as an identifier.

Finally, Title VI specifies that these social security provisions will only apply to people requesting Social Security numbers after the date of enactment of the bill.

TITLE VII

Title VII provides for the establishment of a 4-year Presidential Commission on United States-Mexico Immigration Policy, whose purpose will be to conduct studies, develop recommendations, and report to Congress concerning immigration between the United States and Mexico and its effects on domestic and international affairs.

On the United States side, the Commission

members would include cabinet-level officials and distinguished citizens from the community who are involved in the fields of immigration, labor, business, education, health and international relations.

The Chairman of the Commission would be empowered to invite appropriate officials of the Mexican government to participate in the meetings and hearings. These representatives would be appointed to the Commission by the President of Mexico.

Specific concerns to be addressed by the

Commission would include:

 prevailing and projected demographic, technological, and economic trends affecting immigration between the United States and Mexico;

(2) the interrelationships between United States-Mexico immigration and existing and contemplated government programs in the United States:

(3) the effects of United States immigration and trade policies and practices on re-

lations with Mexico;

(4) the effectiveness of the operation of the immigration laws of the United States, with emphasis on the adequacy of such laws from the standpoint of fairness to aliens seeking admission into the United States and from the standpoint of the impact of such laws on social and economic conditions in this country; and

(5) present and projected unemployment in the United States, by occupations, industries, and geographic areas and how it is

affected by immigration.

PROTECTING THE CONSUMER AGAINST FALSE MAIL-ORDER REPRESENTATIONS

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 5, 1977

Mr. GILMAN. Mr. Speaker, today I am introducing legislation imposing civil penalties upon persons who fall to comply with orders of the U.S. Postal Service prohibiting the use of the mails to conduct lotteries or to obtain money or property through false representations.

The intent of this legislation is to protect unsuspecting, unknown consumers from unscrupulous promoters of products and services who engage in misrepresentation and the fraudulent use of the mails.

Under the false representation section of Public Law 91-375 (39 U.S.C. 3005), the Postal Service, upon satisfactory evidence that an individual is engaged in a scheme to obtain money or property through the mail by means of false representations, may issue a mail-stop order directing the postmaster of the promoter's post office to return the mail, appropriately marked as a violation of the statute, to the unsuspecting sender. The returned mail usually contains the sender's remittance. Before a mail-stop order is issued, the promoter is afforded an opportunity to discontinue the advertisements containing the alleged misrepresentations, and if a complaint is issued against the promoter, to appear with an attorney in accordance with the Administrative Procedure Act (5 U.S.C. 551) and the rules governing false representation (39 CFR 952) before an administrative law judge to challenge the complaint. If the mail-stop order is issued, the promoter may seek relief in an appropriate Federal district court.

In an effort to protect the consumer from misrepresentation by unscrupulous promoters, my proposal extends section 3005 by providing that if the promoter fails to comply with a Postal Service order and continues to engage in proscribed conduct or fails to maintain certain records, then the violator would be subject to a civil penalty of not more than \$10,000 for each violation. In the event the Postal Service determines that its orders are subject to a civil penalty, the Service would be authorized to notify the Attorney General of the United States who would be authorized to bring an action in an appropriate Federal district court for the imposition of a civil penalty. The Service could also order the unscrupulous promoter to: First, provide the victimized consumer with a statement summarizing the findings of fact contained in the postal order, and second. offer to return the money or property to the consumer upon written request within 30 days after receipt of the statement.

The promoter could also be ordered to return the money or property to the consumer within 21 days after receipt of a timely request. The violator of this proposal could be directed by the Postal Service to provide the Service with a list of names and addresses of victimized consumers, including those who have requested the return of their money or property, and for whom the money or property has been returned.

Mr. Speaker, this measure is not a mail fraud statute with criminal sanctions; that would require proof beyond a reasonable doubt, that the promoter intended to defraud the consumer. Rather. this proposal is a civil statute directed against those who use the mails to obtain money or property through false representations of their goods or services. Proof of scienter or intent to defraud is not a prerequisite to the issuance of a mail-stop order. Lynch v. Blout, 330 F Supp. 689 (D.C.N.Y., 1970), affirmed, 404 U.S. 1007 (1972). In order to obtain an administrative determination that false representations in the advertisement exist, the Postal Service must, however, obtain satisfactory evidence to warrant the issuance of the mail-stop order, and that order is subject to a review by the courts. Speaking for a three-judge court in Lynch, Judge Medina stated that the courts will not uphold mail-stop orders 'whenever a person has restored to a little exaggeration or mere puffing. The false statement must be material and it must be substanital to warrant the imposition of this drastic remedy," (330 F. Supp. at 693).

Mr. Speaker, in testimony on my bill, H.R. 10463, the Consumer Fraud Act before the Subcommittee on Consumer Protection and Finance. I pointed out that "economic crimes require stiff economic penalties.' Similarly, if the consumer is to be protected from unscrupulous con-artists who use the mails to misrepresent their goods and services, then we should provide the Postal Service with the tools to insure that their

administrative orders will not be disregarded, and that those who continue to violate the false representations section should be subject to civil penalties.

This measure is intended to arrest the deceptive work-at-home-in-your-spare-time and other get-rich-quick schemes, the false health claims and the weight reduction schemes, the phoney invention evaluators and the chain letter writers. This proposal sharpens the tools of the Postal Service in their war against the unscrupulous promoters who prey on the miseries and fantasies of unsuspecting consumers for whom the doctrine of caveat emptor—let the buyer beware—is an insufficient shield against those who use the mails to misrepresent their advertised goods or services.

Mr. Speaker, at this point in the Record I include the provisions of this bill in full and in the interest of protecting consumers against false mail order representations, I urge my colleagues to support this legislation:

HR. 6073

A bill to amend title 39, United States Code, to impose civil penalties against persons who fail to comply with orders of the United States Postal Service prohibiting the use of the mails to conduct lotteries or to obtain money or property through false representations, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 3005 of title 39, United States Code, is amended by redesignating subsection (d) as subsection (f) and by inserting immediately after subsection (c) the following new subsections:

"(d)(1) Any person who fails to comply with any order of the Postal Service under subsection (a) of this section, and any person who continues to engage in conduct or who resumes engaging in conduct which the Postal Service has determined to be subject to subsection (a) of this section, shall be subject to a civil penalty of not more than \$10,000 for such violation.

"(2) Any person who falls to maintain such records as may be necessary to comply with the requirements of this section for a period of 18 months after the last date upon which such person receives any money or property as a result of any conduct subject to subsection (a) of this section shall be subject to a civil penalty of not more than \$10,000 for each violation.

"(e) (1) Whenever the Postal Service determines that any person is subject to a civil penalty under subsection (d) of this section, the Postal Service shall notify the Attorney General of the United States and certify any relevant facts to the Attorney General. Upon receiving any such notice and certification, the Attorney General shall bring an action in an appropriate United States district court for the imposition of such civil penalty.

"(2) Any determination made by the Postal Service under paragraph (1) of this section, or any action brought by the Attorney General under paragraph (1) of this subsection, shall not bar the Postal Service from issuing additional orders against the person involved in order to carry out the provisions of this section."

SEC. 2. Section 3005(a) of title 39, United States Code, is amended—

 in paragraph (2) thereof, by striking out the period at the end thereof and inserting in lieu thereof a semicolon; and

(2) by adding at the end thereof the following new paragraphs:

"(3) contains a summary of the findings of fact upon which the order is based and directs the person to provide to each person from whom money or property was received as a result of conduct subject to this subsection, not later than 30 days after the issuance of such order, a written statement which contains (A) a copy of the summary of the findings of fact contained in such order; and (B) an offer to return such money or property upon written request made no later than 30 days after the receipt of such statement:

"(4) directs the person to return money or property which is the subject of any timely request made under paragraph (3) of this subsection no later than 21 days after the

receipt of such request;

"(5) directs the person to provide to the Postal Service, upon request, a list of the names and addresses of all persons from whom money or property was received as a result of conduct subject to this subsection;

"(6) directs the person to provide to the Postal Service, upon request, a list of the names and addresses of persons who have made timely requests for the return of money or property under paragraph (3) of this subsection, and a statement which indicates the persons to whom money or property has been returned in accordance with paragraph (4) of this subsection."

PROF. C. LOWELL HARRISS ON THE NEED FOR TAX REFORM AND CAPITAL FORMATION IN THE IN-TEREST OF AMERICAN FREEDOM AND PROSPERITY

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 5, 1977

Mr. KEMP. Mr. Speaker, Prof. C. Lowell Harriss of Columbia University is one of America's most distinguished economists. Recently he wrote an article for the Journal of the Institute for Socioeconomic Studies which discusses the reasons why America faces a serious capital investment shortage, what this means in terms of freedom, economic growth, and prosperity, and what policies are necessary to assure that an adequate amount of capital will be produced to create new jobs and increase productivity:

TAX REFORM, CAPITAL, AND HUMAN PROGRESS

"No, Lord Keynes. In the long run, we are not all dead."

Keynes' quip about the inevitability of death has often been cited as a rationalization for a short-short-run focus in public policy and neglect of the future. Yet, in the most humanly meaningful sense, life goes on. Our history testifies to human desire to look beyond individual mortality. Many of us try to make for a better life in the years remaining to us and for our children and grandchildren.

Capital accumulation offers a means of improving the way we work and live. By going without something in the near future, we can raise the level of living permanently. A family saving \$1,000 and investing it at 6 percent adds \$5 a month to its income. If the \$1,000 finances an addition to business facilities which produce, say, 10 percent net after allowing for maintenance and replacement, the economy will have \$100 a year more of goods and services year after year.

"Tax reform," if the concept is to embrace progress for the millions—if "reform" is to mean improvement on a broad scale—should

AT ISSUE: "CAPITAL SHORTAGES"

(1) reduce impediments to achieving what for many is a deeply felt desire, building their own captal and (2) also lessen the obstacles to building the production facilities which make higher living standards possible.

Congress has built anti-capital elements into the tax system. In part this stems from the delusion that capital and labor are rivals. In fact, they support each other. All of us who work need productive tools (often now \$30,000 to \$40,000 worth per person) to realize the potential of our abilities and to justify the pay we expect.

CAPITAL AS A "HUMAN THING"

Tax revision can benefit from recognizing that capital (or, if you will, property) is a part of our life as human beings. Moreover, the capital which bears directly on personal life involves more than the human capital deriving from education and training. Beyond this, the quality of life depends upon the tangible, physical capital serving us, directly and indirectly.

Discussions of capital "needs" and "shortages" use numbers which involve unfathomable magnitudes. A study by the New York Stock Exchange estimates that from 1974 to 1985 the economy will need \$4,700 billion. Available "savings", however, will only total around \$4,000 billion. A weekly shortfall of more than \$1 billion is predicted. The figures may seem remote and beyond comprehension, but they involve the way men and women and children will actually be living. More, as against fewer, billions of dollars are needed to add to productive capacity (housing included).

Those opposing tax reforms which would relax burdens on capital sometimes seem to think only big corporations are involved. Not only populist politicians and representatives of labor unions, but also some highly schooled participants in tax reform discussions are misled. They imply that the benefits of a higher tax credit for new machinery or a cut in the 48 percent corporate tax rate or recognition of inflation in computing depreciation deductions, would benefit only huge, impersonal entities—giant corporations.

In fact, if big companies-and small onesare to provide good jobs, capital must be available. How will a growing labor force find work at wage rates which are expected almost as a "right?" Assume that workers count on \$4 an hour (on the low side these days); the fringes which the employer must pay will add over rather than under \$1 an hour. For his or her output to be worth such pay, a worker must frequently have capital to work with equal to twice the annual wage expense—the figures vary considerably. With the full backup of capital, more than \$20,000 of invest-ment will typically be needed for a relatively new and unskilled worker getting \$8,000 a year and costing the employer \$10,000. The \$15,000 a year job, found increasingly over the economy, will probably require at least \$30,000 of capital, perhaps much more.

If earnings are to rise from time to time, more than the worker's improving skill must contribute; there must be additions of capital. Employers cannot afford to hire workers, or to keep them on the payroll, unless productivity justifies; and more and better capital facilities lie at the heart of rising productivity. Taxes that impede corporate capital formation strike at employment.

Gross investment—not only net additions, but also funds from depreciation of old capital used for replacement—when related to additions to the labor force (and adjusting for inflation) has been almost 30 percent less per worker since 1970 than in the 1950's. It is down about 18 percent from the 1960's. What is the consequence? Slower growth in productivity. In recent years (ignoring shortrun cyclical change), annual increases in worker productivity have been sadly below the 2.7 percent average of 1950 to 1970.

Severe strains in capital markets became evident by 1973. Interest rates over 12 percent testified to exceptional pressures in financial markets; bottlenecks and shortages in various industries indicated that productive capacity could not meet demand. Increasingly, the existing "capital shortage," plus prospects of shortages ahead, were cited as a reason for capital-conscious tax reform. Several studies attempted to look ahead. Different methodologies have been used. Assumptions have varied. So have conclusions—about the capital "needed" and the savings available to meet them.

Difficult questions arose in making estimates. What will be the actual growth of the labor force, especially of women? What capacity do firms actually have now, and how will they seek to expand and modernize? To what extent will shifting population add to needs for capital in some areas, while leaving that in other places partially unutilized? How costly will be the governmentally imposed needs for environmental and health-safety purposes? How much will governmental budget deficits draw upon available savings? What needs grow out of the energy situation? Uncertainties in the projections are real and large.

The findings seem to me to support the conclusion that, as the ordinary person would think of "shortage," we can expect capital shortage in the years ahead. Tax changes which favor saving and capital formation as against consumption, will, in my opinion, be in the long-run interest of most Americans.

Some economists, however, disparage the assertions that "shortage" in a meaningful sense lies ahead. Indeed, the underutilization of production capacity due to the recession may protect against strains through 1977, perhaps into 1978. Supplying productive facilities for a growing labor force may be "easy" for a time, but can then become a different matter.

Most of the estimates extend through the 1970's only. Policy discussions involving capital should look beyond half a decade. To be sure, no one should blithely claim competence to attach dollar numbers to what to expect 10 and 15 years in the future. But one fact is clear to me: the American people will expect a level of living which requires capital in increasingly large amounts per person. Heavy taxes on profitable enterprises and successful families hamper the supplying of the capital.

Looking somewhat farther head—but fewer years than those since World War II—the obligations already promised in the Social Security programs will present strains we can yet sense only vaguely. Each member of the active work force may be paying for about 40 percent of the benefit provided to support Social Security retirees—a heavy burden. Increased capital facilities will enhance productivity and thus to some extent ease this burden upon the active workers.

Valid criticism can be made of the "laundry list" approach of reckoning capital needs—adding estimates of capital needs for: various industries, regions, reducing dependence on foreign sources of energy, legally imposed outlays (notably for environmental and health-safety requirements), housing, state-local and Federal government projects, and so on.

Nothing sacrosanct attaches to either the physical items envisaged in such lists of needs or to the presumed timing, e.g., 1979 as against 1982. But if the schedules are not met more or less as assumed, adverse consequences will plague us. Undiscovered gas, or wells without pipeline connections, cannot suddenly be brought into service when winter cold validates capital-need projections that have been ignored.

Market forces, we are told, will convert any prospective shortage into higher prices. Supply and demand will balance at some price. True. But the issue of concern should be the results. The rate of betterment of living standards will be higher or lower depending upon capital formation. For example, lower supplies of new saving will lead to higher interest rates—perhaps 10 instead of 8 percent for long-term bonds. Some potential business and housing projects will not be undertaken. Or if the capital available per worker sags, employers will be forced to slow the rate of increase in pay. They will delay the expansion in employment until new workers are willing to accept (lower) pay appropriate to the (smaller) capital available.

But markets have an inescapable deficiency as guides to "proper" capital formation. Children cannot now express the very real desires they will have in the 1980's. Young people starting their working lives will then need capital facilities which can be available only if their parents and others provide in advance. The market system cannot reflect now desires which will come into being later on. People quite young, and some unborn, will want goods and services-and good jobswhich cannot be supplied without capital investment in advance. Often the leadtimes are long. Parents, of course, try to make some provision for their children by accumulating capital. But by the time children are, say, age 22, how many parents can supply them with capital for much more than education? We know that a growing population will need capital, but those with the needs are not able to reflect them (and certainly not provide for them) in years when provisions must be

AN "OFFICIAL" ESTIMATE

The Bureau of Economic Analysis of the U.S. Department of Commerce has published the results of detailed analysis of the outlook through 1980. The Bureau calls attention to many uncertainties of its methods and deficiencies of the underlying data. It concludes that nonresidential fixed investment must exceed the historical rate (as a percentage of Gross National Product) if we are to meet goals for full employment levels of output, goals for pollution abatement and decreasing dependence on foreign sources of petroleum, and increasing productivity. The difference is considerably over one percent of GNP (the precise figure depending upon details of comparison). This amount may not seem large. But it is more than one-tenth of the longerterm percentage of GNP devoted to gross business investment-a considerable difference. The extra quotient is due largely to environmental and special energy goals. The study did not undertake to look 10 and 15 vears ahead.

DIFFERENCE BETWEEN PRODUCTIVITY OF CAPITAL AND REWARDS TO THE SAVER

Another approach utilizes the concept of the "wedge" between what new investment capital produces and what the person supplying it can expect to receive. Much new equipment yields 25 to 30 percent before tax, sometimes more. The actual returns differ, and our data are far from complete and satisfactory. In any case, however, new productive facilities used in business (ignoring the large amounts required for environmental and other governmentally dictated purposes) typically produce yields which to most of us would seem surprisingly high. But government "gets there first" and takes in Federal and state taxes around half of the yield financed by equity capital.

After tax on the company, the amount remaining for suppliers of capital (debt and equity capital being grouped together for this purpose) will be materially less than what the capital adds to national output. The government "take" can be thought of as a "wedge." The saver will look at what he can get. To the extent that saving and investment are responsive to prospective rewards, the drain for taxes will lead us to curtail the funds available for business investment. Taxes prevent the productivity of capital from exerting the influence appropriate to

its true potential for bettering levels of

TECHNOLOGICAL PROGRESS: ADVANCE OF KNOWLEDGE

New capital facilities are often the means by which technological progress gets translated into actual benefits for mankind. Scientific advance in the broadest sense plays a vital role in economic progress. The fruits of technological success become usefully available, not when they are proved in the laboratory, but only when new equipment operates. Improvements in fabrication, marketing, communications, and servicing frequently rest upon capital goods which embody new invention.

Both cost reduction and quality improvement depend upon research and technological advance—and then capital investment. So too, in part, will the economy's effectiveness in international competition. Investment in new facilities plays a crucial role in productivity improvement. This, in turn, stands high on the list of means of raising

living standards.

Savings allocated for paying for new capital goods can bring advantages which are greater than the addition of more equipment. The new things tend to be the most advanced types, the best quality. We enjoy a "technological dividend," better instruments of production and new and better goods and services which we use as consumers.

WHO BENEFITS FROM EXPANSION OF ECONOMY'S CAPITAL BASE?

Enlargements of the economy's capital base benefits everyone. But trying to decide who benefits most can be more diverting than fruitful. The reality is this: the benefits do spread widely—in increased employee productivity, more housing, new products services, energy sources, environmental improvement, stronger competitive position in world markets, and so on. Compared with the benefits obtainable from income redistribution through government finance-sharing this year's pie—the longer-run fruits of capital expansion rank high indeed.

Saving and investment permit the produc-tion of more and better real goods and services with less burdensome effort. As consumers, all of us depend on the economy's capital base. Whether one looks at changes in living standards over centuries or merely the last decade, one must be struck by improvements beyond count and measure. These rest heavily upon increases in capital. Payments to producers—wages, interest and profit—go up. The family which has added to its savings account or bought some shares of stock en-

joys higher income.

Who, however, gets most of the increase of money incomes? Human beings in their capacities as workers-"labor"-rather than as suppliers of capital! From 1960 to 1975, compensation of employees rose \$65 billion. Aftertax profits went up \$47 billion and net in-

terest by \$7 billion.
As industrial facilities are improved and enlarged, the suppliers of capital get a modest fraction of the fruits. Additions to the production base raise the real income of laborers (broadly defined) much more than the incomes of those who supply the capital. (How little "trickles up" to shareholders!) For example, how do wages rates per hour plus fringes compare with those of the past? From 1947 to 1975, private nonagricultural hourly earnings (after adjusting for inflation) rose 70 percent. Fringes, I expect increased relatively more. Over longer periods, the real income of workers has multiplied.

What about the real returns to capital, per dollar per year? Adjusting for inflation, neither (1) interest rates nor (2) dividend rates plus reinvested earnings seem to have risen appreciably over time. With proper adjustment for inflation, after-tax profits per dollar invested at risk are probably significantly less than in the 1950's and 1960's.

TAX REFORM WHICH LOOKS TO THE FUTURE

The next stage of tax reform could benefit from taking account, openly and explicitly, of rising expectations. The performance of U.S. economy does reinforce hope for continuing improvement. The productive system has made possible impressive advances in living standards. The private economy generates most of the taxpaying capacity which enables governments to pay their em-ployees and to make transfer payments. The rate of advance will depend significantly on capital formation.

Our tax structure has anti-capital elements-e.g., double (two-tier) taxation of dividends, steep graduation of personal in-come and estate-gift rates. To some extent they reflect the "in the long run we are all bias of the 1930's-and also the argument, then so influential, that saving by curtailing consumer demand was an obstacle to employment. Funds saved would be idle because of a lack of investment projects. Are we not now smart enough—and sufficiently selfish—to start lifting the incubus of anticapital taxation?

No solid basis exists for deciding which balance between consumption and capital formation is "best" for the economy. lions of people as individuals make decisions on the basis of their own situations—the sacrifice of consumption now to save for a better house or education, for retirement or security. The incentives facing each of us

influence our actions.

Today, I believe, the "greatest good for the greatest number" as a goal calls for a tax system with greater concern for capital for-mation. Whatever the reasons behind decisions in enacting and administering American tax laws, the forces which have produced present system have not given heavy weighting to concern about saving.2 But two features are relatively favorable: the treatment of pension systems and interest accruals on life insurance reserves. Neither owes its origin to any announced desire to encourage capital formation.

Personal and corporation savings must be made out of after-tax income. Then, any income from the resulting investments is again subject to tax before it can be used for consumption or more capital formation. Discrimination against saving as compared with

consumption results.

At the margin, corporation earnings are generally taxed at 48 percent, plus state taxes; then dividends (over \$100) received by individual shareholders are taxed at personal rates. Capital gains from the reinvestment of taxed profits are taxed again when realized. And in measuring capital gains, no allowance is made for inflation. Per dollar of revenue, estate and gift taxes and levies on capital gains bear heavily upon private

Recent pressure for tax "reform" by means that would in fact reduce capital formation alleges that costs of government would then distributed more "equitably." Baffling complexities arise in trying to agree on fairness in taxation. A larger consideration seems to me to override many details: expansion of the capital base brings the broadest of benefits, extending, of course, to those at the low end of the income scale.

Opponents of tax revision which would have a "pro capital" goal sometimes draw

1 The failure to recognize inflation in computing depreciation and capital gains is a anti-capital development. So is lack of indexation to keep the personal in-come tax from becoming steeper in real terms—thus impeding personal saving.

2 Local property taxes, except as they apply values, reduce the net benefits from buildings, machinery, and business inventory. Some communities impose property tax rates high enough to impede their ability to attract funds for new investment in buildings and machinery.

upon class-war, worker-vs.-employer rhetoric. The fact that big businesses would face fewer tax obstacles is held against the proposals. The biggest corporations are the largest suppliers to consumers, the largest of employers, and so on. Whatever the comprehension and motives of persons dredging up antibusiness rancor and suspicion, tax policy should rest upon an accurate understanding of the role of capital.

The tax system can be modified to reduce

the obstacles to saving and to provide new incentives for doing so. A pro-saving, proinvestment tax revision might take any of several forms. No one pattern is clearly best. Efforts to predict the full results of specific tax changes present many difficulties. can wisely be done will depend heavily upon the control of Federal expenditures. Re-straining the increase in governmental spending deserves high priority; the funds going into "collective consumption" or used in governmental transfer payments for personal consumption do not remain available for private capital formation.

CONCLUDING COMMENT

An oppressive legacy of popular misunder-standing hangs over us. Anti-business attitudes create obstacles to the acceptance of tax changes which would aid the productive system that can serve us and our children ever more effectively. Not a few persons, some self-designated as "intellectuals," show more ignorance than understanding of economic reality. Disdain or envy or dislike of private "saving to get ahead" probably lurks behind or slightly beneath some of the articulation of "tax reform" proposals. Yet the human goals which we all seek can be approached more rapidly and surely with the aid of nonhuman instruments of production-capital.

DR. MARC J. MUSSER CONTRIBUTED GREATLY TO THE AMERICAN MEDICAL SCENE

HON. JOHN P. HAMMERSCHMIDT

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES Tuesday, April 5, 1977

Mr. HAMMERSCHMIDT. Mr. Speaker. on Friday morning, a distinguished American was laid to rest, with military honors, at Arlington National Cemetery.

He will be missed, greatly, but all of us who knew him—and of his great achievements in the medical field-will find great comfort in knowing that the world is, indeed, a better place for his having been here; particularly the world of many who served in World War II. the world of the American veteran, and the world of the medical profession to which he brought enormous credit.

I speak, of course, of the late Dr. Marc J. Musser.

During the Second World War, he served, with great distinction, as an officer in the Army Medical Corps, from which he was discharged as a colonel.

That service included his command of the 135th Medical Group, accepted as probably the largest, most important, medical command in the effort against Japan—moving from that assignment to serve the last 3 years of his duty, as a medical commander there in the Southwest Pacific area.

For that service, he was awarded the Legion of Merit before moving to postwar service, first with the Reserves, and later, with the National Guard—in Wisconsin, and in Texas.

Meanwhile, he turned his attention from serving as the wartime combat soldier to the postwar veteran.

Joining the Veterans' Administration as the chief of staff at the VA's Hospital in Houston, he moved upward, steadily, within the VA, and achieved the position of Deputy Chief Medical Director, before resigning to become executive director of the North Carolina regional medical program with appointments to the academic staff at Duke University, Bowman Gray School of Medicine, and the University of North Carolina.

He was, however, recalled to service with the Veterans' Administration as its Chief Medical Director.

There would, of course, be no way to ascertain how many lives of our combat men, and of our veterans, may have been saved; how many wounds healed; nor how many illnesses cured under the guiding command of Dr. Marc J. Musser.

Nor, would there be a way of ascertaining how many medical school students may have been inspired to continue to pursue their profession, with the greater inspiration and encouragement that he was able to impart.

In turn, there is no way of knowing how many Americans are alive, and healthy, today, as a consequence of those things which he helped to contribute to medical research and education.

But, this we can know: His contributions to our people were unselfish and considerable.

OUTLOOK FOR SACCHARIN SUBSTITUTES

HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 5, 1977

Mr. PEPPER. Mr. Speaker, at the time the Food and Drug Administration announced its intention to ban saccharin, I spoke out against this action as "precipitous, unfounded and a violation of freedom of choice." As chairman of the House Select Committee on Aging, I stated that the elderly would be hard hit by the action, particularly those who suffer from diabetes and other chronic illnesses which require use of a sugar substitute

Should FDA proceed in the next few days with the publication of its proposed ban, we should realize that the 10 million diabetics in the Nation, as well as the many others who use a noncaloric sweetener for health reasons face the prospect of going a long period of time without a legally sanctioned sweetener.

Unfortunately, much publicity has recently been given to many so-called substitutes for saccharin, with the implication that they are already available or will be shortly, when in fact no other calorie-free sweetener is available now or is likely to be for some time.

Sweeteners such as fructose and the polyols—mannitol, sorbitol, and xylitol—

have been mentioned in press reports as available now but all of these sweeteners contain calories and, in some cases, contain as many calories as natural sugar. This of course means such sweeteners are of little use to diabetics or others who must control their carbohydrate intake.

Another sweetener which has been frequently mentioned is NEO-DHCneohesperidine dihydrochalcone-which is derived from citrus rinds, such as grapefruit and Seville oranges. While I believe the long-term prospects for this sweetener are hopeful and would provide an additional beneficial use for the citrus of which my own State of Florida is justifiably proud, it may be several years before this substance can be cleared by the FDA for use in dietary foods, beverages, and so on. Though NEO-DHC may have a future as a flavorant for toothpaste. mouthwash, and chewing gum its role in the diet is still unclear.

German scientists are currently conducting tests on acetosulfam, another product which may take 3 to 5 years of additional testing before it can be approved. Similarly, the Associated Press reported in a dispatch from Washington on April 1 that Dr. Robert Henkin of Georgetown University has developed an extract from a West Indian berry that may have a future in sweetening foods by altering the taste perceptions. The AP story warned the substance may have to go through lengthy FDA examination because FDA regards it as a drug instead of a food additive.

However, a predecessor extract from the West African berries was abandonded last year by a firm which spent \$5 million.

What are some of the other sweetener substitutes? Aspartame, composed of two naturally occurring amino acids, was actually cleared for marketing in 1974 and then withdrawn because of belatedly discovered health effects. That product is still being reviewed and a decision by FDA could be a year away or more. Cyclamates which were banned in 1969 have not been readmitted to the U.S. market, although some western countries continue to permit their use.

I emphasize, Mr. Speaker, that in this country no legally-approved or acceptable substitute for saccharin exists today and that the development and testing of such a substitute will require long periods of time and great expense. Thus, if the FDA proposal goes into effect the immediate impact on the American public will be enormous and particularly so where the elderly, the diabetic, and the chronically ill are concerned.

Mr. Speaker, I would like to submit for the Record an article from Newsweek magazine of April 4, 1977, which describes the problem inherent in finding a new non-caloric sweetener:

[From Newsweek Magazine, Apr. 4, 1977] HUNTING A SAFE SWEETENER

Few government actions have soured the American people quite as much as the decision to ban saccharin. Congress has been deluged with mail. The Food and Drug Administration, which imposed the ban, has received more phone calls than on any other issue in its history. Amid the bitter reaction, scientists have stepped up research on a new sugar substitute.

Last week, the tangled issue was tossed in the lap of Congress. Testifying before a House subcommittee, manufacturers, legislators and physicians wrangled over the true significance of the Canadian studies responsible for the ban. Fed huge amounts of saccharin—a standard procedure for such experiments—thirteen out of 200 rats developed bladder cancer. Under the 1958 Delaney clause, no substance known to induce cancer in man or animals can be used as a food additive. The ban takes effect in about three months' time.

Chunky Rep. Barbara Mikulski, a Maryland Democrat who claimed to have lost 47 pounds on a diet supplemented by low-calorie sodas, ridiculed the huge dose of saccharin given to the rats—equivalent to human consumption of 800 cans of diet soda per day for a lifetime. "People would die of gas before they would die of cancer," she gibed. One manufacturer of an artificial sweetener called the ban "ludicrous." According to Robert Kellen, a lobbyist for diet products, the ban would leave 10 million diabetics without a sugar-free sweetener.

Diabetics aren't the only patients who use saccharin. C. Joseph Stetler of the Pharmaceutical Manufacturers Association pointed out that 619 separate medications, ranging from antibiotics to antacids, now contain the sweetener. And some, he said, could not be reformulated with sugar since it serves as a natural incubator for bacteria.

QUESTIONS

Perhaps the most objective testimony came from a panel of five physicians. They doubted neither the validity of the Canadian experiments nor the FDA's contention that their results could be projected into four cases of bladder cancer among every 10,000 Americans who drink just one 12-ounce can of diet soda per day. But they did question whether the risks of the sweetener really outwelgh its medical benefits. "The potential of dying from obesity and its complications is as serious as the potential of dying from bladder cancer that may be caused by the use of saccharin," said Dr. Kurt J. Isselbacher of the Harvard Medical School. "Actually, cancer of the bladder is one of the more treatable kinds of cancer."

The doctors' prescriptions for dealing with saccharin ranged from restricting its sale to diabetics and overweight patients to allowing it on the open market with a warning label, like that on cigarette packages. The physicians also proposed that a federally funded panel of experts analyze all data on saccharin's safety. The testimony did little to remove the confusion surrounding the subject. And with no more hearings scheduled, it was unlikely that Congress would resolve the controversy before the ban takes effect this summer.

SEARCHES

One compelling reason why Congress eventually might make the ban less than absolute is the fact that new sweeteners are hard to find. Most sugar substitutes, including saccharin, have been discovered by accident, because experts know too little about the mechanism of taste. "The chemical structures of all known sweetening agents are so diverse that it's almost impossible to predict that a chemical structure is going to produce sweetness," says Edward M. Acton, a chemist at Stanford Research Institute.

Acton himself has worked on SRI oxime V, which is synthesized from petrochemicals and is 450 times as sweet as sugar. But testing and development of the clean-tasting no-calorie compound could take up to ten years. Scientists at the Dynapol Co. in Palo Alto, Calif., are looking even further into the future. They hope to develop nonabsorbable sweeteners that pass completely unaltered through the body, leaving behind nothing more than a sweet message on the tongue.

Some new sugar substitutes have already undergone intermittent public taste testing. Five years ago, the Miralin Co. introduced a derivative of a West African berry that, when consumed before a meal, gave sour foods a sweet taste. But the FDA, rejecting the company's plea that it was not strictly a food additive, forced the Miralin compound off the market. Abbott Laboratories is now running a high-pressure campaign for the reinstatement of cyclamates, which were banned in 1969. Abbott's argument: the cyclamates that produced cancers in laboratory rats were tainted with saccharin. Yet another product is xylitol. Extracted from birch trees, it is sold in some European countries as a sweetener for diabetics. Its appeal is limited, however, because it contains just as many calories as natural sugar.

Even the two most promising alternatives to saccharin are more than a year from commercial production, largely because of the work involved in confirming their absolute safety. One of these, aspartame, is a compound of two substances found naturally in many foods; it tastes exactly like sugar, is 180 times sweeter and leaves no aftertaste. The other compound, known as Neo-DHC, is, ironically, derived from naringin, the main bitter component of citrus-fruit rinds. Neo-DHC can be produced most easily from grapefruit and Seville oranges.

RESOLUTION

Aspartame was actually cleared for marketing in 1974, but was withdrawn when a scientist objected that the compound could produce brain lesions. Moreover, questions were raised about the accuracy of the testing procedures used by G.D. Searle & Co., which developed aspartame. Those problems now seem likely to be resolved—but not for at least eighteen months. Animal studies suggest that Neo-DHC, which was developed by Robert M. Horowitz and Bruno Gentili of the Department of Agriculture, is extraordinarily safe. Two companies are preparing to petition for its use in toothpaste, mouthwash and chewing gum. Its major disadvantage is a strong aftertaste, which makes it hard to use in diet drinks.

One major reason saccharin can't be replaced sooner is simply commercial. It costs millions of dollars to develop a new product, and the relative safety of the substitute is not established until the final testing phase. It's an expensive—and long-term—investment gamble. Thus, unless Congress unexpectedly agrees to alter the Delaney clause, dieters and diabetics are likely to face a prolonged period of life without sweetness.

SWEET AND SOUR

HON. BOB GAMMAGE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 5, 1977

Mr. GAMMAGE. Mr. Speaker, it has recently come to my attention that the sugar industry is in need of relief because of rapidly falling sugar prices. Moreover, I believe the sugar producer's argument—that lowering import quotas for sugar will not help the sugar growers and will damage the sugar producers—is

Rather than arbitrarily lowering the sugar import quota, which may result in an adverse economic impact on sugar growers, refiners, and skyrocketing prices to consumers; I suggest the Secretary of Agriculture consider other alternatives—possibly the institution of a nonrecourse loan/target price system similar to that used in other agricultural programs.

Mr. Speaker, I call to the attention of my colleagues, the Houston Post editorial of March 15, 1977, recognizing the need for immediate relief for the sugar industry:

SWEET AND SOUR

A federal agency's decision that imported sugar is hurting U.S. sugar farmers could prove a bitter spoonful for American consumers, depending on what the Carter administration decides to do about it. The International Trade Commission (ITC) found earlier this month that increased amounts of raw sugar being shipped here for processing were depressing the market prices below the production costs of domestic sugar cane and sugar beets. The ITC is expected to recommend remedies in a few days.

The President will have the final say.

Whatever it does, the administration faces a no-win situation. If it decides to take no to aid U.S. sugar growers isn't likely-they will be angry. If it curbs imports or raises tariffs on raw sugar, thus increasing prices, consumers will be irked and U.S. sugar processors and their foreign suppliers will be unhappy. Tightening up on the sugar quota could also provoke retaliation other nations. The government could pay subsidies in the form of price supports or crop loans similar to those made on other farm commodities, but some producers don't like this approach because such subsidies are highly visible targets for criticism. Furthermore, the payments could increase the federal deficit. Any help the administration may decide to give U.S. sugar farmers will have to be paid for by the public, either as consumers

Agriculture Secretary Bob Bergland is reportedly considering a combination of import quotas and price supports to put a 13- to 14-cent-a-pound floor under sugar, which is now selling for about 11 cents. The U.S. Cane Sugar Refiners' Association, which opposes forcing up sugar prices by restricting quotas or raising tariffs, says an increase of 3 cents a pound could cost U.S. consumers more than \$1 billion a year in higher prices for sugar and products containing sugar.

A group composed of five of these refiners

is urging the ITC to reverse its findings that imports hurt U.S. sugar growers. The refiners, who buy substantial amounts of foreign raw sugar, have a vested interest in keeping the status quo, of course. But they advance a cogent argument that raising sugar prices could work to the disadvantage of American sugar growers by making corn syrup sweeteners (fructose) more competitive with sugar. This sugar substitute quickly captured 10 per cent of the market when sugar prices shot to record highs of more than 60 cents a pound in 1974. Though the sharp drop in raw sugar prices during the past two years has inhibited the growth of fructose production, sugar industry sources say it could eventually supply 25 to 50 per cent of the sweetener demand, particularly for food processing and other industrial uses which

account for 70 per cent of the market. There has been talk of reviving the old Sugar Act or enacting a similar law, but this seems to have only minority support in the industry. For four decades before it expired in 1974, the Sugar Act lent stability to the business by providing price floors but no ceilings, leading critics to charge—with justification—that it protected the industry at

the expense of the consumer.

Any way you spoon it, the sugar problem is a sensitive pocketbook issue. But if U.S. sugar producers are to be helped, it would be cheaper to give that aid in the form of temporary price supports or loans rather than tinker with the quota or tariff structure. Sugar producing and consuming nations will meet in Geneva next month to try to work out a new international sugar agreement that could significantly alter our policy on this troubled commodity. The result could

be a greater stability in the market and a stronger position for the American sugar producer. We should avoid any interim action that could sour this possibility. Besides, it's time the American consumer got a break.

LEGISLATION TO PROHIBIT DIS-CRIMINATION ON THE BASIS OF PREGNANCY

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 5, 1977

Mr. HAWKINS. Mr. Speaker, on March 15 I, along with 92 cosponsors, introduced H.R. 5055, a bill to amend title VII of the Civil Rights Act of 1964 to make clear that employment-related discrimination based on pregnancy, childbirth, and related conditions is discrimination based on sex and therefore

banned by title VII.

I am reintroducing that bill today with 17 additional cosponsors, with one change. A new section has been added to provide simply that employers who are now discriminating in regard to pregnancy-related disabilities will not be able, if this bill is enacted, to decrease, or cause to be decreased, the benefits or compensation provided to their employees generally in order to come into compliance. The Equal Pay Act has a similar provision, and the courts have generally interpreted title VII to the same effectthat is, that an employer who has been discriminating may not create equality by harming other employees; rather, the employer must raise the discriminatees to the position of the other employees. I regard this rule as a basic premise of what constitutes nondiscrimination; the reason for including this provision here, which merely restates existing law, is simply that employers have been explicitly stating that one result of a bill such as this would be a loss of benefits or compensation to other employees, and I and my cosponsors decided on reflection that it is wise to make clear that this cannot

H.R. 5055 does not really add anything to title VII as I and, I believe, most of my colleagues in Congress when title VII was enacted in 1964 and amended in 1972, understood the prohibition against sex discrimination in employment. For, it seems only commonsense, that since only women can become pregnant, discrimination against pregnant people is necessarily discrimination against women, and that forbidding discrimination based on sex therefore clearly forbids discrimination based on pregnancy. Indeed, six Federal courts of appeal, 18 Federal district courts, the Equal Employment Opportunity Commission, fair employment practices agencies of many States, and the highest courts of five States have so held.

But the U.S. Supreme Court, in General Electric Corp. against Gilbert and IUE, decided otherwise this last December. To understand the need for H.R. 5055, some history and discussion of the GE litigation is helpful.

In 1973, the Supreme Court, in Geduldig against Aiello, held that California could constitutionally deny disability benefits funded by State taxes to women unable to work because of disability due to a normal pregnancy. In a footnote not really pertinent to the constitutional decision, the six-member majority stated:

This case is a far cry from cases * * * involving discrimination based upon gender as such. The California insurance program does not exclude anyone from benefit eligibility because of gender but merely removes one physical condition—pregnancy—from the list of compensable disabilities. * * * The program divides potential recipients into two groups—pregnant women and non-pregnant persons. While the first group is exclusively female, the second includes members of both sexes.

This view—that a classification which harms only women and does so on the basis of a factor inextricably linked to gender is not discrimination against women just because not all women are affected—is contrary to any sensible approach to what constitutes discrimination. For, as Mr. Justice Stephens noted in his dissent in Gilbert—

It is the capacity to become pregnant which primarily distinguishes the female from the male, so that a rule which treats pregnancy as unique by definition . . . discriminates on account of sex.

But Geduldig was in any event based squarely on constitutional law, not title VII. And all the courts of appeals which after Geduldig considered the issue under title VII held that Congress in passing that statute clearly intended to forbid discrimination based on pregnancy, even if the Constitution did not prohibit such discrimination. As those courts noted, and as the Supreme Court in Gilbert agreed, Congress obviously in passing statutes may forbid actions which are perfectly constitutional, and thereby make such actions illegal. And the EEOC, the agency entrusted primarily with enforcing title VII, has long had guidelines which interpret title VII to prohibit pregnancy discrimination.

In Gilbert, however, the Supreme Court, faced with the question whether an employer may consistently with title VII, provide employees with disability pay for absences due to any medical cause other than pregnancy or child-birth, including all illnesses peculiar to man, that this Congress must have intended title VII to have only the same reach, as regards what constitutes discrimination based on sex as the Court held applied under the Constitution.

This was an extraordinary assumption to entertain. The equal protection clause, construed in Geduldig, does not use the word "discriminate" anyway, so there was no reason at all for the Court to believe that we intended by using that word in subsection 703(a)(1) of title VII to limit the reach of title VII to actions which would violate the equal protection clause if done by a State. And, more astonishing, we enacted title VII, including the sex discrimination provision, fully 9 years before the Supreme Court informed us that it did not view discrimination based on pregnancy as discrimination based on sex as a constitutional matter. We could not possibly have intended to incorporate constitutional concepts not yet announced, and I for one certainly did not contemplate the limited approach taken by the Court in Geduldig.

Therefore, H.R. 5055 is designed to make clear that whatever may be true as a constitutional matter, this Congress does regard discrimination based on pregnancy as discrimination based on sex, and, in particular, that employers, labor unions, and others covered by title VII must treat pregnant women as they treat other employees similar in their ability, or inability, to work. This means, for example, that if an employer permits other employees to continue working unless their doctors regard them as physically unable to work, it may not force pregnant women off the job, as many employers have done in the past, while they are perfectly able to perform their jobs. It means that employers and labor unions which permit other employees to retain seniority while on leaves of absence or while disabled may not deprive women of seniority if they are absent for a limited period due to pregnancy, as some employers do. It means that an employer who provides a certain number of sick days a year for each employee to use when unable to work may not forbid women to use their sick days when unable to work due to pregnancy or childbirth. And it means that an employer who provides disability insurance to other employees unable to work may not single out pregnancy-related disabilities for exclusion from the disability plan.

It is also important to understand what this bill would not do. Like title VII generally, it merely requires that employers not discriminate. Thus, an employer who does not now provide disability benefits to his employees will not have to provide such benefits to women disabled due to pregnancy or childbirth. Rather, this bill would simply require employers to treat disability due to pregnancy, childbirth, or a related medical non-work-related disability, by providing leave and benefits for the same period, on the same terms, and at the same employment rate applicable to other employees.

Nor does the bill require that employers pay pregnant women disability benefits, or provide leave, simply because they are pregnant, or because they prefer to stay home after childbirth for an extended period. Rather, it recognizes that for most of the time a woman is pregnant she is, in most cases, able to continue working, and should be allowed to do so. It also recognizes that pregnancy and childbirth does cause some period during which a woman is medically unable to work. For 95 percent of women, that period is 6 weeks or less. It is only during this period, unless there are complications which cause the woman to be disabled longer, for which disability benefits or leave are required on the same basis applicable to other employees with temporary disabilities.

I believe enactment of this bill is necessary if the prohibition against sex discrimination in title VII is to be meaningful. For discrimination against pregnant women is one of the chief ways in which women's careers have been impeded and women employees treated like secondclass employees. For example, prior to the enactment of title VII of the Civil Rights Act of 1964, most employers discharged a woman as soon as she became obviously pregnant. When the new mother returned to work after her baby was born, she began again as a new employee. Whether she went back to work for her former employer, or whether she found a new employer, she started at the bottom of the seniority ladder. Usually she lost not only seniority but also all previously earned pension credit. This loss of seniority had a lifetime impact on her pay and benefits, for these often were negotiated on the basis of continuous service, and also an impact upon her ability to obtain more responsible positions. And, the loss of service credit toward a pension similarly had a lifetime impact; she had to work more years before she could retire, and when she finally could retire, she had a substantially smaller pension benefit than others with the same number of years of service. Of course, for a woman who had more than one child, she began again as a new employee without seniority status and without pension credits after the birth of each child, with multiplied harmful effects on her pay, position, and pensions. Since a large proportion of women are likely to become pregnant in their working careers, such pregnancy discrimination accounts in large part for the fact that women were-and are-in lower paying and less responsible jobs.

Similarly, the refusal to pay pregnant women disability benefits or sick leave available to other temporarily disabled employees has effects which go far beyond the simple loss of income for a period of time. First, the loss of income itself can have devastating effects: 25 million women workers or 70 percent of the women who work do so because they are single, divorced or widowed, or because their husbands earn under \$7,000 per year; and 1 in 10 babies is born to a single, divorced, or widowed mother.

Thus, if disability benefits are not paid. the loss of a mother's salary, even temporarily, can make it difficult for many families to provide their children proper nutrition and health care, and may result in forcing some families onto welfare because of the loss of income. Further, some mothers, unable to afford the loss of income, may be discouraged from carrying their pregnancy to term. And, some women may be forced to seek lower paying or less responsible jobs which do provide benefits for time lost due to pregnancy-related disability, because they cannot take the risk of going without income should they become pregnant. Finally, disability, sick leave, and other leave programs are basically designed to allay fears that workers will be left without income during critical periods: they thus assure that employees are productive, committed workers when they are well and do not try to come to work and endanger their heatlh-and therefore their productivity—when they are not well. If women disabled due to pregnancy do not have this assurance. they perceive the message quite readilythat the employer is not concerned about their well-being and does not regard them as valued, career employees.

Indeed, while one of the arguments made opposing pregnancy disability coverage is that women do not return after childbirth, that argument is in fact circular: It is little wonder if some women who are forced to leave several months before they are disabled and not provided disability benefits available to other similarly situated employees are not interested in returning to an employer who has treated them in this way. In fact, statistics show that over onehalf of women who take pregnancy leave even under discriminatory conditions do return: but they also show that in companies which have begun paying pregnancy disability benefits on the same terms available to other employees return rates have risen dramatically—by more than 50 percent. These companies have reported that as a result of the increased return rate, paying disability benefits for pregnancy-related disabilities is entirely cost-effective, since the savings in training costs for new employees more than covers the cost of providing benefits.

The main argument raised against prohibiting pregnancy-related discrimination is that it will be costly. But eradicating invidious discrimination by definition costs money: It is cheaper to pay all black workers less than all white workers, or all women less than all men. The fact that it would cost employers money did not prevent Congress from enacting the Equal Pay Act or title VII, and it should not prevent this Congress from making clear that title VII prohibits this form of sex discrimination as

Further, the cost figures which employers groups have been promoting are vastly inflated and, indeed, based on assumptions which themselves involve stereotypes based on sex. For example, the \$1.5 billion figure introduced by GE in the Gilbert litigation assumed that women would be absent due to pregnancy an average of 30 weeks, even though the undisputed evidence in the same case was that 95 percent of women would be disabled only an average of 6 weeks. As one judge presented with similar calculations observed, the assumption that women will claim benefits for a period much longer than their actual disability is equivalent to "assigning the tendency to malinger as a sex-related characteristic. If, as defendant suggests, the employer can make as much or more money on disability than at work be true, then the fault lies with the particular insurance plan and not with the female sex." \$1.5 billion figure also ignored the fact that women are paid on the average less than men, and calculated the benefits at the male rate of pay. And, it does not take account of the fact that at least 14 States, including such large States as New York, New Jersey, and California, now require as a matter of State law that employers provide disability benefits for pregnancy-related disabilities, so that the cost of providing coverage in those States is not fairly counted as a cost of any Federal legislation on the question. Finally, such calculations do not include

workers off the job, for example, costs employers money in lost productivity and training; and if the lost income is not replaced by employers directly, it may have to be replaced indirectly by unemployment or welfare benefits.

Our best figures at present suggest that the direct national cost of covering all women who work for companies with disability plans for pregnancy-related disabilities not now covered is about \$150 million; this figure includes women working in States where such coverage is mandated by State law and does not take account of the monetary benefits of providing such coverage, so that it is probably rather high. We will be trying through hearings to get updated cost figures, to aid my colleagues in the deliberations on this bill, but I am convinced that the net cost, if any, will prove rather minimal in comparison to the increase in equity and justice to women which is the goal of this bill.

In sum, this legislation is necessary to assure that the goal set by title VII in 1964-equality of women in the work place-becomes a reality. I am hopeful that this House will move swiftly to enact this bill into law so that the harmful effects of the Gilbert decision will be short-lived.

LEGISLATIVE NEWSLETTER

HON. EDWARD J. PATTEN

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 5, 1977

Mr. PATTEN. Mr. Speaker, I mail a legislative newsletter to my constituents twice a year to keep them informed of some of my legislative work and goals.

I feel that it is important to do this. for constituents have the right to know what we are doing as their representa-

My first newsletter this year, follows, and it was approved by both majority and minority counsel in the House Post Office and Civil Service Committee before it went to press.

The newsletter follows:

ECONOMIC STIMULUS PROGRAM WILL HELP RECOVERY

In his moving farewell address to Congress in January, President Ford said, "the State of the Union is good, but we must go on making it better and better . . . " As I listened to his last speech to Congress in the House Chamber, I felt that he was a sincere, honest and dedicated Chief Executive who did his best after inheriting serious economic and political problems. Most Members of Congress respected and liked President Ford.

Eight days later, Jimmy Carter became 39th President of the United States and in his brief but impressive inaugural address not only called for a "new national spirit of unity and trust," but expressed the conviction that most Americans wanted to hear: 'I believe America can be better. We can be even stronger than ever before.

Those words of optimism and hope were implemented by the new President when he sent his Economic Stimulus Program to Con-gress soon after his inauguration. No realist can claim that it will create and convert recession to recovery overnight. It will, how-ever, contribute to the recovery the Nation has been hoping for during the past several

HIGHLIGHTS OF THE ECONOMIC PROGRAM

President Carter's plan for strengthening the economy consists of a variety of important programs which will help people in several vital areas and I was happy to vote The main provisions call for: acceleration of local public works projects; continuation of revenue sharing; cession aid for areas of high unemployment maintain basic services; expansion of public service jobs; employment and training assistance; special payments to those who receive certain retirement benefits; a tax rebate; and others.

The President deserves credit for the vigorous and active leadership he has shown in attacking the recession and by expressing deep interest in human rights everywhere. Other legislative action on the Carter agenda includes such areas as consumer advocacy, election reform, hospital cost control, an anti-inflation program, and the vital field of

energy. He has made a good start. The 95th Congress has also made an impressive beginning. Even before the new President was inaugurated, the House was working on four priorities recommended by the Democratic leadership: an Economic Stimulus Program; ethics reform; government reorganization; and an energy program. A recent Harris survey disclosed that by a margin of 59-29 percent, the majority of Americans expect the new Congress to compile a positive legislative record. They will not be disappointed.

NEW PUBLIC WORKS BILL SHOULD HELP 15TH DISTRICT COMMUNITIES

In late December, the Economic Development Administration (EDA) announced almost \$100 million in Federal construction grants to N.J. to help stimulate the stagnant economy. It was disturbing to me that except for a \$330,000 award to Monmouth Junction, Middlesex County and its communities failed to receive any of the grants, despite a 9.3 percent unemployment rate and over 30,-000 jobless. It was obvious that the Public Works Employment Act needed improvement so I co-sponsored a better bill which should increase the chances of Middlesex and Union counties getting more grants to help the thousands of persons looking for work. The bill I helped sponsor is a considerable improvement over the previous legislation (doubling the funds nationaly to \$4 billion, eliminating 30 percent of the funds for areas with lower numbers of unemployed, etc.). Before mid-April, President Carter will probably sign a bill which is in a House-Senate conference. It will be a real help in combating the recession.

BILLS COSPONSORED IN NEW CONGRESS

The new Congress (1977-78) is determined to achieve a proud and responsive legislative record in areas ranging from strengthening the economy to improving health and educa-With the support of the Carter Administration, there is strong confidence that these legislative plans and hopes will be accomplished. Some of the bills I've helped sponsor so far, would:

Extend Federal Emergency Unemployment Compensation benefits for an additional 65

Authorize a career education program for elementary and secondary schools. Improve the Federal Water Pollution Con-

trol Act in the battle against pollution.
Expand the Public Works Employment Act

and help our jobless and communities with 100% Federal construction grants. Create a U.S. Dept. of Energy and consoli-

date most energy functions.

Provide grants to states for compensating persons injured by criminals.

CXXIII-666-Part 9

an offset for the extent to which practic-

ing pregnancy discrimination is itself

costly-forcing productive, experienced

Aid the elderly in a package of bills from banning age discrimination in employment to liberalizing the Social Security earnings test.

Make certain that increases in Social Security benefits would not reduce veterans' bene-

fits

Require U.S. agencies to undergo periodic reviews to determine if they're necessary.

Provide mandatory minimum prison sentences for persons illegally distributing certain narcotic drugs.

Include eligible drugs requiring a doctor's prescription or certification among the items and services covered by Medicare.

Establish a Law Enforcement Officers Bill of Rights.

Include a tax credit up to 25% of the cost of conservation improvements on homes.

Provide protection against catastrophic illness through the Catastrophic Health Insurance and Medical Assistance Reform Act.

ance and Medical Assistance Reform Act.
Create a national climate program to deal
with climatic variation.

This is only a partial list of the legislation I've helped sponsor. Constituents can be sure that these—and other—measures will be actively supported by me and that committee chairmen, House leaders, and Members, will be urged to back these proposals.

FREE KING TUT PAMPHLET AVAILABLE

Those interested in receiving a free 48-page color pamphlet with instructions on how to order the King Tutankhamen display reproductions illustrated in a brochure, should write to: Metropolitan Museum of Art, 25 Gracie Station, New York, New York, 10028. New York City's exhibition of the famous king will start in Dec. 1978, but the lovely brochure will still thrill those who may not be able to view the exhibition.

ORDER FREE CONSUMER INFORMATION CATALOG

In August, 1977, a limited supply of Consumer Information Catalogs will be made available by my Washington, D.C. office. Those interested in a free copy should write to: 2332 Rayburn House Office Building, 20515. Because of inflation, it's important that we get the most out of our spending dollar. The catalog can help you in your daily buying decisions, ranging from food to home appliances.

U.S. Funds May Finance Alcohol Research Center at Rutgers

One of the Appropriations subcommittees on which I serve: Labor-Health, Education and Welfare (HEW), took important action in late February that will provide Federal funds for establishing 6 Alcohol Research Centers throughout the country. Hopefully, one of them will be located at Rutgers University in New Brunswick. The full Appropriations Committee and the House also approved the funding. Although Rutgers presently has an Alcohol Studies Center which coordinates national programs to fight alcoholism, a research center there would enable it to greatly increase its research activities.

Alcoholism is a serious health problem which not only harms the health of millions of Americans, but also costs billions of dollars every year because of medical expenses and lost worktime. The main goal of the Alcohol Research Centers at the 6 facilities would be to conduct detailed research into causes of alcoholism and ways to reduce the severe—and sometimes tragic—impact it has on so many Americans. New and better methods must be found to not only effectively treat alcohol abuse, but, ideally, help prevent it. The centers should bring these goals closer to realization and through my efforts, the Labor-HEW Subcommittee included the funding.

"AGENTS OF INFLUENCE" AND THE COUNCIL ON HEMISPHERIC AF-FAIRS

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 5, 1977

Mr. McDONALD. Mr. Speaker, one of the newer groups active in churning out attacks on Latin American countries resisting Cuban-instigated terrorism is the Council on Hemispheric Affairs— COHA—the creation of Laurence R. Birns.

Birns, a professor of Latin American studies at the New School for Social Research, was an associate of Chilean Marxist-Leninist Orlando Letelier, killed by a bomb last September. Since then, Letelier has been exposed as having received covert Soviet funding channeled through Beatrice Allende, the wife of a top Cuban intelligence officer, to use for his organizing activities in this country. Letelier was in direct contact with Soviet and East German officials both in this country and overseas. Letelier appears to have been a highly effective "agent of influence" responsive to the U.S.S.R.'s desires and operating in U.S. academic and Government circles.

COHA made its formal debut at a Washington, D.C., press conference on June 15, 1976. At that time Birns stated COHA would engage in "education, information, and research activities." Birns made it plain that COHA's output would be directed to what he determined were "interested parties" in the media, Government, and other institutions. Later the mercurial Birns described COHA's purpose as "to manipulate the sophisticated political and academic commua statement indicative not so nities." much of candor as of Birns' arrogance and deep contempt for his targets.

At the initial press conference, Birns outlined COHA's three main areas of work: opposition to the confirmations and activities of certain State Department officials; the removal of "disk" tax incentives from new investments made by U.S. corporations in all Latin American countries which have "massively violated the human rights of their populations" meaning those countries who have declared states of emergency or martial law to cope with revolutionary terrorist threats; and to "cut off from U.S. support" the "vast majority of nations that make up the Organization of American States."

Birns has been circulating smear attacks against U.S. public figures who oppose the Havana/Moscow export of subversion and terrorism in Latin America and the Caribbean. Birns' latest target for smears has been Hon. James D. Theberge, U.S. Ambassador to Nicaragua, a distinguished scholar and expert on Soviet activity in Latin America. False and defamatory statements that Birns provided to Associated Press reporter Ary Moleson were distributed as "news" over the Spanish language service on March 5.

Ambassador Theberge sent a letter to AP executive Marvin Arrowsmith to defend himself against Moleson's use of irresponsible sources such as Mr. L. Birns of the so-called Council on Hemispheric Affairs in New York. Ambassador Theberge noted that Birns was well-known for his emotional outbursts and character assassinations of U.S. Government officials and others with whom he happens to disagree.

The Ambassador further pointed out the "disinformation" value Birns' smears have had for anti-U.S. Forces when spread through Latin America via

"responsible" media outlets:

While few pay much attention to Mr. Moleson's stories in the United States, it is regrettable, and should be of concern to you. that he regularly misinforms your Latin American readers by citing this particular reckless and ill-informed source. Irresponsible stories may titilate some readers, and they may be easy to write since they seem to be based on press handouts, but they seriously jeopardize the well-deserved reputation of the Associated Press for objective, balanced, reliable and informed reporting.

One of COHA's first actions was to send National Lawyers Guild-NLGactivist Sandford Katz, who had made his speciality in representing Black Panther Party and Black Liberation Army terrorists, to Argentina to look for Castroite film maker Raymundo Glazer. The NLG is a section of the Soviet controlled International Association of Democratic Lawyers-IADL-which coordinates legal defense and propaganda support for Soviet-approved revolutionaries. Katz gave a lengthy account of his Argentinian trip to the militant Trotskyite Spartacist League whose Partisan Defense Committee was the subject of my report on August 3, 1976, page 25383.

COHA's pro-Marxist-Leninist stance was evident from its initial press conference where Birns supported the Marxist Allende Government of Chile, Cuba, the pro-Castro dictatorship in Panama, the left-leaning Governments of Mexico and Venezuela while attacking Brazil and the countries who are the targets of the JCR united terrorist command: Argentina, Bolivia, Chile and Uruguay.

Birns made it plain that as i'ar as his organization was concerned supporting "human rights" means that the United States should promote economic assistance and diplomatic relations with totalitarian Marxist-Leninist regimes where even the most basic human rights to own property, run a business, own lands, or emigrate are nonexistent: but to break economic, diplomatic, and strategic ties to friendly countries where some political and press rights are restricted but where the people enjoy freedoms unknown in Communist lands.

COHA was to concentrate on economic manipulation, an area of particular interest to the late Orlando Letelier who prior to his becoming Allende's Ambassador to the United States worked for 10 years as an economist at the Inter-American Development Bank.

Director Birns stated that COHA expected to obtain "special foundation grants" with which to fund "public sector researchers" in Washington, D.C.,

who would concentrate on "the shifting political standards of the Eximbank, the Inter-American Development Bank, OPIC, the World Bank and other agencies. However, the economic information obtained by the COHA researchers would remain private unless specifically requested by "legislative committees" or the media

COHA has an office in New York at 30 Fifth Avenue, New York, N.Y. 10011 [212/982-4249 and 673-5470] and at 110 Maryland Avenue, NE., Washington, D.C. 20002 [202/547-0030] where a related organization, the Washington Office on Latin America (WOLA), has its offices.

COHA and Mr. Birns have also developed close ties with segments of the United Auto Workers bureaucracy in Washington. In a January 12, 1977, press statement, Birns attacked the appointment of Terence Todman as Assistant Secretary of State for Inter-American Affairs. Birns attacked Todman's appointment as "wrong because Todman is an established old-line cold warrior," in other words Birns expects Mr. Todman to work against increasing Soviet/Cuban subversion in Latin American and the Caribbean. Birns then went on to promote "the United Auto Workers' Esteban Torres" who would carry out what Birns and COHA see as the "required housecleaning" or purge of "cold-warriors."

Esteban E. Torres, assistant director of the UAW International Affairs Department, participated in the founding press conference of COHA. In his statement he pledged that "we of organized labor" would cooperate with COHA in attacking countries where the trade unions have been "purged" and union leaders jailed. Mr. Torres did not make any exceptions for countries where the trade unions were or had been dominated by the Communists who perverted the trade unions for their own totalitarian purposes.

COHA's principal and effective tactic is media manipulation via the cultivation contacts in the press and in Government. The newsletter, Latin America, published in London, had a perceptive article on the "Human Rights Lobby in the USA" last October in which both COHA and the WOLA operations were discussed. The article stated:

About 20 members of Congress are now consistently outspoken on the issue of human rights. Senators Edward Kennedy, Jacob [sicl Abourezk and George McGovern are promi nent in this field in the upper house, while representatives Michael Harrington, Thomas [sic] Koch, Toby Moffet, Donald Fraser and Ronald Dellums are all active in the lower chamber. These men are all supported by young staff assistants who are often more radical and more committed to human rights issues than the legislators themselves. They are often people who have been radicalized by their experience in the Peace Corps, the civil rights movement or in Vietnam. They have played an important part in organizing the congressional hearings on the activities of the CIA and multinational companies, and on human rights violations in Latin

These hearings are not so important for their impact on legislation as for their impact on public opinion, and as a means of extracting classified information from a secretive bureaucracy. * * *

At this point it may be worthwhile to examine the public record of Professor Birns activities and those of his trustees.

Laurence Richard "Larry" Birns, dob July 22, 1929, is a graduate of Columbia University and received a Ph. D. from Oxford. His teaching posts include serv ing as a lecturer at the London School of Economics noted for its radical Marxist orientation. Birns has been a Ford Foundation Latin American scholar and in 1973, prior to Allende's downfall, Birns was stationed in Santiago as the Senior Economic Affairs Officer of the United Nations Economic Commission for Latin America-ECLA. Birns has been associated with the New School for Social Research since 1965, and currently is a professor of Latin American studies. Birns' recent courses have included "Latin America, the United States and the Inter-American Crisis: Brazil, Chile, Cuba, and Mexico and the Dynamics of Development" and in "Futuristics," "Ten of the Most Perplexing Personal, Domestic and International Dilemmas for our Time." It is noted that Margaret Boe Birns also teaches at the New School: in 1971 she was a member of the National Council of the National Emergency Civil Liberties Committee-NECLC-a Communist Party, U.S.A. front which took a leadership role in efforts to subvert the U.S. Armed Forces during the Vietnam period and which now is taking a similar role in the attacks on the U.S. intelligence community.

Birns' activities as a propagandist date back at least to 1963 when he was editor of the Campus Voice. Birns circulated through the elite left academic, business and social circles of New York, numbering among his contacts William Meyers, president of the Fund for New Priorities in America, whose wife, Ruth Meyers, is an identified CPUSA member and a leader of Women Strike for Peace-WSPwhich works closely with the Sovietdirected World Peace Council. Birns was a participant in the Fund for New Priorities in America's "Congressional Conference on Cuba" held in Washington in April 1972. Both William Meyers and Ernest Chanes, a member of COHA's board of trustees, serve as leaders of CPUSA's National Emergency Civil Liberties Committee.

In July and August 1972, the former ECLA senior officer in Chile wrote two articles published by the "anti-imperialist" pro-Vietcong Clergy and Laity Concerned—CALC. Entitled "Chile: The Frying Pan Awaits the Fire" and "Chile: The Path Ahead," Birns praised the Marxist Popular Unity regime for its confiscation of privately owned businesses and hailed the oncoming Chilean revolution, by which he may have meant the "auto-coup" planned by the Unidad Popular Marxists.

With the overthrow of Allende in September 1973, Birns' activities became frenetic. As editor of International Documentation-North American—IDOC-NA—a publication organizing support for Castroites and other Marxist revolutionaries in Latin America. Birns participated in the Fund for New Priorities in America's February 28, 1972, "Congressional Conference on Chile" at which a

variety of speakers denounced the United States for not having aided the UP revolutionaries in Chile.

In his role as partisan advocate for Marxist revolutionaries in Latin America, Birns during 1974 was a speaker at a Trotskyite forum at Columbia University sponsored by the U.S. Committee for Justice to Latin American Political Prisoners—USLA—the guerrilla support arm of the Socialist Workers Party—SWP—which is the U.S. section of the terrorist Fourth International. Birns appeared in September 1974 as a witness before the House Committee on Foreign Affairs in hearings on the "U.S. and Chile During the Allende Years. 1970–73."

the Allende Years, 1970-73."

More recently Birns has been associated with a number of Castroite and Old Left groups concerned with Latin America including the North American Congress on Latin America-NACLA; the National Coordinating Committee in Solidarity with Latin America-NCCSCa CPUSA front whose director. Susan Borenstein, a veteran of both the DuBois Clubs of America and the Venceremos Brigade who was in Washington to meet with Letelier on the day of his murder; the Solidarity Committee with the Argentine People-SCAP-which is closely tied with the Movimiento Antimperialista por el Socialismo en Argentina-MASA-which was discussed in more detail in my report on March 30, 1977, page 9727.

Birns was a participant in the 1976 third session of the International Commission of Inquiry Into the Crimes of the Military Junta in Chile, a creation of the Soviet's World Peace Council. The Commission was headed by Hans Goran Franck who previously headed up the WPC's "Commission of Inquiry Into U.S. War Crimes in Vietnam." Recent press stories have revealed that Orlando Letelier used his covert funding to pay for the travel expenses of American public figures to the Mexico City meetings. Birns began to organize COHA shortly after the Mexican meetings.

COHA's board of trustees includes: Senator James Abourezk.

Richard Barnet, codirector, Institute for Policy Studies—IPS—a Marxistoriented think-tank seeking to bring down the system through the system and which has never disregarded the role of violence in what it euphemizes as social change. IPS staff include members and leaders of revolutionary Marxist-Leninist and terrorist organizations ranging from Weathermen through the Trotskyite Fourth International, the Zimbabwe African People's Union, and the Puerto Rican Socialist Party.

Barnet from 1961 to 1963 was Deputy Director for Political Research of the U.S. Arms Control and Disarmament Agency. In 1969 Barnet traveled to Vietnam where according to Hanoi Radio he told the Vietnamese that:

The message we would bring back with us is the message that the Vietnamese will continue to fight against the aggressors, the same aggressors that we will continue to fight in our own country * * *.

In 1971 Barnet was a sponsor/endorser of the People's Peace Treaty de-

veloped by the Vietnamese Communists. And Barnet was active with the Lawyers Committee on American Policy Towards Vietnam, founded by the Stalinoid leaders of the National Emergency Civil Liberties Committee, a CPUSA front.

Barnet, a member of the elite Council on Foreign Relations, has been a leader of Business Executives Move for Peace in Vietnam—BEM—now renamed Business Executives Move for New National Priorities.

In November 1975, Barnet participated in two anti-intelligence conferences, in Ann Arbor, Mich., the "Teach-In on Techno-Tyranny," and the so-called Conference on Controlling the Intelligence Agencies sponsored by the Center for National Security Studies, a project of the Fund for Peace which is staffed to a considerable extent by current and former IPS fellows and trustees. Cosponsors of the CNSS conference included Lillian Hellman's Committee for Public Justice, the Institute for Policy Studies, American Civil Liberties Union, Americans for Democratic Action, Common Cause, and the United Automobile Workers of America.

Barnet was a signer of a New York Times ad on September 23, 1973, by the Chile Emergency Committee in support of the Allende regime. He has been associated with the CPUSA's national coordinating committee in solidarity with Chile—NCCSC—and with the local D.C. Chile Solidarity Committee, which is affiliated with the NCCSC.

Barnet is a member of the board of advisers of the Fund for Peace's disarmament propaganda project called In the Public Interest, as well as of the Center for National Security Studies. Barnet was a founding COHA trustee; however, it is noted that his name was withdrawn in mid-February after Letelier's activities had become an emberrassment.

Ernest Chanes, president of the Consolidated Water Conditioning Corp., 360 West 11th Street, New York, N.Y., is a long-time active leader of CPUSA's National Emergency Civil Liberties Committee—NECLC. Chanes' more recent activities include organizing the April 1972 "Congressional Conference on U.S.-Cuban Relations" for the Fund for New Priorities in America—FNPA—headed by William Meyers, also active in NECLC.

Chanes is a member of Business Executives Move for New National Priorities. Along with a number of well-known CPUSA members and supporters of CPUSA fronts and causes, Chanes sponsored an ad in the New York Times on September 23, 1973, by the Chile Emergency Committee, a precursor to the National Coordinating Center in Solidarity with Chile, a CPUSA front. Chanes also sponsored the "Expo-Cuba" celebration of the Cuban 26th of July organized by the Venceremos Brigade, a coalition of CPUSA youth activists and Castroites

In 1974 Chanes was an active sponsor of the Puerto Rican Decolonization Committee, now the Puerto Rican Solidarity Committee, a support group for the Castroite Communist Puerto Rican Socialist Party, which has maintained an office in

Havana since the early 1960's. Chanes is a sponsor for the Center for Cuban Studies, a Castroite propaganda mill headed by Sandra Levinson, a member of the NECLC national council.

In May 1975, Chanes sponsored a conference by CPUSA's National Alliance Against Racist and Political Repression-NAARPR-attacking Senate bill 1, the Criminal Code Revision which in its original draft contained provisions which would have strengthened internal security protections. During 1975 and 1976, Chanes has been a sponsor of CPUSA's National Coordinating Center in Solidarity with Chile: of the "Hard Times Conference" organized by the Weather Underground's Prairie Fire Organizing Committee-PFOC; and of the July 4 Coalition, developed by the Castroite Puerto Rican Socialist Party and the PFOC

Judith Loeb Chiara, associated with the Physicians Forum and the ad hoc Emergency Committee to Save Chilean Health Workers.

William Dyal, president, Inter-American Foundation, a U.S. Government corporation established in 1969 "to support social change—in Latin America and the Caribbean," was as participant in the Fund for New Priorities in America's 1972 Congressional Conference on U.S.-Cuba Relations.

Richard Rees Fagen, a consultant to the Linowitz Commission of which COHA's Kalman H. Silvert was a member: a member of the Institute for Policy Studies Transnational Institute's Ad Hoc Working Group on Latin America set up under Orlando Letelier's supervision; and professor of political science at Stanford University. The IPS/TNI Ad Hoc Working Group on Latin America was a coalition effort of Castroite revolutionaries and liberal academics who were working during 1976 on production of the second Linowitz Commission report. The report supports many foreign policy goals of the Cubans and Soviet Union including U.S. abandonment of the Panama Canal and institution of a policy of nonintervention by any means-political, economic, or military-against Communist aggression. See my report of March 8, 1977, for additional detail.

Fagen is a past president of the American Political Science Association and of the Latin American Studies Association.

Fagen traveled to Cuba in July 1969. with a group of U.S. revolutionaries, mostly members of the Weatherman faction of SDS, to meet with North Vietnamese Communists and Vietcong officials. With Fagen on that trip were Robert "Bo" Burlingham, indicted with other Weatherman leaders in a bomb conspiracy plot, a former Ramparts editor and since 1974 an editor of the radical journal, Working Papers for a New Society, cosponsored by IPS and its offshoot, the Cambridge Policy Studies Institute: Sandra Levinson, a strident Castroite now active with a Cuban propaganda outlet in New York City called the Center for Cuban Studies; James Petras who combines support of Castro with his Trotskyism; and Saul Landau, active in support of the Cuban Communists since the 1960's, an IPS fellow, and with Orlando Letelier codirector of IPS's Transnational Institute.

Fagen was a recipient of Ford Foundation grants in 1967-68, 1969, and 1972-73 during which period he lived in Chile as a "consultant" under the Marxist Allende regime.

In 1967 Fagen was a founding sponsor of the U.S. Committee for Justice to Latin American Political Prisoners-USLA-a front of the Trotskyite Communist Socialist Workers Party, the U.S. section of the Fourth International which has organized the training of Latin American Trotskyites as terrorists by the Cubans since 1962. USLA's function is to provide support to arrested members of revolutionary groups. Fagen has retained his Trotskyite contacts, serving as a USLA "honorary" executive board member in 1974 and in July 1976 signed a letter protesting the Peruvian Government's expulsion of the Trotskyite terrrorist Hugo Blanco, a leader of the Fourth International.

Fagen has been active in the agitation against the non-Communist government of Chile which deposed Allende in 1973. He was a sponsor of the second Chile Solidarity Conference in 1975 organized by the Communist Party, U.S.A., controlled National Coordinating Center in Solidarity with Chile and in which many Castroites are also active

In July 1975 and again in 1976, Fagen was a sponsor of the Venceremos Brigade's yearly celebration of the Cuban Communist July 26 holiday, and in 1975 signed a letter inviting Melba Hernandez, a Cuban Communist leader active in the World Peace Council's terrorist support programs, to speak at the New York City rally. Fagen is a sponsor of the Cuba Resource Center, a propaganda mill which works closely with the Venceremos Brigade and the Center for Cuban Studies.

Fagen is a supporter of the North American Congress on Latin America-NACLA-established from the SDS Radical Education Project and characterized frankly by the SDS leadership as the intelligence-gathering arm of the revolutionary left. NACLA staffers have very close ties to the Cuban regime, and CIA turncoat Philip Agee credited NACLA along with members of the Cuban Communist Party with having aided him in producing his book. Said Fagen of NACLA "long before the Establishment press and Congress took note, NACLA understood what was happening in Chile and why.'

Frances Farenthold, president, Wells College.

Manuel Fierro, president, National Congress of Hispanic Americans formed in 1975

Congressman Donald Fraser.

Patrick E. Gorman, chairman of the board, Amalgamated Meatcutters and Butcher Workmen of North America (AFL-CIO), a union dominated by identified Communist Party, U.S.A. activists including Abe Feinglass, a union vice-president and key organizer in gaining union support for the CPUSA's NCCSC and local NCCSC affiliates.

Gorman in 1971 was a sponsor of the People's Peace Treaty in support of the Vietcong and sponsored assorted demonstrations held by the CPUSA-influenced People's Coalition for Peace and Justice—PCPJ—and predecessors. He is

a sponsor of CPUSA's National Committee to Re-Open the Rosenberg Case and in 1975 sponsored the retirement Tribute to Ernest DeMaio, a CPUSA member and vice-president of the United Electrical Workers who now is a United Nations representative of the Soviet Union's international trade union front, the World Federation of Trade Unions.

Under Feinglass's prompting, Gorman is a member of the NCCSC's Chicago Citizens Committee to Save Lives in Chile and has sponsored various NCCSC activities.

Robert G. Lewis, secretary, National Farmers Union and active with that organization for over 15 years. Lewis attended COHA's founding press conference and stated he saw as a principal problem in Latin America land ownership and land redistribution. The National Farmers Union was formed from an amalgamation of the old Communist controlled Iowa Farmers Union and the Farmers Educational and Cooperative Union.

Saul H. Mendlovitz, president, Institute for Worl³ Order, formerly called the World Law Fund. Mendlovitz is associated with Richard Barnet and Richard Falk, both of whom worked with Mendlovitz in the Lawyers Committee on American Policy Toward Vietnam, set up by CPUSA's National Emergency Civil Liberties Committee—NECLC.

Barnet and Falk are both affiliated with the Institute for World Order, as is Richard Fernandez, former director of the "anti-imperialist" Clergy and Laity Concerned, who with Falk spoke in support of the terrorist Palestine Liberation Organization at a February conference organized by IPS and the American Friends Service Committee.

Mendlovitz' credits include serving as chairman of Rutgers University Law School and as professor of international

Nicholas Nyary, president of the Fund for Peace, attended meetings of the Soviet-dominated World Peace Council at which a campaign for Western disarmament in the face of increasing Soviet arms development was coordinated. Nyary is reportedly an associate of William Myers of the Fund for New Priorities in America, and is also a member of the American Committee on U.S.-Soviet Relations, a supporter of détente with the U.S.S.R. which has opposed the Jackson amendment tying U.S.-Soviet trade to human rights issues. Orlando Letelier was active in the Center for International Policy-CIP-another Fund for Peace project in Washington.

Thomas Quigley, U.S. Catholic Conference, Office of International Justice and Peace. Quigley has been highly active in anti anti-Communist Latin American activities including participating in the Fund for New Priorities in America's April 1972 "Congressional Conference on U.S.-Cuba Relations" as a representative of the National Council of Churches Division for Latin America; participating in a meeting on Argentina sponsored by the Trotskyite Socialist Workers Party's U.S. Committee for Justice to Latin American Political Prisoners—USLA—in 1973; sponsoring the CPUSA's NCCSC

second national conference on Chile in February 1975, et cetera.

Abe Rosenstein.

Rabbi Morton Rosenthal, Anti-Defamation League.

Kalman H. Silvert, a Ford Foundation Program Advisor and professor of politics at New York University who died in 1976 after COHA's founding. Silvert was highly active as a member of the Linowitz Commission and was instrumental in obtaining funding for it and for a number of young leftist academics who were his proteges. Silvert was associated with the Fund for New Priorities in America and participated in FNPA's 1972 Congressional Conference on U.S.-Cuba Relations as a representative of the Ford Foundation and as director of New York University's Ibero-American Institute.

Ben Stephansky, an expert on international labor matters and from 1961–64 Ambassador to Bolivia. Stephansky is currently associated with the Ford Foundation. In 1972, at the Fund for New Priorities in America's Congressional Conference on U.S.-Cuba Relations, Stephansky was critical of the U.S. position of isolating Castro.

Rev. William Wipfler, National Council of Churches, Director, Latin American Division. A participant in the Fund for New Priorities in America's February 1974 Congressional Conference on Chile; a sponsor/signer of the advertisement in the New York Times on September 23, 1973 by the Chile Emergency Committee, a precursor to the National Coordinating Center in Solidarity with Chile; and a sponsor of NCCSC activities. Wipfler has just returned from a trip to Cuba with high praise for the progress of the Cuban people under communism

Leonard Woodcock, president, United Auto Workers. In October 1973, Woodcock sent an appeal to the Chilean Military Government asking for the release of Chilean Communist Party leader Luis Corvalan—now living in Moscow. Woodcock is also a member of the Committee for Public Justice, headed by admitted former CPUSA activist and apologist for the Stalinist purge trials Lillian Hellman. The CPJ is working with the ACLU and related groups for the crippling and destruction of the FBI and other internal security agencies.

In February, 1977, Birns added to the COHA board of trustees Chauncey Alexander, executive director, National Association of Social Workers; Leonel J. Castillo, Controller, City of Houston; Joseph Eldridge, Washington Office on Latin America; Terry Herndon, executive director, National Education Association; Frank Mankiewicz, Peace Corps director for Latin America under the Johnson administration and Cuba traveler; John Plank, University of Connecticut and formerly with the Department of State and Brookings Institution; and Frieda Silvert, widow of Kalman Silvert.

COHA's counsel is Leon I. Jacobson of New York. The COHA executive committee includes Birns, Chanes, Fierro, Quigley, Rosenthal and Woodcock.

COHA provides an interesting study in interlocking relationships between overt old and new left organizations and allegedly responsible projects funded and at least nominally directed by the large foundations. As legislators we must be aware of special interest groups and subtle "lobbying" pressures from groups like COHA. And in that the ultimate special interest served appears to be totalitarian Marxism-Leninism, and in that Orlando Letelier was deeply involved in the formation of COHA, such networks of influence may be a prudent subject for congressional investigation.

OAHE MUST BE FUNDED

HON. JAMES ABDNOR

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 5, 1977

Mr. ABDNOR. Mr. Speaker, the trust of the people of South Dakota in the Federal Government stands in jeopardy if the Congress allows President Carter's hasty and ill-conceived determination to cancel the Oahe Irrigation is allowed to stand. Today, I am joining the Governor of South Dakota, Congressman Pressler, Senator McGovern and a bipartisan delegation from South Dakota in statements before the Appropriations subcommittees on Public Works of both the House and the Senate, supporting the funding of both the Oahe and Pollock-Herreid Irrigation units.

My statement is as follows:

STATEMENT OF THE HONORABLE JAMES ABDINOR OF SOUTH DAKOTA IN SUPPORT OF FUNDING FOR THE OAHE AND POLLOCK-HERREID IRRIGATION UNITS

Mr. Chairman and members of the Subcommittee, I appreciate the opportunity to appear before you today in support of fiscal year 1978 funding for the Oahe and Pollock-Herreid irrigation units. It is unfortunate that your deliberations have been clouded by the President's hasty and ill-conceived recommendations which will, if upheld by Congress, result in the foreclosure of opportunities for needed water resource development throughout the nation. South Dakotans share the deep sense of betrayal the President's actions have caused among those who recognize the importance of the wise and productive development of our water resources, and I know that includes the members of this committee.

Water resource development is not a partisan issue, nor is it a subject we can afford to put off as we have done with our energy problems. It is not with any partisan intent, therefore, that I come before you in support of the recommendations of President Ford, rather than those of President Carter. The Ford Budget provides \$16.96 million for the Oahe Unit. The Carter proposal is for termination of the project, with no funds requested for further study or any other purpose and without so much as an acknowledgment of the commitment of the Federal government to our state.

It is incomprehensible to me that President Carter can recommend billions for temporary public works jobs and at the same time choose to ignore the recurring problems of drought, underemployment, and outmigration that will be addressed through sound water resource development projects. Such projects will not only provide direct construction jobs at a cost comparable to those in the President's public works pro-

posal but they will also continue to provide new job opportunities and abundant new wealth once they are completed. Under the circumstances, the President would have been far more consistent to have recommended that the full capabilities of the Bureau of Reclamation (\$21.46 million for the Oahe Unit; \$500,000 for the Pollock-Herreid Unit) be funded in the coming fiscal year.

Although our lack of action in dealing with our energy problems might be termed a national disgrace, it will seem pale by comparison to the inevitable result if we do not come to grips with the nation's water development needs. The President's recommendation that 30 major water development projects receive no further funding flies in the face of the urgent needs they were authorized to meet. Taken on merit alone, the President's recommendations must be rejected; but considering the way they have been handled by the Administration, they become insulting.

For example, the Department of the Interior could not tell us two days ahead of time who would be on the "review team" which would come to South Dakota to take public testimony on the Oahe Unit. I detailed other outrageous aspects of the "review" process in my statement to the review panel on March 21, and I would like to furnish a copy of that statement for the committee's Whatever value might be ascribed to the President's recommendations is devastated by the lack of integrity of the process by which they were determined. Clearly, the President and his advisors have failed to appreciate the importance of water development, the historical commitments regarding projects such as the Oane Unit, and-most importantly-the requisites of the future if the needs of our citizens are to be met.

Having made these general points, let me turn to the specific controversial surrounding the Oahe Unit. It is evident from the difficulty members of Congress have had in obtaining information from the White House that the President had no particular criteria whatsoever upon which he based his judgment to terminate certain projects. Almost as an afterthought, however, three broad "screening" criteria were announced as the basis on which all water projects would be weighed for possible termination. These criteria are safety considerations, benefit/cost ratio, and environmental effects.

There are no valid safety questions which might justify termination of the Oahe Unit, but the safety of the James River—both in terms of quality and quantity—will be enhanced as a source of municipal water supply.

The Oahe Unit has been found to be economically feasible in every benefit/cost analysis ever performed using nationally recognized and Congressionally mandated procedures. The overall benefit/cost ratio (which considers spinoff benefits other than those realized directly) for the Oahe Unit has been calculated at 3 to 1. The Oahe Unit is justified in its own right; but even if it were not, to argue that it should be stopped is to fail to recognize the debt owed South Dakota by the federal government. We are deserving of federal assistance in developing our state's water resources and the Oahe and Pollock-Herreid Units are but a portion of the development to which we are entitled.

The third criterion, and the most nebulous of all, used in the "screening" process is "environmental impacts." The Interior Department's March 10th announcement which stated, "a project must have no significant environmental impacts," is indicative of the self-serving, prejudgmental nature of the "review." In my view the whole purpose of water resource development is to significantly alter the environment for the benefit of mankind. The Oahe and Pollock-Herreid Units will certainly do so.

It would make more sense to forego projects which "pass" the test of no significant beneficial environmental impact than those which "fail" it. If every human endeavor had been subjected to such a "screening criterion," we'd still be living in caves and being served up as lunch for our animal friends. Obviously there are environmental absolutes which must not be infringed upon. No one questions that, but neither can one accept the President's recommendations in view of the arbitrary and haphazard way environmental factors have been applied.

mental factors have been applied.

There are a number of other environmental issues of which I am sure the President has no personal knowledge but which are of concern to those who will be affected by the Oahe Unit. Included among these are the irrigability of the soil, the future of the James River, and wildlife habitat losses and mitigation.

As far as irrigability of the soil is concerned, I would point out that the Oahe Unit was the first federally authorized project to have artificial drainage included as part of the original project cost. Detractors cling to early and outmoded soil survey data which indicated that irrigation could be difficult in the project area, but exhaustive more current and more pertinent studies have been undertaken by the Bureau of Reclamation. It is clear from these studies that the project area can support sustained irrigation, and I would like to provide for the hearing file the statement Dr. Larry Fine the Plant Science Department of South Dakota State University presented to the review panel. Based on his own research experience, Dr. Fine concurs with the Bureau's conclusion that the land is irrigable.

Dr. Fine also discusses the quality of the return flows from his irrigation research plots and goes so far as to say that he and his associates have drunk them in preference to other available water supplies. The Bureau's studies have indicated that at times the quality of the James River will be degraded somewhat over its present condition by construction of the Oahe Unit. At other times, however, the quality will be improved. Both the quality and quantity of the water flow in the James will be stabilized.

If arbitrary water quality standards are to be used to justify terminating the project, are we also going to close down the water systems of the 60% of South Dakota communities which fall to meet those standards? Of course we are not, but these communities will never be able to improve their water systems if such improvements must pass the criteria the President proposes to apply to water developments. Furthermore, an expanded economic base—such as the Oahe Unit will provide—is the very thing many of these communities need to make water system improvements feasible.

Under current conditions the problem of water quality is often moot, however, since records show that the stretches of the James in the project area are dry about 40% of the time and flow less than 30 cfs about 75% of the time. The stabilized flow of the Oahe Unit can provide will be a benefit more than offsetting any unalterable degradation in water quality. If this were not so, the City of Huron, which takes its water from the James, would not be strongly supporting the project and looking to it as the solution to the City's precarious water supply problem.

Although the flow of the James will be stabilized by irrigation return flows and supplemental water releases, the flooding potential will also be increased somewhat. Obviously, a river which has some water in it when flood scale precipitation occurs will top its banks more quickly and severely than if it were dry. For this reason the authorized plan calls for channelization. There are several alternatives and combinations of alternatives by which to deal with this problem,

however, and it is my belief they will result in not only preservation but enhancement of the aesthetic and productive character of the James.

Wildlife specialists have pointed out the costs of channelization as far as fisheries and wildlife are concerned, and these factors will be taken into account as the project proceeds. The U.S. Fish and Wildlife Service also recently released their "Revised Wildlife Plan," which details their suggestions for the wildlife habitat mitigation and enhancement aspects of the project. The public reaction to the revised plan has been overwhelmingly negative due to the large acreage (39,940 acres) which would be removed from private ownership, particularly in certain counties such as Day (12,185 acres), Beadle (6,205 acres), Clark (5,183 acres), and Brown (4,550 acres), for example.

There are those who believe that the U.S. Fish and Wildlife officials timed the release of this document to coincide with these hearings and to foment opposition to the Oahe Unit. The August 3, 1976, letter I received from then Assistant Secretary of Interior for Fish and Wildlife Parks Nathaniel Reed leads me to believe, however, that the Fish and Wildlife Service simply hopes to have the Bureau of Reclamation acquire property they intend to gain control of anyway.

Specifically, Assistant Secretary Reed wrote that they plan to gain control of about 330,-000 acres (110,000 in fee title and 220,000 by easement) in South Dakota in the next 10 to 15 years. I am uncertain whether or not the nearly 40,000 acres they have suggested be acquired in conjunction with the Oahe Unit is in addition to or a part of the 110,000 acres they intend to acquire anyway, but it is clear that the proposed Oahe mittgation features are the small end of the problem.

Officials of the Bureau of Reclamation should not be made "point men," through the Oahe mitigation features, for the U.S. Fish and Wildlife Service in acquiring wetlands. In view of the expansive plans of the U.S. Fish and Wildlife Service for South Dakota, acquisition of habitat lands for the Oahe Unit should be kept to the bare minimum required to mitigate identified losses. This would immediately reduce by 8,461 acres (which represents the net gain in natural wetland acres under the Revised Plan) the amount of habitat lands to be acquired for the project. Certainly, all wildlife habitat lands should be acquired from willing sellers, with the concurrence of the county commissioners.

Condemnation should not be used at all in acquiring wildlife acres, and it should be used as sparingly as absolutely possible in acquiring property for necessary project features. It has been argued that an unduly large percentage of the parcels of land thus far acquired have been taken through condemnation proceedings, but it has also been pointed out that these represent a small percentage of the total acreage acquired. It has also been suggested that organized opposition has actively encouraged those who have been asked to settle as a willing seller to resist doing so.

Be that as it may, I am familiar with condemnation proceedings through my own losses to the Interstate Highway; and I am of the opinion that there must be a better and less expensive means of protecting the rights of private property owners and at the same time allowing the acquisition of property needed for projects in the public interest. In this regard I would like to furnish for the hearing file a copy of a report done by the Library of Congress, at my request on "Alternatives to Traditional Court Proceedings for the Valuation of Land in Federal Condemnation." It speaks favorably of the potential of a system of arbitration.

Perhaps the most pertinent of all criticisms of the Oahe Unit has been the notion that

"the people don't want it." In my view a very well organized campaign has been waged to convince South Dakotans that they don't want the project. Still, surveys—including two boxholder questionnaires of my own show support in the range of 70 to 85%

The problem is, of course, determining who should have a voice in deciding the future of the project. The Oahe Conservancy Sub-District Board will appear before you today and undoubtedly express the majority position that fiscal year 1978 funding should be held in abeyance while they review the project. As far as the Board is concerned, however, the majority represents a minority of the people in the Sub-District. I understand they do represent the larger portion of the taxable property which supports the Sub-District, but the American way is one-man/ one-vote not one-dollar/one-vote. Also, it should be pointed out that the new majority on the Board did not run on platforms pledged to terminating the Oahe Unit but, rather, pledged to questioning its imperfections. As recently as March 21st the Board requested and received neutral time to appear before the Oahe Review Panel.

The Oahe Sub-District Board is not the most direct representative of the prospective irrigators themselves. The elected officials closest to the irrigators are the Spink and West-Brown Irrigation District Boards, both of which strongly support the project. It has been argued that the farmers don't want the project, but it is evident that those who will be irrigating do. It is beyond belief that once the water becomes available there will not be enough farmers who want to make use of it. It has also been said that it is those in the towns who want the project, but why should farmers who will not be affected have any more to say about the project than townspeople who may experience a marked improvement in business once the project is in operation? Anyone who will be adversely affected deserves every consideration, and I will do my utmost to see that he gets it.

On the other hand, extremely strong positions of support have been adopted by numerous associations and organizations throughout the state. I'd like to furnish for the hearing file an editorial from the March 17, 1977, edition of the Aberdeen American News, which expresses the broad support of the press throughout the state. Perhaps most impressively of all, the South Dakota Legislature, in an unusual show of bipartisan unity enacted into state law a policy in support of continued funding of the Oahe Unit. In the entire Legislature two votes were cast against the bill. Finally, Governor Kneip, Congressman Pressler, and I appear before you today to continue the tradition of bipartisan unity observed by every major official elected in our state since 1944. Senator McGovern stands with us on the other side of the Hill; but, frankly, the best I can say of our junior Senator, Senator Abourezk, who has announced he will not seek re-election, is that he is not against us.

Senator Abourezk is primarily concerned with supporting the position of the Sub-District Board, apparently without regard to what their position might be. He has said that South Dakota should not be penalized through the loss of federal assistance simply because South Dakotans have the courage to review the merits of the Oahe Unit. I certainly agree with his position in that respect, and I intend to be among the first to support any changes the Sub-District Board may recwhich will improve the project without jeopardizing its completion. I sincerely believe, however, that the Senator has underestimated the threat to funding for the Oahe Unit and the implications of the President's "criteria" for potential additional water resource developments in our state.

It must be noted that the President simply

It must be noted that the President simply proposes to terminate the Oahe Unit and the 29 other projects on his current "hit list." The period of "review" for these projects ends on April 15, 1977, and he proposes no alternative water developments to replace them. The President intends to save the Treasury the full cost of all of these 30 projects; and, although I do firmly support the goal of fiscal responsibility, I do not believe all South Dakotans fully appreciate the fact that the President contemplates no further federally sponsored water resource development in our state.

For example, many have suggested that funding for the Oahe Unit could be better spent at this time on the various rural and municipal pipelines proposed and so badly needed throughout South Dakota. I will do everything in my power to see these pipelines built; but in my judgment not only will Oahe funding not be diverted to these pipelines but if the President's criteria are applied to them, they will never be built at all. South Dakotans are also entitled to know the implications of the President's criteria as far as the Pollock-Herreid Unit, the Belle Fourche Project re-authorization, the lower-James proposal, urgent bank stabilization, and additional hydropower facilities are concerned. Indeed, the Oahe Unit's delivery system is the most efficient means of transporting water into eastern South Dakota. If it is not feasible, obviously no other delivery system is either, and eastern South Dakota will be

left high and dry.

While the President is explaining these ramifications of terminating the Oahe Unit, perhaps he would also justify why our downstream neighbors are enjoying the benfits of flood control and navigation at the expense of over 1 million acres in North and South Dakota. It would also be instructive to know why Nebraska should get more of our hydropower than we do and why Minnesota gets more than North and South Dakota combined (35.4% for Minnesota FY 1976 versus 11.6% each for North and South Dakota). Perhaps the President can justify, too, the higher rates which will be required for the hydropower if authorized irrigation is foregone in the Missouri River Basin.

But all of that assumes that the President's recommendations will be allowed to stand. I believe Congress will reject the President's proposed budget cuts for the most part, and I am hopeful that the Oahe Unit will be among those projects receiving the full funding requested in the Ford budget. President Carter undoubtedly would have had better success if he had attempted to pick off the projects he chooses to terminate one at a time. South Dakota is a small state by population, and we do not have the political clout to force our will upon the President or the Congress.

We do have the irrevocable moral commitment of the Federal government, however, to provide water resource development assistance to our state in fulfillment of the promise made to us when we agreed to the inundation of one-half million acres of our precious land resources. South Dakota does not yet have a single acre irrigated out of the Missouri River mainstem pursuant to the commitment made to us in the Flood Control Act of 1944. We do have two authorized projects—the Oahe and Pollock-Herreid Units—which only await funding.

I urge that you recommend to the House that \$16.96 million be appropriated for the Oahe unit and \$500,000 for the Pollock-Herreid Unit. Please do not betray our trust.

Thank you.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of all meetings when scheduled, and any cancellations or changes in meeting as they occur.

As an interim procedure until the computerization of this information becomes operational, the Office of the Senate Daily Digest will prepare such information daily for printing in the Extensions of Remarks section of the Congressional Record.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Wednesday, April 6, 1977, may be found in the Daily Digest section of today's Record.

The schedule follows:

MEETINGS SCHEDULED APRIL 7

8:00 a.m.

Energy and Natural Resources Subcommittee on Public Lands and Resources

To resume consideration of S. 7, to establish in the Department of Interior an Office of Surface Mining Reclamation and Enforcement to administer programs to control surface coal mining operations.

3110 Dirksen Building

9:00 a.m.

Agriculture, Nutrition and Forestry
To hold hearings to receive testimony
on the administration's proposals relative to the food stamp program.

Foreign Relations 322 Russell Building

Subcommittee on Foreign Economic Policy
To resume, in closed session, oversight
hearings on major international economic issues facing the United States.
S-116, Capitol

9:30 a.m.

Banking, Housing, and Urban Affairs
To hold a hearing on the nomination of
Chester Crawford McGuire, of California, to be an Assistant Secretary of
Housing and Urban Development.
5302 Dirksen Building

Commerce, Science and Transportation

Aviation Subcommittee

To continue hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.

5110 Dirksen Building

Environment and Public Works Subcommittee on Resource Protection

To hold hearings on proposed fiscal year 1978 authorizations for national wild-life refuges at San Francisco Bay, Calif., Great Dismal Swamp, Va., and Tinicum National Environmental Center, Pa.

4200 Dirksen Building

Human Resources Subcommittee on Child and Human De-

To continue hearings on the proposed extension of the Child Abuse and Prevention Treatment Act (Public Law 93-247).

4232 Dirksen Building

10:00 a.m.

Appropriations Labor-HEW Subcommittee

To hold hearings on proposed budget estimates for fiscal year 1978 for the Department of HEW, to receive testimony on research programs for and to aid families of, deceased children suffering from sudden infant death. S-128, Capitol

Appropriations Military Construction Subcommittee

To resume hearings on proposed budget estimates for fiscal year 1978 for military construction programs, on funds for NATO and classified programs.

S-146, Capitol

Armed Services

Subcommittee on Research and Development

To resume closed hearings on proposed military procurement authorizations for fiscal year 1978 for weapons pro-

224 Russell Building

Commerce, Science, and Transportation Merchant Marine and Tourism Subcommittee

To hold hearings on S. 1019, to authorize funds for fiscal years 1978 and 1979 for certain maritime programs.

235 Russell Building

Energy and Natural Resources

Subcommittee on Energy Production and Supply

To continue hearings on S. 977, to conserve gas and oil by fostering increased utilization of coal in electric generating facilities and in major industrial installations.

3110 Dirksen Building

Select Intelligence

To hold a closed hearing on proposed fiscal year 1978 authorizations for Government intelligence activities.

S-407, Capitol

Special Aging

To continue hearings on the impact on older Americans of rising energy costs. 1224 Dirksen Building

10:30 a.m.

*Banking, Housing, and Urban Affairs

To hold oversight hearings on the 1977 budget of the Federal Reserve System. 5302 Dirksen Building

Commerce, Science, and Transportation To hold a business meeting.

235 Russell Building

Foreign Relations

Subcommittee on Foreign Assistance

To mark up proposed legislation authorizing funds for fiscal year 1978 for bi-lateral development assistance.

6202 Dirksen Building

1:00 p.m.

Foreign Relations

Subcommittee on Near Eastern and South Asian Affairs

To meet in closed session to receive a briefing from Central Intelligence Agency officials on the situation in Lebanon.

S-116, Capitol

2:00 p.m.

Armed Services

Subcommittee on Research and Development

To resume closed hearings on proposed military procurement authorizations for fiscal year 1978 for weapons programs.

224 Russell Building Commerce, Science, and Transportation

To hold hearings on the nomination of Dr. Frank Press, of Massachusetts, to be Director or enc.
Technology Policy.
5110 Dirksen Building

Commerce, Science, and Transportation Surface Transportation Subcommittee To hold hearings on S. 562, the proposed

Union Station Improvement Act 235 Russell Building

APRIL 8

9:00 a.m. Governmental Affairs

To continue hearings on S. 826, to establish a Department of Energy in the Federal Government to direct a coordinated national energy policy.

APRIL 11

10:00 a.m.

Governmental Affairs

Subcommittee on Governmental Efficiency To receive testimony on a GAO study alleging inaccurate financial records of the Federal flood insurance program. 6226 Dirksen Building

APRIL 18

10:00 a.m.

Appropriations HUD-Independent Agencies Subcommittee To resume hearings on proposed budget estimates for fiscal year 1978 for the Department of Housing and Urban Development and Independent Agencies, to hear public witnesses.

1318 Dirksen Building

Banking, Housing, and Urban Affairs

To hold hearings on proposed housing and community development legislation with a view to reporting its final recommendations thereon to the Budget Committee by May 15. 5302 Dirksen Building

Environment and Public Works Water Resources Subcommittee

To resume hearings on national water policy in view of current drought situations.

4200 Dirksen Building

To hold hearings on S. 825, to foster competition and consumer protection policies in the development of product standards.

2228 Dirksen Building

APRIL 19

9:30 a.m.

Appropriations Interior Subcommittee

To resume hearings on proposed budget estimates for fiscal year 1978 for the Department of the Interior and Related Agencies, to hear public wit-

nesses.

1114 Dirksen Building

Appropriations

Transportation Subcommittee

To resume hearings on proposed budget estimates for fiscal year 1978 for the Federal Aviation Administration. 1224 Dirksen Building Commerce, Science, and Technology

Science, Technology, and Space Subcommittee

To hold hearings on S. 126, to establish an Earthquake Hazards Reduction Program.

5110 Dirksen Building

Energy and Natural Resources

To resume hearings on S. 9, to establish a policy for the management of oil and natural gas in the Outer Continental Shelf.

3110 Dirksen Building

Environment and Public Works
To resume hearings on the proposed replacement of Lock and Dam 26, Alton, 111.

4200 Dirksen Building

10:00 a.m.

Banking, Housing, and Urban Affairs

To continue hearings on proposed hous-ing and community development legislation with a view to reporting final recommendations thereon to the Budget Committee by May 15. 5302 Dirksen Building

Consumer Subcommittee

To hold oversight hearings on activities of the Consumer Product Safety Commission.

235 Russell Building

Governmental Affairs

*Subcommittee on Reports, Accounting and Management

To hold hearings to review the process by which accounting and auditing practices and procedures, promulgated or approved by the Federal Govern-ment, are established.

6202 Dirksen Building

Judiciary To continue hearings on S. 825, to foster competition and consumer protection policies in the development of product standards.

2228 Dirksen Building

3:00 p.m.

Appropriations
HUD-Independent Agencies Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Department of Housing and Urban Development, to hear public witnesses.

1318 Dirksen Building

APRIL 20

9:30 a.m.

Environment and Public Works Water Resources Subcommittee

To continue hearings on the proposed replacement of Lock and Dam 26, Al-

4200 Dirksen Building

10:00 a.m.

Appropriations Interior Subcommittee

To continue hearings on proposed budget estimates for fiscal year 1978 for the Department of the Interior and related agencies, to hear public witnesses.

Banking, Housing, and Urban Affairs

To continue hearings on proposed housing and community development legislation with a view to reporting its final recommendations there to the Budget Committee by May 15.

5302 Dirksen Building Commerce, Science, and Technology Consumer Subcommittee

To continue oversight hearings on activities of the Consumer Product Safety Commission.

235 Russell Building

Governmental Affairs

Subcommittee on Governmental Efficiency To receive testimony on a GAO study alleging inaccurate financial records of the Federal flood insurance program.
6226 Dirksen Building

Judiciary

To continue hearings on S. 825, to foster competition and consumer protection policies in the development of product standards.

2228 Dirksen Building

Select Small Business

To hold hearings on S. 872, to authorize the Small Business Administration to make grants to support the development and operation of small business development centers.
424 Russell Building

APRIL 21

9:00 a.m. Judiciary

Subcommittee on Juvenile Delinquency

To hold hearings on S. 1021 and S. 1218, to amend and extend, through fiscal year 1980, programs under the Juvenile Justice and Delinquency Prevention Act.

2228 Dirksen Building

10:00 a.m.

Appropriations

Interior Subcommittee

To continue hearings on proposed budget estimates for fiscal year 1978 for the Department of the Interior and related agencies, to hear public witnesses.
1114 Dirksen Building

Banking, Housing, and Urban Affairs To continue hearings on proposed hous-ing and community development legislation with a view to reporting its final recommendations thereon to the Budget Committee by May 15. 5302 Dirksen Building

Commerce, Science, and Technology Consumer Subcommittee

To continue oversight hearings on activities of the Consumer Product Safety Commission.

5110 Dirksen Building

Energy and Natural Resources Subcommittee on Parks and Recreation

To hold hearings on S. 568, to designate certain lands in Oregon for inclusion in the National Wilderness Preservation System.

Room to be announced

Environment and Public Works Subcommittee on Resource Protection

To hold hearings on proposed legislation authorizing funds to the States to extend the Endangered Species Act through 1980.

4200 Dirksen Building

Governmental Affairs

Subcommittee on Governmental Efficiency To receive testimony on a GAO study alleging inaccurate financial records of the Federal flood insurance program. 6226 Dirksen Building

Governmental Affairs

Subcommittee on Reports, Accounting and Management

To continue hearings to review the processes by which accounting and auditing practices and procedures, promulgated or approved by the Federal Gov-ernment are established.

3302 Dirksen Building

APRIL 22

10:00 a.m.

Banking, Housing, and Urban Affairs

To continue hearings on proposed hous-ing and community development legislation with a view to reporting its final recommendations thereon to Budget Committee by May 15.

5302 Dirksen Building

APRIL 25

9:30 a.m.

Appropriations Interior Subcommittee

To resume hearings on proposed budget estimates for fiscal year 1978 for the Forest Service.

1114 Dirksen Building

10:00 a.m.

Banking, Housing, and Urban Affairs Consumer Affairs Subcommittee

To hold hearings on S. 656, S. 918, and S. 1130, to amend the Consumer Protection Act so as to prohibit abusive practices by independent debt collectors.

5302 Dirksen Building Commerce, Science, and Transportation Merchant Marine and Tourism Subcom-

mittee

To hold hearings on proposed budget estimates for fiscal year 1978 for the Coast Guard.

5110 Dirksen Building

Energy and Natural Resources

To resume hearings on S. 9, to establish a policy for the management of oil and natural gas in the Outer Continental Shelf.

3110 Dirksen Building

Environment and Public Works

Subcommittee on Water Resources To hold hearings on proposed legislation to authorize funds for fiscal year 1978

for river basin projects. 4200 Dirksen Building

Judiciary

To resume hearings on S. 825, to foster competition and consumer protection policies in the development of product standards.

2228 Dirksen Building

APRIL 26

9:30 a.m.

Select Small Business To hold hearings on problems of small

> -667-Part 9 CXXIII-

business as they relate to product liability.

1202 Dirksen Building

Select Small Business

To resume hearings on S. 972, to authorize the Small Business Administration to make grants to support the development and operation of small busi-ness development centers.

424 Russell Building

10:00 a.m.

Appropriations

Transportation Subcommittee

To resume hearings on proposed budget estimates for fiscal year 1978 for the Urban Mass Transportation Administration.

1224 Dirksen Building Banking, Housing, and Urban Affairs Consumer Affairs Subcommittee

To continue hearings on S. 656, S. 918, and S. 1130, to amend the Consumer Protection Act so as to prohibit abusive practices by independent debt collectors.

5302 Dirksen Building

Commerce, Science, and Transportation Merchant Marine and Tourism Subcom-

To hold hearings to receive testimony in connection with delays and conges-tion occurring at U.S. airports-ofentry.

235 Russell Building

Environment and Public Works Subcommittee on Water Resources

To hold hearings on projects which may be included in proposed Water Resources Development Act amendments

4200 Dirksen Building

2:00 p.m.

Appropriations

Transportation Subcommittee

To resume hearings on proposed budget estimates for fiscal year 1978 for the National Highway Traffic Safety Administration.

1224 Dirksen Building

APRIL 27

10:00 a.m.

Appropriations

Transportation Subcommittee

To continue hearings on proposed budget estimates for fiscal year 1978 for the Urban Mass Transportation Administration.

1224 Dirksen Building

Banking, Housing, and Urban Affairs Consumer Affairs Subcommittee

To continue hearings on S. 656, S. 918, and S. 1130, to amend the Consumer Protection Act so as to prohibit abusive practices by independent debt collectors.

5302 Dirksen Building

Commerce, Science, and Technology Consumer Subcommittee

To hold hearings on S. 403, the proposed National Product Liability Insurance Act.

5110 Dirksen Building

SENATE-Wednesday, April 6, 1977

(Legislative day of Monday, February 21, 1977)

The Senate met at 12:30 p.m., on the expiration of the recess, and was called to order by Hon. DONALD W. RIEGLE, JR., a Senator from the State of Michigan.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following

Almighty God, our Creator and Redeemer, prepare our hearts for the Day of Resurrection, that we may keep it for what it is: the pivotal point of all history.

Deliver us from the tyranny of desk pads, appointment calendars, and telephones lest we miss the glory and wonder of Easter. Lead us in sacred memory through the Gethsemane of decision to the agony of the cross with its apparent defeat, to the dawn of the third day and the victory over sin and death. Rescue us from all that is sordid, ugly, and sinful in our lives that as newborn men with new life for new days we may make known the beauty, goodness, and truth of Thy salvation.

We pray in the name of Him who is the Resurrection and the Life. Amen.

APPOINTMENT OF ACTING PRESI-DENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The legislative clerk read the following letter:

> U.S. SENATE, PRESIDENT PRO TEMPORE, Washington, D.C., April 6, 1977.

To the Senate:

Being temporarily absent from the Senate on official duties, I appoint Hon. DONALD W. RIEGLE, Jr., a Senator from the State of Michigan, to perform the duties of the Chair during my absence.

> JAMES O. EASTLAND. President pro tempore.

Mr. RIEGLE thereupon took the chair as Acting President pro tempore.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings of yesterday, Tuesday, April 5, 1977, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETINGS

Mr. ROBERT C. BYRD. Mr. President, I believe consent has already been given for all committees to meet during the session of the Senate today

The ACTING PRESIDENT pro tempore. That is correct.

COMMITTEE MEETINGS TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that committees may meet during the session of the Senate tomorrow.

Mr. BAKER. Mr. President, there is

no objection. The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, there are certain nominations that are cleared on the Executive Calendar, I ask unanimous consent that the Senate proceed to executive session to consider nominations beginning under "New Re-

Mr. BAKER. Mr. President, will the majority leader yield?

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER. There is no objection to confirming the nomination on the Executive Calendar following "New Report," Federal Trade Commission.

Does the majority leader intend to seek the confirmation of the remaining items for National Highway Traffic Safety Administration and the Department of State?

Mr. ROBERT C. BYRD. Yes; all nomi-

nations following "New Report."
Mr. BAKER. I would advise the majority leader that all of those nominations have been cleared on this side and there is no objection.

Mr. ROBERT C. BYRD. I thank the

minority leader.

FEDERAL TRADE COMMISSION

The second assistant legislative clerk read the nomination of Michael Pertschuk, of the District of Columbia, to be a Federal Trade Commissioner for the unexpired term of 7 years from September 26, 1970, and for a term of 7 years from September 26, 1977.

Mr. ROBERT C. BYRD. Mr. President, I call attention to the fact that with respect to Calendar Order No. 125, message No. 224, Michael Pertschuk, of the District of Columbia, the Executive Calendar does not so state, but the nomination is for the 7-year term commencing September 26, 1977, in addition to the unexpired term of 7 years from September 26.

The ACTING PRESIDENT pro tempore. Without objection, the nomination, as corrected, is confirmed.

NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION

The second assistant legislative clerk read the nomination of Joan Buckler Claybrook, of Maryland, to be Administrator of the National Highway Traffic Safety Administration.

The ACTING PRESIDENT pro tempore. The nomination is confirmed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the remaining nominations in the Department of State, be confirmed en bloc with the understanding that the nominations under the Department of Housing and Urban Development will remain on the calendar.

DEPARTMENT OF STATE

The second assistant legislative clerk read the nominations of Richard N. Cooper, of Connecticut, to be Under Secretary of State for Economic Affairs; Charles William Maynes, Jr., of New York, to be an Assistant Secretary of State; Barbara M. Watson, of New York, to be Administrator, Bureau of Security and Consular Affairs, Department of State; James F. Leonard, Jr., of New York, to be the Deputy Representative of the United States of America to the

United Nations, with the rank and status of Ambassador Extraordinary and Plenipotentiary; and Donald F. McHenry, of Illinois, to be Deputy Representative of the United States of America in the Security Council of the United Nations. with the rank of Ambassador.

The ACTING PRESIDENT pro tempore. Without objection, the nominations are considered and confirmed en

bloc.

COAST GUARD NOMINATIONS PLACED ON THE SECRETARY'S DESK

The second legislative clerk proceeded to read nominations in the Coast Guard placed on the Secretary's desk.

Mr. ROBERT C. BYRD. Mr. President. I ask unanimous consent that the nominations be considered en bloc.

The ACTING PRESIDENT pro tempore. Without objection, the nominations are considered and confirmed en bloc.

Mr. ROBERT C. BYRD. Very well. That takes us through page 2 of the calendar?

The ACTING PRESIDENT pro tempore. That is correct.

ORDER OF BUSINESS

Mr. TALMADGE. Mr. President, will the distinguished majority leader yield? Mr. ROBERT C. BYRD. Yes.

Mr. TALMADGE. I just handed in six nominations of appointments to the Department of Agriculture for assistant secretaries and two members of the board of directors of the Commodity Credit Corporation. They came from the committee unanimously. Senator Dole, the ranking minority member, has approved their being considered today.

The Department has been short handed of assistant secretaries, and I hope they can be confirmed at this time.

Mr. BAKER. Mr. President, if the Senator will yield, I am sure there will be no problem with that in view of the fact that Senator Dole has agreed to their confirmation, but I wonder if the majority leader would indulge me for just a few minutes while I go through my regular procedure to make sure there are no other objections?

Mr. TALMADGE. That is certainly

agreeable to me.

Mr. ROBERT C. BYRD. Very well.

As soon as the distinguished minority leader can get clearance for the nominations alluded to by Mr. TALMADGE the Senate will return to those.

I ask that the President be immediately notified of the confirmation of the nominations.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

DEPARTMENT OF AGRICULTURE

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate consider the various requests that were made by Mr. TALMADGE and, which, I now understand in talking with the minority leader, have been cleared on the minority side.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. The second assistant legislative clerk

read the nominations reported earlier today of Howard W. Hjort, of the District of Columbia, to be a member of the Board of Directors of the Commodity Credit Corporation:

Alex P. Mercure, of New Mexico, to be an Assistant Secretary of Agriculture;

Dale Ernest Hathaway, of the District of Columbia, to be an Assistant Secretary of Agriculture:

Dale Ernest Hathaway, of the District of Columbia, to be a member of the Board of Directors of the Commodity Credit Corporation:

Malcolm Rupert Cutler, of Michigan, to be an Assistant Secretary of Agri-

culture:

Malcolm Rupert Cutler, of Michigan, to be a member of the Board of Directors of the Commodity Credit Corporation (new position)

Robert Haldeman Meyer, of California, to be an Assistant Secretary of Agriculture, vice Richard L. Feltner, resigned;

Robert Haldeman Meyer, of California. to be a member of the Board of Directors of the Commodity Credit Corporation, vice Richard L. Feltner, resigned; and

John C. White, of Texas, to be a member of the Board of Directors of the Commodity Credit Corporation, vice John A. Knebel, resigned.

Mr. BAKER. We have no objection.

Mr. President, before going any further, how many nominations are there? I understood there were six?

The ACTING PRESIDENT pro tempore. I am told by the clerk that in at least three instances there are two appointments for the same individuals.

Mr. BAKER. I thank the Chair. I did not mean to create a problem, but only to satisfy the literal nature of the request for clearance that I had made for six people.

The ACTING PRESIDENT pro tempore. The Chair appreciates the question.

Mr. ROBERT C. BYRD. Mr. President. I ask unanimous consent that the nominations be considered and confirmed en

The ACTING PRESIDENT pro tempore. Without objection, the nominations are considered and confirmed en bloc.

DEPARTMENT OF JUSTICE

Mr. ROBERT C. BYRD, Mr. President. I send to the desk a nomination that has been reported from the Committee on the Judiciary, reported by Mr. Thur-MOND, as a matter of fact, and it is for the appointment of Mr. Thomas E. Lydon, Jr., of South Carolina, to be U.S. attorney for the district of South Carolina for the term of 4 years, vice Mark W. Buyck, Jr., resigned, I ask unanimous consent that the Senate proceed with its consideration.

The second assistant legislative clerk read the nomination of Thomas E. Lydon, Jr., of South Carolina, to be U.S. attorney for the district of South Carolina for the term of 4 years, vice Mark W. Buyck, Jr., resigned, reported earlier

Mr. BAKER. Mr. President, the nomination is cleared on this side.

The ACTING PRESIDENT pro tempore. Is there objection? Hearing none, then the nomination is confirmed.

Mr. HOLLINGS. Mr. President, I thank my colleagues on the Judiciary Committee and the membership of the Senate for moving with all deliberate speed in confirming the nomination of Mr. Thomas E. Lydon, Jr., as U.S. attorney for South Carolina.

Mr. Lydon's confirmation today puts a firm and experienced hand at the helm of Federal prosecution in my State and reinstills a sense of permanence to the position. It also removes any possibility of delay in fully staffing up the office of U.S. attorney there. And it places the Federal judicial system in South Carolina on firm and solid footing for the future.

I would be remiss if I did not also thank the Attorney General, Mr. Bell, and President Carter for very quickly responding to the South Carolina delegation when it proposed Mr. Lydon's name for nomination. The Justice Department and the White House expedited the matter promptly, and this has helped the Senate immeasurably in its deliberations.

We have performed a great service for South Carolina today in confirming Tom Lydon as U.S. attorney. He has distinguished himself in the legal profession in my State, he is dedicated to bettering his community and the conditions of its citizens' lives, and he has a devotion to our system of government and a determination to make its judicial system work equally for all.

He has the experience to back up his convictions, and I am certain he will put a stamp of professionalism on his office Mr. Lydon has served both as a municipal judge and as a prosecutor for the city of Columbia, the capital of South Carolina. He also has instructed college classes in criminal justice and was a guest lecturer at the University of South Carolina Law School in its prosecution clinical program.

I am sure Mr. Lydon will bring a keen insight into the judicial system and its performance along with a determination to uphold the highest standards of service to his State and his country as he assumes office. I congratulate him on attaining this high position of service, and I know that I speak for my colleagues on the South Carolina delegation when I wish him every successs in the future.

Mr. ROBERT C. BYRD. Mr. President. I ask that the President be immediately notified of the confirmation of the nominations

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD, Mr. President. I ask unanimous consent that the Senate return to the consideration of legislative business

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

SALT

Mr. ROBERT C. BYRD. Mr. President. I was pleased today to read in various press accounts that Mr. Brezhnev has perhaps reconsidered his apparent recalcitrant stand of last week with respect to strategic arms limitations and that

there is the possibility of progress in future talks.

I was not one of those who viewed the first Moscow talks and the lack of positive results there with any wringing of hands or great dismay, and I do not know of any Member of this body or the other body for that matter who viewed the results of those talks as anything to be discouraged about.

I think it was something that most of us who have any recollection whatsoever of the history of dealing with the Russians would have expected. I felt the visit of Mr. Vance was an initial probe to open up the talks between the new Carter administration and Mr. Brezhnev. I did not have the slightest feeling nor did I labor under the slightest illusion that the Soviets would embrace the agreements in an affirmative way during that visit. I expected them to say no. The proposals were complex. They required time for study by the Soviets. And I think that the Soviets acted in a way that was not only to have been expected but also in a way that was quite normal for them-if we but remember past talks with the Soviets in connection with arms agreements

We have begun. It will be a long, painful, tenuous, trying, exacting, and demanding process. We must go forward, and I believe that Mr. Brezhnev's statement indicates that we can go forward. His comments yesterday indicate that such an arms agreement may

All negotiations of this kind must begin with hard bargaining, and quick acceptance by either side is not to be anticipated.

The only thing that surprised me was the surprise on the part of some people, apparently some of whom were within the party that went to Moscow, that the Soviets did not immediately accept the proposals. This to me was the only surprise.

I think the U.S. position was sound and, as the Soviets examine it more carefully, I feel that they will realize that the basis is there for a meaningful ac-

A reasonable arms limit, not only a reasonable pact that will deal with arms control but even more important, a pact that will deal with meaningful arms reduction—is something that the world hopes for, and as public opinion around the world crystalizes more upon the contents of the proposals, I believe that the Soviets will find themselves in a weakened position if they continue to be unresponsive to what indeed is a legitimate, reasonable, sound, and fair proposal for arms reduction.

I again commend the President. commend Secretary Vance. And I hope that they will continue to look forward with faith in the ultimate outcome. It is not to be expected that rewards will be reaped overnight, within a few days. within a few weeks, or even perhaps within a few months. But, as I have stated repeatedly, the Soviet Union needs an arms agreement that is in its own security interests as much as we need an arms agreement that is in our own security interests. The Soviet Union cannot more afford to bleed its economy in a spiraling arms race than we can afford to bleed our own. I believe, further, that if there is no arms agreement then the United States will have no choice but to develop and deploy additional weapons. We do not want to do that. We do not want to have to budget our funds for additional weapons. But if there is no choice I have no doubt that the American people will back up the President and American technology will prevail.

So, I see in Mr. Brezhnev's statement a return to reason. I see an indication that the leader of the Soviet Union is indeed willing to take a further look a deeper look, and I see an indication that the Soviets have been taking such a deeper look already. I also see the indication, and I saw it when Mr. Gromyko recently held quite a lengthy press conference for the first time, that the Soviets felt that world opinion was not with them, that world opinion recognized that the American proposals were reasonable proposals, and that in the interest of world peace both of these countries should sit down, talk, and negotiate as reasonable men ought to do in the interest of lowering the risk of nuclear war. So this is a hopeful sign.

Again, I reiterate that when we look at the past experience of dealing with the Soviets we should have learned a lesson that they are hard bargainers, they are tough, and they will say "No" today and "Yes" months from today. We should have learned that lesson and we should not feel that the result of the talks was a rejection of the American proposals. Those same proposals can be presented again and again, and there may be room for modification of those proposals. But let us see what the Soviets are going to propose. We know this can be hard bargaining by both sides, and I have every confidence that the President can be just as firm as Mr. Brezhnev can be firm. I have every reason to believe that the American people can be just as firm as the Soviets leaders can be firm. As long as we think we are right-and I think we were right-I see no reason to go with hat in hand, or with wringing of hands, saying that we made "miscalculations." I know of no

within such a short time. Mr. HELMS. Mr. President, will the Senator yield?

"miscalculations" at Moscow except the

miscalculations that the Soviets were indeed going to immediately grab up

either proposal advanced by Mr. Vance, embrace it to their hearts and say "Yes,"

Mr. ROBERT C. BYRD. I yield.

Mr. HELMS. Did the Senator anticipate that the Soviets would enter into any agreement on the first round of negotiations?

Mr. ROBERT C. BYRD. Not at all. I would have been utterly surprisedpleasantly, of course-if they had.

Mr. HELMS. They just do not operate that way, do they?

Mr. ROBERT C. BYRD. They never have operated in that way.

Mr. HELMS. That is right.

Mr. ROBERT C. BYRD. It is just not in their makeup. They are tough bargainers. They are international poker players. And, of course, if they think they are dealing with an adversary who will buckle, knuckle under, fall back and fall back, and wring hands, they will

push him to the wall.

Mr. HELMS. If the Senator will yield further, I have had to part company with some of my friends who have suggested that President Carter's stand on human rights had an adverse effect on the recent SALT talks. I do not think it had one thing to do with the so-called breakdown of negotiations, because the Soviets, as the Senator has said, just do not negotiate that way.

Furthermore, as to his human rights stand, I commend the President, and I support him. If we have reached the stage in this country that we cannot forthrightly stand for human rights, then we have our priorities wrong, in

my judgment.

Of course, it is essential that we not fall prey to Communist propaganda in other parts of the world, such as Latin America. Communist terrorists in a number of Latin American countries are engaged in violence and destruction, including bomb throwing, murder, and general mayhem. And when these Communist terrorists are arrested, the Communist propagandists around the world raise the absurd claim that these are "political prisoners." These Communist terrorists are in no way "political prisoners." They are criminals.

So in his stand on behalf of human rights, and I strongly support the President in this, I trust that Mr. Carter will carefully examine all evidence when questions arise about human rights. In fact, I hope that Mr. Carter will visit such non-Communist countries as Argentina, Chile, Uruguay, Brazil, and others and compare them with Cuba and other Communist countries. I believe such a trip would supply a needed perspective to the human rights discus-

sion.

As for the Communists of the Soviet Union, I am not concerned that President Carter's human rights stand has been an irritant to the Soviets. I commend the President, and support him.

Mr. ROBERT C. BYRD. I agree with the Senator. There is no question but that an outspoken statement of human rights policy can be an irritant, and I am not suggesting that this method, that method, or some other is the method one always ought to pursue. But the Soviets have never hesitated to criticize the United States concerning our own internal matters. And like the Senator from North Carolina, I believe, on the basis, certainly, of my own commonsense, but more important than that, on the basis of the views of the experts, as I have read such opinions in the newspapers, that while the President's outspokenness on human rights was an irritant, it was not the gravamen of the temporary-I will use the word "temporary" as my own-"rejection," and I will use that term also as my own, by the Soviets of the SALT proposals put forth by Secretary of State Vance.

I thank the distinguished Senator.

Mr. HELMS. I thank the able Senator from West Virginia.

The ACTING PRESIDENT pro tempore. The Senator from Tennessee is recognized.

Mr. BAKER. Mr. President, I think it is a good thing that the majority leader has brought these matters to our attention today. I shall not add much to the colloguy, but just a little.

to the colloquy, but just a little.

I approve, I believe, of almost everything the majority leader said. I am aware, as is the majority leader, that not only do we speak to our colleagues from this floor, and to the press; but we speak also to foreign countries, particularly to the Soviet Union, where I understand there is an American Institute that takes particular interest in these matters. There may even be a file in Moscow with the majority leader's name on it, and one with my name on it. So perhaps I will add just a little to the file.

Before Secretary Vance went to Moscow, I stood at this place and wished him well. I assured the Soviets that on the matter of obtaining satisfactory resolution of the arms buildup, the establishing of a strategic arms limitation, and the signing of a successful SALT II agreement, Republicans and Democrats were virtually united to a man and to a woman in support of the American proposals.

I think we will still get a SALT II agreement. I do not think anything has happened that will preclude that possibility; and certainly believe it would be a worldwide tragedy if we do not get an

agreement between now and October. I also rather suspect that our friends the Russians may be tempted to do a little testing between now and October, when SALT I expires. I would caution them against that tactic. I would caution them that even though some of us may disagree with the bargaining strategy, or even the formulation of the bargaining techniques, we are together in support of the proposals.

It has unfortunately been the policy of the Soviet Union from time to time to test other Presidents of the United States. I recall as far back as the administration of President Eisenhower that, in retrospect, there appeared to be a testing of the new President. Certainly that testing occurred with President Kennedy in Cuba; and certainly with President Nixon and President Ford, to the degree that there has developed a pattern of testing our American Presidents in the early, formative stages of their administrations.

I urge the Soviet Union to understand that we engage in free political discussion, critique, criticism, even sometimes opposition to foreign policy positions; but that we are united in the importance of preserving this country's foreign policy in the face of challenge.

I reiterate, nothing has happened that should prevent successful negotiation of SALT II. If we do not succeed in such a negotiation, I am going to blame the Russians, because I think the factors are still there—the fundamental imperatives are still present—that led us to the inescapable conclusion that there should be an agreement.

Mr. President, I reserve all of my options to agree or disagree with the formulation of the foreign policy techniques of this administration, and I will probably do some of both, agree and disagree; but I urge the Soviets and the

American Institute of Moscow, in that thickening file that may have our names on it, to reflect on the fact that, on the matter of testing new Presidents, majority and minority are undivided.

Mr. ROBERT C. BYRD. I thank the distinguished minority leader for his saying, in essence, that when it comes to the testing of an American President on an issue involving the national security of this country, there are no Democrats and no Republicans; there are just Americans.

I am not saying this just because President Carter happens to be a President belonging to the Democratic Party. He is the President of all the people. The distinguished minority leader will remember that when we went through all the difficulties and pain and suffering of Vietnam and Cambodia, it was my amendment on this floor that reassured the President of the United States that he had not only the authority but the responsibility to act to protect American serviceman during the Cambodian bombing.

I do not intend to renew the memories of those painful years, or to in any way get into all of the mistakes that may or may not have been made, but when it came to backing up the President and backing up our servicemen, I was not just a Democrat; I was an American.

The position the distinguished minority leader is taking, I think, is the right one. There are 215 million Americans who want an agreement; but they want an agreement that is in the security interests of this country, and I am sure the Soviets want an agreement that is that in the security interests of their country. It is not inconceivable, by any means, that such an agreement can be reached which will be in the security interests of both countries, and which will lower the risk of nuclear war for the world.

That is our hope and prayer and our determination, whether we be Democrats or Republicans. The Senator from Tennessee has spoken well, and I commend him for his fine statement.

Mr. BAKER. I thank the majority leader. We stand as one on the proposition of supporting our President in the face of external challenge.

Mr. President, I yield my remaining time under the standing order to the distinguished senior Senator from Alaska.

JAYCEES INTERNATIONAL CONFERENCE AT ANCHORAGE, ALASKA

Mr. STEVENS. Mr. President, many of us in Congress have served as members of junior chambers of commerce. I am pleased to note that the Jaycees International Conference this year will be hosted by the Anchorage Junior of Commerce, known as the Old Sourdough Jaycees in Anchorage, Alaska.

I have hopes that this conference, which focuses on the problems of man and his environment, particularly in regard to international cooperation in the development of the Outer Continental Shelf and high-seas fisheries, will bring together world leaders who are members of the international Jaycees, who will focus their attention on many of these problems, and give those of us who are

involved in formulating the policies of our country some guidance in the formulation of policies which they support.

lation of policies which they support.

I call up a resolution which I have at the desk.

The ACTING PRESIDENT pro tempore. The resolution will be stated.

The assistant legislative clerk read as follows:

A resolution (S. Res. 137) commending the Jaycees International Conference hosted by the "Old Sourdough Jaycees" of Anchorage, Alaska

Mr. STEVENS. Mr. President, I ask for the immediate consideration of the resolution.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, and I will not object, this resolution has been cleared with the majority side. It is a commendable resolution, and I congratulate the assistant minority leader for calling it up.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the resolution.

The resolution was agreed to.

The preamble was agreed to.

The resolution, with its preamble, is as follows:

Whereas, the Jaycees have a long standing record of community involvement and leadership around the world;

Whereas, this is the third Jaycees International Conference to be held in the United States and the first to be held in Alaska;

Whereas, the Jaycees International Conference addresses the problems of "man and his environment" focusing on international cooperation in the development of the outer-continental shelf and high-seas fisheries;

Resolved, that the U.S. Senate commends the "Old Sourdough Jaycees" of Anchorage, Alaska, the U.S. Jaycees, and the Jaycee International for bringing together Jaycee leaders around the world who have contributed to the betterment of mankind.

SEC. 2. The Secretary of the Senate is hereby directed to transmit a copy of this resolution to the "old Sourdoughs" of Anchorage, Alaska.

ORDER OF BUSINESS

The PRESIDING OFFICER (Mr. LEAHY). Under the previous order, the Senator from Delaware (Mr. BIDEN) is recognized for not to exceed 15 minutes.

Mr. ROBERT C. BYRD. Mr. President, I want to apologize to the distinguished Senator from Delaware for the delay which has been occasioned by my remarks.

Mr. BIDEN. No apology is necessary. I found the remarks of the majority leader quite instructive and reassuring.

THE WILMINGTON BUSING CASE: INJUSTICE IN THE NAME OF JUS-TICE

Mr. BIDEN. Mr. President, for the past 6 years, the people of my State have been struggling with one of the most fundamental questions which the whole Nation must ultimately confront. What are the parameters of the 14th amendment of the Constitution which guarantees to all Americans, regardless of race, "equal protection of the laws?" Since 1971 when the basic school desegregation case for Delaware, Evans against Buchanan, was reopened, Delaware has

faced the prospect of a Federal court order requiring busing of 60 percent of its schoolchildren.

Throughout my career as a lawyer and as a Government official, I have been an outspoken proponent of the "equal protection" mandates of the 14th amendment and of the other civil rights and liberties guaranteed by the Constitution.

I have never doubted for a moment the wisdom and necessity of the Supreme Court's Brown decision nor have I doubted that the 14th amendment outlaws racial discrimination in public education or in any other governmental activity

However, I have always opposed court ordered busing to achieve racial balance in public schools. I am opposed to busing both because it is an unproved and unworkable social policy and because it frustrates rather than furthers the ultimate goal of "equal educational opportunities."

At the heart of my opposition is my firm belief that busing is unfair. In the name of a higher principle—equal justice—busing can result in a terrible injustice. I will summarize for you today the essential facts and law in the Wilmington case which provide a compelling example of that injustice.

My concern about busing is not parochial. I believe that the apparent irrationality of some Federal court school desegregation orders is beginning to have a fundamental effect upon the fabric of our legal system. In Boston, Louisville, and Detroit, many otherwise law-abiding families took to the streets because they believed busing to be irrational and arbitrary.

Hopefully, if the busing case happens to go through in my State, we will not have that upheaval, but, nonetheless, it cannot be ignored as having occurred.

Federal courts have mechanically applied the equal protection clause as if it were some religious imperative handed down from the heavens. The courts are not some priestly sect interpreting sacred text. The words of our Constitution are the conventional wisdom, the consensus of our society. When these words permit manifest injustice in the name of achieving justice, that consensus begins to erode. The Wilmington case, as it stands now, contributes to the erosion of that consensus. It is, I submit, a case of manifest injustice in the name of justice.

I would like to begin my presentation of the Wilmington case with a summary of the basic facts of the litigation. I ask unanimous consent that the summary of those facts, as summarized in the most recent brief of the Wilmington defendants, be printed at this point in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

STATEMENT OF THE CASE

This action was commenced in July, 1971, by the filing of a petition by a group of individuals purporting to represent a class of persons comprising all black students attending the public schools within the City of Wilmington, Delaware School District. In substance, the petition charged the defendant, Delaware State Board of Education, with denying the class which the petitioners purported to represent of the equal protection

of the laws in violation of the Equal Protection Clause of the Fourteenth Amendment of the United States Constitution. No statutory claims were asserted or considered by the trial court.

The petition sought to invoke the continuing jurisdiction of the District Court under the caption of Evans v. Buchanan, a case which had begun in 1956 on the complaint of black students of a rural school district in southern Delaware. Subsequent to the initial complaint in 1956, additional plaintiffs intervened from other districts in southern Delaware and that case proceeded as a class action affecting the entire State.

The 1956 litigation culminated in 1961 when a statewide plan of desegregation was approved by the District Court. Evans v. Buchanan, 195 F. Supp. 321 (D. Del. 1961). That plan provided for the immediate admission on a racially non-discriminatory basis of all Negro children desiring to attend formerly white schools. The plan also addressed the longer range problem of totally dismantling the dual system of public education in Delaware, which had earlier been described as a "maze" of overlapping school district boundaries. Steiner v. Simmons, Del. Supr., 111 A. 2d 574, 580 (1955). The longer range aspect of the Court approved plan provided for the elimination of the dual systems and the establishment of thirty unitary districts.

Except for a dispute about the attendance areas in one rural New Castle County School District in 1962, Evans v. Buchanan, 207 F. Supp. 820 (D. Del. 1962), the case was dormant from July 1961 when the District Court approved the plan for total integration throughout the State (including retention of the Wilmington School District's historic boundaries) until July, 1971 when the instant petition was filed.

The Wilmington School District was permitted to intervene as a party plaintiff on September 19, 1972, basically to advocate the position of the purported class. A three-judge court was convened on the ground that a state statute was under challenge. In December, 1973, and January 1974, trial was held before the three-judge court. This proceeding has been generally referred to by the parties and by the court as the "liability" hearing."

After briefing and argument, the District Court held that the vestiges of the dual system of education within the Wilmington School District mandated by law in Delaware prior to 1954 had never been totally eliminated. Evans v. Buchanan, 379 F. Supp. 1218 (D. Del. 1974). The court found no interdistrict violation but nevertheless ordered the State Board of Education to submit two remedial desegregation plans—one limited to the boundaries of the Wilmington School District and the other incorporating other areas of New Castle County in addition to Wilmington.

Shortly thereafter, the United States Supreme Court issued its ruling in Milliken v. Bradley. 418 U. S. 717 (1974) holding in essence that a constitutional violation limited to a single public school district could not constitute the basis for an equitable remedy incorporating multiple school districts. The District Court thereafter postponed the submission of plans by the defendant, pending further order of the court. The court also

The defendant, State Board of Education, designated the entire record subsequent to the filing of the petition in July 1971 in this proceeding as the record for this appeal, said record being filed on December 20, 1976. References to page numbers of the transcript of the liability hearing shall be denoted as follows in this brief: "Tr. L. 1018". References to exhibits marked at the liability hearing will be to the exhibit numbers given by the Court, thus: "DX-28" or "PX-177C". Reference to the transcript of the remedy hearing, thus: "Tr. R. 208".

reversed a previous ruling and ordered that any public school district in New Castle County which had not been a party to the action would have the right to intervene pursuant to Federal Rule 24. All suburban districts in the County did intervene with the exception of the countywide vocational district.

Following further briefing and argument, the District Court issued another opinion and order, Evans v. Buchanan, 393 F. Supp. 428 (D. Del. 1975), again directing the defendant to submit alternative intradistrict and interdistrict desegregation plans and enjoining the enforcement of the Educational Advancement Act of 1968, 14 Del. C. § 1004 (c) (2) and § 1004(c) (4). An appeal from this interlocutory judgment was taken to the United States Supreme Court, which summarily affirmed that judgment. Buchanan v. Evans, 423 U.S. 963 (1975).

Thereafter, the three-judge court held further hearings (the "remedy" hearings) concerning the alternative desegregation plans which had been submitted in response to its prior order. These hearings were held in .October, November, and December, 1975. The court then issued a further opinion, Evans v. Buchanan, 416 F. Supp. 328 (1976) and entered its final judgment on June 15, 1976. In essence, the remedy imposed provided that eleven of the twelve local school districts in New Castle County would be collapsed into a single super-district covering more than 250 square miles of urban, suburban, and rural territory and enrolling more than 60% of the public school students in the entire State of Delaware. The political entities which had previously governed public education in this area were to be dissolved and with them their individualized programs of administration, finance and curriculum. In addition, the trial court ordered that pupil assignment within the new, mammoth district would conform to a fixed racial quota within each grade in each school building. This judicial reorganization is to become effective no later than September 1, 1977, with full compliance with the racial quotas to be achieved in all grades no later than September 1, 1978.

A notice of appeal was filed by the defenddant on June 30, 1976, to this Court. On July 22, 1976, appeal was also taken directly to the Supreme Court in view of the fact that the remedy had been imposed by a three-judge court. On September 8, 1976, this Court granted the defendant's motion for leave to extend time to file the record until the jurisdictional issue was resolved in the Supreme Court and to stay consideration of the appeal in this Court until that time. On November 29, 1976, the Supreme Court dismissed the appeal for lack of jurisdiction. State Board of Education v. Evans, 45 U.S.L.W. 3394. This defendant promptly moved this Court to lift the stay previously granted and to permit this appeal to proceed in accordance with the Federal Rules of Appellate Procedure. This Court granted said motion on December 20, 1976.

STATEMENT OF FACTS

Delaware, the nation's second smallest State, has long displayed an intense desire on the part of its citizens to retain local control over its political institutions. That desire has been particularly evident in the retention of small public school districts which permit maximum parental involvement, contact and control, 416 F. Supp. at 336. At one time, in the nineteenth century, the Delaware educational system was com prised of approximately 425 "educational republics." 256 F. 2d 688 at 693. In general, each district contained a single school house serving those pupils residing within a radius of two miles from that building. Pursuant to an 1829 statute, the number of districts was reduced to 195. Further reductions took place over the years, particularly in rural, southern Delaware, where the ineconomies and educa-

tional inefficiencies of the tiny units were most pronounced. Larger, more efficient educational units appeared in New Castle County, particularly north of the Chesa-peake and Delaware Canal, and many of the present school districts in the County have historic antecedents and trace their origins to the nineteenth century or early twentieth

century. 393 F. Supp. 428, 433.

Historically, the City of Wilmington School District has been the largest, wealthiest, and by far the most independent educational entity in the State of Delaware. In 1852, nine United School Districts within the City of Wilmington were brought together under the governance of a newly incorporated board of education designated Board of Public Education in Wilmington' 10 Del. Laws 644. That body has controlled public education in the City of Wilmington ever since. In 1905, the boundaries of the Wilmington School District were defined by statute to be coterminous with the political boundaries of the City of Wilmington. 23 Del. Laws 92. This explicit statutory designation in 1905 confirmed the geographic identity of the Wilmington School District and the City of Wilmington which had existed for the preceding fifty years. This geographic designation has been explicitly carried forward in every amendment to the Delaware school laws. 32 Del. Laws 163 (1921); 37 Del. Laws 202 (1931); Del. Laws 172 (1965); 56 Del. Laws 292 (1968)

Prior to 1954, the Delaware Constitution mandated a dual system of public education. Desegregation began in northern Delaware, however, even prior to 1954, pursuant to the landmark decision in Belton v Gebhart Del. Ch., 87 A. 2d 862 (1952); aff'd. Gebhart v. Belton, Del. Supr., 91 A. 2d 137 (1952). Following the affirmance by the United States Supreme Court of the Gebhart decision, sub nom. Brown v. Board of Education, 347 U.S. 483 (1954) ("Brown I"), desegregation proceeded promptly in northern New Castle County. The Wilmington School District was permitted by the State Board of Education to begin desegregation prior to the Supreme Court's implementation decision, Brown v. Board of Education, 349 U.S. 294 ("Brown II").

The prompt, voluntary and substantial affirmative action taken in New Castle County was not matched in rural, southern Delaware and eventually led to the initiation of the Evans v. Buchanan litigation urging compliance in lower Delaware. In 1958, this Court acknowledged the prompt compliance representative of New Castle County. Evans Buchanan, 256 F. 2d 688, 690 (3rd Cir. 1958). In fact, this prompt and voluntary move toward compliance had been acknowledged three years earlier by the United States Supreme Court in Brown II. 349 U.S. at 299. In again dealing with the problem of compliance in lower Delaware in 1960, this Court stated in Evans v. Ennis, 281 F. 2d 385 (3rd Cir. 1960):

"In short, integration in the State of Dela-ware, which has already integrated many of its schools, particularly in the Wilmington metropolitan area, should not be viewed, gauged or judged by the more restrictive standards reasonably applicable to communities which have not advanced as far upon the road toward full integration as Dela-

ware." 281 F. 2d at 393.

Pursuant to the mandate of this Court in Evans v. Ennis, supra, the District Court approved a two-step plan which resulted in the integration of public schools in all of Dela-Evans v. Buchanan, 195 F. Supp. 321 (D. Del. 1961). The first step provided for the immediate admission on a racially nondiscriminatory basis of all Negro children desiring to attend formerly white schools. The second stage provided for the full integration of school facilities throughout the State and was to be accomplished by a new school code which eliminated the small and overlapping dual school districts and established thirty

unitary districts. Significantly, the plan, approved by the court below in 1961, retained the Wilmington School District, the largest, wealthiest, and most educationally advanced in the State, as geographically coterminous with the boundaries of the City of Wilmington, as it had been for more than 100 years.

The legislature, however, failed to pass the school code which had been proposed by the State Board of Education and approved by the District Court. Therefore, the State Board of Education undertook affirmative administrative action to eliminate the vestiges of the remaining dual systems within the State of Delaware. This vigorous action was so successful that the last remnants of the dual system were eliminated in June, 1967, three years in advance of the deadline which had been established by the court. This affirmative action by the State Board was so successful that Delaware earned the commendation of the Department of Health, Education, and Welfare as being the first Southern or Border State to completely eradicate the dual system (Tr. L. 2606). See 393 F. Supp. at 451.

Even after the dual system had been eradicated, there still remained many small and educationally inefficient school districts, primarily in southern Delaware. Therefore, the State Board again sought legislation which would achieve school district consolidation. In so doing, as the court below recognized (393 F. Supp. at 439), the emphasis was on the small, weak, and ineffective school districts in southern Delaware.

The proposal that was ultimately enacted into law as the Educational Advancement Act of 1968 was developed over a period of time with extensive input from educators, legislators, and parents. Public and educa-tional input was received from all parts of the state. A significant concern expressed throughout Delaware was the intense natural desire to retain local control over public education. This desire was rationally based upon a fear of educational structures that were too large and impersonal to responsibly handle the needs of individual children.

Educational Advancement Act. 56 Del. Laws 292, 14 Del. C. § 1001, et seq., passed by the legislature in 1968. The Act was intended "to provide the framework for an effective and orderly reorganization of the existing school districts of the State through the retention of certain existing school districts and the combination of other existing school districts". 14. Del. C. § 1001. Pursuant to the Act, the State Board of Education was subjected to an explicit timetable to develop a plan conforming to specific criteria, to submit the plan to local boards of education and to receive and pass on their objections to the

The legislative criteria contained in 14 Del. § 1004 are the legislative provisions significant in this action. 14 Del. C. § 1004(c) (2) provided that each proposed school district should have an enrollment of at least 1,900 and not more than 12,000. This size limitation, so much a part of the tradition of Delaware education, effectively excluded three school districts in New Castle County from consolidation with contiguous districts by the State Board of Education: Wilmington, Newark, and Alfred I. DuPont.

14 Del. C. § 1004(c)(4) carried over the statutory language pertaining to the Wil-mington boundaries, which had existed since by providing that the Wilmington School District would be the City of Wilmington with the territory within its limits. This language, which was surplusage so far as the possible consolidation of Wilmington was concerned because of the size limitations, was inserted because of the drafters' concern that the failure to include this language from existent Delaware statutes might create a problem under the Delaware Constitution which would necessitate a twothirds vote of the legislature. Because of the opposition to consolidation which existed in southern Delaware, there was considerable

doubt that a two-thirds vote could be achieved. None of the southern Delaware school districts is involved in the present case.

Because of this strong opposition in southern Delaware to consolidation of small districts, the vote on the legislation was indeed close, with the critical amendment passing by a single vote. The Act passed because it received its substantial political support from Wilmington and New Castle County and received the affirmative vote of every Wilmington representative, both black and white. A black Wilmington representative was among the sponsors of this beneficent legislation.

Wilmington and New Castle County, dur-ing the years following World War II, experienced the rapid demographic change and growth that has been universal in metropolitan areas in this country during that period. Rapid suburban growth, white emigration from the City and a significant immigration of black population into the City have resulted in the City being relatively black compared to the suburbs. These demographic changes have been reflected (and in fact magnified) in the racial composition of the schools. Between 1954 and 1973, the Wilmington School District experienced an increase in black enrollment from 3,572 to 12,141. At the same time, the white student enrollment decreased from 9,303 to 3,556 (PX-6). Thus, during this period, the percentage of black enrollment in the Wilmington School District had increased from 28% to 83%. It is essentially this fact of which the plaintiffs and intervening plaintiff complain, a set of demographic changes in no way attributable to actions by any of the defendants in this case.

Mr. BIDEN. This brief was filed in the U.S. Court of Appeals for the Third Circuit, where the Wilmington case is now on appeal. I attended the oral argument before the third circuit in Philadelphia on March 30. The summary of the basic issues in contest which follows is derived in large part from my review of the briefs of all the parties, my attendance at the oral argument, and the lengthy debates I have had with Justice Department officials about the case in the course of the confirmation hearings of the Assistant Attorney General for the Civil Rights Division and the Solicitor General. Incidentally, it was these two men's views on the busing questions which led me to oppose their nominations although I felt them otherwise well qualified.

Every school desegregation case requires a Federal court to conduct two basic inquiries. First, the court must determine whether there has been a violation of the equal protection clause of the 14th amendment. Has there been racial discrimination in providing public educational opportunities? Assuming the court determines that there was such a violation, the court must then determine the scope of the remedy necessary to place the injured parties in the same situation they would have been in had the violation not occurred. Even after 6 years of litigation, neither of these fundamental questions has been resolved.

The question of constitutional violation in the Wilmington school case and many other such cases was reopened last summer when the Supreme Court decided the case of Washington v. Davis, 426 U.S. 229 (1976). The Supreme Court decided in that case, that while the "equal protection" clause prohibits intentional discrimination by Government officials, it does not, as some courts have

assumed, create liability in Government officials for unintended racial consequences. In other words, school officials are not responsible for the outmigration of whites from urban areas thus creating ghetto schools.

Furthermore, the Supreme Court stated:

[We] have not held that a law, neutral on its face and serving ends otherwise within the power of government to pursue, is invalid under the equal protection clause simply because it may affect a greater proportion of one race than of another.

However, the basic premise of the purported constitutional violation in the Wilmington case is a State statute enacted in 1968. The district court concluded that the effect of that statute's exclusion of the Wilmington school district from State school board reorganizational authority was discriminatory since that district is predominantly black. However, the court explicitly found that there was no discriminatory motive or purpose.

It is important that my colleagues, hopefully, when reading this record understand what I am about to read from the court's decision:

We cannot conclude, as plaintiff's contend, that the provisions excluding the Wilmington District from school reorganization were purposefully racially discriminatory. To be sure, all legislators in Delaware in 1968 knew that Wilmington had a large black population, and most legislators may have known that the Wilmington School District was predominantly black. On the other hand, the focus of the legislators' concern in developing the consolidation provisions of the Educational Advancement Act was on small, weak, ineffective school districts, and while the effectiveness of schooling in Wilmington at this time has been disputed, it is clear that Wilmington had larger staffs and better programs than many Delaware school districts. Moreover, Wilmington had historically been treated distinctively in Delaware education, and there is evidence that its representatives were unwilling to forego certain aspects of this special treatment. No language in the provisions at issue makes any reference to race, nor evidently, did the legislative debates over the Act contain any reference to race. Finally, all Wilmington legislators, black and white, voted for the Educational Advancement Act. In short, the record does not demonstrate that a significant purpose of the Educational Advancement Act was to foster or perpetuate dis-crimination through school reorganization. (Emphasis added)

A more explicit violation of the Supreme Court's holding in the Washington against Davis case is hard to imagine. However, the plaintiffs and the Department of Justice in its amicus curiae brief insist that the district court's language is consistent with the Washington case.

The essence of that argument is that the 1968 statute must be read in light of the history of a dual system in Delaware. Although the statute had no explicit purpose, according to the Department of Justice, it was intended to keep Wilmington separate and thereby perpetuate the discrimination of Delaware's separate but equal system by isolating blacks in Wilmington. The argument further assumes that the State legislature had a continuing responsibility to remedy the past dual system which the 1968 act did not fulfill.

Parenthetically, that past dual system

to which I refer and to which the Department of Justice referred is the pre-1954—14 years earlier—statute that existed in Delaware.

At the heart of this argument is the assertion that there was a historic arrangement between suburban districts and Wilmington to perpetuate a dual system and, therefore, that the 1968 act is evidence of a continuing violation. Delaware was clearly a so-called de jure system. There did exist pre-1954 and subsequent to that, an obligation upon the State of Delaware to remedy this violation of the 14th amendment. However, Delaware promptly dismantled its dual system within a year of the Brown decision; had done all that need be done, in my opinion. Indeed, the Supreme Court commended Delaware in 1955 for the speed with which is complied with the year old mandate of the Brown de-

The plaintiffs point specifically to the fact that for a 1-year period, the 1954–55 school year, 191—hear me, 191—black students in the suburbs attended black schools in Wilmington. We are not talking about tens of thousands or thousands or even hundreds of children. One hundred and ninety-one black children were unfairly and wrongly not permitted to attend schools within the district in which they resided.

These 191 black students consisted of one-half of 1 percent of the students in the county at the time. The plaintiffs insist that this indiscretion, which affected a tiny fraction of the student population, served as the basis for a busing order affecting 60 percent of the students in the State two decades later. That, I submit, is injustice in the name of justice.

The second predicate for a constitutional violation in Wilmington is alleged housing discrimination. No one who has lived in Delaware, or anywhere in this country, can deny that there has been housing discrimination. And quite frankly, I believe it still exists across this Nation.

However, the amount of intentional unconstitutional housing discrimination was engaged in by private, nongovernmental parties:

The housing violations which the Court actually found to support this sweeping conclusion were as follows:

(1) The 1936 FHA Mortgage Underwriting Manual advocated racially and economically homogeneous neighborhoods. 393 F.Supp. at 434. No finding as to the cause and effect of this federal manual was made by the court below, other than to cite a 1971 speech by ex-President Nixon. Obviously, no attempt was made to attribute this manual to the defendant State Board of Education.

(2) Private racial discrimination in the sale and rental of housing was tolerated by the real estate industry and not terminated by State officials. 393 F.Supp. at 434. Of course, this undocumented conclusion by the trial court overlooks the fact that until the decision in Jones v. Mayer, 392 U.S. 409 (1968), private discrimination in such matters was not unlawful. The real estate agents, as legal agents for their clients, were obligated to honor their client's legal wishes. The record is undisputed that since 1968 and the passage of the Delaware Fair Housing Law, 6 Del. C. § 4601, there has been no discrimination in private real estate transactions.

(3) Deeds containing racially restrictive covenants were recorded in the County Recorder of Deeds office until 1973. 393 F.Supp. at 434. There is not a scintilla of evidence any such deed was recorded subsequent to 1948. The only evidence cited by the trial Court in support of its undocumented conclusion was the affirmative effort taken by the New Castle County Attorney in 1973 to insure that all recorded deeds would be physically reviewed and not recorded if any such language were found. Furthermore, the record was uncontradicted that no racially restrictive covenant was given force in the State of Delaware subsequent to 1948 and all private and public officials involved with real estate were explicitly aware that such covenants were without legal force.

The Delaware Real Estate Commission in 1959 republished in a pamphlet a Code Ethics of the National Association of Real Estate Boards, a private organization, which can be read to advocate that real estate agents should not attempt "block-busting" but should promote racial ho-"blockmogeneity, 393 F.Supp. at 434. This admonition of the private real estate group was subsequently deleted from the publication of the Delaware Real Estate Commission, which issues licenses to realtors in Delaware (TR. L. 511). Needless to say, the trial Court did not even attempt to make a finding concerning the specific effects of this admonition nor attribute it to the defendant State

(5) In 1965, a private board of realtors in Wilmington published a multi list which designated "open" listings where the owner was willing to sell to a minority buyer. 393 F.Supp. at 435. Such listings, in use nationwide prior to 1968, merely reflected the legal fact in the real estate industry that it was not illegal for private persons—

Although, in my opinion, absolutely outrageous, but not illegal—
to discriminate in the sale of their real estate. That situation was changed, of course,

by the decision in Jones v. Mayer, supra.

(6) The public housing authorities which have existed in New Castle County have built almost all of what public housing has been built within the City of Wilmington. 393 F.Supp. at 435. The Court does not attempt to determine a specific cause and effect in this regard, does not attempt to attribute it to the defendant school authority but does at least recognize that there are legitimate economic realities which exist in New Castle County as in most other metropolitan areas which have resulted in public housing being concentrated in the urban area. The decision in Arlington Heights, supra, establishes the lack of constitutional violations involved in such activity.

Mr. President, is it possible to ask for an additional 5 minutes?

Mr. ROBERT C. BYRD. Mr. President, I understand that Mr. Javits does not want the time allotted to him under the order. I ask unanimous consent that the distinguished Senator from Delaware may use such time as he may desire from the 15 minutes that was ordered for Mr. Javits.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BIDEN. I thank the majority leader.

When I was New Castle councilman, I dealt with the issue of public housing. I fought hard and I fought long to put public housing projects in the suburban communities. It should be. That should happen. But it was not an attempt on the part of Government agencies to specifically exclude blacks from the county.

Mr. President, I agree with the Court

of Appeals for the Fourth Circuit which stated that, although housing discrimination, private or governmental, is deplorable, "* * * a school case, like a vehicle, can carry only a limited amount of baggage." The Supreme Court stated it more forcefully in the Charlotte busing case in 1971:

Our objective in dealing with the issues presented by these cases is to see that the school authorities exclude no pupil of a racial minority from any school, directly or indirectly, on account of race; it does not and cannot embrace all the problems of racial prejudice even when those problems contribute to disproportionate racial concentrations in some schools.

To hold Wilmington school officials responsible for the acts of private realtors is unjust and, to my mind, inconsistent with the Supreme Court's holding in the Charlotte case. It is one more example of injustice in the name of justice.

I have summarized the allegations of constitutional violation in the Wilmington case. Furthermore, the one colorable allegation involving 191 students over 20 years ago is simply not a "substantial" interdistrict violation, an essential prerequisite to an interdistrict remedy such as the massive urban-suburban busing ordered by the district court in Wilmington, which, I reemphasize, will bus 6 out of 10 children in the State of Wilmington.

This leads me to the second major controversy in the Wilmington case—and all school desegregation cases—the scope of the remedy. In summary, the district court in this case has ordered the State board of education to adopt a busing plan involving approximately 60 percent of our students, so as to achieve a 10- to 35-percent quota of blacks in each school in the Wilmington metropolitan area—which is essentially our State.

Mr. President, the rule which the courts apply in fashioning school desegregation remedies is to place the injured party or class in the same position they would have been in had the injury not occurred. I believe that there has been no substantial injury that deserves a remedy. Assume, for the sake of argument, that the court finds such an injury, that 191 student transfers 20 years ago or the fortuitous effect of the 1968 statute, constitute violations in either of these instances. There is absolutely no reason to believe that either of those acts, had they not occurred, would have resulted in a 10- to 35-percent presence of blacks in the schools of metropolitan Wilmington.

At the heart of the Wilmington case is the problem of residential racial separation. Blacks cannot afford to live in Wilmington school suburbs.

That is unfortunate, and would be resolved by economic policy, by housing patterns, and by attempts in this body and in other State legislatures to rectify that situation.

So we end up having predominantly black schools in Wilmington and predominantly white schools in the suburbs. This is a nationwide condition that must be addressed, but not by busing. It has little if anything to do with Government action in Wilmington or in most other urban centers. It has absolutely nothing to do with the acts of school officials in

Wilmington. It cannot be cured by a massive busing order in Wilmington or any other city.

It cannot be cured, furthermore, and I am confident it cannot be, by any busing order that envisions elimination of those school districts.

Furthermore, I am confident that the progress we have made in race relations in Delaware will be jeopardized and that equal educational opportunities will be undermined by such an order.

And I come from the other side of the fence on this, Mr. President. I was a criminal defense lawyer, a public defender, representing dissident groups within the community. I have been in my legal practice the black man's lawyer. My civil rights record, my activities, all that I have done since I have been in this body, are consistent with the position that is that blacks are given the short end of the stick in our society and we have an obligation to remedy that.

But it seems to me that all the work we are doing to better relations between black and whites in this country, and in my community, will force a setback and not a move forward by this ill-conceived policy.

Last week, I introduced legislation which will stop the Wilmington busing order and all similar orders, were to pass. In brief summary, it takes the following two principles from the Supreme Court decisions in Washington against Davis and the Charlottee case and enacts them into statutory law. It essentially says:

Busing cannot be ordered:

based solely upon evidence of discriminatory effect, or

(2) private discrimination beyond the control of school officials.

Remember the Supreme Court's quote:
Any vehicle can only carry so much bag-

The schools are having enough trouble teaching children how to read and write, let alone solving the social problems created by agencies and/or individuals beyond their control.

I believe that my legislation will correct the injustice of the Wilmington case and other cases where the pursuit of the goals of the 14th amendment have led to irrational and arbitrary results. I have struggled throughout my Senate career to fashion legislation that can achieve that goal without doing violence to the "equal protection" goals of the 14th amendment. I am satisfied that this legislation will do just that. In the end, it will strengthen the 14th amendment because it will again make the "equal protection" clause a practical reality. It will restore credibility and rationality to that basic goal of our society by regenerating the public consensus necessary to implement the "equal protection" clause and the rest of the Bill of Rights.

I thank my colleagues for listening. I particularly thank the majority leader for extending my time. I appreciate the indulgence of the Chair.

(There was a disturbance in the galleries.)

Mr. ROBERT C. BYRD. Mr. President, I ask that there be order in the galleries.

The PRESIDING OFFICER. The ma-

jority leader is correct. The Chair would remind the galleries that they are guests of the Senate. They are there under the same instructions as Senators are, to maintain order and decorum at all times during the sessions of the Senate.

ORDER OF BUSINESS

The PRESIDING OFFICER. Under the previous order, the Senator from Oklahoma (Mr. Bartlett) is recognized for not to exceed 15 minutes.

THE ADMINISTRATION'S COMPRE-HENSIVE ENERGY PROGRAM

Mr. BARTLETT. Mr. President, the Congress and the American people are presently awaiting with great expectations the unveiling of the administration's comprehensive energy program. Although the program will not be formally presented for 2 weeks, we have received some indication of the directions to be taken from statements of the President and members of his Cabinet and by various bills already introduced in Congress and supported by the administration. Among these developments are a statement by the President to the effect that his forthcoming program will be strongly reliant on mandatory conservation, a statement by Dr. Schlesinger that the development of breeder reactors will be delayed for some time to come, the introduction of the Surface Mining Control and Reclamation Act, the Outer Continental Shelf Lands Act amendments, and the Coal Utilization Act.

I regret to say that these already publicized positions and measures, constituting a large portion of the ultimate Carter administration energy package, fall far short of realistic hopes and expectations for a rational, workable energy policy for the United States.

In fact, the program I see taking form is not just a failure, but a farce, one in which the Federal Government will continue to suppress energy development—as it has done for the last several years, force consumers to restrain energy consumption, and somehow hope that America will conserve itself into energy abundance. Such a program to "accentuate the negative" may appease those who want cheap energy while it lasts, or the radical environmentalists who prefer no energy, but it continues to ignore the legitimate energy needs of our Nation, its economic growth, its military strength, and the basic energy demands of its people for jobs and a good standard of living.

An area of particular disappointment which I would like to address today concerns coal, one of America's four primary energy resources for now and the remainder of the century. Administration policies now being formulated and legislation which has been offered, presumably in concert with the administration's forthcoming "Energy Program," will deny the coal industry the integral role it might otherwise play in solving our energy problems.

Two conflicting measures before the Senate will have a disastrous, crippling effect on this vital part of our energy industry. One is S. 977, the "Coal Utilization Bill" which mandates conversion

from oil and natural gas to coal for electrical generation and industrial boilers. This measure is designed to promote the use of coal in place of other basic energy resources—and I certainly support the conversion of natural gas from boilers to coal—however, it is destined for failure, because of other aspects of the discordant energy program that is developing.

While S. 977 promotes coal utilization, another measure before the Senate works in exactly the opposite direction, discouraging coal production. S. 7, erroneously termed the surface mining bill, is instead a ban-surface mining bill, an anticoal production bill. The measure has gone far beyond reasonable regulation of coal mining and reclamation to effectively prevent the strip mining of coal, in favor of the more expensive and less productive deep mining of this resource.

These two measures, working in totally opposite directions, are representative of the overall energy effort as it now stands before the Congress and the administration. We have known for some time that only full production of the four basic energy resources available to us in quantity can supply America with the energy it needs for the rest of the century.

And yet, our policies with regard to the four resources—oil, gas, coal, and nuclear energy, continue to discourage rather than stimulate increased development of these resources.

In the days ahead I intend to comment in detail on the policies being formulated regarding these resources, and how these policies together form a blueprint for energy disaster in this country.

If we review very briefly the 4-year period that has just passed, virtually every action taken by Congress on energy has reduced the capability of our energy industry to produce domestic energy.

The incentives have been removed and replaced with negative incentives. The price has been rolled back to reduce the natural incentive of the marketplace to invest in more and more drilling, to produce more and more oil and gas.

So it is very important that Congress look at the existing parts of the administration's energy program and assess them; and I believe Congress will come to the conclusion that, with the positions taken by the administration and the measures supported by the administration, we are not going to be able to realize the potential coal production we could otherwise, with no action; that we will not be able to have the nuclear energy that we desperately need, that we otherwise would have with existing programs permitted to continue, particu-larly in the breeder reactor area; that with the Outer Continental Shelf bill, if it passes as it is now submitted to Congress, we will not have sufficient drilling in the Outer Continental Shelf and development of those resources to fill the need we have for more domestic oil and

However, this is just a part of the total Carter package. We are not sure what the missing links are as yet, but we will see yery soon.

Regardless of what is in the part that has not been announced, I do not see how we can have a workable energy program

that is going to provide the needs of this Nation. Congress must look very closely at what is presented to it, so that we will develop a workable energy program that will resolve our problems, reduce our dependency on OPEC nations, provide the power for jobs—more and better jobs for this Nation—strengthen our economy, and assure us that our national defenses are strong.

It used to be that we would limit our imports of oil to 10 percent of our production for national security reasons. Today we are bringing in 50 percent of production by imports. This shows a foolish dependency on foreign sources of oil that we know are not reliable in all conditions.

So I tell my colleagues that I will continue analyzing the various aspects of the administration energy program as time goes on and as more parts of it are made known to all of us. But I think it is vital that Members of the Senate pay very close attention to all facets, so that we can develop a sensible program that will do the job for every American.

LOCAL PUBLIC WORKS CAPITAL DE-VELOPMENT AND INVESTMENT AUTHORIZATIONS

Mr. ROBERT C. BYRD. Mr. President, on behalf of Mr. RANDOLPH, I ask the Chair to lay before the Senate a message from the House of Representatives on H.R. 11.

The PRESIDING OFFICER (Mr. Harry F. Byrd, Jr.) laid before the Senate a message from the House of Representatives announcing its insistence upon its amendment to the amendment of the Senate to the bill (H.R. 11) to increase the authorization for the Local Public Works Capital Development and Investment Act of 1976, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. ROBERT C. BYRD. Mr. President, on behalf of Mr. RANDOLPH, I move that the Senate disagree to the further amendment of the House to H.R. 11 and agree to the request of the House for a conference, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. Randolph, Mr. Muskie, Mr. Burdick, Mr. Bentsen, Mr. Anderson, Mr. Moynihan, Mr. Stafford, Mr. McClure, Mr. Domenici, and Mr. Chaffe conferees on the part of the Senate.

POSTPONEMENT OF EFFECTIVE DATE OF CHANGES IN THE SICK PAY EXCLUSION

The PRESIDING OFFICER. Under the previous order, the Senate will now proceed to the consideration of H.R. 1828, which will be stated by title.

The assistant legislative clerk read as

A bill (H.R. 1828) relating to the effective date for the changes made by the Tax Reform Act of 1976 to the exclusion for sick pay.

Mr. LONG. Mr. President, as I believe Senators know, this bill, the counterpart of which has been sponsored on this side by the Senator from Kansas (Mr. Dole) and others, provides that the provisions relating to sick pay would not be effective for the calendar year 1976.

There has been a great deal of discussion about that. I am sure Senators have received a great deal of mail about it. I have.

Mr. President, H.R. 1828 generally postpones for 1 year the effective date of the sick pay revisions made by the Tax Reform Act of 1976.

Last year the Congress made extensive changes in the taxation of sick pay. In general, the Tax Reform Act repealed the sick pay provisions and substituted a more restricted, disabilty income exclusion. Several other major changes in this provision were made by the 1976 act. These changes include: The exclusion is availabe only to taxpayers who are permanently and totally disabled; the exclusion is phased out for adjusted gross incomes of more than \$15,000; and, under certain circumstances if a taxpayer wishes to recover tax-free the amount of any contributions he or she made to an annuity program, the taxpayer must make an irrevocable election not to claim sick pay exclusion for that year and any subsequent year.

The Tax Reform Act of 1976 which required almost 2 years of legislative work did not become law until October 4, 1976, but the sick pay revisions were applicable back to January 1, 1976. By October 4, 1976, many people had received amounts which were excludable as sick pay under the old law, but not under the new law. Many of these taxpayers did not fully realize that they were affected by the changes until they started to prepare their tax forms and instructions this year, and had to come up with extra money to pay the increased tax liabilities.

This bill relieves taxpayers of these unanticipated tax increases by generally postponing for 1 year the effective date of the sick pay revisions. Under this bill, the sick pay provisions generally begin to apply in 1977—that is, for taxable years beginning after December 31, 1976.

The bill also contains a number of technical provisions designed to protect people who made certain elections under the 1976 act's sick pay revisions. These people will be given the opportunity to revoke those elections and make new elections beginning in 1977 or at a later date.

Also, for some people the Tax Reform Act rules reduce current or future tax liability. For those relatively few people who prefer the 1976 act rules, the bill permits them to stay on those rules for 1976. Under this bill, taxpayers are permitted to choose whether they want 1976 as their last year under the old rules or their first year under the new rules.

This bill is estimated to cause a onetime \$327 million reduction in receipts, all in fiscal year 1977. The third concurrent budget resolution, as agreed to by the Congress, provides sufficient room for this revenue reduction.

Mr. President, I believe the relief provided by this bill is fair and reasonable. The Finance Committee unanimously recommended that this measure be passed by approving identical language on the tax stimulus bill.

I know of no objection to this amendment. I am informed that at least one or

two amendments will be offered, and I can agree to at least one of them. I believe the Senator from Connecticut has an amendment he wishes to offer.

UP AMENDMENT NO. 148

Mr. RIBICOFF. Mr. President, I send an amendment to the desk on behalf of myself, Mr. Bartlett, and Mr. Matsunaga.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Connecticut (Mr. Ribicoff), for himself, Mr. Bartlett, and Mr. Matsunaga, proposes an unprinted amendment numbered 148:

At the end of the bill, add the following:
Sec. EFFECTIVE DATE FOR CHANGES IN
TREATMENT OF INCOME EARNED
ABROAD BY UNITED STATES CITIZENS LIVING OR RESIDING ABROAD
Subsection (d) of section 1011 of the Tax

Subsection (d) of section 1011 of the Tax Reform Act of 1976 is amended by striking out "December 31, 1975" and inserting in lieu thereof "December 31, 1976".

Mr. RIBICOFF. Mr. President, my amendment delays for 1 year the effective date of the provision in the Tax Reform Act of 1976 which substantially changed the tax treatment of income earned abroad by U.S. citizens.

Prior to the 1976 act, U.S. citizens could exclude up to \$20,000—and in some cases \$25,000—of income earned abroad during a period in which they were overseas for 17 out of 18 months or during a period they were bona fide residents of a foeign country. The 1976 act generally reduced this exclusion to \$15,000 per year-although a \$20,000 per-year exclusion was retained for employees of charitable organizations. In addition, the act made three substantial modifications in the computation of the exclusion: It disallowed any foreign tax credit for taxes paid to foreign governments on excluded income; it taxed any additional income of these individuals at the higher rate brackets which would have applied had the excluded income been subject to tax; and it required that income eligible for the exclusion not be received outside of the country where earned.

Although the Tax Reform Act of 1976 was not enacted until October 4, 1976, these changes in the earned income exclusion applied to all income earned in 1976 for calendar year taxpayers. This retroactive effective date has caused considerable hardship for many individuals who could not have known for most of 1976 that they would be subject to substantially higher taxes for that year. The amendment recognizes that the hardship resulting to these individuals is substantialy greater than the small amount of revenue involved-approximately \$38 million. Thus, the amendment delays the effective date of this provision until taxable years beginning in 1977.

This matter was brought before the Committee on Finance at the same time as the exclusion for sick pay, and I believe it was voted on unanimously by the entire committee. I appreciate the willingness of the manager of the bill to accept this amendment.

Mr. MATSUNAGA. Mr. President, will the Senator yield?

Mr. RIBICOFF. I am pleased to yield

to the distinguished cosponsor of this amendment.

Mr. MATSUNAGA. Mr. President, I suport the Ribicoff-Matsunaga-Bartlett amendment which would delay from December 1, 1976 to December 31, 1977, the effective date of the provision in the 1976 Tax Reform Act which changes the tax treatment of income earned abroad by U.S. citizens.

This is an appropriate time for the consideration of this amendment; the same reasons which lead the House to enact H.R. 1828 also support the adoption of the present amendment. As with the changes in sick pay exclusion, the 1976 Tax Reform Act changed retroactively the tax treatment of Americans living and working abroad. Although the act became law in October of 1976, its provisions were made applicable back to January 1, 1976.

Taxpayers rightfully deserve the opportunity to plan and to prepare for the payment of added taxes imposed by the change. However, because of the late passage of the 1976 act and its retroactive application, many U.S. citizens abroad did not anticipate the tax increase. Many did not realize the changes had been made, until they examined the tax forms and were preparing to file their tax returns for this year.

The new provision caught these taxpayers unprepared. They had not made quarterly declarations and withholdings to satisfy the new law. Many would incur, in addition to the tax, interest and penalty because of the 1976 act's retroactive application.

These U.S. citizens abroad are honest taxpayers; they wish to comply fully with U.S. tax laws. Nonetheless, a retroactive change which materially increases their tax liability for a year already passed, cannot help but rankle their sense of fair treatment.

I do not wish to argue the merits of the changes in the tax treatment of income earned abroad today. I only wish to direct your attention to the inequity that results from the retroactive application of that change. I urge the Senate to adopt this amendment to correct this inequity. As amended, the bill, H.R. 1828, would restore fairness of our tax system to two groups of taxpayers—those who received sick leave compensation and those who worked abroad.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. RIBICOFF. I yield.

Mr. CURTIS. I thank the distinguished Senator from Connecticut.

Mr. President, I support wholeheartedly this amendment as well as the provision in reference to sick pay. I think both are meritorious as to content.

In addition, I believe that Congress should always refrain from retroactive taxation unless there are some very unusual circumstances.

The tax load of all our people is so heavy that we owe it to them to let them know ahead of time what their burdens will be, so they can make proper arrangements, and we should not place on them an undue hardship by reason of retroactivity.

I commend the Senator for offering this amendment, I shall support it.

Mr. RIBICOFF. I would just make one

comment. In November 12 Senators went abroad under a Senate resolution. We met with American residents abroad. We said that:

Here are 12 Senators who would like to hear the thoughts of Americans living abroad.

We had two meetings in Iran, attended by some 300 people, and I never heard such universal outrage. These were not people in business or earning a lot of money; these were Americans with ordi-

nary jobs.

As the distinguished Senator from Nebraska said, they were having withholding taken out of their wages, and suddenly they were confronted with a big tax bite, and they did not have the money to pay for it. They were not talking about what would happen in 1977 with respect to retroactivity.

I see the distinguished Senator from Michigan is on the floor. While not a single one of those people was a Connecticut constituent, I think all of us felt their cause so deeply we said we would fight for them when we got back to the

Senate.

Mr. GRIFFIN. Mr. President, will the Senator from Connecticut yield for a brief comment?

Mr. RIBICOFF. I would be pleased to vield.

Mr. GRIFFIN. I want to associate myself with the remarks of the distinguished Senator from Connecticut, who was the chairman of the delegation which made that trip into the Middle East last November, and I am glad to indicate he reports exactly correctly.

At his suggestion, which I thought was a very good one, our group had a meeting with Americans living abroad in various

countries in which we traveled.

The one universal, uniform complaint we heard was this particular provision which was made retroactive insofar as the taxation of income of Americans living abroad was concerned.

I support this amendment of the Senator from Connecticut. It does give relief insofar as retroactivity is concerned.

I also hope, however, that the Committee on Finance perhaps would spend a little more time on the policy questions involved as to whether or not we want it to take effect at the end of the year or whether it needs some further modification.

I think there is some serious question as to whether we are actually helping or hurting the employment of Americans and what the impact, the serious question of what the impact, would be on U.S. business that is operating abroad.

I think some of those questions, perhaps-and I say this not as a member of the Committee on Finance-need a closer and more comprehensive study.

Mr. RIBICOFF. I thank my distinguished colleague.

I yield to my cosponsor, Senator Bart-LETT of Oklahoma.

Mr. BARTLETT. I thank the Senator from Connecticut for yielding. I express to him and to the floor manager my appreciation of their sponsorship and acceptance of this amendment.

One of the reasons why I voted against the Tax Reform Act last year was the provision in the law that changed the tax treatment of Americans working

abroad. Because of those changes I introduced a bill on the 20th of January 1977, to substantially return that treatment to what it was before the 1976 law. addressing the policy question that was mentioned by the Senator from Michigan. I later offered another bill to remove the retroactive provisions which the amendment of the Senator from Connecticut now addresses.

I will give you the experience of just one company, since I understand the Treasury Department has said this provision will only amount to revenue gains of only \$40 million. One company in Oklahoma. Halliburton, which is an oilfield service company that serves the drilling of wells, production of oil and gas all over the world, has estimated that the increased employee costs to them for 1976 will be \$9 million.

Halliburton is not a huge company. You can see that for the operations of many companies and for many individuals in foreign lands that this amounts

to a very severe blow.

Certainly, as the Senator stated, surprising them with a tax change which they were not expecting was a severe financial blow, but also I think it really hurt their pride. I think most of the Americans overseas feel they are ambassadors for the United States, very good ones in most cases.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. BARTLETT. They do a lot for this country that we are not aware of.

Yes, I yield.

Mr. CURTIS. I commend the Senator on his remarks. This goes far beyond the employees there. The companies for whom they work must compete with industrial companies from all over the world. If we do not continue this tax treatment, fewer American companies will have employees abroad, and all of these employees abroad are creating jobs for people back home because the parent company is sending things, manufacturing things, and it opens up the avenues of trade and banking for more goods

So, in addition to the fact that this matter we are correcting today is unfair to the employees, it is also a very uneconomic thing from the standpoint of

our general economy.

Mr. BARTLETT. The Senator is certainly right because the management of Halliburton informed me very early, before the Tax Reform Act passed, that they would not be competitive in certain areas because of the anticipated increases in salary payments they would have to make, and that they would be replacing Americans with foreign nationals in some positions. So it would affect the "ambassadors" and the goodwill citizens of our country who do a great job for the United States all over the world.

I will say this to the Senator from Connecticut and also to the floor manager of the bill. I hope that the Committee on Finance will look very carefully at the questions of fairness and policy involved in this matter, as was stated by the Senator from Michigan. After this amendment does become law it will provide enough time to make a sensible study of whether it is really in the best interests of this Nation to tax the earnings of people. Americans, working in foreign areas as we now do.

But I do thank the Senator from Connecticut very much for his leadership in this area. I think it is a very important amendment to be passed.

Mr. DOLE. Mr. President, I support-in fact will be glad to join in cosponsoring-the amendment of the distinguished

Senator from Connecticut.

Mr. RIBICOFF. Mr. President, I ask unanimous consent that the distinguished Senator from Kansas, the Senator from Michigan, the Senator from Nebraska, and the Senator from Utah (Mr. HATCH) be listed as cosponsors.

The PRESIDING OFFICER. Without

objection, it is so ordered.

Mr. DOLE. I do not want to take any time. I just wanted to ask the distinguished chairman of our committee if the House will agree to this amendment and any other amendments so that we can have this bill passed today? We have a time problem. I strongly support the amendment. I wonder if the Senator has any information about whether the House will accept these amendments.

Mr. LONG. I am led to believe that while the House may not be unanimously in favor of the amendment as we were on the Committee on Finance, the House, I think, will be favorable to it. I believe there is good reason for optimism that the House will accept the amendment.

This amendment, plus anything else we are going to do on this bill, should be done in about the next hour because f am told the House may adjourn within the next 2 hours, so we want to be sure we get it there before they go out.

Mr. DOLE. I appreciate that comment because I understand they may adjourn by 3:30 and, of course, we are faced with an April 15 deadline, and many of these people who are directly involved in the sick pay exclusion and also the amend-ment of Senator Ribicoff need to know immediately. I certainly support the amendment.

Mr. CURTIS. Let us vote on the amendment.

Mr. LONG. I also favor the amendment. I hope the House will agree to it, and I am confident it will.

Mr. BUMPERS. Mr. President, will the Senator yield me 60 seconds? I would like to say, first of all, I know the amendment is going to be accepted, and even if we are going to have a rollcall vote on it I think I probably would support it. But I would like to say that I was on a trip to the Middle East with the distinguished Senator from Connecticut in November, and every place we went we tried to meet with as many Americans as we could.

This was the first thing we were always hit with. They were terribly disenchanted because we were taking this exemption away from them.

I would like to say that I have some reservations about repealing this. I guess I was one of the people in the Senate who would admit he knew it was in the bill at the time the bill was passed. I did know it was in there. One of the reasons why I had reservations about it was because defense contractors used this in employing people. They reminded them that they make \$25,000 in Iran, and that is \$25,000 of tax-free money, no

deductions, and that is the equivalent of anywhere from—well, for example, when I was making \$44.4 thousand as a U.S. Senator, my take-home pay was about \$25,000 a year, and that is what

it is comparable to.

So if you look at it from that basis it means we are, in effect, subsidizing defense contractors who do indeed send literally thousands of people all over the world. Their argument is that this is the only way they can compete with the Germans, the French, and the British and other arms manufacturers who sell in the international market.

I personally do not think it is a good argument, but I do recognize many of those people, who signed fairly long-term contracts on the assumption they were going to receive a certain amount of money, and it would not be taxable, probably should not be penalized by the legislation we passed last year. But I wanted to express my reservations about

Mr. LONG. Mr. President, of course, the amendment applies only to the year 1976. This deals with something that is on a bill that we enacted in October 1976. While it is true that some of the best advised taxpayers know what the House Ways and Means Committee is talking about, know what the House of Representatives has passed, and know what bills come from the House of Representatives and the Senate, the average taxpayer does not know about anything of that sort of thing until it becomes law. and this is how the average accountant does business. So they are not in position to advise on those things until it becomes law

In that respect, they have as good point as do the people involving sick pay, to say they did not know about all this and it took place in a bill passed in October. For 10 months of the year the law was favorable to them and, if we are going to do this to them, we at least should not do it retroactive; it should be prospective. So they can make the argument, and I think at least on that basis, even if we do not fully agree with their argument we can justify a vote to say that the effective date would be January 1, 1977, rather than January 1, 1976.

Mr. RIBICOFF. That is correct.

Mr. CURTIS. Vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.
Mr. STONE and Mr. CURTIS ad-

Mr. STONE and Mr. CURTIS addressed the Chair.

The PRESIDING OFFICER. The Senator from Florida is recognized.

UP AMENDMENT NO. 149

Mr. STONE. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows: The Senator from Florida (Mr. Stone), for himself, Mr. Huddleston, Mr. Ford, Mr. Packwood, and Mr. Williams proposes an unprinted amendment numbered 149.

Mr. STONE. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

- At the end of the bill add the following new section:

SEC. . WITHHOLDING TAX ON CERTAIN GAM-BLING WINNINGS.

(a) IN GENERAL.—Subparagraph (C) of section 3402(q)(3) of the Internal Revenue Code of 1954 (relating to sweepstakes, wagering pools, and other lotteries) is amended to read as follows:

"(C) Sweepstakes magazing and the control of the control of

"(C) Sweepstakes, wagering pools, certain parimutuel pools, jai alai, and lotteries.—Proceeds of more than \$1,000 from—

"(i) a wager placed in a sweepstakes, wagering pool, or lottery (other than a wager described in subparagraph (B)), or

"(ii) a wagering transaction in a parimutuel pool with respect to horse races, dog races, or jai alai if the amount of such proceeds is at least 300 times as large as the amount wagered.".

(b) EFFECTIVE DATE.—The amendments made by this section apply to payments made after April 30, 1977.

Mr. STONE. Mr. President, this amendment was originally to be offered by Senator Huddleston, along with Senator Ford. Senator Packwood and myself had asked to be cosponsors. Unfortunately, Senators Huddleston and Ford had to go to Kentucky today because of the disastrous floods in the eastern portion of their State.

The amendment I am offering modifies the withholding requirement enacted in the 1976 Tax Reform Act on proceeds of wagers placed in parimutuel pools with respect to horse races, dog races, and jai alai. It provides for a withholding tax of 20 percent on proceeds of a wagering transaction if the proceeds are \$1,000 or more and are at least 300 times as large as the amount of the wager. The present law imposes a 20-percent withholding on wagering proceeds of \$1,000 or more regardless of odds.

Mr. President, this amendment will make the withholding provision conform to what many of us, and also the Commissioner of the Internal Revenue Service, thought we were enacting in the tax bill last year. The law as it now stands is unworkable. Dr. Larry Woodworth, Assistant Secretary of the Treasury for Tax Policy, recognizes the problem. In recent testimony before the Ways and Means Committee, he stated that:

We realize that the new withholding requirement creates problems, and we would support legislation to reduce these.

My amendment is explained in more detail in the written statements of Senator Huddleston and Senator Ford and I shall ask unanimous consent for these statements to be made a part of the Record.

I should also mention that the House Ways and Means Committee has reported a bill, H.R. 4090, which corrects the law along the same lines as my amendment, but imposes only a 10-percent, rather than a 20-percent, tax on proceeds subject to withholding. This bill is now awaiting floor action in the House.

Mr. President, it is my understanding that the Internal Revenue Service and the Treasury Department have no objections to this amendment as offered.

The State of Florida receives in direct tax revenue more than \$25 million annually from pari-mutuel racing. My concern about the withholding on gambling winnings imposed by the Tax Reform Act of 1976 is that it will have an adverse affect on the revenue received by Florida as well as approximately \$690 million in revenue received by the 32 other States which benefit from parimutuel racing. The amendment I offer today will minimize the amount of revenue which will be lost by Florida and other States as a result of Federal withholding tax.

Florida also ranks third in production of thoroughbred foals, having produced 18,392 foals in the decade from 1965-74 and I can proudly state that we produced 10.6 percent of the stakes winners in the country, an inordinate percentage considering the number of foals produced. It is illustrative of the size and scope of the horse industry in my State that more than 92,000 acres are devoted to raising thoroughbreds alone, and those lands have an estimated valuation of \$46 million. Stud fees for stallions standing in the State amounted to \$7,-237,000 last year, public auctions grossed in excess of \$11 million, and it is esti-mated that the thoroughbred broodmare population is worth an additional \$40 million.

That, Mr. President, encompasses the thoroughbred breeding industry alone, and we are also graced with large and viable, standardbred, quarter horse, and pleasure horse industries. Additionally, there are thousands of employees at our racetracks and farms, who pay income taxes and sales taxes.

I think it can safely be said that the horse breeding industry is a large and productive part of the economy in the State of Florida.

Mr. President, I ask unanimous consent to have printed in the RECORD a statement by the distinguished Senator from Kentucky (Mr. Huddleston).

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT BY SENATOR HUDDLESTON

The amendment I am proposing modifies the rules established by the Tax Reform Act of 1976 in regard to the withholding of income tax on winnings from wagers placed in parimutuel pools with respect to horse races, dog races, or jai alai.

Before the 1976 Act, withholding on race-track winnings was not required, although payouts of \$600 or more to winners of daily doubles, exactas, and similar wagering pools were reportable on information returns. The Internal Revenue Service enforced this requirement only where the odds were 300 to one or higher. To deal with some underreporting of gambling winnings on income tax returns, the 1976 Act supplemented the information reporting requirement with a provision for withholding 20 percent of net winnings of more than \$1,000 from sweepstakes, wagering pools, and lotteries.

During the conference on the 1976 Act, many people, including the Commissioner of Internal Revenue, as well as Members of Congress and their staffs, understood that, as to parimutuel pools with respect to horse races, dog races, and jai alai, winnings over \$1,000 would be subject to withholding only if the odds were at least 300 to one. However, the law as enacted did not include any odds requirement. The Internal Revenue Service has concluded that it is generally not productive to enforce reporting of winnings based on low odds.

This amendment provides that withholding in the case, of those kinds of parimutuel pools, will be required on winnings of more than \$1,000, but only if the amount of the

winnings is at least 300 times the amount of the bet.

It is my intent by this amendment that aggregation will not apply to parimutuel pools for horse races, dog races, and jai alai. Under the amendment, withholding should only be required if the proceeds are \$1,000 or more and only then if the proceeds are at least 300 times as great as the amount of the wager with each wager considered separately. It is my understanding that it is impractical to enforce any aggregation rules with respect to parimutuel wagering.

The changes made by this amendment will apply to proceeds paid after April 30, 1977.

The revenue impact of these changes are estimated by the Joint Committee on Internal Revenue Taxation to be within the Third Concurrent Budget Resolution.

The amendment is designed to meet minimum needs at this time and is not an endorsement per se of the concept of withholding on parimutuel winnings. The distinguished Commission on the Review of the National Policy Toward Gambling concluded

in its first report last year that

. . . the withholding measure will increase the advantage to illegal operators, generate minimal revenues to the Government, and unnecessarily increase administrative burden to the legal gambling businesses. . . If, upon reexamination, Congress finds the proposed withholding tax to be destructive of existing legal gambling industries, the Commission recommends that these withholding provisions be repealed."

In light of these findings, I believe that it would be appropriate if the Internal Revenue Service, the Department of the Treasury and the Department of Commerce would cooperate with all segments of the parimutuel industry in determining the ultimate productivity of withholding.

The study should determine:

(A) The effect of withholding on the "churn" of parimutuel dollars to determine whether withholding these winnings produces enough net federal revenue to offset the loss of revenue to the states;

(B) If winnings of less than \$1,000 are not ultimately offset by losses, with the end result that the IRS and the industry will subject themselves to considerable additional administrative expense without comensurate benefits in the form of government revenue;

(C) Whether the confusion engendered by the adoption of different parameters for reporting of parimutuel winnings and withholding from them will not be counterproductive both for the industry and for the federal government.

(D) If the revenue to be derived from such withholding in reality is consistent with the

IRS estimates of said revenue: and

(E) Finally, and most importantly, if the addition of withholding on the parimutuel industry drives the bettors from the sources of wagering into the hands of illegal bookmakers who do not withhold.

Along with passage of this amendment, it is essential that they study these potential areas of counterproductivity and report back to Congress within a reasonable time after

date of enactment.

The racing and breeding industries have contributed significantly not only to the tourist industries and quality of life in the 33 States which have parimutuel racing, but have made significant financial contributions as well. In the four decades since accurate records have been kept, the various States which conduct parimutuel wagering have received in excess of \$11.25 billion in direct parimutuel revenue, in addition to which they have received untold billions of dollars in additional, less obvious, revenues from sources such as property taxes, payroll taxes, sales taxes on admissions, concessions, farm equipment, on the sale of horses, and even on breeding fees for, in most states, horses are the one breed of livestock which do not fall under agricultural exemptions from sales tax on breeding fees.

There are more than 230,000 people in this country today who are licensed to make their living at the racetracks, and they must be supported by more than 100,000 additional workers directly employed in the breeding and raising of these horses to race.

These are mainly unskilled people, who might find it difficult to find employment in more specialized fields. Also, there are thousands of others in supportive industries which provide feed, equipment, housing and informational services to support the racing and breeding of horses in the United States.

In my State of Kentucky alone, Mr. President, the thoroughbred industry is estimated to be worth \$1 billion, and the annual sales taxes on thoroughbred stud fees alone annually amounts to more than \$1.5 million. Our own direct parimutuel revenue is estimated to have been \$12.5 million in relatively "painless" and "cheap" revenue, revenue which would have to be made up somewhere else if it were not for the racing industry.

I urge the Senate to pass this amendment, which merely makes the law into what we thought the law would be when we passed the 1976 Act.

Mr. STONE. Mr. President, I ask unanimous consent to have printed in the RECORD a statement by the distinguished Senator from Kentucky (Mr.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT BY SENATOR FORD

This amendment is quite simple. It re quires the withholding of 20 percent of the winnings at race tracks when the odds are at least 300 to 1 and when the winnings exceed \$1,000.

The present provision may be workable, but it certainly is impractical. It involves the aggregation of tickets which is extremely difficult, if possible, to implement.

The House Ways and Means Committee has reported a bill that would incorporate a change in the withholding requirements. There is a moratorium on attempting to implement this existing provision until Congress has had an opportunity to correct it.

The problem is not nearly as simple as it might appear. All of us support the principle that all income should be reported and proper taxes be paid. However, anyone who has been to the track will tell you very quickly that all winnings on one race do not mean a day's winnings.

Furthermore, the administration should not be so burdensome or inconvenient to drive people to illegal avenues of gambling. We should not create any incentives for individuals to use bookies nor patronize organized crime activities. The national commission on gaming recommended against any withholding, primarily for this reason.

Any withholding is a problem, and if too much is withheld, it is apparently more attractive to place bets outside the law than within the framework of race tracks and off-

track betting parlors.

I believe that this amendment is a reasonable approach. It is a workable approach and I believe that it could be administered without major inconvenience.

I do want to point out, however, that it will result in the loss of some revenue to States because of the churning effect. It will reduce the amount of the wager pools as the racing day nears an end.

The merit of withholding is that it will improve the reporting of winnings on Federal income tax returns. Thus, it will increase the Federal taxes collected on winnings at race tracks.

What all of us must recognize is that the economic value of an industry is at stake. Without the bettors, race tracks cannot continue. Without tracks the farms and all the agri-businesses related thereto cannot continue. And without this industry, there is a loss of over a half-million jobs. It is very important that all of us recognize that the question is not simply withholding at the tracks. It is an industry with which we are dealing and we could very easily cost the treasury more than we gain. I believe that this amendment recognizes that fact and I urge its adoption.

This amendment simply accomplishes what many of us thought the interpretation of the Tax Reform Act of 1976 to be. That interpretation was also shared by the In-

ternal Revenue Service.

I urge the adoption of the amendment.

Mr. STONE. Mr. President, briefly this amendment carries into effect what all of the people involved in last year's tax reform bill thought we were passing and with the approval and consent of the Commissioner of Internal Revenue and his staff.

May I also say, in advance, to the distinguished Senator from Kansas (Mr. Dole), who raised the question about House committee approval to the previous amendment, that this amendment is acceptable to the House of Representatives as well, I am informed, so that it will not slow down the basic bill with which the Senator from Florida is in the

strongest support.

What this amendment does is simply make it clear that withholding of winning wagers at the paramutual plants will take place when the winning wager is \$1,000 or more, and the return is 300 times the amount of the initial wager, or more. That is what we thought we were passing. Because of something that got caught between the bait and the dock it came out simply \$1,000. In the way the proposal to administer it was made, the Internal Revenue Service itself finds it very difficult, if not impossible, to administer under those terms. I think that all the parties in interest to this feel that it will be in the interest of minimizing the bite on State revenues and yet giving a reasonable way to administer this from the Internal Revenue Service point of view.

Mr. LONG. I thank the Senator.

Mr. President, during the conference on the Tax Reform Act of 1976 many people, including the Commissioner of Internal Revenue, as well as Members of Congress and their staffs, had understood that as to parimutuel pools with respect to horse races, dog races, and jai alai, winnings over \$1,000 would be subjected to withholdings only if the odds were 300 to 1 or more. However, as the law was enacted it did not include these odds requirements. Unfortunately, we could not correct this oversight in conference because the language was exactly the same in both the House bill and the Senate bill and there was nothing in conference that gave us the power to correct it. The conference report would have been subject to a point of order if we had corrected that oversight at that

So we assured Senators who were concerned about this matter that we would try to correct it at the earliest opportunity. We tried to correct the problem by passing a bill to meet this situation, and we did pass such a bill and sent it to the House of Representatives the last

night of the last session of Congress. Unfortunately, the House of Representatives adjourned before they had oppor-

tunity to consider it.

So this measure that the Senator is offering would at least seek to get this situation straightened out before the Kentucky Derby occurs, and that is very important to Senators from Kentucky who are necessarily absent because they are in that State looking at the plight of their people who suffered from the recent floods.

Mr. STONE. That is right, from the

flood damage.

Mr. LONG. And they have asked that this matter be considered and that they be recorded as being very much in favor of it, and I believe they have cosponsored this amendment.

Mr. STONE. That is correct.

Mr. LONG. So I am happy to support the Senator's amendment, which will make the statutory language conform to what we understood we were enacting in the Tax Reform Act of 1976. I hope very much the House of Representatives will agree to it. My understanding is that this is acceptable to the House side and I hope very much it works out that way.

Mr. STONE. I thank the distinguished

Senator from Florida.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

UP AMENDMENT NO. 150

Mr. CURTIS. Mr. President, I send to the desk an unprinted amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The

amendment will be stated.

The legislative clerk read as follows: The Senator from Nebraska (Mr. Curtis) proposes unprinted amendment No. 150.

Mr. CURTIS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill add the following new section:

SEC. —. STATE LEGISLATORS' TRAVEL EXPENSES AWAY FROM HOME.

Subsections (a) and (d) of section 604 of the Tax Reform Act of 1976 are each amended by striking out "January 1, 1976," and inserting in lieu thereof "January 1, 1977,". Subsection (c) of such section is amended by inserting "beginning before January 1, 1976," after "any taxable year".

Mr. CURTIS. Mr. President, we have a situation here where State legislators, without the passage of this amendment, are going to be unable to deduct their away-from-home expenses for the taxable year 1976.

I understand the distinguished chairman is favorable to this amendment and the House of Representatives is willing to accept it. The Committee on Finance has

already approved it.

The Internal Revenue Code provides that the place of residence of a Member of Congress within the congressional district which he represents is considered his tax home. Prior to the Tax Reform Act of 1976, no rule similar to the special rules for ascertaining the place of residence for a Member of Congress ap-

plied in the case of a State legislator. As a result, the tax home of a State legislator was determined in accordance with the general rules applicable to other taxpayers. Depending upon the facts and circumstances, the State capital may be a legislator's tax home under those general rules.

The Tax Reform Act of 1976 provided an election for the tax treatment of State legislators for taxable years beginning before January 1, 1976. Under this election, a State legislator may, for any such taxable year, treat his place of residence within his legislative district as his tax home for purposes of computing the deduction for living expenses. If this election is made, the legislator is treated as having expended for living expenses an amount equal to the sum of the daily amount of per diem generally allowed to employees of the U.S. Government for traveling away from home, multiplied by the number of days during that year that the State legislature was in session, including any day in which the legislature was in recess for a period of four or less consecutive days.

The provisions which allow a State legislator to treat his place of residence within his legislative district as his tax home for purposes of computing the deduction for living expenses only apply to taxable years beginning on or before December 31, 1975. This provision should be extended for a 1-year period during which time the problem can be given further consideration and a permanent

rule can be developed.

Mr. President, I ask unanimous consent that the comment in the Finance Committee report on H.R. 3477 relating to this legislative pay beginning on page 92 and extending over to page 94 be printed in the Record.

There being no objection, the comment was ordered to be printed in the RECORD,

as follows:

 LEGISLATORS TRAVEL EXPENSES AWAY FROM HOME (SEC. 407 OF THE BILL AND SEC. 162 OF THE CODE)

Present law

Under present law, an individual is allowed a deduction for traveling expenses (including amounts expended for meals and lodging) while away from home in the pursuit of a trade or business (sec. 162(a)). These expenses are deductible only if they are reasonable and necessary in the taxpayer's business and directly attributable to it. "Lavish or extravagant" expenses are not allowable deductions. In addition, no deductions are allowed for personal, living, and family expenses except as expressly allowed under the code (sec. 262).

Generally, under section 262, expenses and losses attributable to dwelling unit which is occupied by a taxpayer as his personal residence are not deductible. However, deductions for interest, certain taxes, and casualty losses attributable to a personal residence are expressly allowed under other provisions of the tax laws (secs. 163, 164, and

165).

A taxpayer's "home" for purposes of the deduction of traveling expenses generally means his principal place of business or employment. Where a taxpayer has more than one trade or business, or a single trade or business which requires him to spend a substantial amount of time at two or more localities, his "home" is held to be his principal place of business is determined on an objective basis taking into account the facts and circumstances in each case. The more im-

portant factors to be considered in determining the taxpayer's principal place of business (or tax home) are: (1) the total time ordinarily spent by the taxpayer at each of his business posts, (2) the degree of business activity at each location, (3) the amount of income derived from each location, and (4) other significant contacts of the taxpayer at each location. No one factor is determinative.

In 1952, a provision was adopted with re-spect to the living expenses paid or incurred by a Member of Congress (including a Delegate or Resident Commissioner). Under these rules, the place of residence of a Member of Congress within the congressional district which he represents in Congress is considered his tax home. However, amounts expended by the Member within each taxable year for living expenses are not deductible in excess of \$3,000. Therefore, a Member of Congress (who does not commute on a daily basis from his congressional district) can deduct no more than \$3,000 of his expenses of living in the Washington, D.C. area. Prior to the Tax Reform Act of 1976, no rule similar to the special rules for ascertaining the place of residence for a Member of Congress applied in the case of a State legislator. As a result, the tax home of a State legislator was determined in accordance with the general rule described above.

The Tax Reform Act of 1976 provided an election for the tax treatment of State legislators for taxable years beginning before January 1, 1976. Under this election, a State legislator may, for any such taxable year, treat his place of residence within his legislative district as his tax home for purposes of computing the deduction for living expenses. If this election is made, the legislator is treated as having expended for living expenses an amount equal to the sum of the daily amount of per diem generally allowed to employees of the U.S. government for traveling away from home, multiplied by the number of days during that year that the State legislature was in session, including any day in which the legislature was in recess for a period of four or less consecutive days. In addition, if the State legislature was in recess for more than four consecutive days, a State legislator may count each day in which his physical presence was formally recorded at a meeting of a committee of the State legislature. For this purpose, the rate of per diem to be used is to be the rate that was in effect during the period for which the deduction was claimed. In addition, the total amount of deductions allowable pursuant to this election is not to exceed the amount already claimed under a Federal income tax return filed by a State legislator before May 21, 1976. For this purpose, amounts shall be considered claimed under a return even though the taxpayer treated his living expenses as an offset against any reimbursement of per diem he received from the State legislature and, therefore, did not actually set forth these expenses as a deduction on his income tax return. The election is to be made at such time and in such manner as provided under Treasury regulations.

These limitations apply only with respect to living expenses incurred in connection with the trade or business of being a legislator. The 1976 Act did not impose a limitation on living expenses incurred by a legislator in connection with a trade or business other than that of being a legislator. As to other trade or businesses, the ordinary and necessary test of prior law will continue to

apply.

Reasons for change

The provisions which allow a State legislator to treat his place of residence within his legislative district as his tax home for purposes of computing the deduction for living expenses only apply to taxable years beginning on or before December 31, 1975. The committee believes this provision should be extended for a one-year period during which

time the problem can be given further consideration and a permanent rule can be developed.

Explanation of provision

The committee amendment extends the provision adopted by the Tax Reform Act of 1976 for one year, or to taxable years beginning before January 1, 1977.

Effective date

This amendment would apply to taxable years beginning before January 1, 1977.

Revenue effect

This provision will result in a revenue reduction of \$3 million for fiscal year 1977.

Mr. CURTIS. Mr. President, I asked the distinguished chairman of the Committee on Finance if he concurs in what I have said as to the acceptance of this amendment.

Mr. LONG. Mr. President, this measure was unanimously agreed to in the Committee on Finance. It is a part of the tax reduction and simplification bill which we will call up immediately after the recess. I am informed that it is strongly supported in the House of Representatives and the chances are very good the House of Representatives will accept the amendment if it is agreed to in the Senate.

Mr. CURTIS. Mr. President, I ask for a vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. CURTIS. I thank my distinguished chairman.

UP AMENDMENT NO. 151

Mr. LONG. Mr. President, I believe the Senator from Colorado (Mr. HASKELL) wanted to offer this amendment. I send it to the desk and ask that it be reported.

The PRESIDING OFFICER (Mr. ANDERSON). The amendment will be stated

The legislative clerk read as follows:

The Senator from Louisiana (Mr. Lone), for the Senator from Colorado (Mr. Has-Kell), proposes an unprinted amendment numbered 151:

At the end of the bill add the following new sections:

SEC. 3. UNDERPAYMENTS OF ESTIMATED TAX.

The amendment is as follows:

At the end of the bill add the following new sections:

SEC. 3. UNDERPAYMENTS OF ESTIMATED TAX.

No addition to the tax shall be made under section 6654 or 6655 of the Internal Revenue Code of 1954 (relating to failure to pay estimated income tax) for any period before April 16, 1977 (March 16, 1977, in the case of a taxpayer subject to section 6655), with respect to any underpayment, to the extent that such underpayment was created or increased by any provision of the Tax Reform Act of 1976

SEC. 4. UNDERWITHHOLDING.

No person shall be liable in respect of any failure to deduct and withhold under section 8402 of the Internal Revenue Code of 1954 (relating to income tax collected at source) on remuneration paid before January 1, 1977, to the extent that the duty to deduct and withhold was created or increased by any provision of the Tax Reform Act of 1976.

SEC. 5. INTEREST ON UNDERPAYMENTS OF TAX.

No interest shall be payable for any period before April 16, 1977 (March 16, 1977, in the case of a corporation), on any underpayment of a tax imposed by the Internal Revenue Code of 1954, to the extent that such

underpayment was created or increased by any provision of the Tax Reform Act of 1976.

Mr. LONG. Mr. President, it is my understanding that the Senator from Colorado (Mr. HASKELL) wanted to offer this amendment, and I therefore offer it on his behalf.

This amendment is identical to the language of H.R. 1680, which has been sent to us by the House of Representatives, and would simply provide that with regard to certain errors that might be made in the tax returns this year, of which there will be many because of the complexities of the tax reform law last year, the interest and penalties be waived.

The administration very much wants this particular group of provisions enacted before April 15, to help with the preparation and processing of returns. I offer it on behalf of the Senator from Colorado

Mr. HASKELL. Mr. President, I thank the Senator from Louisiana very much indeed. This is merely an amendment to correct an inequity which we in the Senate perpetrated on people who are subject to estimated tax statements, and also employers who are liable for failure to withhold income tax from employees.

We adopted several amendments last year in the Tax Reform Act, and the statute requires automatic increase of withholding. Our bill was passed late in the year, but it was retroactive to January 1. Therefore, people obviously could not foresee that they would have to withhold commencing January 1, but they become liable to a penalty, and it is clearly inequitable. This particular amendment would give relief just for the year 1976.

I understand that this is satisfactory to the chairman of the committee, or I do not think he would have offered it on my behalf. I move that the amendment be adopted.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Colorado.

The amendment was agreed to.

Mr. HASKELL. I thank the Senator from Louisiana.

UP AMENDMENT NO. 152

Mr. BELLMON. Mr. President, I have an amendment at the desk, and ask that it be reported.

The PRESIDING OFFICER. The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from Oklahoma (Mr. Bell-MON) offers an unprinted amendment numbered 152:

At the end thereof, insert the following new section:

Mr. BELLMON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end thereof, insert the following new section:

Sec. . Elimination of Retroactive Increases in Taxes by the Tax Reform Act of 1976

(a) Any provision of the Tax Reform Act of 1976, as amended by section 1 of this Act, or any provision of any amendment made by the Tax Reform Act of 1976 which increases the liability for tax of any person

under the Internal Revenue Code of 1954 for any taxable year beginning before January 1, 1977, shall not take effect with respect to any such taxable year.

(b) The Secretary of the Treasury or his delegate shall, as soon as is practical but not later than 30 days after the date of the enactment of this Act, submit to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate—

 a list of all provisions of and amendments made by the Tax Reform Act of 1976 with respect to which subsection (a) applies;

(2) a draft of any technical and conforming changes in the Tax Reform Act of 1976 and the Internal Revenue Code of 1954 which are necessary to carry out the provisions of subsection (a).

Mr. BELLMON. Mr. President, when the Tax Reform Act of 1976 was passed, that bill included many provisions that were retroactive on American taxpayers. I doubt that any Member of the Senate realized what an enormous impact that bill was going to have retroactively on taxpayers who were at the time operating under the provisions of law, who had no idea, no advance notion that the laws would be changed, who had made no preparation for the retroactive provisions of the law, and in fact there was no way they could make provision for them.

The result is that we have many taxpayers who are seriously injured by retroactive provisions of that bill.

I understand that amendments have already been adopted today to H.R. 1828 to take care of State legislators, foreign earnings, and sick pay, which would indicate that the committee now recognizes that those retroactive provisions were inequitable. What I am trying to do is take care of the rest of the inequities in the bill. That is the purpose of this amendment.

Mr. LONG. Mr. President, if this amendment were agreed to the House would not accept it, and if it got to the President's desk the President would veto the bill. I think that would be very unfortunate. I am sure the Senator from Oklahoma favors most of what we have here, and I hope he would be willing to buy, from my argument, that it is better to do as much good as you can at one time, and settle for that, than to find you have overshot the target and achieved nothing.

What the Senator would like to do should be considered in detail on a bill with regard to which we do not have the time limitation that we have now. If we take even 2 hours in passing this bill, we might as well forget about it, because the House will have gone home for the Easter recess, and by the time they come back in people will have had to comply with the law as it existed at the time. So it is urgent that we hold off on amendments of this sort and consider them on some other measure.

The Senator may want to offer his amendment on the President's tax reduction and simplification bill, which will be the pending business immediately after we get back. That would be better than offering it on this bill, because the amendment can only, at this point, impede the progress of a bill which I believe the Senator agrees is meritorious, which would not become law if we put the amendment on it at this point, or

even if we merely take a substantial amount of time debating it here in the Senate today.

Would the Senator be willing to withhold his amendment at this time and consider offering it on some later measure, for example, the tax simplification and reduction bill we will have before us immediately after we get back?

Mr. BELLMON. Mr. President, I certainly have no desire to delay the passage of H.R. 1828, nor to bring about its defeat or get it vetoed. On the other hand, I believe it is not equitable to take care of some of the unjust retroactive provisions that are presently in the law without at least some indication that we are going to take care of the rest of them in a timely fashion and in an appropriate manner.

I frankly am not all that enamoured with the President's tax simplification and reduction bill; I may want to vote against that when it gets to the floor.

Mr. LONG. Mr. President, some of the 1976 act amendments help the taxpayers. Some of them provide very substantial tax reductions, such as the provision for the retirement income of elderly people and the extension of the tax cuts that were in that bill. This would, in many respects, on balance be a good thing for the taxpayers, in that it would result in a lot more tax reductions than increases.

But we did have certain situations where some taxpayers were getting by with paying little or nothing, although they had, in terms of economic matters. made very heavy gains. We were seeking to stop that kind of legal tax avoidance, that no one in the Senate really approved of. I think the majority of the business people would tell us, for example, that if we can find anyone who is paying less than 2 percent or even less than 5 percent on the economic income that person made in that year, we ought to find a way to tax him, because other people in the same business may not be engaging in the same form of tax avoidance or tax shelters that those people are using, and it results in people who are not trying to avoid a reasonable share of taxes having to pay a lot more than they otherwise should have paid.

I regret that I cannot accept the Senator's amendment, but I hope that he understands my problem as the manager of the bill. We have here a bill that would be beneficial to a million working people, that does help to remove inequities as far as it goes, but if it goes beyond that point, we are just going to kill a good bill which everyone agrees should become

I hope the Senator will not insist on this amendment. I hope he will consider offering his amendment, or offering some phase of it, in connection with the bigger bill which will be before us when we return.

Mr. BELLMON. Mr. President, the point for my amendment is not that some tax changes in the law should not be made. I would agree that the Tax Reform Act of 1976 probably did make some needed reforms and corrected some injustices. The point is they were done retroactively and we were well into the tax year when taxpayers thought they were following the law, and were in fact

following the law, and then the law was changed retroactively. It is like changing the rules after the game has already been played in order to determine a different winner. That is the point of my amendment. If the changes are needed, fine. Make them prospectively and not retroactively.

The bill before us does change part of those injustices, and corrects them. I was simply trying to go ahead and finish the job to change the rest of them. I cannot see how it would hurt the bill. I think it would make it a more desirable bill.

Mr. LONG. There were a great deal more retroactive provisions in that tax bill last year than the Senator from Louisiana wanted to have in the bill.

I should explain that one of the difficulties of the advice of the Budget Committee was that this was not a good idea, to pass retroactive tax increases. But Mr. Kennedy, with the support of people like Stanley Surrey, Joe Pechman, and others, made a strong argument and decided there was a lot of precedent for that sort of thing had been done before, where many of us in the Congress had voted for provisions in the law which included things of that sort. Of course their precedents were well taken.

Looking at the situation in which we find ourselves, I know if this amendment is agreed to it will kill this bill. Therefore, I am compelled to resist it. I am sorry I cannot support the amendment of the Senator. I hope he understands.

Mr. BELLMON. Will the Senator yield for a question?

Mr. LONG. Yes.

Mr. BELLMON. I do not want to try to nail down the Senator. If he does not like the amendment on this bill, does this mean that the amendment might be acceptable on a later bill?

Mr. LONG. I would not object to the Senator offering it and letting the Senate work its will with regard to the amendment. If he wants to offer it on the next big bill to come up, offer it. Otherwise, there will be other revenue bills. We have one that has just come from the House, I am happy to say, which gives us something upon which we can act. We will be bringing other revenue bills out shortly behind this one.

Mr. BELLMON. The Senator does agree in principle that the retroactive features of the 1976 bill were inequitable?

Mr. LONG. No, not all of them. There were some that I would have liked to not have retroactive. I will admit there are some that I did not want to have apply at all. Some I voted against which were retroactive. There are undoubtedly some in that category.

Mr. BELLMON. But the Senator can assure the Senator from Oklahoma that there will be an opportunity to bring forth these amendments in a timely manner and get them voted upon soon after the recess?

Mr. LONG. Yes, there definitely will be, immediately after the recess.

Mr. BELLMON. Mr. President, on the basis of those assurances and realizing the time constraints under which the Senate and House are working at the present time, I will withdraw the amendment and offer it later.

The PRESIDING OFFICER. The amendment is withdrawn.

Mr. HARRY F. BYRD, JR. Mr. President, I wish to express my support for H.R. 1828 and urge the Senate to enact this legislation. It postpones for 1 year the effective dates of changes in the sick pay exclusion. I think it is a just and fair proposal. If this legislation is not passed, it will work a considerable hardship on a great many Americans. The sick pay provisions of the 1976 Tax Reform Act were retroactive in nature. The 1976 tax legislation was not passed by the Congress until October 1976, yet the sick pay exclusion provisions were made effective January 1, 1976.

I think the bill now before the Senate is a fair and proper proposal. I commend the Senator from Kansas (Mr. Dole) for taking the leadership in the Senate on this matter.

I also commend the Congressman from the State of Virginia, Congressman ROBERT W. DANIEL of the Fourth District, for the effective and able work which he did in the House of Representatives in bringing this legislation to the attention of the House and helping to guide it through the House.

This is additional evidence that Congressman Daniel is doing a splendid job in representing the people of Southside and Tidewater Virginia. Congressman Daniel's district includes two large cities, the City of Portsmouth and the city of Chesapeake, in Tidewater, and at the other end of the district the city of Petersburg. Between those cities lie some 15 or 18 counties which Congressman Daniel represents. These counties are well represented by Congressman Daniel.

As this bill comes before the Senate today for consideration and, hopefully, for passage, I, therefore, want to recognize the effective and hard work done by Congressman Daniel in the House of Representatives on this measure as well as expressing my support for H.R. 1828.

Mr. DOLE. Mr. President, I appreciate the comments of the distinguished Senator from Virginia, particularly those with reference to Congressman Daniel. I can say that this Senator has been in contact with Congressman Daniel as recently as this morning. He has been of great assistance on the House side. He introduced the bill there early in January. He has been doing a very fine job of securing passage in the House. Without his efforts, I feel that we would not have received favorable action by the House as soon as we did.

BACKGROUND OF THE SICK PAY EXCLUSION

Mr. President, the Tax Reform Act of 1976, Public Law 94-455, was signed into law on October 4, 1976. Before passage of that act, certain payments of up to \$100 per week.—\$5,200 per year—were excludable from income if given to a tax-payer because of sickness, injury, or disability. This "sick pay" forms a major part of the income of many disabled retirees and is part of many wage continuation plans.

Section 505 of the Tax Reform Act addressed the tax status of this sick pay. That section provided that only persons who are permanently and totally disabled and under age 65 may receive sick pay

tax free. The odious feature of this change in the tax law was that the effective date of the section was made January 1, 1976. Tax liability was created retroactively for 9 months.

EFFECT OF NEW LAW

Hundreds of thousands of older Americans were adversely affected by this retroactive change in tax treatment. Taxpayers had accepted and used this money for 9 months with the Government's assurance of its tax-free status. Nothing was withheld, nor were projections made of any liability on this sick pay. Then, with no warning, and no opportunity to plan, hundreds of thousands of dollars in additional taxes were imposed on the sick and retired workers. Many of these people did not even know of the new law and their new taxes until their tax forms came in the mail.

RESPONSE OF THE TAXPAYERS

Since December, when I announced that I would introduce legislation to delay the effective date of section 505. thousands of citizens have contacted me. These are not people living off of Government largesse. All of the people had worked hard and been taxpavers for years or they would not be entitled to sick pay. They are willing to continue to pay their fair share of taxes. What they object to is the unfair imposition of large additional tax burdens retroactively. Often these citizens live on small fixed incomes that inflation is shrinking and they do not have the flexibility to come up with large sums quickly.

LEGISLATIVE ANSWERS

My bill, S. 4, and its companion legislation, H.R. 318, introduced by Representative Bob Daniel of Virginia, were the first attempts to address this problem created by the Tax Reform Act. Both were introduced at the start of this session in January. During these past 3 months, many Congressmen, including myself, have worked to secure passage of these bills. The third concurrent budget resolution contains language including the resultant revenue loss in the final budget figures. The Senate Finance Committee, under the chairmanship of Senator Long, included a version of S. 4 in another piece of legislation, H.R. 3477, not yet considered by the Senate.

The bill before us today, H.R. 1828, is patterned after the legislation that Representative Daniel and I first introduced. I gladly support its passage since the same result is achieved by both bills.

EFFECT OF THE LEGISLATION

Basically, the bill retains, for 1976 tax purposes, the tax status of sick pay as it was in 1975 and before. Persons who were eligible for the sick pay exclusion in 1975 will also qualify for 1976 if this bill passes. The age limit will be 70 and not 65. The income limitation of \$15,000 in the Tax Reform Act will not apply to 1976 taxes. Persons will not have to prove that they are permanently and totally disabled to qualify for the sick pay exclusion.

One additional feature is aimed at a specific problem caused by the change. Because many annuitants could not pay the extra taxes they owed, some elected to draw on their tax-free retirement contribution to reduce their tax liability.

This bill would make that election revocable. These taxpayers could have the choice of which tax treatment they prefer for their 1976 taxes.

NEED FOR QUICK ACTION

Thousands of taxpayers have delayed filing tax returns in the hope that Congress would act soon enough. While I had hoped for earlier passage, the Senate's rapid consideration 2 days after final action by the House is to be commended.

I would also like to mention the 37 Senators who cosponsored S. 4, and later will ask unanimous consent that their names be printed in the RECORD.

Some people have urged that more substantive alterations be made to the Tax Reform Act either by restoring the old law completely or "grandfathering" in people who claimed the sick pay exclusion in prior years. Whatever the merits of those proposals to be considered later, adoption of the legislation before us will correct the most immediate and unjust aspects of the new law.

While the Treasury Department has continuously opposed this legislation in the past, I hope that President Carter will consider the untenable position the affected taxpayers find themselves in. If he responds to the anguish and uncertainty that these people have been in since last October, I am certain that he will quickly sign this legislation.

The injustice created by the Tax Reform Act grows worse each day as April 15 nears. Affirmative action today by the Senate is imperative if the legislation is to become law before that date. The manifest unfairness of this retroactive law compels adoption of H.R. 1828. Therefore, I ask for the vote of each Member of the Senate in support of this legislation.

Mr. President, I ask unanimous consent that the names of the cosponsors be printed in the RECORD at this point.

There being no objection, the list of cosponsors was ordered to be printed in the Record, as follows:

COSPONSORS OF S. 4

Senator Ribicoff, Senator McClure, Senator Brooke, Senator Randolph, Senator Scott, Senator Williams, Senator Eagleton, Senator Thurmond, Senator Haskell, Senator Allen, Senator Domenici, Senator Bayh, Senator Humphrey, Senator Chiles, Senator Hollings, Senator Sarbanes, Senator Hansen, Senator Laxalt, Senator Morgan, Senator Burdick, Senator Durkin, Senator Hathaway, Senator Schmitt, Senator Pell, Senator Hatfield, Senator Huddleston, Senator McGovern, Senator Senator Johnston, Senator Helms, Roth, Senator Stone, Senator Griffin, Senator Cranston, Senator Abourezk, Senator Percy, Senator Biden, and Senator Metzenbaum.

Mr. McCLURE. Mr. President, I strongly support this bill to correct an unfair provision of the Tax Reform Act of 1976. The unexpected and sudden elimination of the exclusion of sick pay as a taxable item posed a heavy tax burden on those who can least afford it. The Tax Reform Act retroactively increased the tax liability of many citizens, particularly those who are retired and on fixed incomes. These people must plan their long-term tax obligations very carefully. They are suffering very greatly

from the high rate of inflation caused by runaway Government spending and even without this inequitable provision, the cost of Government is the fastest growing item in the family budget. A retroactive increase in tax liability is grossly unfair to these people and destroys their careful plans to meet their financial responsibilities.

That is why I urge the Senate to act swiftly to postpone for 1 year, the effective date of the elimination of the sick pay exclusion and provide at least in this small area, the needed relief to those citizens currently being victimized.

Mr. PERCY. Mr. President, I rise in support of H.R. 1828, which will postpone for I year until January 1, 1977, the effective date of changes of the provisions relating to sick pay of the Tax Reform Act of 1976. Under H.R. 1828, the provisions will apply to taxable years beginning after December 31, 1976. I am a cosponsor of S. 4, introduced by my distinguished colleague from Kansas (Mr. Dole), which is the Senate companion measure.

The Tax Reform Act, which was not enacted into law until October 1976, did a great disservice to persons on disability and sick pay by making the effective date of these changes retroactive. These people were given no advance warning of the changes and therefore, were left unprepared for the additional tax burden imposed by the Tax Reform Act. Those who are unable to work because of sickness or disability should be given the opportunity to plan ahead, and I am pleased that Congress is taking action to correct this insensitive and unfair oversight.

I am also pleased that we are dealing with this problem separately instead of as part of the Tax Simplification and Reduction Act, not scheduled for action until after the April 15 tax return filing deadline. Hopefully those who are eligible for the sick pay exclusion have waited to file their returns in anticipation of this legislation. I urge the Internal Revenue Service to make every effort to assist those persons who have filed their returns to file amended tax forms so that a further injustice will not occur by forcing disabled and sick persons to overpay their tax liabilities. I strongly urge my colleagues to vote for enactment of this vital piece of legislation, the importance of which to the average working American has been brought out by elected representatives of the UAW region 4 meeting in Washington this week under the leadership of Robert Johnston.

SICK PAY CHANGES NEEDED

Mr. ROTH. Mr. President, I strongly support the legislation we are considering today and I urge the Senate to act quickly and pass this bill. The legislation, which is identical to a bill I have sponsored with Senator Dole and others, would delay for 1 year the effective date of the sick pay tax changes made last year by the Tax Reform Act.

Before the enactment of the Tax Reform Act, workers could exclude from income tax purposes up to \$100 a week, or \$5,200 a year, received in disability or sick pay. The tax reform bill repealed the sick pay exclusion for people receiving temporary sick or disability pay and

allowed only those people who are medically certified as being permanently and totally disabled to use the sick pay exclusion.

But even for those still eligible to receive the exclusion benefit, the exclusion was phased out for those with adjusted gross income, including disability income, in excess of \$15,000.

I opposed these changes in the sick pay exclusion when they were enacted in October last year. I was particularly opposed to the provision which made these changes retroactive to January 1, 1976.

This retroactive date change meant that the people who, in good faith, counted on using this tax exclusion suddenly found that they could not use it. In most cases, taxpayers did not realize what changes were made until they examined the tax forms and instructions this year.

These people, about 1.5 million sick and disabled taxpayers, suddenly discovered that they owe the Federal Government as much as \$500, \$600, or \$1,000 in additional taxes.

I believe this is grossly unfair, and the very least we can do is to postpone these unanticipated tax increases for at least 1 year. Final tax forms must be filed in less than 2 weeks, and I urge the Senate to act on this legislation.

Mr. DOMENICI. Mr. President, I would like to take just a few minutes to speak on behalf of the legislation before us which would defer the effective date of the sick pay exclusion restriction.

I had hoped that this legislation, which was introduced the first day of this Congress, could have been voted upon before this late date, for many taxpayers have already filed their 1976 returns. Those who have filed their income tax forms will now have to submit a revised return, should this legislation be enacted today.

Mr. President, as you know, there was not a vote on this specific provision last year in the Senate when we were considering the Tax Reform Act. The former law stated that an employee who was either off the job an extended period or who retired on disability could exclude up to \$100 per week or \$5,200 per year in sick pay benefits from his or her Federal income tax bill until reaching the age of 70. The Tax Reform Act lowered the age limit to 65, and more importantly, eliminated the exclusion entirely for those employees who were not totally and permanently disabled.

One amendment was offered, however, which would have permitted individuals who had previously retired and were disabled Federal employees to be excluded from the new law. I voted with a majority of my colleagues in the affirmative, but even that modest attempt to modify the sick pay exclusion was dropped when the bill was referred to the joint conference committee assigned to work out the differences between the House and Senate versions of the Tax Reform Act.

I plan to support the enactment date postponement for two reasons: It is a violation of public trust to pass significant legislation which is retroactive, which disregards the taxpayers' need for a major financial adjustment; and second, a postponement would enable the Congress to seriously study a repeal of this provision altogether.

This legislation should be passed to rectify an injustice to many thousands of Americans, and I urge my colleagues' support as well.

Mr. MATHIAS. Mr. President, I am pleased that the Senate is considering H.R. 1828, a bill which would delay the effective date of the sick pay exclusion under the Tax Reform Act of 1976 for 1 year.

This provision of the Tax Reform Act sharply curtailed the use of certain tax provisions by sick and disabled individuals. Formerly, any person who had retired on disability could exclude from taxable income up to \$100 a week. Similarly, if an individual was sick and received pay under a wage-continuation plan during his or her illness, the same \$100 a week exclusion applied. Under the new law, only those individuals under the age of 65, retired on disability and permanently and totally disabled can exclude up to \$100 a week—or \$5,-200 a year—from their taxable income.

My primary objection to this section of the tax bill is that the new law applies to taxable year 1976, even though the bill was not enacted until October 1976. As a result many disabled individuals may be liable for taxes they had not expected to pay for 1976. Many individuals—retired and living on fixed incomes-had expected to use the sick pay exclusion when filing their tax return for 1976. As you may know, in the opening days of the Congress I introduced a bill. S. 62, which would alleviate this dilemma and enable these people to use this tax exclusion for taxable year 1976. I am pleased that the Congress is taking action on the concept embodied in my

Of the hundreds of people who have called or written me about this section of the Tax Reform Act, the majority did not argue with the revisions made by Congress, but rather were outraged and bewildered that so little time was given in which to comply with this new law.

I think it imperative that we act quickly to change the effective date of this provision. By doing this, we would prove that Congress can be responsive to the needs of citizens, can admit a mistake through oversight, and is willing to correct it.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read the third time.

The bill was read the third time.

Mr. CURTIS. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.
The PRESIDING OFFICER. Is all time

yielded back? Mr. LONG. Mr. President, I yield back

the remainder of my time.

Mr. DOLE. Mr. President, I yield back

the remainder of my time.
The PRESIDING OFFICER. All time

has been yielded back.

The bill, having been read the third

time, the question is, shall it pass? On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from New Hampshire (Mr. Durkin), the Senator from Mississippi (Mr. Eastland), the Senator from Kentucky (Mr. Ford), the Senator from Kentucky (Mr. Huddleston), the Senator from Michigan (Mr. Riegle), and the Senator from Mississippi (Mr. Stennis) are necessarily absent.

I further announce that the Senator from South Dakota (Mr. Abourezk), the Senator from Indiana (Mr. Bayh), the Senator from Alaska (Mr. Gravel), the Senator from Washington (Mr. Jackson), the Senator from South Dakota (Mr. McGovern), and the Senator from Alabama (Mr. Sparkman) are absent on official business.

I also announce that the Senator from Texas (Mr. Bentsen) is absent due to illness in the family.

I further announce that, if present and voting, the Senator from Washington (Mr. Jackson), the Senator from New Hampshire (Mr. Durkin), the Senator from Texas (Mr. Bentson), and the Senator from Michigan (Mr. Riegle) would each vote "yea."

Mr. STEVENS. I announce that the Senator from New Jersey (Mr. Case), the Senator from Arizona (Mr. Goldwater), the Senator from Nevada (Mr. Laxalt), the Senator from Kansas (Mr. Pearson), the Senator from Virginia (Mr. Scott), the Senator from Vermont (Mr. Stafford), and the Senator from Wyoming (Mr. Wallop) are necessarily absent.

I further announce that, if present and voting, the Senator from New Jersey (Mr. Case) and the Senator from Nevada (Mr. Laxalt) would each vote "yea."

The result was announced—yeas 80, nays 0, as follows:

[Rollcall Vote No. 100 Leg.] YEAS—80

Metzenbaum

Griffin

Allen

Morgan Moynihan Anderson Hansen Hart Bartlett Haskell Muskie Bellmon Nelson Hatfield Biden Nunn Brooke Hathaway Hayakawa Packwood Bumpers Pell Heinz Burdick Percy Helms Byrd, Proxmire Harry F., Jr. Byrd, Robert C. So the bill (H.R. 1828), as amended, was passed.

UP AMENDMENT NO. 153

Mr. HARRY F. BYRD, JR. Mr. President, I send to the desk an amendment and ask that it be stated.

The PRESIDING OFFICER (Mr. Morgan). The amendment will be stated.
The legislative clerk read as follows:

The Senator from Virginia (Mr. HARRY F. BYRD, Jr.) proposes an unprinted amendment numbered 153 to the title of the bill:

Amend the title so as to read: "An act relating to the effective date for changes made by the Tax Reform Act of 1976 to the exclusion for sick pay and for other purposes."

Mr. HARRY F. BYRD, JR. Mr. President, I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Virginia.

The amendment was agreed to.

Mr. HARRY F. BYRD, JR. Mr. President, I ask unanimous consent that the bill—H.R. 1828—be printed with the amendments of the Senate numbered, and that in the engrossment of the amendments of the Senate to the bill the Secretary of the Senate be authorized to make all necessary technical and clerical changes and corrections, including corrections in section, subsection, and so forth, designations, and cross references thereto.

The PRESIDING OFFICER. Without

objection, it is so ordered.

Mr. HARRY F. BYRD, JR. Mr. President, I move to reconsider the vote by which the bill (H.R. 1828) was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business, with no resolutions coming over under the rule.

The PRESIDING OFFICER. Without

objection, it is so ordered.

ASSISTANCE TO VICTIMS OF RECENT EARTHQUAKES IN ROMANIA

Mr. HUMPHREY. Mr. President, there is a bill at the desk from the House, H.R. 5717, which has been cleared on the part of both the majority and the minority, and I ask for its immediate consideration.

The PRESIDING OFFICER laid before the Senate H.R. 5717, an act to provide for relief and renabilitation assistance to the victims of the recent earthquakes in Romania, which was read twice by its title.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its

consideration.

Mr. HUMPHREY. Mr. President, this is authorization legislation. It is required. The Senate has appropriated money for this relief activity, but the House, because of the failure to have authorization legislation, did not agree.

Therefore, we are making a 180-degree turn, coming back and getting the authorizing legislation, which has now been passed by the House, and I ask the Senate to pass it.

Mr. KENNEDY. Mr. President, I want to add my voice in strong support of this effort to respond to the emergency humanitarian needs of the earthquake victims in Romania

As I noted in my remarks to the Senate on Friday, during our consideration of my amendment to provide a supplemental appropriation for this authorization, this bill is an effort to give a significant indication of the concern of the American people for the victims of the tragic earthquake which struck Romania last March 4.

Although the \$20 million to be authorized, and later appropriated, by this bill is not yet fully broken down by specific projects, the administration has, in concert with the Romanian Government, identified a number of specific areas of humanitarian need deserving

of U.S. support.

The first is in the medical field. The earthquake damaged nine important hospitals in Bucharest alone, plus many other medical facilities and clinics outside of the city. Critically important medical equipment—much of it originally from the United States—has been destroyed. A sizable portion of the funds authorized by this bill will go for this humanitarian purpose.

A second area, outlined in a letter to me from the Deputy Secretary of State, relates to technical services and commodities required for the clearance of damaged buildings and the rehabilitation and reconstruction of housing, schools, and other community facilities.

Finally, Mr. President, I am hopeful that after the Congress acts in support of this bill and a subsequent appropriations bill, that the executive branch will fully consider other kinds of assistance to Romania which may be appropriate to help its people overcome the human and social and economic hardships produced by the earthquake.

I urge the passage of this important bill expressing the humanitarian concern of the American people for the earthquake victims in Romania.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the third reading and passage of the bill

The bill (H.R. 5717) was ordered to a third reading, was read the third time, and passed.

Mr. HUMPHREY. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. RIBICOFF. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States vere communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States

submitting sundry nominations which were referred to the Committee on Armed Services.

(The nominations received today are printed at the end of the Senate proceedings.)

APPROVAL OF BILL

A message from the President of the United States announced that on April 6, 1977, he approved and signed the following bill:

S. 626, An Act to reestablish the period within which the President may transmit to the Congress plans for the reorganization of agencies of the executive branch of the Government, and for other purposes.

AGENCY FOR CONSUMER ADVOCA-CY—MESSAGE FROM THE PRES-IDENT—PM 64

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States: To the Congress of the United States:

The task of helping consumers understand and shape the powers of their government has become more difficult, and more important, through the years. As the Federal Government has grown, individual citizens have found it harder to learn how and where and when to go to influence the many government decisions which make a difference in their lives. As the technology of our society has become more complex, Congress and the President have delegated more responsibility to regulatory technicians, whose activities affect consumers profoundly but are difficult for average citizens to study, influence, and understand.

For several years there has been a movement in Congress and among the people to create a strong voice in government to speak up for the consumer. Today I am recommending measures which will expand and accelerate that movement.

The first of these measures is the creation of an Agency for Consumer Advocacy, which will bring to fruition eight years of bipartisan effort in the Congress.

This Agency will be a small, effective group; its purpose will be to plead the consumer's case within the government. It will not require major additions to the government's size or operations; in significant part, it can be established by drawing together resources now scattered throughout the government. It will not be another regulatory agency. Its purpose is to improve the way rules, regulations, and decisions are made and carried out, rather than issuing new rules itself. It will help the Congress and help me search out programs which are inefficient or have outlived their purpose, and will help us correct inequities in programs and procedures which are supposed to protect consumers.

The Agency will aid in the fight against inflation by monitoring governmental actions that unnecessarily raise costs for consumers. Many government activities affect prices: The government establishes rates, standards and incentives for private businesses to follow, and it is itself a major purchaser of goods and services. In all these areas, the Agency will use its

powers of intervention and of information collection, analysis and dissemination to keep costs down.

By establishing the Agency, the Congress can give new meaning to the phrase "in the interest of consumers" found throughout the United States Code and the Code of Federal Regulations.

The basic format of the Agency for Consumer Advocacy has been refined and perfected in eight years of debate by Congress. I support that framework. In particular, I believe that the following principles should be reflected in a bill principles agency.

creating the Agency:

First, most government consumer functions should be consolidated in the Agency. The Office of Management and Budget has begun a comprehensive review to help me identify those units that should be transferred to the Agency. This review will also determine how remaining functions in the individual agencies can be strengthened. Of course, I still expect that all Federal agencies will be responsive to the consumer's concerns.

Second, the Administrator of the Agency, like the heads of other executive agencies, should be appointed by the President and serve at his pleasure. The Agency should be subject to the normal executive budget and legislative clearance procedures. Accountability within the executive branch is necessary to ensure that the Agency will be as vigorous and effective as the people expect. It will not undermine the independence of the Agency's representational role.

Third, the Agency should be empowered to intervene or otherwise participate in proceedings before federal agencies, when necessary to assure adequate representation or consumer interests, and in judicial proceedings involving Agency action. The Agency, at its discretion, should be represented by its own lawyers. I will instruct the Administrator to establish responsible priorities for

consumer advocacy.

Fourth, the Agency should have its own information-gathering authority, including, under appropriate safeguards, access to information held by other government agencies and private concerns. However, small businesses should be exempt from the Agency's direct information-gathering authority. Additional safeguards should be included to assure that needless burdens are not imposed on businesses or other government agencies.

The Agency for Consumer Advocacy is mainly designed for participation in very large administrative proceedings; it is only one of a number of steps which will better protect the consumer. Members of my Administration, in the months ahead, will comment to the Congress on a variety of these steps. There are three of them I would like to mention now; they are measures which the Congress has been considering, and which I believe would complement the ACA.

The first is legislation to help consumer groups represent themselves in agency and judicial proceedings. I support Congressional efforts to assist citizen groups to participate in the proceedings of federal agencies, where their participation may lead to a more balanced decision. I also recommend that Congress enact legislation that would give

the federal courts more discretion to reimburse litigation costs for plaintiffs who win cases of public importance involving the government.

Second, I support legislation which will give citizens broader standing to initiate suits against the government, in appropriate cases. The government has too often routinely invoked the "standing" defense when it is challenged in court. The Department of Justice will work with my Special Assistant for Consumer Affairs, Esther Peterson, and with the Congress toward legislation to reform this practice.

Third, I support the effort to enable consumers to sue as a class to enforce their rights. Recent court decisions have greatly restricted their ability to do so. I want to expand the opportunities for responsible class actions, starting with violations of consumers' rights. The Department of Justice and Mrs. Peterson will work with the Congress to develop

suitable legislation.

These measures—and the others which members of my Administration will discuss in the months ahead—will enhance the consumer's influence within the government without creating another unwieldly bureaucracy. I believe they will increase confidence in government by demonstrating that government is considering the people's needs in a sensitive and responsive way.

JIMMY CARTER. THE WHITE HOUSE, April 6, 1977.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the message received today from the President of the United States, relative to helping consumers, be jointly referred to the Committees on Banking, Housing, and Urban Affairs; Commerce, Science, and Transportation; Governmental Affairs; and Judiciary.

The PRESIDING OFFICER. Without

objection, it is so ordered.

MESSAGE FROM THE HOUSE

At 12:36 p.m., a message from the House of Representatives delivered by Mr. Berry, one of its clerks, announced that the House has passed the following bills in which it requests the concurrence of the Senate:

H.R. 3199. An act to amend the Federal Water Pollution Control Act to provide for additional authorizations, and for other purposes:

H.R. 5294. An act to amend the Consumer Credit Protection Act to prohibit abusive practices by debt collectors; and

H.R. 5717. An act to provide for relief and rehabilitation assistance to the victims of the recent earthquakes in Romania.

The message also announced that the House agrees to the amendment of the Senate to the bill (H.R. 11) to increase the authorization for the Local Public Works Capital Development and Investment Act of 1976, with an amendment; that the House insists upon its amendment and requests a conference with the Senate on the disagreeing votes of the two Houses thereon; and that Mr. Johnson of California, Mr. Boberts, Mr. Roe. Mr. Anderson of California, Mr. Breaux, Mr. Nowak, Mr. Edgar, Mr. Harsha, Mr. Don H. Clausen, and Mr. Hammer-

SCHMIDT were appointed managers of the conference on the part of the House.

The message further announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3365) to extend the authority for the flexible regulation of interest rates on deposits and accounts in depository institutions, and for other purposes; and that the House recedes from its disagreement to the amendment of the Senate to the title.

ENROLLED BILL SIGNED

The message further announced that the Speaker has signed the enrolled bill (H.R. 3365) to extend the authority for the flexible regulation of interest rates on deposits and accounts in depository institutions.

The enrolled bill was subsequently signed by the Acting President pro tempore (Mr. RIEGLE).

COMMUNICATIONS FROM EXECU-TIVE DEPARTMENTS, ETC.

The PRESIDING OFFICER laid before the Senate the following communications which were referred as indicated:

EC-1066. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Summary: The Long-Term Fiscal Outlook for New York City" (PAD-77-1A, April 4, 1977) (with an accompanying report).

EC-1067. A letter from the Comptroller

EC-1067. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "The Long-Term Fiscal Outlook for New York City" (PAD-77-1, April 4, 1977) (with an

accompanying report).

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that two communications from the Comptroller General of the United States relative to New York City finances be referred jointly to the Committees on Governmental Affairs and Banking, Housing, and Urban Affairs.

The PRESIDING OFFICER. Without objection, it is so ordered.

EC-1068. A letter from the Assistant Secretary of Defense transmitting, pursuant to law, notice of the intent to obligate \$7,985,899 of funds available in the DOD Stock Fund for war reserve inventory for the Army (with an accompanying report); to the Committee on Appropriations.

EC-1069. A letter from Comptroller General of the United States transmitting, pursuant to law, a report entitled "Assessment of New York City's Performance and Prospects Under its 3-Year Emergency Financial Plan" (with an accompanying report); to the Committee on Banking, Housing, and Urban Affairs.

EC-1070. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "New York City's Efforts to Improve its Accounting Systems" (with an accompanying report); to the Committee on Banking, Housing, and Urban Affairs.

EC-1071. A letter from the Secretary of Commerce transmitting, pursuant to law, a report on the implementation of section 809 of the Merchant Marine Act, 1936, as amended, concerning United States-flag commercial vessels (with an accompanying report); to the Committee on Commerce, Science, and Transportation.

EC-1072. STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. NELSON (for himself, Mr. JAVITS, Mr. WILLIAMS, Mr. CRANSTON, Mr. HUMPHREY, Mr. JACKSON, Mr. KENNEDY. RANDOLPH, and Mr. STAFFORD):

S. 1242. A bill to provide employment and training opportunities for youth; to the Committee on Human Resources. YOUTH EMPLOYMENT AND TRAINING ACT OF

1977

Mr. NELSON. Mr. President, on behalf of myself and Senators Javits, Williams, CRANSTON, HUMPHREY, JACKSON, KEN-NEDY, RANDOLPH, and STAFFORD, I am introducing the administration's proposed "Youth Employment and Training Act of 1977." The draft legislation was transmitted to Congress today by Secretary of Labor Ray Marshall.

There is no greater economic problem facing the Nation today than the problem of youth unemployment. Teenagers face rates of unemployment twice as high as other members of the labor force. Over 3 million young persons age 16 to 24 are unemployed. I congratulate the administration for taking this beginning toward a comprehensive national employment and training program to provide America's young people with useful work and training opportunities with the goal of enhancing their job prospects and opportunities for useful careers throughout their lives.

The legislation which I am introducing for the administration would add to the Comprehensive Employment and Training Act a new title VIII on youth employment and training, with an authorization to appropriate such sums as may be necessary for such title. The proposed new title contains three parts: Part A-National Young Adult Conservation Corps; part B-Youth Community Conservation and Improvement Projects; and part C-Comprehensive Youth Employment and Training Programs.

Part A of the new title VIII would create a national Young Adult Conservation Corps designed to provide youths from ages 16 to 22 with opportunities to perform useful work in the Nation's parks and forests. The Secretary of Labor would administer the corps through interagency agreements with the Secretaries of the Interior and Agriculture, who would be responsible for the management of the centers on public lands and waters under their respective jurisdictions. In addition, projects would be carried out on non-Federal public lands or waters, pursuant to agreements with appropriate State and local agen-

Part B of the new title VIII authorizes youth community conservation and improvement projects. Under this part, the Secretary of Labor would provide funds to employ youths from age 16 to 22 on community improvement projects, to perform work which would not otherwise be carried out, including the rehabilitation or improvement of public facilities, neighborhood improvements-including basic repairs to low-income housing-and conservation, maintenance, or restoration of natural resources on non-Federal public lands. Such projects would be carried out by State and local governments and public or private nonprofit agencies submitting project applications to prime sponsors under the Comprehensive Employment and Training Act. In allocating funds under part B, the Secretary of Labor would take into consideration the severity of unemployment among eligible youths residing in the areas to be served, but no State would receive less than one-half of 1 percent of the funds available for this part.

Part C of the proposed new title VIII would authorize funds for a broad variety of employment and training programs designed to enhance the job prospects and career opportunities of young persons, with emphasis on youths age

In addition to useful work experience opportunities in community betterment activities, part C would support appropriate training and services such as outreach, counseling, occupational information, institutional and on-the-job training, and transportation assistance. Under the proposed legislation, half of the funds would be allocated among prime sponsors on a formula based 75 percent upon relative unemployment and 25 percent upon the relative number of lowincome persons. The remaining half of the funds would be made available in the discretion of the Secretary of Labor; however, all except 25 percent of that half must be made available to CETA prime sponsors, with the remaining positions available for other public or private nonprofit agencies.

While the National Young Adult Conservation Corps under part A and Community Improvement Projects under part B would be open to both disadvantaged and nondisadvantaged youths, eligible participants for comprehensive employment and training programs under part C must be persons who are not members of families whose family incomes exceed 70 percent of the Bureau of Labor Statistics lower living standard budget.

In each part of the proposed new title VIII, the Secretary could permit youths starting at age 14 and up to age 24 to participate in programs under the pro-

posed legislation. On April 20, 21, and 22, the Subcommittee on Employment, Poverty, and Migratory Labor, of which I am chairman. will hold hearings on the administration's youth employment legislation which I am introducing today as well as the House-passed bill (H.R. 2992) extending the authorization for the Comprehensive Employment and Training Act through fiscal year 1978.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD following my remarks.

I also ask unanimous consent that there be printed in the RECORD Secretary of Labor Ray Marshall's letter transmitting the legislation, as well as the detailed "Statement and Explanation of the Youth Employment and Training Act of 1977," which accompanied the Secretary's letter.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1242

Be it enacted by the Senate and House of Representatives of the United States America in Congress assembled, That this Act may be cited as the "Youth Employment and Training Act of 1977".

SEC. 2. The Comprehensive Employment Training Act of 1973 is amended by adding at the end thereof the following new title:

"TITLE VIII-YOUTH EMPLOYMENT AND TRAINING

> "PART A-NATIONAL YOUNG ADULT CONSERVATION CORPS

"STATEMENT OF PURPOSE

"Sec. 801. It is the purpose of this part to establish a National Young Adult Conservation Corps to provide employment and other benefits to youth who would not otherwise be currently productively employed, through a period of service during which they engage in useful conservation work and aid in completing other projects of public nature on Federal and non-Federal public lands and waters.

'NATIONAL YOUNG ADULT CONSERVATION CORPS

"Sec. 802. To carry out the purposes of this part, there is hereby established a National Young Adult Conservation Corps to carry out projects on Federal or non-Federal public lands or waters. The Secretary shall administer this part through interagency agreements with the Secretaries of the Interior and Agriculture. Pursuant to such interagency agreements, the Secretaries of the Interior and Agriculture shall have responsibility for the management of each Corps center, including determination of Corps members' work assignments, selection, training, discipline, and termination, and shall responsible for an effective program at each center.

"SELECTION OF ENROLLEES

'SEC. 803. (a) Enrollees of the Corps shall be selected by the Secretaries of the Interior and Agriculture only from candidates referred by the Secetary.

"(b) To qualify as an enrollee of the Corps an individual, at the time of selec-

"(1)(A) shall have attained age 16 but not attained age 22; provided, that individuals who have attained age 16 but not age 19, and have left school, shall, to qualify as enrollees, give adequate assurances that they did not leave school for the purpose of participating in programs financed under this part: or

"(B) may be, notwithstanding the above and under such regulations as the Secretary may prescribe, persons who have attained 14, but not age 16, or individuals who have attained age 22 but not age 24; and

'(2) shall be citizens or lawfully admitted permanent residents of the United States or lawfully admitted parolees and refugees;

- (3) shall be physically and mentally capable, as determined by the Secretary, of carrying out the work of the Corps for the estimated duration of the individual's enrollment.
- "(c) Preference for membership in the Corps shall be given to those eligible under this part who reside in areas determined by the Secretary under section 204(c) to have a rate of unemployment equal to or in excess of 6.5 percent.
- "(d) The Secretary shall make arrangements for obtaining referral of candidates for the Corps from the public employment service, prime sponsors under title I, the Secretaries of Interior and Agriculture, and such other agencies and organizations as the Secretary may deem appropriate.
- "(e)(1) No individual may be enrolled in the Corps for a total period of more than 12 months, with such maximum period consisting of either one continuous 12-month period, or three or less periods which total 12 months; provided, that an individual who attains the maximum permissible enrollment age may continue in the Corps up to the 12month limit provided in this subsection only as long as the individual's enrollment is continuous after having attained the maximum age.
- "(2) No individual shall be enrolled in the Corps if solely for purposes of membership for the normal period between school

"ACTIVITIES OF THE CORPS

"SEC. 804. (a) Consistent with each interagency agreement, the Secretary of the Interior or Agriculture, as appropriate, in consultation with the Secretary shall determine the location of each residential and nonresidential camp site. The Corps shall perform work on projects, programs, and in areas, including but not limited to:

"(1) tree nursery operations, planting, pruning, thinning, and other silvicultural

measures:

"(2) erosion control and flood damage: "(3) wildlife habitat improvements and preservation;

(4) range management improvements:

"(5) drought damage measures; "(6) recreation development, rehabilitation, and maintenance;

"(7) fish habitat and culture measures; "(8) forest insect and disease prevention

control: "(9) road and trail maintenance and improvements;

"(10) general sanitation, cleanup, and maintenance: and

(11) natural disasters damage measures. To the maximum extent practicable, appropriate projects shall-

"(1) be highly labor intensive;
"(2) be projects for which work plans could be readily developed; (3) be able to be initiated promptly;

"(4) provide work experience to participants in skill areas required for the accomplishment of productive work on the project;

"(5) if a residential project, be located in areas where existing residential facilities for the Corps members are available; and

"(6) be similar to activities of persons employed in seasonal and part-time ployed in agencies such as the National Park Service, U.S. Fish and Wildlife Service, Bureau of Reclamation, Bureau of Land Management, Bureau of Indian Affairs, and the Forest Service.

"(c) (1) The Secretaries of the Interior and Agriculture, pursuant to agreements with the Secretary, may provide for such transportation, lodging, subsistence, medical treatment, and other services, supplies, equipment, and facilities as they may deem appropriate to carry out the purposes of this

part;
"(2) Whenever economically feasible, existing but unoccupied or underutilized Federal, State and local government facilities, and equipment of all types, including military facilities and equipment, shall be utilized for the purposes of the Corps work camps, where appropriate, with the approval of the Federal agency, State or local government involved.

"CONDITIONS APPLICABLE TO CORPS ENROLLEES

"SEC. 805. (a) Members of the Corps shall not be deemed Federal employees except for purposes of chapter 171 of title 28, chapter 81 of title 5, and title II of the Social Security Act (42 U.S.C. 401, et seq.);

"(b) The Secretary shall, in consultation with the Secretaries of Agriculture and Interior, establish standards for

- "(1) rates of pay which shall be at least at the rate set forth in section 6(a)(1) of the Fair Labor Standards Act of 1938, as amended:
- "(2) reasonable hours and conditions of employment, and
- "(3) safe and healthful working and living conditions.
- "(c) To minimize transportation costs, Corps members shall be assigned to projects as near to their homes as practicable.

"AGREEMENTS WITH AGENCIES AND ORGANIZATIONS

"SEC. 806. Consistent with interagency agreements with the Secretary, the Secretaries of the Interior and Agriculture may make grants or enter into other agreements, after consultation with the governor, with any State agency, or after consultation with appropriate State and local officials, with any public agency or organization or any private nonprofit agency or organization (which has been in existence for at least five years) for the conduct of any project under this part on Federal or non-Federal public lands or waters.

"PART B-YOUTH COMMUNITY CONSERVATION AND IMPROVEMENT PROJECTS

"STATEMENT OF PURPOSE

"SEC. 811. It is the purpose of this part to establish a program of community conservation and improvement projects to provide employment, work experience, skill training, and opportunities for community service to eligible youths, for a period not to exceed 12 months, supplementary to, but not replacing opportunities available under title I of this Act.

"DEFINITIONS

SEC. 812. As used in this part, the term-"(1) 'eligible applicant' means any prime sponsor designated under section 102 of the

Act and Indian tribes, bands, and groups qualified under section 302(c)(1) of this Act.

"(2) 'project applicant' shall have the same meaning as in section 701(a)(15) of this Act.

"(3) (A) 'eligible youth' means any un-employed individual who at the time of employment, has attained the age 16 but not age 22;

"(B) notwithstanding paragraph (A), under such regulations as the Secretary may prescribe, persons who have attained age 14, but not age 16, and persons who have attained age 22 but not age 24 may be 'eligible vouth'.

"(4) 'community improvment projects' means projects which provide work which would not otherwise be carried out, including, but not limited to, the rehabilitation or improvement of public facilities; neighborhood improvements, including basic repairs to low-income housing; and conservation, maintenance, or restoration of natural resources on publicly held lands other than Federal lands.

"ALLOCATION OF FUNDS

"SEC. 813. (a) In allocating funds appropriated under this part, the Secretary shall take into consideration the severity of unemployment among eligible youths residing in the areas served by each eligible applicant: Provided, however, that not less than one-half of 1 per centum of all amounts appropriated to carry out this part shall be granted under this part for programs within any one State, except that in the case of Guam, the Virgin Islands, American Samoa, the Northern Marianas, and the Trust Territory of the Pacific Islands, not less than one-half of 1 per centum in the aggregate shall be granted for such projects in all five of these jurisdictions.

"COMMUNITY CONSERVATION AND IMPROVEMENT YOUTH EMPLOYMENT PROGRAM

"SEC. 814. The Secretary is authorized, in accordance with the provisions of this part, to enter into agreements with eligible applicants to pay the costs of community im-provement projects to be carried out by project applicants using exclusively eligible youth and appropriate supervisory personnel.

"PROJECT APPLICANT APPLICATIONS

"SEC. 815. (a) Project applicants shall submit applications for funding of projects under this part to the appropriate eligible applicant.

(b) In accordance with regulations prescribed by the Secretary each project appli-

cation shall-

"(1) provide a description of the work to be accomplished by the project, the jobs to be filled, and the approximate duration for which the eligible youth would be assigned to such jobs.

"(2) provide a description of job training and development opportunities that will be made available to participating eligible youth, as well as a description of plans to coordinate the training and work experience with school related programs including the awarding of academic credit in accord with regulations prescribed by the Secretary;

'(3) describe the wages or salaries to be paid persons employed in jobs assisted under

- "(4) set forth assurances that there will be an adequate number of supervisory personnel on the project and that the supervisory personnel are adequately trained in skills needed to carry out the project and can instruct participating eligible youths in skills needed to carry out the project;
- "(5) set forth assurances that any income generated by the project will be applied to-ward the cost of the project;
- "(6) set forth assurances for acquiring, including by reasonable payment or rental,

ment as necessary;

"(7) set forth assurances that, to the maximum extent feasible, projects carried out under this part shall be labor intensive;

"(8) describe the method of recruiting eligible youth, including a description of how such recruitment is coordinated with plans under other parts of this title and with arrangements required by section 105 of this Act, and also including arrangements with school systems and the public employment service, including its school cooperative programs; and

"(9) set forth such other assurances, arrangements, and conditions as the Secretary deems appropriate to carry out the purposes of this part.

"PROPOSED AGREEMENTS

"SEC. 816. (a) Each eligible applicant desiring funds under this part shall submit a proposed agreement to the Secretary

(b) The proposed agreement shall contain project applications approved by eligible applicant, and other information and assurances as prescribed by the Secretary to carry out the purposes of this part.

"(c) (1) In order for a project application submitted by a project applicant to be submitted to the Secretary by the eligible appli-cant, copies of such application shall have been submitted at the time of such application to the prime sponsor's planning council established under section 104, or a like organization as determined by the Secretary, for the purpose of affording such council an opportunity to submit comments and recommendations with respect to that application to the eligible applicant. No member of a prime sponsor's planning council, or like organization, shall cast a vote on any matter in connection with a project in which that member (or any organization with which that member is associated) has a direct

"(2) Consistent with procedures established by the eligible applicants in accordance with regulations which the Secretary shall prescribe, the eligible applicant shall not disapprove a project application submitted by a project applicant unless it has first considered any comments and recommendations made by the prime sponsor's planning council, or like organization, and unless it has provided such applicant and the planning council, or like organization, with a written statement of its reasons for such disapproval.

"AGREEMENTS

"SEC. 817. (a) The Secretary of Labor may approve or deny the project applications included in each proposed agreement on an individual basis,

"(b) No funds shall be made available to the eligible applicant except pursuant to an agreement entered into between the Secretary and the eligible applicant which provides assurances satisfactory to the Secretary that

"(1) the standards set forth in part D will be satisfied;

"(2) projects will be conducted in such manner as to permit the eligible youth employed in the project who are in school to coordinate the job with classroom instruction and, to the extent feasible, to permit such eligible youths to receive credit from the appropriate educational agency or school involved: and

"(3) meet such other assurances, arrangements, and conditions as the Secretary deems appropriate to carry out the purposes of this

"WORK LIMITATION

"SEC. 818. No eligible youth shall be employed more than 12 months in work financed under this part, except as prescribed by the Secretary.

such space supplies, materials, and equip- "PART C-COMPREHENSIVE YOUTH EMPLOY-MENT AND TRAINING PROGRAMS

"STATEMENT OF PURPOSE

"Sec. 831. It is the purpose of this part to establish comprehensive programs, supplementary to but not replacing programs and activities available under title I of this Act, to enhance the job prospects and career opportunities of young persons, including employment, community service opportunities, and such training and supportive services as are necessary to enable participants to secure suitable and appropriate unsubsidized employment in the public and private sectors of the economy. To the maximum extent feasible, training and employment opportunities afforded under this part shall be interrelated and mutually reinforcing so as to achieve the goal of enhancing the job prospects and career opportunities of persons served under this part.

"PROGRAMS AUTHORIZED

"SEC. 832. The Secretary is authorized to provide, subject to such terms and conditions as he deems appropriate, financial assistance to enable eligible applicants (as defined in section 834) to provide employment opportunities and appropriate training and supportive services for eligible participants including but not limited to:

"(a) useful work experience opportunities in a wide range of community betterment activities such as the rehabilitation of public properties, assistance in the weatherization of homes occupied by low-income families, demonstrations of energy-conserving measures including solar energy techniques (especially those utilizing materials and supplies available without cost), park establishment and upgrading, neighborhood revitalization, conservation and improvement, and related activities;

"(b) meaningful and productive employment and work experience in fields such as education, health care, neighborhood transportation services, crime prevention and control, environmental quality control, preservation of historic sites, and maintenance

of visitor facilities; and
"(c) appropriate training and services to
support the objectives of this part, including but not limited to:

(1) outreach, assessment, and orientation:

"(2) counseling;

"(3) activities promoting education to work transition;

"(4) provision of occupational, educational and training information;

"(5) services to youth to help them obtain and retain employment;
"(6) literary and English as a second

language:

"(7) attainment of certificates of high school equivalency;

"(8) job sampling, including vocational exploration in the public and private sector; "(9) institutional and on-the-job train-

ing;
"(10) transportation assistance; and "(11) other necessary supportive services. "ALLOCATION OF FUNDS

833. (a) Fifty percent of the funds available for this part in any fiscal year shall be allocated as follows for the purpose of carrying out programs authorized under section 832:

"(1) 75 percent of the amount allocated under this subsection shall be allocated on the basis of the relative number of unemployed persons within the State as compared to such numbers in all States; and

"(2) 25 percent of the amount allocated under this subsection shall be allocated on the basis of the relative number of persons in families with an annual income below the low-income level within the State compared to such total numbers in all States.

(3) In determining allocations under this

CXXIII-668-Part 9

subsection, the Secretary shall use what he or she determines to be the most recent and

best available data.

"(b) The sum allocated to each State shall be allocated by the Secretary among areas within the State, as determined by the Secretary among areas within the State, as determined by the Secretary, on an equitable basis based upon the factors set forth in subsection (a).

(c) The Secretary is authorized to make such reallocations as he or she deems appropriate of any amount of any allocation under subsections (a) and (b) to the extent that the Secretary determines that an eligible applicant will not be able to use such amount within a reasonable period of time. Any such amount may be reallocated only if the Secretary has provided 30 days advance notice of the proposed reallocation to the eligible applicant for such area and to the Governor of the State of the proposed reallocation, during which period he may submit comments to the Secretary. After considering any comments submitted during such period of time, the Secretary shall notify the Governor and affected eligible applications of any decision to reallocate funds, and shall publish any such decision in the Federal Register. Priority shall be given in reallocating such funds to other areas within the same State.

"(d) The remaining fifty percent of the funds available for this part shall be available for innovative and experimental programs authorized under section 838.

"ELIGIBLE APPLICANTS

"SEC. 834. Eligible applicants under this part are prime sponsors, as defined in section 102 of this Act, and Indian tribes, bands, and groups qualified under section 302(c) (1) of this Act.

"ELIGIBLE PARTICIPANTS

"Sec. 835. (a) Eligible participants in programs authorized under this part shall be limited to persons who—

"(1) are unemployed;

"(2) at the time of entrance into a program authorized by this part, have attained the age 16 but not age 22, provided that, pursuant to such regulations as the Secretary may prescribe, persons who have attained age 14, but not age 16, and persons who have attained age 22 but not age 24 may be eli-

gible participants; and

"(3) are not members of households which have current gross family income, adjusted to an annualized basis (exclusive of unemployment compensation and other public payments which the individual will be disqualified from receiving by reason of assistance under this part) at a rate exceeding 70 per centum of the lower living standard income level; provided that activities of the type authorized under sections 832(c) (2), (3), (4), (5), (8) and (11) may be provided to persons meeting the requirements of paragraph 2 of this subsection who would not otherwise be eligible under this part.

"(b) For purposes of this section, the term 'lower living standard income level' means that income level (adjusted for regional and metropolitan and urban and rural differences and family size) determined annually by the Secretary based upon the most recent 'lower living standard budget' issued by the Bureau of Labor Statistics of the Department of

Labor.

"(c) To the maximum extent feasible, programs under this part shall be targeted on participants who are out-of-school, out-of-work, and experiencing severe handicaps in obtaining employment, including but not limited to those who lack credentials, such as a high school diploma, and those who require substantial basic and remedial skill development.

"CONDITIONS FOR RECEIPT OF FINANCIAL ASSISTANCE

"Sec. 836. The Secretary shall not provide financial assistance to an eligible applicant for programs authorized under section 832 unless such eligible applicant provides assurances that the standards set forth in part D will be met and:

"(1) includes in its comprehensive manpower plan submitted pursuant to section
105 or section 302(c)(1) of this Act (or for
fiscal year 1977, as an amendment thereto),
a description of the program to be provided
to eligible participants, together with a
description of the relationship and coordination of services provided to eligible participants under this part of similar services
offered by local educational agencies, postsecondary institutions, the public employment service, other youth programs, community-based organizations, businesses, and
labor organizations consistent with the requirements of sections 105 and 106 of this
Act:

"(2) provides assurances, satisfactory to the Secretary, that in the implementation of programs under this part, there will be coordination, as appropriate with local educational agencies, post-secondary institutions, other youth programs, community-based organizations, businesses, labor organizations, other job training programs, the apprenticeship system, and with respect to the referral of prospective youth participants to the program, the public employment service system;

"(3) provides assurances satisfactory to the Secretary, that to the maximum extent feasible, programs or components of programs conducted under this part will be linked, where appropriate, to comprehensive work and training programs conducted by prime sponsors under title I of this Act;

"(4) provides assurances satisfactory to the Secretary that allowances will be paid in accordance with the provisions of section 111(a) of this Act and such regulations as the Secretary may prescribe for this part; and

"(5) provides such other information and assurances as the Secretary may deem appropriate to carry out the purposes of this Act.

"FEDERAL ADMINISTRATION

"SEC. 837. The provisions of sections 108, 109, and 110 of this Act shall apply to all programs and activities authorized under section 832.

"INNOVATIVE AND EXPERIMENTAL PROGRAMS

"Sec. 838. (a) There are authorized to be established innovative and experimental programs to test new approaches for dealing with the unemployment problems of youth. In establishing such programs, the Secretary shall consult, as appropriate, with the Secretaries of Commerce, Health, Education, and Welfare, Housing and Urban Development and with the Director of ACTION. Such programs shall include, where appropriate, cooperative arrangements with educational agencies to provide special programs and services for eligible participants enrolled in secondary schools, including job experience, counseling and guidance prior to the completion of secondary school and making available occupational, educational and training information through State-wide career information systems.

"(b) Three-fourths of the funds available under section 833(d) to carry out this section shall be provided to eligible applicants on the basis of applications submitted to the Secretary. The Secretary shall review and approve such applications, on the basis of criteria which he or she shall establish, which shall include but not be limited to:

"(1) standards of local need, as evidenced by the severity of unemployment problems among low-income youth participants in the area to be served;

"(2) demonstrated effectiveness in dealing with the unemployment problems of youth, as indicated by the past performance record of the eligible applicant; and

"(3) the quality of the program proposal, as determined by the Secretary in accord with such standards as the Secretary shall establish.

"(c) The remaining one-fourth of the funds available under section 833(d) to carry out this section shall be used at the Secretary's discretion to carry out innovative and experimental programs for eligible participants, for the purposes of preparing them for, enhancing their prospects for, or securing their employment in jobs through which they may be reasonably expected to advance to productive working lives.

"ACADEMIC CREDIT

"Sec. 839. In the Administration of this part, appropriate efforts shall be made to encourage the granting by the educational agency or school involved of academic credit to eligible participants who are in school.

"PART D-GENERAL PROVISIONS

"Sec. 851. Pursuant to such regulations as the Secretary deems appropriate, all activities funded under this title shall meet the following standards:

"(a) The activities-

"(1) will result in an increase in employment opportunities over those opportunities which would otherwise be available, "(2) will not result in the displacement

"(2) will not result in the displacement of currently employed workers (including partial displacement such as reduction in the hours of non-overtime work or wages or employment benefits),

"(f) Members of the target population to be served by the program shall be consulted with and their views taken into con-

sideration.

"(g) Where a labor organization represents employees who are engaged in similar work in the same area to that proposed to be performed under the program for which an application is being developed for submission under this title, such organization shall be notified and shall be afforded a reasonable period of time prior to the submission of the application in which to make comments to the applicant and to the Secretary.

"(h) The provisions of section 605(b) of

this Act shall apply.

"(1) Activities funded under this title shall meet such other standards as the Secretary may deem appropriate to carry out the purposes of this Act.

"(j) Rates of pay under parts B and C shall be no lower than the highest of—

"(1) the minimum wage under section 6(a) (1) of the Fair Labor Standards Act of 1938:

"(2) the State or local minimum wage for the most nearly comparable employment; or

"(3) the prevailing rates of pay for persons employed in similar occupations by the same employer: Provided, however, that in the case of projects to which the provisions of the Davis-Bacon Act (or of any Federal law containing labor standards in accordance with the Davis-Bacon Act) otherwise apply, the Secretary is authorized, for projects financed under parts B and C of this title of under \$5,000, to prescribe rates of pay for youth participants which are not less than the applicable minimum wage but not more than the wage rate of the entering apprentice in the most nearly comparable apprenticable trade, and to prescribe the appropriate ratio of journeymen to such participating youths.

"EDUCATION CREDIT

"SEC. 852. The Secretary in carrying out the purposes of this title, shall work with the Department of Health, Education, and Welfare to make suitable arrangements whereby academic credit may be awarded by educational institutions and agencies for competencies derived from work experience obtained through programs established under this title.

"EVALUATION

"SEC. 853. Programs provided under this title shall be subject to continuing performance evaluation pursuant to the provisions of section 313(a) of this Act.

TRAINING AND TECHNICAL ASSISTANCE

Sec. 854. Training and technical assistance may be provided to eligible applicants conducting programs and activities under parts B and C of this title in accordance with the provisions of section 315 of this Act. Technical assistance to be provided by the Secretary shall emphasize the development and exchange of viable and proven program models and program information to assist eligible applicants in the design and modification of local program initiatives.

AUTHORIZATION OF APPROPRIATIONS

SEC. 3. (a) There are authorized to be appropriated such sums as may be necessary for the fiscal year ending September 30, 1977, and for the fiscal year ending September 30, 1978 to carry out the provisions of title VIII the Comprehensive Employment and Training Act of 1973 (as amended by this

(b) Funds necessary to carry out their responsibilities under part A shall be made available to the Secretaries of the Interior and Agriculture in accord with interagency agreements between the Secretaries of the Interior and Agriculture and the Secretary.

RELATION TO OTHER PROVISIONS OF LAW

SEC. 4. The provisions of title VII of the Comprehensive Employment and Training Act of 1973, as amended, shall apply to pro grams under this Act, except that, to the extent that such provisions are inconsistent with the provisions of this Act, the provisions of this Act shall prevail.

EFFECTIVE DATE

· SEC. 5. The provisions of this Act shall become effective upon enactment.

> U.S. DEPARTMENT OF LABOR, Washington, D.C.

Hon. WALTER F. MONDALE, President of the Senate, Washington, D.C. Hon. THOMAS P. O'NEILL, Jr. Speaker of the House, Washington, D.C.

DEAR MR. PRESIDENT and MR. SPEAKER: We are transmitting herewith a draft bill to provide employment and training oppor-

tunities for youth.

As set forth more fully in the accompanying explantory materials, the "Youth Employment and Training Act of 1977" would amend the Comprehensive Employment and Training Act of 1973, as amended (CETA) by adding a new title VIII.

This proposed bill would implement the program for dealing with youth unemploy-ment problems which the President outlined in his message of March 9, 1977. The bill contains three new programs for dealing with

youth unemployment.

1. The bill would establish a National Young Adult Conservation Corps. The Corps, administered by the Secretary of Labor through agreements with the Secretaries of Interior and Agriculture, would engage youth aged 16 to 21 (and 14, 15, 22, and 23 years old at the Secretary's option) in conservation programs and in the maintenance and improvement of public lands and waters.

2. The bill would establish a program of community conservation and improvement projects to provide employment, service op-portunities, work experience, and skill training for youth. The projects, funded through CETA prime sponsors and qualified Indian tribes, would include neighborhood and community improvement activities, and conservation and restoration of natural resources on non-Federal public lands.

3. The bill also would establish Compre hensive Youth Employment and Training Programs. These programs would be targeted on low-income, unemployed youth. It would provide useful work experience opportunities in community betterment activities, productive employment in fields such as education and a wide range of service opportunities, training, and supportive services to aid youth in finding and retaining employment. The programs would be run through CETA prime sponsors and qualified Indian tribes. This part would also authorize innovative and experimental programs to test new approaches to the unemployment problem of Youth.

The President has requested \$1.5 billion to be spent over an 18-month period for these youth unemployment programs.

We urge your prompt and favorable consideration of this important measure.

The Office of Management and Budget advises that there is no objection to the submission of this draft legislation and that its enactment would be in accord with the program of the President.

Sincerely,

RAY MARSHALL Secretary of Labor.

STATEMENT AND EXPLANATION OF THE YOUTH EMPLOYMENT AND TRAINING ACT OF 1977

A substantial proportion of the young population continues to be plagued by persistent unemployment which may have longterm adverse consequences. Latest available figures indicate that there are about 3.4 million unemployed jobseekers among those aged 16-24. In percentage terms, there is an 18.5 percent unemployment rate among youth aged 16-19, and a 12.0 percent rate among those aged 20-24. For minority youth, however, the rate of unemployment is presently 37.2 percent. Even more significant these figures are little different from corresponding figures for the same age groups a year ago. The problem is not only severe in magnitude, but chronic in duration.

To date, progress in meeting the employment problems of young people has not been satisfactory. In many cases, young workers lack marketable job skills; in too many cases, their training and education have not fitted

them for jobs which are available.

In response to the problems of youth unemployment, the President proposed new initiatives for serving youth in his economic recovery package sent to Congress on January 31 of this year. Details of three new initiatives to serve youth were elaborated upon in a March 9, 1977, Presidential message to the Congress. In the latter message, the President stated that the new programs initially would be conducted under the existing authority of Title III of the Comprehensive Employment and Training Act (CETA), but that he would submit to the Congress a legislative proposal for a new title to be added to CETA, embodying the new initiatives. The Youth Employment and Training Act of 1977 represents a fulfillment of the President's commitment.

The proposed legislation would respond to the needs of unemployed youth by authorizing three new programs under a new title

VIII of CETA:

NATIONAL YOUNG ADULT CONSERVATION CORPS

Part A of the new title authorizes creation of a National Young Adult Conservation Corps. The Corps would consist of young Americans aged 16 through 21 (and persons aged 14, 15, 22, and 23 pursuant to regulations issued by the Secretary) in conservation projects and in the maintenance and improvement of public parks, forests and recreation areas. The Department of Labor intends to spend a total of \$350 million over the next 18 months for 35,000 positions under this program.

The program would be administered by the Department of Labor through agreements with the Agriculture and Interior Departments. It would be open to unemployed young persons, provided they meet the age criteria. However, individuals would be given preference for employment if they live in areas (as defined in title II of CETA) having unemployment rates of 6.5 percent or higher.

Corps members would be enrolled for a total period of not more than 12 months.

They would receive at least the Federal minimum wage.

Corps members would work on projects such as tree nursery operations, drought and flood damage control, recreation development, and cleanup and maintenance of public lands.

To the maximum extent feasible, projects would be labor intensive and those which could be initiated promptly. Candidates for the Corps would be re-

ferred by the public employment service, CETA prime sponsors and other appropriate organizations including the Departments of Agriculture and Interior.

State agencies, any public agency or organization, or any private non-profit agency or organization (which has been in existence for at least five years) would be able to operate a Corps project.

Corps members would be provided transportation, lodging, subsistence, and other services, where appropriate.

YOUTH COMMUNITY CONSERVATION AND IM-PROVEMENT PROJECTS

Part B authorizes a program of Youth Community Conservation and Improvement Projects. Under this program, young people aged 16 through 21 (and persons aged 14, 15, 22, and 23 pursuant to regulations issued by Secretary) would be employed in projects of local benefit, such as improving neighborhoods and communities and maintaining and restoring natural resources on publicly owned land. Projects would be concentrated where the need was greatest, but they would be open to unemployed youth. Over the next 18 months, the Department of Labor intends to spend a total of \$250 million for 30,000 jobs under this program.

Projects would be developed by project applicants (State and local governments and agencies, local educational agencies, community-based organizations and others) and reviewed and approved by eligible applicants as is done under title VI. Approved projects then are forwarded to the Secretary of Labor.

Funds would be available for supplies and equipment necessary to carry out the projects.

In funding projects, consideration would be given to the severity of unemployment among youths living in the areas to be served. The programs will be open to unemployed

persons, provided they meet the age criteria. COMPREHENSIVE YOUTH EMPLOYMENT AND TRAINING PROGRAMS

Part C authorizes Comprehensive Youth Employment and Training Programs, aimed at youths in low-income families, aged 16 through 21, (and persons aged 14, 15, 22, and 23 pursuant to regulations issued by the Secretary) who are unemployed. The program would be administered primarily by CETA prime sponsors, with a portion of the funds authorized being reserved for testing innovative demonstration projects. A total of \$900 million would be spent for 138,000 slots under this program.

Programs would be designed to enhance the job prospects and career opportunities of young persons; to achieve this, training and employment received would be interrelated and mutually reinforcing.

These programs would supplement programs and activities for youth now carried out by prime sponsors under title I.

Half of the funds would be allocated to the 466 prime sponsors under the CETA system to provide meaningful employment and work experience in fields such as community betterment, education and health care, and appropriate training to enhance the job prospects of participants. Eligible applicants (prime sponsors and Indian tribes) would be allocated funds based on their relative shares of unemployed persons and persons in families below the low-income level.

The other half of the funds would be available to the Secretary of Labor to encourage innovative and experimental programs. Three-quarters of this money would be available to eligible applicants on the basis of their applications to the Secretary. These applications would be judged by standards of local need, program quality, and the prime sponsor's record. The Secretary would use the rest of the money to develop and test innovative projects.

While programs under Part C are directed at unemployed, low-income youth, other youth would be able to participate in certain activities and services provided under this

To the maximum extent feasible, programs

would be linked to title I programs.

4. In addition Part D consists of general provisions that apply to parts A, B, and C. Part D sets forth labor standards that have to be met for an activity to receive funding under this title. Labor standards with respect to wages affect only parts B and C (part A has a separate provision in that part)

Part D also provides for coordination between the Secretary of Labor and the Secretary of HEW to provide academic credit.

JAVITS. Mr. President, I am pleased to join Senator Nelson and my other distinguished colleagues in introducing today the Youth Employment and Training Act of 1977. This bill represents the product of weeks of consultations between the administration and various Senators and, as one of those Senators, in addition to being the joint author, with Senator HUMPHREY, of the Comprehensive Youth Employment Act. S. 170, which is one of the Senate bills upon which the bill we introduce today is based, I believe that the bill is an example of what can be achieved when the administration and the Congress work together in a spirit of cooperation.

In January and February no less than seven youth employment bills were introduced in the Senate. These included S. 1, introduced by Senator Mathias; S. 20, introduced by Senators Cranston and KENNEDY; S. 306, introduced by Senators Stafford, Randolph and others; S. 494, introduced by Senator Jackson; S. 503, introduced by Senators McClure, DOMENICI, BELLMON and myself; S. 680, introduced by Senator Schweiker; and S. 170, to which I have already made reference.

Some of these bills utilized the Comprehensive Employment and Training Act manpower delivery system and some did not; some were targeted on the disadvantaged, some aimed at youths 16-21,

others at youths 16-24.

The point is, Mr. President, that although all these bills were intended to deal with the employment problems youth experience in the labor marketand there is no doubt that youth unemployment is a social and economic disaster for our country-each was characterized by a somewhat unique approach. The bills that have been introduced represent the Senate's best thinking currently on how to deal with the endemic structural problem of youth unemployment. I have maintained from the beginning that to remedy effectively so complex and disparate a problem as youth unemployment, we needed to have the maximum cross-fertilization of ideas, so that ultimately we could be able to formulate a truly comprehensive piece of legislation.

But we very easily could have had a legislative race here in the Senate to see whose bill would cross the finish line first and pick up all the available budget authority. As I emphasized on February 22, that would be no way to legislate, to leave that race to those who might find an opportune moment to press their particular approach.

The fact is, Mr. President, that we did not have such a race, because Senators were willing to put the national interest above the partisan or personal interest, and work together with the administration in developing the comprehensive measure I join my colleagues in introducing today.

I commend the President and his able Labor Secretary, Ray Marshall. It is well known that their original plan was to ask for \$1.5 billion in the economic stimulus appropriations bill to start up several national programs in fiscal year 1977 under title III of the Comprehensive Employment and Training Act. They did not contemplate seeking additional legislation in the form of a new, CETA youth

The administration soon realized. however, that with all these bills having been introduced, plus the House also beginning to move, plus the public works bill containing a youth employment title approaching Senate consideration and likely to pass, it would be necessary to reconsider the original plan to rely upon title III authority.

It was at that point that Secretary Marshall joined the chairman and ranking minority members of the Public Works and Human Resources Committees in organizing a staff task force whose mission it was to initiate a series of consultations between the administration and Congress for the purpose of formulating the comprehensive legislation, which has reached fruition today. The staffs are to be commended for their hard work and dedication in helping to develop this bill.

On the whole, I am pleased with the intent and programmatic content contemplated in this legislation. More specifically, I believe the Young Adult Conservation Corps provided for in part A represents a significant addition to our ability to provide manpower services and employment opportunities to rural youth and others, in diverse work experience programs. I agree with Senator Jackson and others, such as Representative MEEDS, that youths stand to gain much from the kind of experiences that can be afforded them in conservation corps

Likewise, I am pleased that Senator STAFFORD'S innovative concept of a youth improvement community program. which I believe represents the breaking of new ground in our manpower system, has been included in the administration's bill. Senator STAFFORD rightly deserves much credit for the development of this legislation, and his unique contribution should be given the place it warrants in our national employment pol-

Finally, it is gratifying to see that the community service program. which is a basic component of the Humphrey-Javits bill, has been adopted as the administration's own proposal.

Although I am generally pleased with and am able to endorse the bill we now introduce, I cannot say I am satisfied with it in every detail. Therefore, I wish

to make it clear that as ranking minority member of the Employment Subcommittee and of the full Human Resources Committee, I reserve the right to move amendments in committee to correct certain inadequacies I perceive in the legislation

One of the more serious defects is the absence of any recognition of the great need to establish employment and training programs for in-school youth. As currently drafted, the bill targets programs on out-of-school youth, thus appearing to neglect the needs of in-school youth, and possibly even inducing many of them to leave school. I believe that unless we begin to prepare youth for the job market while they are still in schoolthrough such programs as cooperative education with business, vocational exploration guided by experienced counselors and other programs that expose students to the world of work-we cannot hope to correct the problem of youth unemployment.

As Willard Wirtz has emphasized, we must begin to improve the entire process of youth transition from school to work, by strengthening the linkages between education and employment through programs designed to familiarize youths with the labor markets they are about to enter. We cannot continue to isolate the classroom from the workplace; to treat these as essentially two separate and distinct "time traps." This bill makes no mention of these needs, so Senator HUMPHREY and I am today introducing amendments to improve linkages and generally to make employment and training programs available to in-school vouth.

We propose that 15 percent of the prime sponsor's formula-determined allocation be set aside and earmarked for the development, operation and administration, in cooperation with local education agencies, of employment and training programs for in-school youth. Use of these funds would be conditional upon a prior agreement between the CETA prime sponsor and the local education agency describing the details of the programs to be offered. In this connection, another of our amendments would establish education-work committees in prime sponsor areas, to advise on the in-school programs that are administered jointly by prime sponsors and local education agencies.

Second, Mr. President, we are dissatisfied with the fact that this bill overlooks the need to initiate national, State and local programs of occupational counseling, career guidance and labor market information. The bill seems to focus' solely upon the more immediate employment problems of youth. Hence, it proposes to give jobs to youths, in national and State and local parks, in community conservation and in community service. But the bill provides little more. We have learned, on the contrary, that we cannot merely provide dead end jobs for unemployed youth; we must remove the competitive disadvantages that now characterize their experiences in the labor market. We need to improve youths' longrun employability, so that one day they can move to permanent, unsubsidized full-time employment. The

lack of such a longrun view is a fundamental defect of this bill, and it is revealed by the failure to include provisions that would encourage the collection, dissemination and utilization of occupational information at the State and local levels

For this reason, Senator HUMPHREY and I propose an amendment to insure that the National Occupational Information Coordinating Committee, which was created under section 161, (b) (1) of the Vocational Education Act Amendments of 1976, receives the wherewithal it requires to expand its efforts to facilitate cooperative arrangements at the State level, between educational authorities, State Manpower Services Councils and CETA administrators. I believe that our entire employment and training effort on behalf of young people may well depend on the degree to which we can establish collaborative processes among manpower and education authorities, in such areas as occupational counseling and eareer guidance. And our success in achieving this goal may depend, in turn, on our ability to initiate collaboration at the national level between the Employment and Training Administration and the Office of Education.

Third, Mr. President, we offer an amendment to raise the formula-determined portion of the appropriation for the Community Service Employment Program, from 50 percent to 75 percent. In conjunction with this. Senator HUMPHREY and I propose that the components of the distribution formula be changed from aggregate State unemployment and number of low-income persons to relative youth unemployment and number of youths in low-income families. In my opinion, the components of the formula in the bill do not afford us adequate targetability on the disadvantaged youth of our country.

Finally, Mr. President, Senator Humphrey and I believe that \$2.5 billion should be authorized to be appropriated in fiscal year 1978 for youth employment programs under this bill. This is the amount the full Human Resources Committee agreed to when the members accepted my amendment to the committee's fiscal year 1978 budget report. Furthermore, we believe that parts A, B and C of the bill ought to receive the same earmarked share each was designated to receive in the President's original message, to wit: 23, 17, and 60 percent, respectively.

In conclusion, Mr. President, I wish to reiterate my support for the overall thrust of this bill. In general, I am pleased with the amalgam we have been able to develop in consultation with the administration. As is the case with most such amalgams, however, it does not contain everything that should be in-cluded. This is why we have proposed amendments which I believe deserve consideration and which I intend to move in committee. But I did not wish to obstruct the extraordinary progress which I saw occurring in the development of this bill by insisting that the bill as introduced contain all of the provisions I thought important. Now the bill can go forward through the legislative process and, hopefully, be enacted by Congress without delay. As the ranking minority member of the Employment Subcommittee, I shall do all I can, and I know our distinguished chairman, the Senator from Wisconsin, Senator Nelson, and Senator Williams, our chairman, will do likewise, to move the Youth Employment and Training Act of 1977 to swift consideration.

Mr. President, I ask unanimous consent to have printed in the RECORD the amendments proposed by Senator Humphrey and me.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

AMENDMENT No. 184

In section 2, section 832 is amended by striking out ", subject to such terms and conditions as he deems appropriate," in the matter preceding (a).

In section 2, section 833(a) of such Act is

amended to read as follows:

"'(a) Seventy-five percent of the funds available for this part in any fiscal year shall be allocated as follows for the purpose of carrying out programs authorized under section 832:

"'(1) 50 percent of the amount allocated under this subsection shall be allocated on the basis of the relative number of unemployed youth within the State as compared to such numbers in all States;

"'(2) 50 percent of the amount allocated under this subsection shall be allocated on the basis of the relative number of youth in families with an annual income below the low-income level within the State compared to such total numbers in all States;

"'(3) In determining allocations under this subsection, the Secretary shall use what he determines to be the most recent and best available data."

In section 2, section 833(c) is redesignated

as 833(d).

In section 2, section 833 is further amended by adding after subsection (b) the following new subsection:

"'(c) Of the funds allocated to each prime sponsor under this section, no less than fifteen per centum shall be utilized for programs, carried out under the joint administration of the prime sponsor and a local education agency, subsequent to an agreement between the prime sponsor and a local education agency which describes in detail the employment opportunities and appropriate training and supportive services which shall be provided to eligible participants, as they are defined in section 835(a), who are enrolled or who agree to enroll in a full-time program leading to a secondary school degree as a junior or technical college degree."

In section 2, section 833 is amended by redesignating subsection (d) to subsection (e) and by striking out "fifty" and inserting in lieu thereof "twenty-five".

In section 2, section 835(c) is further amended to read as follows:

"'(c) To the maximum extent feasible, programs under this part shall be targeted on participants who are most in need.".

In section 2, section 836 is amended by inserting "(a)" after the section designation, by striking out the word "and" at the end of clause (4), by redesignating clause (5) as clause (8) and by inserting immediately after clause (4) the following:

"'(5) establishes an Education-Work Committee of the planning council of such sponsor established under section 104, in accordance with subsection (b) of this sec-

tion;
"'(6) provides that not less than 15 percent of the funds available under section
832 shall be used to provide employment
opportunities and the appropriate training
and supportive services for in-school youth

who are eligible participants under section 835 to be administered by a local educational agency within the jurisdiction of the prime sponsor providing part-time employment opportunities with public and private employers in action learning positions for youths enrolled in or reentering a full-time educational program in a secondary school;

"'(7) provides for a Work Experience Inschool Youth program (hereinafter in this section referred to as the "In-school program") in accordance with the provisions of subsection (c) of this section; and"

In section 2, section 836 is further amended by adding at the end thereof the

following new subsections:

(b) Each such committee shall be convened by the prime sponsor, and shall be composed of members who are representaof: (A) the prime sponsor; local educational agency or agencies; (C) local business and industry; (D) local labor organizations; and (E) the local United States Employment Service office or offices. representative of the prime sponsor shall serve as the chairman of the committee. The prime sponsor shall provide such professional, technical, and clerical staff as is necessary to serve the committee. The committee shall advise in the development of the terms and conditions of the contracts between the prime sponsor and the local educational agency or agencies under section 832 of this title. The committee shall prepare a local career development plan which includes a general plan of the programs to be carried out under this title, and make recommendations for coordinating such activities with other related activities which are carried out by organizations represented in the committee. Any final decision with respect to recommendations submitted by the committee shall be made by the prime sponsor.

"(c) No in-school program shall be entered into unless an agreement has been made between the prime sponsor and the local educational agency. Each such agree-

ment shall—

"'(1) set forth a description of jobs to be performed by participating youths;

"'(2) describe wages or salaries to be paid by participating employers to participating

youths;
"(3) set forth assurances that participating youths will be provided meaningful work experience, which shall improve their ability to make career decisions and which shall provide them with basic work skills needed for regular employment not subsidized under this in-school program;

"'(4) be administered under contracts with the prime sponsor by a local educational agency or local educational agencies within the jurisdiction of the prime sponsor, and that such contracts have been reviewed and approved by the full membership of the Education-Work Committees established in paragraph (8) of this subsection;

"'(5) set forth assurances that job information, counseling, guidance and placement services shall be made available to participating youths and that funds provided under an in-school program shall be available to, and utilized by, the local educational agency or agencies to the extent necessary to pay the cost of school-based counselors to carry out the provisions of this in-school program;

"(6) describe arrangements for reimbursing employers for necessary costs of training participating youths for jobs provided

under this in-school program;

"'(7) set forth assurances that jobs provided under this in-school program shall be certified by the participating local educational agencies as relevant to the educational and career goals of the participating youths;

"'(8) set forth assurances that youths will not be placed in jobs in which wages are based primarily on commissions, in jobs for

which training may be more effectively or economically conducted under other Federal or State programs, or in jobs in shortage occupations where such shortage is caused by poor working conditions;

"'(9) set forth assurances that the activities and services agreed to under this inschool program will be administered by or the supervision of the applicant, identifying any agency or institution designated to carry out such activities or services;

"'(10) set forth assurances that the eliapplicant will advise participating youths of the availability of other training and manpower resources provided under this Act, and other resources available in the local community to assist such youths in obtaining employment;

"'(11) set forth assurances that participating youths will be adequately supervised

by participating employers;

(12) set forth assurances that no person with responsibilities in the operation of the program will discriminate with respect to participant or applicant for participation in such program because of race, creed, color, national origin, sex, political affiliations, or beliefs and that participants in the program will not be employed on the construction, operation, or maintenance of so much of any facility as is used or to be used for sectarian instruction or as a place for religious worship;

(13) set forth assurances that jobs provided by participating employers under this in-school program are in addition to jobs that would be provided by the employer in the absence of programs assisted under this

in-school program;

"'(14) set forth assurances that youth participants in work experience for in-school youth programs shall be chosen, to the maximum extent possible, from among youths who are in low-income families and who need work to remain in school; and selected by the appropriate local educational agency, based on the certification for each participating youth by the school-based guidance counselor that the work experience pro-vided is an appropriate component of the overall educational program of the youth;

"'(15) set forth such other assurances, arrangements, and conditions consistent with the provisions of this in-school program, as the Secretary deems necessary in accordance with such regulations as the

Secretary shall prescribe.

In section 2, section 838 (c) is amended by striking out the word "shall" and by inserting in lieu thereof the following: "shall first be used by the Secretary to transfer an amount, not less than \$3,000,000 and not more than \$5,000,000 in any fiscal year, to the National Occupational mation Coordinating Committee established pursuant to section 161(b) of the Vocational Education Act of 1963, for the purposes described in subsection (d) of this section, and then shall".

In section 2, section 838 is further amended by adding at the end thereof the

following:

"(d) (1) In addition to the responsibilities assigned to the National Occupational Information Coordinating Committee under section 161 of the Vocational Education Act, the Committee shall-

"(A) encourage and assist local areas to adopt methods of translating national aggregate occupational outlook data into local

"(B) assist in the development of State occupational information systems, to be used in the maintenance of local computerized job banks and job vacancy reports, and accessible via computer terminals located in school district offices;

"(C) in cooperation with State and local correctional agencies, programs of counseling and employment services for youth in

correctional institutions:

"(D) programs of computer on-line terminals and other facilities to utilize and implement occupational and career outlook information and projections supplied by State employment service offices and to improve the match of youth career desires with available and anticipated labor demand:

"(E) in cooperation with State and local educational agencies, programs to bring employment and career counseling to presec-

ondary youths; and

"(F) programs designed to encourage public and private employers to list all available job opportunities for youths with the appropriate eligible applicant conductoccupational information and career counseling programs and to encourage cooperation and contact between such eligible applicants and employers.

(2) All funds available to the National Occupational Information Coordinating Committee under this section and under section 161 of the Vocational Education Act, may be used by the Committee, to carry out any of its functions and responsibilities au-

thorized by law.".

Section 3 (a) is amended to read as follows:

"(a) There are authorized to be appropriated \$1,000,000,000 for the period ending September 30, 1977 and \$2,500,000,000 for the period ending September 30, 1978, to carry out the provisions of this Act. Programs authorized under Part A shall receive 23 per centum of the total appropriation; programs authorized under part B shall receive 17 per centum of the total appropriation; and programs authorized under C shall receive 60 per centum of the total appropriation."

Mr. STAFFORD. Mr. President, I commend the administration for its commitment to early action on legislation designed to address the critical unemployment problems facing our Nation's young

Today the President submitted to the Congress a comprehensive youth employment bill, as he promised in his message of March 9. The bill, which I am cosponsoring, is being introduced in the Senate by my colleague and the chairman of the Manpower Subcommittee of the Committee on Human Resources, Senator Nelson.

I am particularly pleased that the President's bill carries forward the concept and purpose of the youth community improvement program that I introduced earlier this year, along with Senator RANDOLPH. It is my view that this program, part B of the administration bill, is valuable because its emphasis is on the creation of jobs for young people.

However, I am concerned over some changes suggested by the administration to the original legislation I had introduced. My concern is not triggered by pride of authorship, but rather by the fear that, unless clarified, the language in the administration bill may result in a complete loss of separate identity for this program. I am concerned that the youth community improvement concept may be doomed at the outset because of the Government's unwillingness or ina-

bility to break new ground.

I am concerned that, in an effort to "regularize" the total legislative package to fit under the broad roof of the Comprehensive Employment Training Act of 1973, the administration has lost sight of the innovative characteristics of the youth community improvement program.

Perhaps I am too sensitive to some of

the changes the administration has made in the legislation I originally introduced. I have been assured by the administration that we share a common goal-to provide jobs for young Americans between the ages of 16 and 19. If our problem is merely one of working out the exact legislative language to achieve that goal, I know we shall succeed, and I pledge my full efforts to that end.

In short, I welcome this legislation in the spirit of cooperation, and with the understanding that the legislative process ahead of us provides the arena for refining our goals and narrowing what-

ever differences are real.

Unlike youth programs of the past where actual work is secondary, jobs are the primary objective of the community improvement program. In past efforts, funds were not adequate for needed supplies and the projects, by necessity, be-came make work. This bill assures adequate funding for materials. In many programs, there was no proper supervision. This bill provides supervision and skill development as necessary for the proper completion of the project. The program is designed to foster good, sound jobs which merit the respect of the youth holding them and the community for which they are performed.

Under the President's bill, as under my proposal, work is to be performed on projects that serve and benefit the community and which would not otherwise be carried out. Maximum flexibility is given each community needs at the same

time they produce jobs.

This emphasizes another major concept of this program-active local participation. The program encourages broad community participation which is vital in the development of good projects. Any private or public nonprofit group, including private citizens' voluntary groups, can participate and submit applications. I believe this is an important part of the process. The program is youth employment and extends beyond the traditional manpower training efforts. The community or neighborhood improvements cut across a wide spectrum of community affairs and interests, and community groups are encouraged to bring forward programs.

Mr. President, many people have given of their time and effort in the development of the entire package as well as the community improvement program included as part B. I note the valuable, constructive efforts of the administration. Also, many individuals and intergroup associations concerned about the serious unemployment confronting our young people have been closely involved in its evolution.

Mr. CRANSTON. Mr. President, I am pleased to join with Senator Nelson and other members of the Committee on Human Resources in introducing S. 1242, the "Youth Employment and Training Act of 1977." This bill. which would add a new title VIII to the Comprehensive Employment and Training Act of 1973, as amended, represents the administration's proposal to provide job and job training opportunities for young people through fiscal year 1978.

Mr. President, I am cosponsoring this legislation because I believe very strongly that we need a major effort to deal with the problem of youth in the labor market, and I am encouraged by the administration's commitment to this task. About one-half of the unemployed persons in this country are young people between the ages of 16 to 24. The problem is not one which is restricted to times of economic hardships—it is with us even in good times. This proposal represents a good basis for moving in the direction of attempting to meet the employment needs of our Nation's young people.

On January 10, I introduced S. 20, the proposed "Youth Initiatives Act of 1977" with Senator Kennedy. My bill is designed to stimulate the creation of employment opportunities for youth in the public and private sectors through the establishment of a National Youth Service program and an Opportunities in Private Enterprise program. Through these initiatives young people would be provided with meaningful work experience, an appropriate income, and opportunities to develop a better knowledge of their career interests and aptitudes, further their education and training, and develop their employment skills for entrance into the labor market.

Mr. President, I intend to be deeply involved in the consideration of this legislation in the Subcommittee on Employment, Poverty, and Migratory Labor on which I serve under the chairmanship of the bill's principal sponsor, Senator Nelson. I will be submitting a number of amendments to the legislation introduced today in order to blend into the bill certain critical elements of S. 20, such as emphasis on economically disadvantaged youth, adequate discretionary flexibility at the State and local levels to develop and carry out innovative and effective job and job training efforts, a larger role for State government, community and youth involvement in the planning of programs, strong education and counseling components, and a major veterans emphasis.

Mr. President, I congratulate the administration for the deep concern reflected in this legislation. I pledge to President Carter and Senator Nelson, the chairman of the Subcommittee on Employment, Poverty, and Migratory Labor, my full cooperation and assistance as we work to refine this legislation and report it to the Senate. I know we will be working expeditously so that a meaningful program can be put in place as soon as possible.

Mr. WILLIAMS. Mr. President, I am pleased to join with my colleagues, the Senator from Wisconsin (Mr. Nelson) and the Senator from New York (Mr. Javits), to introduce the Carter administration's youth employment and training legislation.

This initiative is among the major concerns that face us in these difficult economic times. Unemployment among young Americans has become intolerable, not only for jobless youth, but for a nation that looks to them to provide the dedication and the strength upon which our future will be built.

The recession, which struck hard in upwards of 20 million families at one

time or another over the past 3 years, has denied the opportunities and drained the hopes of our future work force. It is impossible to gage how many youth have lost an essential educational opportunity or apprenticeship because they or their families were economically disabled during a critical stage in their lives

We know what the statistics tell us. There are 3.4 million young Americans between 16 and 24 years of age who are anxious to work, but cannot find a job. Last month, the teenage unemployment rate was 18.8 percent on the whole, but far worse in identifiable segments of the teenage labor force; the official rate for black teenagers, for example, was an astounding 40.1 percent.

While total unemployment has declined from nearly 9 percent to 7.3 percent over the past 2 years, teenagers did not share in the improvement. Their unemployment rate remained close to the high levels reached early in 1975 at the depths of the recession. And the plight of youth in the 20 to 24 age bracket is only slightly more optimistic.

We have evidence, therefore, that the prospects of young people for meaningful and rewarding employment are not likely to improve automatically as the economy recovers. Special efforts are required to help them gain a basic knowledge of the work force, acquire marketable skills, develop a sense of accomplishment that translates into a stable commitment to their jobs, and acquire the special facility for making the difficult transition

from the classroom to the workplace.

This legislation, devised with a sense of urgency, is a major step toward giving young Americans the opportunities for which they yearn.

Mr. President, this bill is the culmination of an admirable cooperative effort between the administration and the Congress. A great deal of thought and consultation has already been invested in its provisions, and they will receive more in the Committee on Human Resources, which I chair.

The basic outline of the legislation was laid by the administration in February, when President Carter requested \$1.5 billion for youth employment and training activities under the general authorities contained in title III of the Comprehensive Employment and Training Act.

Those funds have been approved by the House of Representatives, and are now pending before the Senate in H.R. 4876, the Economic Stimulus Appropriations Act.

The administration, using those funds and existing authorities, could well have gone ahead with its initiatives without further legislation. It is a tribute to the President that he has been willing to develop a partnership with the Congress in a project of this magnitude. I am pleased to have been a participant in these efforts.

My colleagues will be grateful as well, I know, for the special contributions of the Senator from Vermont (Mr. Stafford) and the Senator from Washington (Mr. Jackson). The bill that we have developed incorporates programs they devised for addressing youth unemployment.

The first part of the bill establishes a National Young Adult Conservation Corps along the lines of legislation proposed by the Senator from Washington. It would provide year-round employment in national parks and forests for youth, particularly those who lives in areas where unemployment rates exceed 6.5 percent.

The second part draws upon the initiative of the Senator from Vermont, establishing a Youth Community Conservation and Improvement Projects program. It would provide jobs in projects of local benefit, such as improving neighborhood and communities and maintaining and restoring natural resources on publicly owned land. Unemployed youth in high unemployment areas would be given a preference for these jobs.

The third part of the bill establishes a new Federal-State-local partnership in the attack on youth unemployment. It establishes new statutory foundations for comprehensive youth employment and training programs, with half of the authorized funds to be distributed to State and local prime sponsors for programs especially suited to their communities, and the other half to be administered by the Secretary of Labor to encourage and develop innovative and experimental programs for helping disadvantaged youth discover and pursue the avenues to fulfilling jobs and fuller lives.

With the initiatives that this legislation proposes, we can build into the permanent fabric of national policy a concerted effort to help youth equip themselves to assume command of their destiny.

In the days ahead, the Senator from Wisconsin, as chairman of the Subcommittee on Employment, Poverty, and Migratory Labor, and the Senator from New York, as the ranking member of the subcommittee, will forge the legislation that our committee will recommend to the Senate.

In addition to their own innovative ideas, they will be able to draw upon other suggestions that have been advanced by the distinguished Senator from Minnesota (Mr. Humphrey), the Senator from California (Mr. Cranston), the Senator from Maryland (Mr. Mathias), and others who have introduced youth employment legislation.

What we can do in the next few weeks, however, should not be regarded as final, immutable, or complete. This bill constitutes only a start. Its authorization for no more than 18 months makes it clear that we must revisit and constantly monitor the progress that can be made in the near future.

The innovative and experimental approaches that result from this legislation undoubtedly will suggest new directions for the future and for long-term policy. We should anticipate, therefore, that the Congress will be called upon again next year to address these urgent problems.

It is my hope that we will sustain the intensity of interest and commitment underlying this bill until we achieve a permanent national policy on youth employment that is comprehensive and complete.

By Mr. CHURCH (for himself, Mr. DOMENICI, and Mr. WILLIAMS):

S. 1243. A bill to amend title II of the Social Security Act to revise the provisions relating to automatic cost-of-living increases in benefits, and for other purposes; to the Committee on Finance.

SOCIAL SECURITY COST-OF-LIVING IMPROVE-

MENT ACT

Mr. CHURCH. Mr. President, on behalf of myself and Senators Domenici and WILLIAMS, I introduce for appropriate reference the Social Security Cost-of-Living Improvement Act.

During the past 4 years-from February 1973 to February 1977-prices rose

by 37.7 percent.

All Americans have felt the impact in one form or another and wherever they in the supermarket, the doctor's office, the department store, at the gas

station, and elsewhere.

Older Americans have also been adversely affected, and perhaps harder hit than other age groups. First, most elderly persons live on limited incomes. In 1975, the median income of older Americans living alone or with nonrelatives was \$3,311 a year. One-half of the families with an aged head had incomes below \$8.057.

Millions of elderly persons simply do not have the sufficient margin between income and outgo to absorb major price jumps in fuel, electricity, or other every-

day necessities.

Quite often, they are faced with difficult, if not impossible, choices. Do they buy food for the table or necessary prescriptions to maintain their health? And frequently both needs suffer, and some-

times irreparably. Second, some of the sharpest increases in prices have occurred in areas where the elderly's greatest expenditures are concentrated: Housing, food, medical care, and transportation. In each case the increase for these particular items has exceeded the inflationary rate for the overall Consumer Price Index.

Housing, food, medical care, and transportation typically account for more than \$4 out of every \$5 in the elderly's

limited budgets.

It was my privilege to sponsor legislation in 1972 which led to the establishment of a cost-of-living adjustment mechanism to protect Social Security beneficiaries from rising prices.

This represented an historic first step in safeguarding older Americans from

inflation.

But other actions are clearly needed if the elderly are to have fuller protection

from rising prices.

The Social Security Cost-of-Living Improvement Act would be an important first step to strengthen the automatic escalator provision. It would perfect the cost-of-living adjustment mechanism in two important areas.

First, it would provide two cost-of-living adjustments, provided the consumer price index increased by at least 3 percent semiannually from one benefit period to another. Social security beneficiaries now receive only one cost-ofliving adjustment a year-in Julywhether the inflationary rate is 3 or 13 percent.

The Social Security Cost-of-Living

Improvement Act would permit adjustments to be made in April and October, provided the annual inflationary rate exceeded 6 percent.

Civil Service annuitants now receive two cost-of-living adjustments a year. We can certainly do the same for social security beneficiaries during periods of accelerated inflation.

This change would also allow social security benefits to be kept more current

with rising prices.

Second, this bill would direct the Secretary of Labor, in consultation with the Secretary of Health, Education, and Welfare, to develop a special consumer price index for the elderly-one which would reflect more precisely the impact of inflation upon them.

Individual items comprising the overall Consumer Price Index do not, of course, rise at a uniform rate. They vary markedly in many cases. Home heating fuel oil, for example, increased by 120.1 percent during the past 4 years, or more than three times the level of the Consumer Price Index.

A special index could give appropriate weight to these increases as they affect older Americans.

This measure would also provide greater protection for other elderly per-

Supplemental security income recipients would benefit, because the SSI escalator provision is pegged to the social security cost-of-living adjustment mechanism.

In addition, railroad retirement an-nuitants and their families would also be helped by these changes.

Inflation is the elderly's No. 1 enemy. As prices go up, their purchasing power goes down.

Older Americans have told the Committee on Aging about their daily battles against the cost of living. We have heard firsthand about their personal experiences at hearings throughout the Na-

Many older Americans-particularly the low- and moderate-income elderlynow find themselves in desperate situations. The Government's recent poverty figures make this abundantly clear. More than 200,000 persons 65 or older were added to the poverty rolls during the past year, reversing a longstanding downward trend.

Precipitous price rises have also shaken the economic security of those who retired on what was considered a comfortable income a few years ago. Now they must oftentimes stand by helplessly, watching their purchasing power being whittled away by a never ending price spiral.

Older Americans want and deserve further protection from inflation.

The Social Security Cost-of-Living Improvement Act can provide essential

Mr. President, I ask unanimous consent that the text of this bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1243

Be it enacted by the Senate and House of Representatives of the United States of

America in Congress assembled, That this Act may be cited as the "Social Security Costof-Living Improvement Act of 1977'

SEC. 2. (a) Section 215 (i) (1) of the Social

Security Act is amended-

(1) in subparagraph (A), by striking out "(i)" and all that follows and inserting in lieu thereof the following: "(i) the threemonth period ending on March 31, 1977, (ii) the three-month period ending on November 30 of 1977 or any succeeding year, (iii) the three-month period ending on May 31 of 1978 or any succeeding year, or (iv) any other quarter (which, for purposes of this subsection, means a three-month period ending on May 31, August 31, November 30, or the last day of February) in which occurs the effective month of a general benefit increase under this title;"; and

(2) in subparagraph (B)—
(A) by striking out "subparagraph (A)
(i)" and inserting in lieu thereof "subparagraph (A) (other than clause (iii) thereof)": and

(B) by striking out "calendar quarter" and inserting in lieu thereof "quarter"; and

(3) in subparagraph (C), by striking out "calendar quarter" and inserting in lieu thereof "quarter".

(b) Section 215(i)(2) of such Act is amended-

in subparagraph (A)(i), by striking "the base quarter (as defined in paragraph (1)(A)(i))" and inserting in thereof "a base quarter (as defined in para-graph (1) (A) (ii) or (iii))";

(2) in the first sentence of subparagraph

(A) (ii) -

(A) by striking out "that the base quarter" and inserting in lieu thereof "that a base

quarter";

- (B) by striking out "effective with the month of June of such year as provided in subparagraph (B)" and inserting in lieu thereof "effective (in the case such quarter is the quarter which ends on May 31 of such year) with the month of September of such as provided in subparagraph (B) and effective (in the case such quarter is the quarter which ends on November 30 of such year) with the month of March of the next year as provided in subparagraph (B)";
- (3) in subparagraph (B)— (A) by striking out "quarter shall" and inserting in lieu thereof "quarter shall (i) in case such cost-of-living computation quarter the quarter which ends on May 31 of the calendar year,";

(B) by striking out "May" each place it appears and inserting in lieu thereof "August"; and

(C) by inserting, immediately before the period at the end thereof, the following: ", and (ii) in case such cost-of-living computation quarter is the quarter which ends on November 30, apply in the case of monthly benefits under this title for months after February of the calendar year immediately succeeding the calendar year in which occurred such cost-of-living computation quarter, and in the case of lump-sum death payments with respect to deaths occurring after such February

(c) Subsection (a) of section 230 of such Act is amended to read as follows:

"(a) If the Secretary institutes pursuant to section 215(i) one or more benefit increases which become effective in any calendar year, he shall after October 1 and not later than November 1 of such year determine and publish in the Federal Register the contribution and benefit base determined under subsection (b) which shall be effective with respect to remuneration paid after such year and taxable years beginning after such year."

(d) Section 203(f)(8)(A) of such Act is

amended to read as follows:

"(A) If the Secretary institutes pursuant to section 215(i) one or more benefit increases which become effective in any calendar year, he shall after October 1 and not later than November 1 of such year determine and publish in the Federal Register a new exempt amount which shall be effective (unless such new exempt amount is prevented from becoming effective by subparagraph (C) of this paragraph) with respect to any individual's taxable year which ends after such calendar year."

(e) Section 1839(c) (1), (2), (3), and (4) of the Social Security Act are each amended by striking out "July 1" wherever it appears therein and inserting in lieu thereof

(f) The amendments made by subsections (a) and (b) shall be effective only with respect to determinations under section 215(i) of the Social Security Act as to whether a base is a cost-of-living quarter, in the case of the base quarters as defined in such section (as modified by such amendments) which end after the date of enactment of this Act. The amendment made by subsection (c) shall be effective only with respect to adjustments of the contribution and benefit base, under section 230 of the Social Security Act, which become effective in the case of calendar years after 1977. The amendment made by subsection (d) shall be effective only with respect to adjustments in exempt amounts, under section 203(f)(8) of the Social Security Act, which become effective in the case of taxable years anding after December 31, 1977. The amendments made by subsection (c) shall be effective in the case of determinations, made under section 1839(c) of the Social Security Act, made after the date of enactment of this Act.

(g) The Secretary of Labor, in consultation with the Secretary of Health, Education, and Welfare, shall immediately undertake to develop a special Consumer Price Index for the elderly. Not later than thirty days after the date of enactment of this Act, the Secretary of Labor and the Secretary of Health, Education, and Welfare shall each submit to the Congress a report of the action that they have jointly and severally taken toward the development of such an index, together with an estimate of the date that the development of such an index will be completed and such

index put into effect.

Mr. WILLIAMS. Mr. President, I wish to join my colleague, the Senator from Idaho (Mr. Church) in proposing the Social Security Cost-of-Living Improvement Act. As former chairman of the Senate Committee on Aging, I have dealt with the special hardships of this sadly neglected group of Americans who have the least power and ability to resist inflation. The extraordinary high number of elderly poor, which is now over 5 million, represents a tragedy unworthy of this great Nation. Therefore, I give my strongest support for this legislation to alleviate the impoverished conditions for these deserving people.

Senior citizens have been hard hit by the continuing inflation, throughout our Nation. However, I must emphasize that the national economic picture has caused special hardships for many of New Jersey's elderly. It is estimated that the aged population in New Jersey is over 800,000, of which nearly 90 percent rely on social security payments. These low-income elderly are confronted with a higher rate of inflation than the average Consumer Price Index family during the present inflationary period, because they spend a larger proportion of their budgets on essentials-housing, food, fuel, and health care-which have experienced higher rates of inflation for all other items in the Consumer Price Index by 29 to 43 percent.

We must also consider that such factors as stable living patterns limited mobility, and more frequent health problems combine with high inflation to make it difficult for the aged to shop around and substitute lower cost goods or services for their present expenditures.

Rapid increases, accompanied by inadequate compensation for losses in real income, have placed serious constraints on the bugets of the aged. Moreover, it is impossible to determine what kinds of individual tradeoffs senior citizens have been forced to make in their budgets among medical care, housing, food, and

fuel-all necessities of life.

The legislation being introduced today is designed to improve the automatic escalator law enacted in 1972. First, it would authorize cost-of-living adjustments up to twice a year whenever the Consumer Price Index exceeds 3 percent in a base period. The current annual social security payment adjustments seem patently insufficient and unfair. Consider that increases in social security benefits for inflation are at least 4 months behind the cost-of-living increases, and can be as much as 16 months later. In sharp contrast to this are many private and public pension plans, such the Civil Service retirement plan, which has provisions for biannual adjustments.

Second, the bill would authorize the Secretary of Health, Education, and Welfare to develop a special consumer price index for the elderly. The need for a separate consumer price index for the elderly is evident from the Survey of Con-sumer Expenditures published by the Bureau of Labor Statistics in 1960-61. It found that the aged spend more of their income on groceries, shelter, household goods, and health care. Since an updated consumer expenditure study completed in 1974 revealed similar consumption characteristics distinct from the general population, a more accurate index of their expenses can be both simply and reliably determined.

Mr. President, I urge quick adoption of this measure which will relieve two problems in current social security benefits. We must maintain purchasing power for the elderly in an inflationary economy. We must also make our laws reflect reality by taking into account the extraordinarily high rate of inflation

burdening older Americans.

By Mr. BIDEN:

S. 1244. A bill to limit the period of authorization of new budget authority provided in appropriation acts, to require analysis, appraisal, and evaluation of existing programs for which continued new budget authority is proposed to be authorized by committees of the Congress, and for other purposes; to the Committee on Rules and Administration.

Mr. BIDEN. Mr. President, the great challenge of this session of Congress is the effort to bring the growth of Federal spending under control. Many of us are presently concerned with the slowness of our economic recovery and our persistent almost chronically high unemployment. We must continue to seek solutions to our economic problems. At the same time, however, we must never lose sight of our long-range goal to restore fiscal responsibility and stability in the management of Federal affairs. We must accept the fact that, to some degree, it has been our failure to follow sound fiscal policies that has led to some of our present problems. Therefore, as a first step toward meeting this budgetary challenge, I am introducing today a bill entitled "The Federal Spending Control Act of 1977."

It is not just the size of our Federal budget that is staggering, but even more the rate at which it is increasing. We cannot long continue such growth rates in expenditures. Just to illustrate the severity of the problem, it was not until 1962 that Federal spending exceeded \$100 billion. Just 9 years later, in 1971, spending had doubled to exceed the \$200 billion level, and after only 6 more years. it has almost doubled again, to exceed \$400 billion.

Most studies of Federal fiscal policy testify to this high growth rate. In a recent study the Congressional Budget Office points out that, in the past 20 Federal spending has increased from \$77 billion in 1957 to an estimated \$413 billion in 1977. This is more than a fivefold increase in 20 years. It represents an average annual growth in the rate of spending of 8.8 percent.

These figures include the costs of inflation-some of it caused by unwise Federal fiscal policy. However, even if you take out the effect of inflation, Federal spending in those 20 years has

doubled

The same study by the Congressional Budget Office estimates the cost over the next 5 years of just continuing the present level of Federal programs that are now in operation-no new programs. It estimates that to do this, spending would go from \$413 billion in the 1977 fiscal year to about \$450 billion in 1978. By the end of 5 years, 1982, it could go to \$585 billion

Of course, such future estimates are subject to a wide margin of error. But they show the continuing upward trend. It is one thing, as a theoretical budget exercise, to assume the continuation of everything the Federal Government does today for the next 5 years, but as a practical matter, we must stop assuming

such things.

What we must do is to begin reviewing existing programs to determine whether they are still effective, and whether they are worth the money that we are putting in them. We must eliminate the wasteful ones. One thing that we have all observed is that once a Federal program gets started, it is very difficult to stop it, or even change its emphasis, regardless of its performance in the past. It is time for us to require, on a regular and continuing basis, that both the administrators of these programs and we legislators who adopt the programs examine their operations with care and detail.

The bill that I am introducing today would seek to control Federal spending through such a periodic scrutiny of existing programs. Early in the last session of Congress, I introduced a spending control bill that had a similar purpose. Other bills were introduced also and hearings held, which produced much useful information about the need for such legislation. Last year, a spending control bill was reported by the Government Operations and Rules and Administration Committees, and placed on the Senate calendar for action. Unfortunately, in the rush of business at the close of the session, it was not possible to get the bill passed. I hope we can start early this year and get spending control legislation on the books.

While this bill has the same general purpose as the spending control bill I introduced in the last sesson of Congress, it has been expanded and modified in several important respects. I believe these changes make it a better, and more far-

reaching piece of legislation.

A periodic review of existing spending programs is essential to sound fiscal management and this bill will provide that. But what about the new spending programs that are being added each year? If we are worried now about eliminating existing programs that are duplicative or wasteful, we should also be worried about how many additional duplicative and wasteful programs we may be adding each year. Do we really want to wait 4 years for a review to tell us that a new program overlaps some existing program? Other budget control proposals focus primarily on weeding out old programs. This bill focuses also on not adopting such programs in the first place. Before it adopts a new spending program Congress should ask itself such questions as: Will this new spending proposal really achieve a clear, identifiable goal that could not better be reached through an existing program? Will there be overlapping and duplication of effort? Is there a better way to achieve our goal? Do we really need the program at all? All of these questions should be asked and answered in any committee report that proposes a new spending program. For this reason my bill would require that whenever a committee reports authorizing legislation for a new spending program, its report must set forth: The relationship of the new program to existing programs with the same general purpose; whether there will be conflict, overlap, or duplcation of effort with existing programs; how the new program will mesh with existing ones; what alternatives were considered; and what would be the consequences of not adopting the new spending program. This is an essential addition to the sunset concept which will keep up from embarking on some costly experiments, only to "sunset" them 4 years later.

This proposed legislation also requires that a committee report on any authorization for spending identify the objectives and purposes of the new program and the problems or needs it is intended to meet. This should help to overcome problem in program review that has been identified by many, including the General Accounting Office. Descriptions of purposes and objectives have often been so poorly stated in the past that the objectives could not be identified with sufficient clarity to review accomplishments. To further aid in clarifying intent, this bill would require that a conference report state the objectives of the

program as developed in conference so that modifications or compromises on program content reached in conference will be clear.

Another significant feature of the bill is to require that every authorization to spend money contain a ceiling on the spending. Congress should not authorize a spending program if it cannot set forth in the law what it will cost. Yet it is not unheard of for spending bills to contain a statement to the effect that there is hereby authorized to be appropriated such sums as may be necessary to carry out the purposes of this bill. One purpose of an authorization process is to allow the committee that has program expertise to determine that need for a program and set a maximum price tag on it. I do not believe a committee should recommend a program if it cannot put a price tag on it. Recommending a spending program without a price ceiling defeats the purpose of the authorization process. What is more, inclusion of a spending ceiling has the salutary effect of requiring the authorizing committee to review the program sooner than 4 years if the costs escalate out of control.

Finally this bill includes a number of provisions intended to meet concerns expressed about the bills that were considered last year. The bill contains a provision for phasing out programs, where desirable, so that there need not be suffering and hardship that might be caused by abrupt termination. There is a provision for the Senate and House of Representatives to waive the 4-year limit. This may be necessary where the 4-year period is clearly impractical due to the long time period required to achieve measurable results or where the mere threat of program termination as frequently as every 4 years might raise serious concerns about the stability of basic national commitments. However, even in waiver cases the authorization must be for a stated number of years and there must be a special program of over-

sight set up.

Finally, the bill provides a period of 1 year after enactment for each committee to report its proposals to the Senate for implementing this bill. After all the reports are in, the Senate can judge whether further uniform rules or standards are needed to make this legislation work. Legislation of this kind, while essential, is so far reaching and so different from our past practices that it is impossible to anticipate all the problems. The sensible way to proceed is to get the basic spending control program on the books and then take the time to work out effective procedures to implement it.

While this bill has the same purpose as the one I introduced last year, it has been modified to take account of testimony received last year. I believe, therefore, that it is a better bill. I hope that the Congress will move to consider it

promptly.

For 2 years now, Congress has used the new congressional budget process to hold off any new massive Federal spending programs. That is a good record. But the day may come when we need new things for our country—new initiatives in defense, in health, in housing. Where will

the money come from? One answer has to be from the termination of existing programs that no longer do the job.

* We have told the American people that we will work toward a balanced budget. But the unanswered question is: How are we going to do it? Again, one answer has to be through trimming our existing budget programs that no longer are cost effective and have lost their justification.

This was the purpose of my spending control legislation introduced in 1975. and also of the bill I am introducing today. Federal spending programs would be automatically terminated at the end of 4 years. Before they could be renewed, the congressional committees responsible for them would have to review them and determine whether they are still needed, and whether they have achieved their goals. This review would not just look at how much more a program would cost next year. It would examine the program from the ground up. The purpose would not be to find out how much more should be spent on the program. It would be to decide whether anything should be spent on it. Only after such a study could the committee propose to the Congress that a spending program be continued. And Congress would still have to pass judgment on each program.

These two elements—automatic termination and review of cost effectiveness—were central to the spending control bill that I introduced last year. These are still, in my judgment, the essential elements of a budget control program.

Mr. President, I hope that spending control legislation can be made a first order of business for this Congress. It has been quite a while since I introduced my original legislation. The concept has been well received in many quarters for a long time. In this connection, I request unanimous consent that an article appearing in the December 15, 1975, issue of U.S. News & World Report entitled "A Four-Year Hitch" be printed in the Record.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

A Four-Year Hitch (By Howard Flieger)

Everybody is deploring the high cost and wastefulness of government these days. Small wonder. It is popular politics. Any measure of public opinion you use will tell you that the majority of people are sick and tired of a system that seems to tax, spend and grow almost out of control.

In many ways, the situation recalls Mark Twain's observation on the weather: Everybody talks about it, but nobody does anything. Still, that isn't entirely accurate. Now and then an idea comes along for keeping government in bounds—an idea so practical in its application that it is all but overlooked in the oratory about fiscal responsibility.

Although it is not likely to produce any big headlines, such a proposal is before Congress now. If enacted, it just might stop in its tracks the topsy-like growth of federal operations.

What it would do is limit to four years the automatic financial life of any Government program authorized by Congress.

In other words, those in charge of the bureaucracy would have to convince Congress every four years that they were performing a worthwhile service and doing so efficiently.

If they couldn't prove their case, they'd be out of business-automatically.

This particular proposal—it is similar to othershas been offered by Sen. Joseph R. Biden, Jr. (Dem.) of Delaware. It is cosponsored by Mike Mansfield of Montana, the Democratic Leader, and by Senators Paul Laxalt (Rep.), of Nevada and Patrick J. Leahy (Dem.), of Vermont. It goes to the heart of the problem of Big Government.

Political scientists and students of the federal system have been increasingly concerned over the fact that, once a Government program is set in motion, it tends to go on and on under its own momentum. Rarely does anyone look back to see if the situation that created it still exists, or if those in charge are doing the job they should be doing. Sometimes an agency's annual budget is reduced a bit, but almost never does one pass out of existence. For the most part, they grow.

One of the reasons is that Congress passes legislation to create this program or that, then leaves it up to a department to see that the thing is carried out. The bureaucracy has never been noted for cutting down on the number of people and dollars it thinks it has to have to do any given job.

Thus, the Government has become by far the largest employer in the country, and a good part of the growth of its payroll is prob-

ably due to inertia.

Furthermore, the amount of tax money it spends has gone up at a rate that is truly alarming. It took 175 years for the federal budget to reach 100 billion dollars annually. Then, in the next nine years, it doubled. Now it exceeds 350 billion. At the present rate, it will top 400 billion by 1977.

Says Senator Biden:

"One thing that we have all observed is that once a federal program gets started, it is very difficult to stop it or even change its emphasis, regardless of its performance in the past. It is time for us to require on a regular and continuing basis that both the administrators of those programs and we legislators who adopt the programs examine their operations with care and detail."

The bill would do that by limiting to four years the spending authorization for any program. Positive action by Congress would

be needed to keep it going.

Four years seems just about right—long enough for a program to prove its worth and short enough to kill boondoggles before

they get out of hand.

The plan is not a cure-all. It could hardly be expected to shrink the Government back to its size of a few year sago. But it might stunt its future growth. That alone would be a welcome change.

Mr. BIDEN. Mr. President, this bill is not a cure-all. But it does add one essential building block to our fiscal controls. I am convinced that a spending control process such as this will greatly enhance the soundness of the budget and will slow its growth. In this way, 'the budget will become a much more effective instrument.

Mr. President, I ask unanimous consent that the text of the bill, "The Federal Spending Control Act of 1977," be printed in full in the RECORD at this

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1244

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Spending Control Act of 1977".

DEFINITIONS

SEC. 2. (a) For the purposes of this Act—
(1) The term "budget authority" means

budget authority (as defined in section 3 (a) (2) of the Congressional Budget Act of 1974) which is provided in appropriation Acts

(2) The term "authorization" means an Act authorizing new budget authority to be provided in appropriation Acts.

(3) The term "program" means any activities or purposes for which there is a separate

authorization of new budget authority.
(4) The term "appropriation Act" means an Act referred to in section 105 of title 1, United States Code.

BILLS AND RESOLUTIONS SUBJECT TO POINT OF ORDER

SEC. 3. It shall not be in order in either the Senate or the House of Representatives to consider-

any bill or resolution which authorizes the enactment of new budget authority for any fiscal year beginning six years after the effective date of this Act, until the com-mittee which has jurisdiction has submitted the report thereon required by section 5

(2) any bill or resolution which authorizes the enactment of new budget authority for a period of more than four fiscal years, except as provided in section 4: or

(3) any bill or resolution which authorizes the enactment of an unlimited amount of new budget authority for any purpose or

WAIVER IN THE SENATE OF TIME LIMIT ON AUTHORIZATIONS

SEC. 4. (a) If any committee of the Senate determines that an authorization of new budget authority for a period of more than four fiscal years is necessary to accomplish the purposes for which the authorization is made, it may report a bill or resolution containing an authorization for such longer period. At the same time or later, it shall report a resolution to the Senate providing for a waiver of the four-fiscal-year limit contained in section 3(2) and stating the reasons why such a waiver is necessary. The resolution shall be referred to the Committee on Rules and Administration and to the Committee on Appropriations.

(b) Each committee shall report the resolution to the Senate within 10 days after the resolution is referred to it (not counting any day on which the Senate is not in session) beginning with the day following the day on which it is so referred, accompanied that committee's recommendations and reasons for such recommendations with respect to the resolution. If either committee does not report the resolution within such 10-day period, it shall automatically be discharged from further consideration of the resolution and the resolution shall be placed

(c) During the consideration of any such resolution, debate shall be limited to one hour, to be equally divided between, and controlled by, the majority leader and minority leader or their designees, and the time on any debatable motion or appeal shall be limited to twenty minutes, to be equally divided between, and controlled by the mover and the manager of the resolution. In the event the manager of the resolution is in favor of any such motion or appeal, the time in opposition thereto shall be controlled by the minority leader or his designee. Such leaders, or either of them, may, from the time under their control on the passage of such resolution, allot additional time to any Senator during the consideration of such debatable motion or appeal. No amendment to the resolution is in

(d) If, after both committees have reported (or been discharged from further consideration of) the resolution, the Senate agrees to the resolution by a yea-and-nay vote, then section 3(2) shall not apply with respect to the bill or resolution to which the resolution so agreed to applies.

(e) Whenever any bill or resolution is reported by a committee under the provisions of subsection (a), the report accompanying such bill or resolution shall contain a schedule of oversight hearings by the committee to determine progress being made toward the intended objectives of the program for which the authorization is being made.

ANALYSIS, APPRAISAL, AND EVALUATION OF EXISTING PROGRAMS

SEC. 5. (a) No committee of the Senate or the House of Representatives shall report legislation authorizing continued new budget authority for an existing program for which an authorization of budget authority has pre viously been enacted until it has conducted an analysis, appraisal, and evaluation of the existing program for which continued new budget authority is proposed to be author-ized. If the authorization of new budget authority for any program is enacted for periods of less than four fiscal years, the analysis, appraisal, and evaluation of that program required by this section need only be conducted prior to reporting legislation that would ex-tend the authorization of new budget authority for the fifth fiscal year commencing after the effective date of this Act and each four years thereafter.

(b) The results of such analysis, appraisal, and evaluation shall be included in the committee report on the authorizing legislation.

(c) Whenever a committee of the Senate or the House of Representatives is conducting an analysis, appraisal, and evaluation of a program, the head of the department or agency of the Government which administers the program, or any part thereof, shall submit to the committee, upon its request, his analysis, appraisal, and evaluation of the program.

(d) The committees of the Senate and the House of Representatives having jurisdiction may conduct jointly the analysis, appraisal, and evaluation required by this section and

may conduct joint hearings.

(e) The report of a committee on its analysis, appraisal, and evaluation shall be sufficiently complete to permit a determination to whether a program should be terminated, modified, or continued without change, and may include the following mat-

(1) an identification of the objectives intended for the program and the problem or need which the program was intended to

(2) whether the program objectives are

still relevant; (3) whether the program has adhered to the original and intended purpose;

(4) whether the program has made any substantial progress toward meeting the objectives originally intended;

(5) the impact of the program on the economy;

(6) the feasibility of alternative programs and methods, including tax expenditures, for meeting the objectives of the program under consideration and their cost effective-

(7) the relation of all other Government and private programs dealing with the objectives of the program under consideration, including tax expenditure programs;

(8) an examination of proposed legislation pending in either House seeking to achieve the same or related objectives; and

(9) whether the program should be extended and the further benefits that may be achieved thereby, including:

(A) an identification of the objectives in-

tended for the program and the problem or the need that the program is intended to

(B) an assessment of the consequences of eliminating the program, of consolidating it with another program, or of funding it at a lower level; and

(C) an analysis of the services and performance estimated to be achieved if the

law has been due to a rejection of a proposed program were continued, including an estimate of when, and the conditions under the program will have fulfilled the which objectives for which it was established.

(f) For the purpose of making the analysis, appraisal, and evaluation required by this section, a committee may combine related programs and may issue one report on all such combined programs.

AUTHORIZATIONS FOR NEW PROGRAMS

SEC. 6. Whenever any committee of the Senate or the House of Representatives reports legislation authorizing new budget authority for a program for which there has previously been no authorization, it shall include the following information in its report accompanying such legislation:

(1) an indentification of the objectives and purposes of the new program and the problems or needs that the new program is

intended to address;

(2) a description of other programs which seek to accomplish the same general pur-

pose or purposes;
(3) whether this program will conflict with, overlap or duplicate any existing programs:

(4) how this new program will operate with existing programs to promote the common objective or objectives of all similar programs;

(5) the consequences of failing to achieve

the purposes of the new program;
(6) what other alternatives, including tax expenditures and private resources, were considered as alternatives and why they were not recommended;

(7) what changes were considered in existing programs to coordinate them with the new program and the reasons for changing or not changing existing programs; and

(8) a projection of the anticipated needs and accmoplishments of the program, including an estimate of when, and the conditions under which, the program will have fulfilled the objectives for which it was established.

CONFERENCE REPORTS ON AUTHORIZATION BILLS

Sec. 7. The joint explanatory statement accompanying a conference report on any bill or resolution authorizing new budget authority for any program in connection with which an analysis, appraisal, and evaluation has been conducted under section 5 shall include an analysis of the services and performance estimated to be achieved, including an analysis of the objectives intended for the program and the problems or needs which the program is intended to address, based on the bill or resolution as recommended in such conference report.

PHASE OUT OF EXISTING PROGRAMS

SEC. 8. (a) In the event that a continued authorization for an existing program has been adopted by either the Senate or House of Representatives, but has not become law by the time the existing authorization expires (unless the failure to become authorization by the other House), then there is hereby authorized to be appropriated for such program-

(1) for the first fiscal year following the expiration of the previous authorization, 80 per cent of the amount authorized to be appropriated for the previous fiscal year;

(2) for the second fiscal year following such expiration, 60 percent of the amount authorized to be appropriated under para-

graph (1).
(b) If at any time following the expiration of a previous authorization for a program a new authorization for the program is provided by law, then such new authorization shall replace the authorization provided in subsection (a).

If at any time a program for which an authorization has previously been made is repealed, or the Congress otherwise indicates affirmatively its intent that an authorization for such program not continue, then the provisions of subsection (a) shall not apply.

DETERMINATION OF CERTAIN EXISTING AUTHORIZATIONS

SEC. 9. Except as provided in section 10, it shall not be in order in either the Senate or the House of Representatives to consider bill or resolution making appropriations for a fiscal year which begins five years after the effective date of this Act if such appropriation is made pursuant to a law, in effect on the effective date of this Act, authorizing new budget authority for a period of more than four fiscal years or for an unspecified number of fiscal years.

WAIVER IN THE SENATE OF SECTION 9

SEC. 10. (a) If any committee of the Senate determines that section 9 should not be effective with regard to a law authorizing budget authority for a program within its jurisdiction, it shall report a resolution to the Senate providing for a waiver of Section 9. The resolution shall state the authorization or authorizations of budget authority to which section 9 shall not apply, the reasons why the waiver is necessary, and the fiscal years for which the waiver shall apply. The resolution shall be referred to the Committee on Rules and Administration and to the Committee on Appropriations.

(b) Each committee shall report the resolution to the Senate within 10 days after the resolution is referred to it (not counting any day on which the Senate is not in session) beginning with the day following the day on which it is so referred, accompanied by that committee's recommendations and reasons for such recommendations with respect to the resolution. If either committee does not report the resolution within such 10-day period, it shall automatically be discharged from further consideration of the resolution and the resolution shall be placed on the calendar.

(c) During the consideration of any such resolution, debate shall be limited to ten hours, to be equally divided between, and controlled by, the majority leader and minority leader or their designees, and the time on any debatable motion or appeal shall be limited to twenty minutes, to be equally divided between, and controlled by the mover and the manager of the resolution. In the event the manager of the resolution is in favor of any such motion or appeal, the time in opposition thereto shall be controlled by the minority leader or his designee. Such leaders, or either of them, may, from the time under their control on the passage of such resolution, allot additional time to any Senator during the consideration of such debatable motion or appeal. No amendment to the resolution is in order.

(d) If, after both committees have reported (or been discharged from further consideration of) the resolution, the Senate agrees to the resolution by a yea-and-nay vote, then section 9 shall not apply with respect to the bill or resolution to which the resolution so agreed to applies.

(e) Whichever any bill or resolution is reported by a committee under the provisions of subsection (a), the report accompanying such bill or resolution shall contain a schedule of oversight hearings by the committee to determine progress being made toward the intended objectives of the program.

REPORTS BY SENATE COMMITTEES ON PROPOSED IMPLEMENTATION

Sec. 11. Not later than one year following the effective date of this Act, each commit-tee of the Senate shall file with the Senate a report indicating the schedule, procedure, and content of the analysis, appraisal, and evaluation that it intends to use to implement this Act. Such reports shall be referred

to the Committee on Rules and Administration which shall hold such hearings as it may deem necessary. Following its review of such reports, the Committee on Rules and Administration may report to the Senate changes in the rules of the Senate to provide uniform standards for the implementation of this Act and its requirements for the analvsis, appraisal, and evaluation of programs. ASSISTANCE TO SENATE AND HOUSE COMMITTEES

SEC. 12. (a) At the request of any committee of the Senate or the House of Representatives, the Comptroller General of the United States shall furnish to such committee information, analyses, and reports to assist it in carrying out its duties under this Act

(b) Consistent with the discharge by the Congressional Budget Office of its duties and functions under the Congressional Budget Act of 1974, the Director of the Congressional Budget Office shall, at the request of any committee of the Senate or the House of Representatives, furnish to such committee information and analyses to assist it in carrying out its duties under this Act.

(c) Consistent with the discharge by the Office of Technology Assessment of its duties and functions under the Technology Assessment Act of 1972, the Director of the Office Technology Assessment shall, at the request of any committee of the Senate or the House of Representatives, furnish to such committee information, analyses, and reports to assist it in carrying out its duties under this Act.

(d) At the request of any committee of the Senate or House of Representatives, the Director of the Congressional Research Service shall furnish to such committee information, analyses, and reports to assist it in carrying out its duties under this Act.

STUDY OF ZERO-BASE BUDGETING

SEC. 13. The Director of the Office of Management and Budget shall conduct a study the feasibility and advisability of establishing a zero-base budgeting system for the departments and agencies of the executive branch and furnishing zero-based budget information to the Congress. Such study shall consider the relationship between any such system of zero-base budgeting and the provisions of this Act. The Director shall submit a report of the results of this study, together with his recommendations, to the Congress not later than December 31, 1978.

EFFECTIVE DATE

SEC. 14. This Act shall take effect on the first day of the first regular session of the Congress which begins after the date of the enactment of this Act.

EXERCISE OF RULEMAKING POWER

Sec. 15. This section and sections 3, 4, 5, 6, 7, 9, 10 and 11 of this Act are enacted by the Congress-

(1) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such they shall be considered as part of the rules of each House, respectively, or of that House to which they specifically apply; and such rules shall supersede other rules only to the extent that they are inconsistent therewith; and

(2) with full recognition of the constitutional right of either House to change such rules (so far as relating to such House) at any time, in the same manner, and to the same extent as in the case of any other rule of such House.

By Mr. GRIFFIN:

S. 1245. A bill to improve the criminal justice system by eliminating and improving overcrowded and unsafe conditions in State, county, and local prisons through the provision of grants to assist in the construction, acquisition, and renovation of such facilities; to the Committee on the Judiciary.

PRISONS: WEAK LINK IN THE CRIMINAL JUSTICE SYSTEM

Mr. GRIFFIN: Mr. President, the lack of available prison space has disrupted our criminal justice system at every level.

To help redress this problem to some degree, I am today introducing the Corrections Construction and Program Development Act of 1977. The purpose of this act is to provide Federal assistance to State and local governments for the construction, acquisition, and renovation of correctional facilities and for the development and improvement of correctional programs and practices within such facilities.

Key provisions of my bill would:

Authorize the Law Enforcement Assistance Administration—LEAA—to award a supplemental grant to any State that has submitted an approved application for funding under the existing corrections assistance title of the Crime Control Act.

Require that the application be consistent with modern concepts, including utilization of advanced prison design and personnel practices, provision for narcotic and alcoholism treatment within correctional facilities, and emphasis on community-based facilities and programs.

Authorize \$150 million for fiscal year 1978 and \$350 million for fiscal year 1979. Funds would be allocated to the States on the basis of their population, but unused funds may be available for real-location. States must put up at least 25 percent matching funds.

Require that at least 75 percent of the funds received by a State be used for construction, acquisition, or renovation of correctional facilities. The remainder is to be used to set up or improve correctional programs and practices within the facilities.

Mr. President, a recent Gallup poll indicates that Americans view crime as their community's top problem. Many of our citizens live in constant fear of assaults, murders, robberies, rapes, and other violent crimes.

Unfortunately, there is ample reason for this fear. From 1969 to 1974, the crime index maintained by the FBI increased 38 percent. Through 1975, the rate continued to increase by more than 10 percent.

Even those fortunate enough to have escaped the personal tragedy of a murder, a mugging, or a rape are victims in a certain sense: The cost of crime is staggering, and it must be borne by all of us.

One of the most disheartening aspects of the problem is juvenile crime. Since 1960, juvenile arrests for murder, rape, and aggravated assault have increased 254 percent. Juvenile crime is now found in rural areas and the suburbs. But in the cities, it has reached epidemic proportions.

In Detroit, for example, youth gangs terrorized the city all last summer. While the police desperately tried to bring the city under control a stranded motorist was accosted by a van full of youths who beat and shot him, and left him

lying for dead boasting, "Tell the mayor we own the city."

No one should be surprised that the American people have demanded a halt to this kind of senseless violence and rhetoric. And no one should be surprised that the elected representatives of the people have responded. That response has taken many forms.

According to a recent Wall Street Journal article, 35 States have passed new death-penalty laws following the 1972 Supreme Court decision. Twelve States have replaced discretionary sentencing with fixed term, mandatory sentences for certain crimes. Many States are taking a new, hard look at their juvenile justice system to see if it adequately deals with today's outbreak of violence among youth. Some States are showing dramatic changes in their approach to probation. Finally, many judges are sentencing more offenders-and for longer terms. Tougher parole standards are keeping offenders in jail longer.

As a result of this tough stand by the States the crime rate began slowing in 1975. From an 18-percent crime increase in 1974, the rate of increase dropped to 10 percent in 1975. This decline continued in dramatic fashion through 1976, according to recently announced FBI statistics. The preliminary uniform crime report figures show that serious crime reported in the United States during 1976 showed no increase over 1975.

Unfortunately, solving one problem often creates another. In this case, a very serious problem of prison over-crowding has resulted from the crack-down on crime, and it threatens to dampen the prospects of future success in coping with the problem.

Our perceptions do not always coincide with reality. Many people believe that judges send criminals back to the streets about as fast as the police apprehend them—making the court a regular revolving door. The fact is that law enforcement agencies are apprehending criminals and judges are sentencing them. That is why the Nation's prison propulation grew in 1975 by 11 percent to a total of 249,716. It is surely in excess of 250,000 today.

This trend is not likely to continue—because there is a lack of prison space. While there is a limit to the number of prisoners who can be incarcerated, unfortunately, there seems to be no upper limit to the number of people who can commit crimes. Without more prison space, new criminals will not be sent to prison unless old criminals are let out. If there is a revolving door in the criminal justice system, it is located at the prison gates.

In the State of Michigan the prison population is growing every day. In fact, the prison commitment rate is rising faster than the overall crime rate.

The present capacity of Michigan's prisons is 10,490. The present population of Michigan prisons is 12,700. And it is estimated that the prison population will rise to 13,500 by August of this year. That will be 2,000 more prisoners than can be properly housed, even after completion of a new facility presently under construction.

At Jackson prison, the world's largest, 5,700 residents are crammed in wall to wall. Bunk beds have been placed in the corridors to help house hundreds of prisoners who should be in other facilities that, unfortunately, do not exist.

Michigan officials recognize that they must deal with this situation and have proposed a bond issue to raise \$439 million for new prison construction.

If approved by the voters, this will permit the construction of facilities to house 2,000 prisoners already in the system, will improve existing facilities, and will provide space for 1,500 additional prisoners expected if new mandatory sentencing is enacted. A bond proposal, of course, is just that—a proposal—and there is no guarantee that the State's citizens are willing to shoulder this added financial burden by approving it.

As a stopgap measure, Governor Milliken has just asked the legislature for a 32-percent increase in the corrections budget for emergency housing. Even this action will put a great strain on the State's resources.

Michigan is not alone in this dilemma. For example, it was reported last fall that Maryland needs 4,000 new prison beds at a cost of \$130 million. That State has gone so far as to consider the use of a mothballed ship to house new inmates, and like Detroit, has looked at converting an abandoned warehouse into a prison.

Across the Nation, prison populations are increasing at a record pace. number of prisoners today will pale in comparison to the 350,000 total expected by 1985. In 1975, every State but one, experienced a prison population gain. California, the only State which avoided an increase, did so by resorting to the drastic step of paroling over 10,000 male inmates—twice the usual number to gain needed prison space. By the way, those who might suggest that the increased use of parole would provide an inexpensive solution to the prison space crisis should be aware that this group of California parolees are being returned to prison due to new felony convictions at a 50- to 70-percent higher rate than for other parolees.

Prisons are expensive. Some projections place the total cost of the needed additional space over the next 8 years at \$3 billion. And this says nothing of the old and dilapidated facilities that must be replaced. In the United States as a whole, there are an estimated 25,000 prison cells which were built over 50 years ago.

There is a national interest to be served—as well as a State interest—in making more prison space available. Prisons play a vital role in reducing crime, and while fighting crime is properly considered a State and local interest, crime itself is a national problem. The Federal Government has long recognized that the financial and technical resources at its command are vitally needed by State and local authorities if they are to cope with today's serious crime.

The Law Enforcement Assistance Administration—LEAA—was created in 1968 to bring Federal resources to the States, and LEAA is presently providing some very limited assistance to the States for correctional facilities construction.

LEAA, however, has not emphasized corrections

Since 1968 LEAA has spent nearly 50 percent of its funds on police activities, about 15 percent on courts, and the remainder-less than 40 percent-on correctional facilities and programs, with heavy emphasis on the latter. Translated into actual dollars, the States are receiving very little Federal aid for prison construction from LEAA. For example, of the \$1.5 billion spent on all corrections programs by LEAA since 1968, it is estimated that States have received only about 10 percent of that, or \$150 million, for construction and renovation of mainly city, county, and regional jails.

We are going to have to do better than this. If we give the States money to catch criminals, we should help build

places to put them.

I am well aware, Mr. President that there are many critics in our Nation who. while in agreement that crime must be reduced, believe that prisons and jails have little or no part to play in reducing crime. Indeed, there are some who would argue that the present conditions in our correctional facilities actually produce

While I strongly believe that adequate correctional facilities are an integral part of a modern criminal justice system. I can sympathize with those who see today's prisons as breeding grounds for crime. But among the factors contributing to this situation are the overcrowded and antiquated facilities now being utilized. Another factor is the lack of alternatives to the traditional prison concepts of cells and steel bars. That is why my bill will give States flexibility to remodel and construct a variety of new correctional facilities, including half-way houses, work-release centers, and community-based facilities for both adults and juveniles which are less expensive than traditional pris-

No one argues that criminals should not be caught. However, it would make little sense if the apprehension of criminals was just a futile gesture. If a judge cannot send criminals to prison for lack of space, he must send them back onto the streets. This does much more than frustrate judges. It angers law-abiding citizens and law enforcement officials, breeds cynicism among everyone-including criminals-and makes a mockery of the old saying that "crime doesn't pay."

ons and reflect modern penal concepts.

A recent article in the Washington Star by James Q. Wilson, professor of government at Harvard University, notes that our response to increasing crime rates "has not been rational." He points out that a lack of prison space has caused most States to end up with overcrowded prisons filled with only the most serious of offenders—a potentially lethal mix-and one which makes any hope of rehabilitation nearly hopeless. The only way to keep the lid on things has been to reduce the amount of time these dangerous criminals serve by granting them early parole.

Wilson went on to say that-

Increasing the capacity of our prison system is consistent with, if not mandated by, a variety of policy goals . . .

Chief among these is sentencing policy.

Lack of available prison space can pervade and disrupt the entire criminal justice system at every level. To prosecutors, plea bargaining practices and dismissal of charges become desirable alternatives to forcing expensive and time-consuming trials which result in a convicted criminal being placed on probation. Judges who find, as one Maryland jurist has stated, that "it's easier to get reservations at a luxury hotel than to book a man into a prison," have little choice in some cases but to grant probation or give a reduced sentence.

Prison officials and probation authorities, faced with no room for incoming prisoners, must make liberal parole grants the standard procedure. Even at the street level, police decisions are based on perceptions of a suspected criminal's likely handling as he pro-ceeds through the criminal justice system.

In some instances, as in Michigan, lack of available prison space may persuade State legislators that laws establishing mandatory minimum sentences should not be enacted. Thus, even the legislative process is affected. It is not surprising, therefore, that a recent study done in Massachusetts indicates a shortage of prison capacity in that State "is the critical variable affecting the ability of the system to lower crime rates * *

Mr. President, our States have begun, with the full support of their citizens, a war on crime. The Congress has lent its support to this effort in the past, but it is now clear that more must be done. The war on crime has been escalated to the point where State and local resources are taxed to the breaking point, particularly with regard to the construction of correctional facilities. It is time that the States receive some help. My bill goes a long way toward providing that help.

I ask unanimous consent that the text of my bill and several articles relevant to this subject be printed in the RECORD following my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1245

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act be cited as the "Corrections Construction and Program Development Act of 1977"

TITLE I-FINDINGS AND DECLARATION OF PURPOSE

DECLARATIONS AND PURPOSE

Sec. 101. (a) The Congress hereby finds

(1) Overcrowded conditions in State, counand local prisons and jails have reached crisis proportions;

Understaffed and overcrowded prison and jail facilities are unable to provide proper security and safety for both prisons and staff:

(3) Existing rehabilitation, legal, recreation, medical, and other program services provided by prisons, jails, and other correctional institutions and facilities are inadequate to meet the needs of accused or convicted of-

(4) State and local governments do not have the financial resources needed to respond to the increasing need of the correctional system for appropriated institutional and non-institutional facilities and

services for accused and convicted criminal offenders; and

(5) These conditions constitute a growing threat to the national welfare requiring im-mediate action by the Federal Government to assist State and local governments.

(b) Congress finds further that the continued development of community-based correctional facilities and programs is essential to the development of an enlightened and progressive correctional system.

SEC. 102. It is, therefore, the purpose of this Act to provide additional resources to States and local governments for the con-struction, acquisition, and renovation of correctional institutions and facilities and for the development and improvement of correctional programs and practices within such institutions and facilities.

DEFINITIONS

SEC. 103. As used in this Act-

(a) "Construction" means the erection, acquisition, expansion, or repair (but not including minor remodeling or minor repairs) of new or existing buildings or other physical facilities, and the acquisition or installation of initial equipment therefor.

The term "correctional institution or facility" means any place for the confinement or rehabilitation of juvenile offenders or individuals charged with or convicted of

criminal offenses.

TITLE II-SUPPLEMENTAL GRANT PRO-GRAM UNDER PART E OF CRIME CON-TROL ACT

SEC. 201. The Law Enforcement Assistance Administration (Administration) established under Title I, Section 101, of the Omnibus Crime Control and Safe Streets Act of 1968 (Crime Control Act) is authorized, pursuant to the terms of this Act, to award a supplemental grant to any State, through the State planning agency established pursuant to the Crime Control Act, that submits an approved application for funding under Part

Section 452 of such Act. SEC. 202. (a) Any State desiring to receive a supplemental grant under this Act for any fiscal year shall submit an application in such form and on such date as established by the Administration. The application submitted must be consistent with the purpose of this Act, the State's approved applica-tion for Part E Crime Control Act funding, and any additional terms and conditions established by the Administration consistent with the conditions for funding established in Part E, Section 453 of such Act.

(b) At least 75 per centum of the funds allocated under this title to a State for any fiscal year must be used for the construction, acquisition, and renovation of correctional institutions and facilities, the balance to be used for the improvement of correctional programs and practices within such institutions and facilities.

SEC. 203. (a) The funds appropriated each fiscal year to make grants under this title shall be allocated by the Administration among the States according to their respective populations for supplemental grants to State planning agencies. Any grant of funds available under this title may be up to 75 per centum of the cost of the program or project for which such grant is made.

(b) If the Administration determines, on the basis of information available to it during any fiscal year, that a portion of the funds allocated to a State for that fiscal year for supplemental grants to the State planning agency of the State will not be required by the State, or that the State will be unable to qualify to receive any portion of the funds under the requirements of this title, that portion shall be available for reallocation to participating States in the discretion of the Administration.

SEC. 204. There are authorized to be appropriated for the purpose of carrying out this title not to exceed \$150,000,000 for the fiscal year ending on September 30, 1978, and

\$350,000,000 for the fiscal year ending on September 30, 1979. Funds appropriated for any fiscal year may remain available until expended.

[From the Detroit News, Mar. 3, 1977]

JACKSON A "JUNGLE"—OVERCROWDING SHOWS

NEED FOR MORE PRISON CAPACITY

It is not true that the inmates run Jackson State Prison. After all, as Warden Charles Egeler says, "We have the guns."

But it is true that Jackson is a barred jungle—a monstrosity, a crime school. Prisoners are mugged for their scrip, stabbed, homosexually assaulted and gang-raped.

Prisoners escaping felonious assault have a deep psychological problem: fear. They are at the mercy of the prison population, fearful of their safety and subject to intense pressure.

Even worse, nothing can be done about it immediately. Jackson State Prison is dreadfully overcrowded.

Its inmate population stood Tuesday at 5,693—693 over capacity and about 2,693 more than is healthy.

The docket-clearing crash program in Detroit's Recorder's Court is expected to produce about 800 more convicts this year. The state has no safe place to put them—safe for society and safe for themselves.

With just 120 officers, the jail must rely on cooperation of the "residents," as prison signs euphemistically refer to the prisoners.

This means that the prisoners, in a sense, do run the jail. Traffic in dope and crime is unstoppable.

Again as Warden Egeler says, "It would take one officer for each prisoner" to do anything about it.

That cost would be impossibly prohibitive. But state citizens must realize that more jails are needed. People must be willing to pay the price to increase jail capacity.

We have urged the Legislature to convert the J. L. Hudson warehouse in Detroit to a Detroit State Prison. We have urged the voters to support a \$439 million bonding issue in 1978 for new maximum security

People can't have it both ways: a toughening attitude on crime to protect society and no place to put felons.

Paul Rosenbaum, chairman of the House Judiciary Committee, doesn't exaggerate when he says Jackson is "a time bomb."

A riot in 1952, in which 11 guards were taken hostage, resulted in the death of one convict and the wounding of four others in gunfire. Damage reached \$2.5 million.

A visitor to Jackson State Prison becomes convinced that it could happen again.

A prison psychiatric ward is so dingy, so squalid, that it makes a dog kennel look like a more desirable place for humans to live. Some prison cells, as tiny as six feet by eight feet exude gloom

Psychologists have documented the aggressions of overcrowded rats in a cage.

Jackson State Prison is not just grim. It is inhuman. The people of Michigan should not tolerate that,

[From the Detroit Free Press, Feb. 14, 1977]

The State prison system will be the next to feel the pressure as Recorder's Court brings its docket under control. As the court's wheels turn faster there will be a rapid flow of convicted prisoners into the corrections system.

The prisons already are overcrowded, with 12,700 inmates. (About 40 percent were sentenced in Wayne County, most of them in Recorder's Court.) The prison population has been rising rapidly, and immediate steps must be taken to avoid further dangerous prison congestion of the kind that already exists.

The only major all-new prison to be added to the system in recent years is the recently

opened Muskegon Correctional Facility, with 600 beds. The old Ionia state hospital has been converted into Riverside Correctional Facility, and a new prison at Ypsilanti is to be completed next year. But these will not suffice if the number of prisoners continues to grow at the present rate.

There is every reason to believe the state will need thousands of new places in prison during the next few years. A law mandating two-year prison sentences for persons committing crimes while in the possession of a gun, as well as prospective changes in other sentencing laws, seems certain to contribute to that result.

If we are serious about tougher criminal laws, we must get serious about additional prisons. Yet so far there has been much more rhetoric than willingness to pay the bills.

The Legislature must, immediately move toward more prison construction, adaptation and renovation. The fastest approach would be through general appropriations. But it seems likely that we also will need a substantial state bond issue for prisons.

The Legislature also must begin to move toward a sensible long-term plan to improve the workings of the whole criminal justice system. We hope this will become evident to the House Judiciary Committee, chaired by Rep. Paul Rosenbaum, D-Battle Creek, when it visits Recorder's Court on Feb. 28. That court has many lessons to teach us.

By Mr. PROXMIRE:

S. 1246. A bill to amend the Housing and Community Development Act of 1974 to provide a more equitable allocation of funds, to authorize a fuller range of community development activities, to establish an urban development action grant program for severely distressed cities; to amend section 312 of the Housing Act of 1964, as amended; to amend section 701 of the Housing Act of 1954, as amended; and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

Mr. PROXMIRE. Mr. President, I am introducing today the Community Development Amendments of 1977, the administration's proposals for reauthorizing the community development program administered by the Department of Housing and Urban Development. The program, enacted in 1974 as title I of the Housing and Community Development Act, has been popular with communities throughout the country, providing them with block grants for renewing and developing housing and community facilities.

The bill would provide for a 3-year reauthorization with increased funding, a significant change in the method by which funds are allocated among communities, and several new program initiatives. The Secretary of HUD is to be congratulated for making these major new proposals. In particular, the proposed optional formula which directs community development funds to older communities which have the greatest development needs is likely to gain widespread support.

In introducing this bill I have some reservations. I am concerned about the proposal for urban action grants and the proposal to include economic development as a specific eligible activity. Nor am I entirely satisfied with the funding proposals for smaller cities. I believe these proposals may require additional clarification and refinement, particularly if Federal assistance is to be targeted to

benefit low and moderate income persons and to eliminate slums and blight, which are major objectives of the block grant program.

The Committee on Banking, Housing, and Urban Affairs held oversight hearings on the program last summer, and began to consider reauthorizing proposals last month. Additional hearings are scheduled later this month, at which time the Secretary of HUD will present new testimony regarding the administration's proposals. I anticipate that the committee will mark up the legislation in early May, and recommend reauthorization of the community development program along the lines proposed in the bill I have introduced today.

By Mr. METCALF (for himself and Mr. Jackson):

S. 1248. A bill to provide for the exploration for and development of federally owned minerals, and for other purposes; to the Committee on Energy and Natural Resources.

FEDERAL LAND MINING ACT OF 1977

Mr. METCALF. Mr. President, revision of the mining law of 1872, which governs development of so-called hardrock minerals on Federal lands has been urged by many people for many years. Despite this urging, there has been almost no action by either the Senate or the House of Representatives. During the last 4 years, there have been a few days of hearings, but no bill has even been marked up.

Now, however, it appears that the time is ripe for action. Chairman UDALL of the House Interior Committee has indicated that he will give mining law reform a high priority. Secretary of the Interior Andrus has publicly agreed. I have long held this view.

What is the reason for concern about the mining law of 1872?

Mining often involves the destruction of other resources to some extent. In many cases, timber must be removed, wildlife habitat must be disturbed, natural waterways must be changed, overburden must be set aside, wastes must be disposed of, roads must be pushed through undisturbed areas, water must be diverted and may become contaminated, and holes must be drilled. These and other activities are essential to obtain minerals needed by the economy.

Sacrifice of some resources to realize others is not limited to mining. It is characteristic of any intensive use. However, the mining law of 1872 fails to have internal controls for weighing the value of these sacrifices. It contains no general requirement for consideration of the other resource values of the lands involved.

The result has been a continuing battle among miners, prospectors, other user groups, administrators, legislators, and the general public. Attempts are made to resolve these incompatible conflicts often simply by barring mineral or nonmineral activity from specific areas. There are also, as a result, a host of special laws, or laws for special situations, governing mining in different types of Federal areas—some national parks, national recreational areas, power site reserves, wilderness areas, and others. It is increasingly apparent that the United

States must develop its domestic mineral resources. Public land mineral development must take place within the context of the wide variety of demands being made on Federal lands. This requires accommodations among conflicting uses. It is, and will continue to be, impossible to make everybody happy all the time.

We need to be sure that our policies and procedures assure that this development is as compatible as possible with other uses and values of these lands. How

can we achieve this goal?

There is a critical need for comprehensive land use planning. Most people are willing to compromise and allow "undesirable" uses such as mining. However, they do not see the tradeoffs in the case-by-case decisionmaking process. Comprehensive planning displays the alternatives.

Environmental protection must be built in all plans and actions. We must not permit any degradation that can be avoided and we must minimize all un-

avoidable degradation.

This is the critical weakness of the 1872 mining law. It puts the land use decision entirely in the hands of the miner. He decides that mineral development is the best use of public lands regardless of other values, with no rehabilitation, and no evaluation of alternatives.

We must modify the basic principle of the 1872 mining law that mineral development is always the highest use of land. Existence of minerals in a given tract of land does not necessarily mean that mineral development is the best use.

In sum, we must seek to balance mineral development with other resource values and other potential land uses. For years, the scales have been tipped in favor of the mineral developer.

I believe that the general public will accept the balance principle, with one exception. This is, when in doubt, err on the side of the environment. Deferred development almost always can take place in the future, but environmental damage may be difficult if not impossible to repair.

The mineral developer wants:

First, opportunity to secure public resources; second, continuity in terms of conditions; third, security in tenure; fourth, compensation if use is terminated; fifth, reasonable prices; and sixth, minimum controls.

I believe that the public and the Congress can support these principles but

only within the framework of:

First. The established principles of multiple-use management, sustained resource yield, and environmental protection:

Second. Comprehensive land use planning:

Third. Public participation and intergovernmental coordination in development and implementation of public land management plans and programs;

Fourth. Full consideration of nonconsumptive uses; and

Fifth. Receipt of fair market value for public resources.

Under our Constitution the Congress has a special responsibility for the Federal lands. Congress must establish policies and standards to assure that mineral resource development on Federal lands is consistent with the basic policy that the Federal lands are vital national resource reserves held in trust by the Federal Government for all the people.

Mr. President, I feel certain that Congress can establish laws that will permit compatible mineral development in a manner that is practical, fair, and just. At stake is the management of the public lands in the public interest, which includes a sound, vigorous mining indus-

In order to begin this process, I am introducing today the Federal Land Mining Act of 1977. It is designed to achieve the objective I have outlined. The bill would establish a complete new legal system for prospecting for and developing "hardrock" minerals on both public-domain and acquired lands. I believe it will meet the needs of both the Government and the industry; provide for congressional control of policies and programs with executive flexibility for day-to-day administration; encourage mineral prospecting and development with sound planning and adequate environmental controls; and harmonize mineral development on Federal lands with other congressionally authorized conservation and land management programs.

I intend to ask the Carter administration to submit its views on S. 1248 by June 15. I hope to receive the views of other interested parties by that time also.

The Subcommittee on Public Lands and Resources will hold public hearings on the bill shortly after that date.

I ask unanimous consent that the text of the bill together with a brief summary of the manner in which it treats many of the most significant policy issues involved be printed in the Record.

There being no objection, the material was ordered to be printed in the RECORD,

as follows:

S. 1248

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TABLE OF CONTENTS

TITLE I—SHORT TITLE, POLICY, DEFINITIONS

Sec. 101. Short title.

Sec. 401. Pending mining claims. Sec. 402. Disposition of revenues.

TITLE V—EFFECT ON EXISTING LAW

Sec. 501. Repeals and revisions. Sec. 502. Supersessions.

TITLE I—SHORT TITLE, POLICY, DEFINITIONS

SHORT TITLE

SEC. 101. This Act may be cited as the "Federal Land Mining Act of 1977".

DECLARATION OF POLICY

SEC. 102. The Congress declares that it is the policy of the United States that—

(a) to the extent consistent with statutory objectives and congressional policies governing federally owned lands, the mineral resources of such lands be systematically inventoried for possible utilization as national needs require;

(b) to the extent consistent with statutory objectives and congressional policies governing federally owned lands, economic deposits of minerals in such lands be made available to the national economy in furtherance of the Mining and Minerals Policy Act of 1970

(84 Stat. 1876; 30 U.S.C. 21a);
(c) the prospecting for and exploration and development of federally owned mineral deposits be managed in a manner that will protect, to the fullest extent possible, the quality of scientific, scenic, historical, ecological, environmental, air, atmospheric, water resource, and archeological values, and the quality of life in communities impacted by such mineral activities; and that will avoid mineral development where adverse effects on such values and life would result in unacceptable irremediable losses:

(d) to the fullest feasible extent, the traditional role of the small miner in the development of American mineral deposits be

preserved;

 (e) except in circumstances which make it not feasible, private enterprise be utilized for the prospecting for and exploration and development of federally owned mineral deposits;

(f) the Congress reserve to itself decisions concerning the inventory and utilization of mineral deposits in lands in the National Wilderness Preservation System and in other systems where mineral development is barred by statute; and the Secretary of the Interior be granted the authority and responsibility for the inventory and utilization of other federally owned mineral deposits, subject to the provisions of applicable law;

(g) federally owned mineral deposits be managed in a manner as to avoid monopolies and to promote competition in the discovery, extraction, and distribution of minerals;

(h) unless otherwise provided by statute, federally owned mineral deposits be disposed of at their fair market value; and where the United States finances prospecting or exploration, it be reimbursed by the developers of mineral deposits benefiting from such prospecting and exploration to the extent that the Federal expenditures added to the value of the deposits; and

(i) the prospecting for and exploration and development of federally owned mineral deposits be managed in a manner that will protect life and property and will result in efficient and economical prospecting, exploration, and development operations and efficient, economical, and full utilization of

such deposits.

DEFINITIONS

Sec. 103. As used in this Act-

(a) the word "Secretary" means the Secretary of the Interior unless the context indicates otherwise:

(b) the term "mineral deposits" means all occurrences of minerals owned by the United States other than those which are subject to disposal under the Mineral Leasing Act of

1920, as amended and supplemented (41 Stat. 437; 30 U.S.C. 181 et seq.); the Act of June 8, 1926 (44 Stat. 710); and the Acquired Lands Leasing Act of 1947, as amended (61 Stat. 913; 30 U.S.C. 351 et seq.);
(c) the term "Federal lands" means all fed-

erally owned lands in the fifty States except those held for the benefit of Indians, Aleuts,

and Eskimos;

(d) the term "closed Federal lands" means Federal lands in the National Wilderness Preservation System and other Federal lands, mineral development of which the Congress has prohibited or may hereafter prohibit;

(e) the term "open Federal lands" means all Federal lands other than closed Federal

lands:

- (f) the term "agency lands" means Federal lands which are administered by the head of a department or agency other than the Secretary;
- (g) the term "workable mineral deposits" means mineral deposits, the characteristics of which the Secretary determines, through geological inference, testing, or other means of determination, are sufficiently known to justify efforts for their economic develop-
- (h) the term "potential mineral deposits" means mineral deposits which the Secretary has technical reasons for believing exist in possibly economic concentrations which existing information does not permit him to conclude that efforts to develop them are justified:

(i) the term "hidden mineral deposits" means mineral deposits, the location and characteristics of which are unknown to the

Secretary:

(j) the word "prospecting" means the utilization of methods and techniques in the search for hidden mineral deposits, prospecting ceasing with respect to any mineral deposit with its identification as a potential mineral deposit;

(k) the word "exploration" means the utilization of methods and techniques for the determination of the characteristics of a potential mineral deposit, exploration ceasing with respect to any mineral deposit with its identification as a workable mineral deposit;

the word "development" means the (1) activities necessary to convert a workable mineral deposit into a mine producing minerals for commercial, industrial, and domestic use;

the term "surface estate" means (m) interests in lands other than interests in

mineral deposits therein;

(n) the term "small miner" means an individual citizen while personally engaged in prospecting for hidden mineral deposits an independent entrepreneur or 28 2 member of an association of individual citizens all of whom personally engage in such prospecting or as an owner of a corporation

wholly owned by such individuals;

- the term "privilege of possession" means the right of a prospector under this Act to continue prospecting operations on an area of Federal lands so long as he complies with the terms of this Act and regulations issued thereunder and pursues his prospecting with diligence as defined by the Secretary in his regulations and the lands remain open to prospecting under the terms of this Act:
- (p) the term "right of possession" means an exclusive privilege of possession as against other prospectors based on priority and unbroken continuance of prospecting operations:
- (q) the word "department" means a unit of the executive branch of the Federal Government which is headed by a member of the President's Cabinet and the "agency" means a unit of the Federal Government which is not under the jurisdiction of a head of a department;

- (r) the word "rental" means compensation to a landowner for the use of the surface estate of his lands:
- (s) the word "royalty" means compensation to a landlord representing his share of the value of minerals produced during a production year or other period of time from a mineral deposit he owns, such royalty being calculated as a percentage of value or a fixed amount:
- (t) the word "bonus" means compensation to a landlord representing the present value of his share of the value of his mineral deposit which will not be paid to him in the form of royalties; and

(u) the term "Mining Law of 1872" means the Act of May 10, 1872, as amended and supplemented (17 Stat. 91; Revised Statutes 2319 et seq.; 30 U.S.C. 22 et seq.).

TITLE II-GENERAL PROVISIONS

INVENTORIES AND SURVEYS

SEC. 201. (a) The Secretary shall prepare, and maintain on a continuing basis, an inventory of hidden, potential, and workable federally owned mineral deposits. The inventory shall be kept current to reflect changes in inventory data and economic, social, and environmental conditions relating to mineral deposits. The inventory shall based on the best data available to the with appropriate utilization geological inference, statistical probabilities, other acceptable estimating techniques, and data secured from surveys authorized by subsection (b) of this section.

(b) Within two years after the date of approval of this Act and every ten years thereafter, the Secretary shall submit to the President of the Senate and to the Speaker of the House of Representatives a ten-year program for mineral surveys of the Federal lands. The program shall show separately plans for mineral surveys of lands in each of the following systems: National Wilderness Preservation System, National Wild and Scenic Rivers System, National System of Trails, National Wildlife Refuge System, National Forest System, and National Park System. The program for other Federal lands shall be shown separately by the department or agency which administers the lands. The plan for each System, department, and agency shall take into consideration the statutory goals and objectives of each System, department, and agency; shall include only those techniques and procedures which will not be inconsistent with those goals and objectives; shall take into consideration inventory information that will be available from private activities and other sources; and shall reply to the fullest extent the Secretary deems feasible on the private mineral industry for survey operations. Except for the mineral surveys authorized on the date of approval of this Act for lands in the National Wilderness Preservation System, the Secretary shall initiate no surveys pursuant this section without prior authorization by Act of the Congress.

PLANNING

SEC. 202. (a) The Secretary shall, with public involvement and consistent with the policies, objectives, terms, and conditions of this Act, develop, maintain, and, when appropriate, revise plans for authorizing under the terms of this Act prospecting for and exploration and development of federally owned mineral deposits. In the development and revision of such plans, the Secretary shall, to the fullest extent he finds practical, comply with the principle and utilize the techniques and procedures specified in section 202 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2743, 2747; 43 U.S.C. 1712).

(b) Where the Secretary has authority under this Act to implement plans prepared pursuant to this section, the plans shall include an implementation schedule. Where provisions of statutes prevent implementation, the Secretary shall submit a report to the President of the Senate and the Speaker of the House of Representatives with such recommendations for legislation as he deems appropriate.

APPLICABLE LANDS

Sec. 203. (a) The provisions of this Act which authorize the Secretary to dispose of federally owned mineral deposits shall apply to all such deposits except those in (i) lands in the National Wilderness Preservation System, (ii) lands for which appropriations under the Mining Law of 1872 were prohibited by Act of the Congress prior to the date of approval of this Act and any other lands acquired to be administered with such lands, and (iii) lands which may hereafter be excluded from the provisions of this Act of the

(b) The provisions of section 401(b) this Act relating to claimants under the Mining Law of 1872 who had only pedis possessio as of January 1, 1977, shall not apply to lands in the National Wilderness Preservation

CLASSIFICATION OF MINERAL DEPOSITS

SEC. 204. Where there is a bona fide question whether a mineral deposit is subject to disposal under the terms of this Act or under the terms of some other Act of the Congress. the Secretary shall establish by regulation which Act shall apply. In the absence of a determination by regulation with respect to such a deposit discovered by an authorized permittee or lessee or a small miner who would be entitled to a lease if the mineral deposit were clearly subject to this Act, the Secretary shall authorize such permittee, lessee, or small miner to develop the deposit under the terms of the Act under which the discovery was made unless equitable or contractual considerations require him to make some other arrangements.

COORDINATION

SEC. 205. (a) The Secretary may authorize prospecting, exploration, and development of agency lands only with the consent of, and subject to the terms and conditions specified by, the head of the department or agency which administers the lands. Such head shall not withhold his consent nor shall he specify any terms and conditions unless he finds that such actions are necessary to enable him to manage the agency lands in accordance with statutory guidelines, standards, and criteria governing the administration of the lands.

(b) When the Secretary authorizes prospecting, exploration, and development of federally owned mineral deposits in lands, the surface estate of which does not belong to the United States, the Secretary shall provide, to the extent he finds feasible, for the protection and rehabilitation of the surface owners' interests in the lands to the same extent as he would have if the surface estate were owned by the United States and for compensation by the mineral operator for losses and damages suffered by the surface owners as a result of mineral operations. In the exercise of his responsibilities under this subsection, the Secretary may require the mineral operator to resolve any differences with the surface owner concerning compensation for losses and damages by negotiation or, failing there, by litigation in a court of competent jurisdiction.

(c) Operators authorized under the terms of this Act to prospect for, explore, or develop mineral deposits shall comply with State standards for public health and safety, environmental protection and rehabilitation, and conduct of prospecting, exploration, and development activities if those standards are more stringent than applicable Federal standards.

(d) The Secretary shall not authorize mineral operations pursuant to this Act which would be inconsistent with State or local zoning or land use regulations except when he finds that authorization would be in the public interest and consistent with the policies of this Act.

APPEAL PROCEDURES

SEC. 206. The Secretary shall establish by regulation procedures for prompt review and decision by him, or by another official in the Office of the Secretary appointed by the President by and with the advice and consent of the Senate, of appeals from decisions of officers to whom he delegates authority to take actions under the provisions of this Act. The procedures shall include, but not be limited to, provisions for accelerated review of appeals where delays could result in or continue significant financial, property, or environmental losses or in danger to public health and safety.

RULES AND REGULATIONS

SEC. 207. The Secretary shall promulgate rules and regulations to carry out the provisions of this Act. The promulgation of such rules and regulations shall be governed by the provisions of chapter 5 of title 5 of the United States Code without regard to paragraph 2 of subsection (a) of section 553. Prior to the promulgation of such rules and regulations, the Secretary or his delegate may issue leases or make sales of mineral deposits under this Act under any existing rules and regulations relating to mineral leasing and sales of mineral materials in Federal lands to the extent practical and subject to the terms and conditions of this Act.

ENFORCEMENT OF RULES AND REGULATIONS

Sec. 208. (a) Any person who knowingly and willfully violates any regulation issued by the Secretary pursuant to this Act shall be fined no more than \$10,000 or imprisoned no more than twelve months or both. Any person who fails to comply with such regulations for a period of fifteen days or more after receiving notice from the Secretary to correct such failure shall be liable for a civil penalty of not more than \$1,000 for each day of continuance of such failure after said fifteen days. Any person charged with the violation of such regulations may be tried and sentenced by any United States magistrate designated for that purpose by the court by which he was appointed, in the same manner and subject to the same conditions as provided for in section 3401 of title 18 of the United States Code.

(b) In the event of noncompliance with any rule or regulation of the Secretary issued pursuant to this Act or with any term or condition of a lease or other contract, the Secretary may suspend or terminate any rights granted by contracts under this Act after due notice to the holder of the contract and appropriate administrative proceedings pursuant to section 554 of title 5 of the United States Code. If the Secretary determines that an immediate temporary suspension of activities is necessary to protect the public health and safety or the vironment, he may abate such activities prior to an administrative proceeding. Prior to commencing any proceeding to suspend or terminate a contract, the Secretary shall give written notice to the holder of the contract of the grounds for such action and shall give him at least fifteen days in which to correct the noncompliance.

(c) At the request of the Secretary, the Attorney General may institute a civil action in any United States district court for an injunction or other appropriate order to prevent any person from utilizing Federal lands and mineral deposits in violation of regulations issued by the Secretary under this Act.

(d) The Secretary may require a bond or other surety to enforce any of the requirements of this Act or regulations issued under it.

(e) The use, occupancy, or development of Federal lands and Federal mineral de-

posits contrary to any regulation issued by the Secretary pursuant to this Act or contrary to any order issued pursuant to any such regulation is unlawful and prohibited.

DELEGATIONS OF AUTHORITY

SEC. 209. (a) Subject to such terms and conditions he finds necessary to assure compliance with the provisions of this Act, the Secretary may delegate to the head of the Federal department or agency which administers lands subject to prospecting, exploration, and development under the terms of this Act, such inspection, enforcement, and environmental protection and rehabilitation functions with respect to mineral activities on the lands he administers as the Secretary determines can be effectively performed by such head.

(b) The Secretary may delegate his authority to make sales and donations under section 302 of this Act to the heads of departments and agencies with respect to mineral deposits in lands under their administration.

(c) Nothing in this section shall be construed as diminishing any authority of the Secretary to delegate authority to take actions under this Act to his subordinates in the Department of the Interior.

FAIR MARKET VALUE

SEC. 210. (a) The Secretary may authorize use of Federal lands and dispose of federally owned mineral deposits under this Act only at their fair market value. Except for disposal to third parties, fair market value shall not include value added to mineral deposits by authorized mineral prospectors, explorers, and developers.

(b) Compensation for fair market value may, in the discretion of the Secretary, take the form of cash rentals, royalties, and bonuses; or contributions of land developments or improvements of value to Federal land management programs; or a share of physical production where the minerals produced are needed by departments and agencies for their authorized programs; or any combination of such payments or contributions.

ENVIRONMENTAL AND CONSERVATION PROCEDURES

SEC. 211. (a) The Secretary shall by regulation establish standards and procedures for achieving the policies and objectives of this Act with respect to (i) the protection and rehabilitation of the environment and natural resources, (ii) the protection of life and property, and (iii) achievement of efficient and economical operations and utilization of Federal mineral deposits.

(b) The Secretary shall include in regulations issued pursuant to subsection (a) of this section (i) criteria for determination when prospecting, exploration, and development plans and environmental protection and rehabilitation plans will be required in order to facilitate achievement of the policies and objectives of this Act and (ii) standards for the preparation and revision of such plans.

(c) The Secretary will design the regulations required by subsection (a) of this section to achieve the following specific objectives, among such others, which he may find consistent with this Act: (1) to return mined areas, to the extent, and as soon as, feasible, to their approximate original contour or to a contour similarly appropriate considering the surrounding topography and possible future uses of the area; (ii) to avoid to the fullest extent feasible the deposition of overburden and spoil material on the undisturbed or natural surface within or adjacent to the mined area; (iii) to the extent feasible, to conduct rehabilitation operations concurrently with mining operations; (iv) to maintain stability of soil conditions and to manage water in order to prevent landslides, soil erosion, and water pollution; (v)

to control drainage of acid, mineralized, and toxic substances; (vi) to revegetate disturbed areas, as soon as feasible, with the native types of vegetation or appropriately similar types; and (vii) to control subsidence and other possible adverse impacts of mining activities.

RESTRAINT OF TRADE

Sec. 212. The Secretary, in consultation with the Attorney General of the United States, shall by regulation establish standards, criteria, methods, and procedures for preventing and terminating acquisitions of federally owned mineral deposits which could lead to the restraint of trade in the production and distribution of minerals. The Secretary may utilize any methods and procedures permissible under due process to en-force standards and criteria established by regulation, including, but not limited to, limitations on the acreage or volume of holdings of Federal mineral deposits, due diligence performance requirements, and contract provisions for sharing operations with other mineral producers or for allocation of production to industrial users. The Attorney General shall, at such times he deems ap-propriate to insure the enforcement of this section and the antitrust laws of the United States, audit the operations of the Secretary under this Act and advise the Secretary of any changes in standards, criteria, methods, procedures, and practices the Attorney General may find appropriate with respect to his responsibilities under this section.

SUSPENSIONS AND WAIVERS

Sec. 213. (a) For the purpose of achieving optimum recovery of minerals or in the interest of conservation of natural resources or protection of the environment, the Secretary may temporarily suspend operations or production or both on any mineral operation authorized by this Act. Suspension proceedings shall be subject to the procedures prescribed in subsection (b) of section 208 of this Act. The Secretary shall make such adjustments in the terms and conditions of the contract governing the suspended operation as he deems appropriate to compensate the mineral operator for any losses sustained by virtue of the suspension.

(b) The Secretary may suspend, waive, or reduce rentals or royalties in contracts issued pursuant to this Act wherever in his judgment it is necessary to do so in order to promote mineral development or wherever mineral operations cannot be successfully conducted under the terms and conditions of such contracts: Provided, That the duration of the waivers and the amounts of the reductions are consistent with the policies of this Act for fair market value return to the United States.

UNITIZATION

Sec. 214. Leases issued under this Act may, in the interest of conservation of natural resources or protection of the environment, be made subject, by the Secretary or with his approval, to unitized exploration, development, and production under regulations issued by the Secretary. Such regulations shall include, but not be limited, to, provisions insuring that any unitization orders by the Secretary shall not deprive any lessee of the opportunity to secure the benefits of any rights granted by his lease.

MULTIPLE LEASES

SEC. 215. The issuance of a lease under this Act for a particular mineral deposit shall not preclude issuance of leases covering other mineral deposits in the same lands, where the Secretary considers that they are separately mineable or extractable and the operations with respect to such minerals will not unreasonably interfere with the lessee who has prior rights.

ASSOCIATED OR RELATED MINERAL DEPOSITS Sec. 216. In leases issued pursuant to this Act, the Secretary may allow or, where economically feasible in his judgment, require the lessee to extract and dispose of all associated and related minerals under the terms of this Act, if they are not subject to a lease issued to a different lessee.

TITLE III—DISPOSAL OF MINERAL DEPOSITS

SMALL MINERS

SEC. 301. (a) To encourage prospecting for hidden mineral deposits by small miners, the Secretary shall establish by regulation standards and criteria for—

(1) designation of areas of open Federal lands which contain geological evidence favorable to the existence of hidden mineral deposits and which can be made subject to prospecting by small miners under the terms of this Act and regulations of the Secretary without significant impairment of statutory objectives for management of Federal lands in such areas:

(2) termination of designations made pursuant to paragraph (1) of this subsection;

(3) determination whether a workable mineral deposit of not more than one hundred and sixty acres can be developed into a profitable producing mine;

(4) determination of the value added to a workable mineral deposit by the prospecting activities of a small miner who discovered the deposit under the provisions of this

section; and

- (5) the types and classes of mineral deposits which are subject to exploration and development leases pursuant to this section. In addition to other mineral deposits which the Secretary may identify in his regulations, he will identify the following as not being subject to exploration and development unthis section: (i) deposits of relatively low unit-value minerals, including, but not limited to, sand, stone, gravel, and rock; (ii) deposits of highly disseminated minerals and other low concentrations of minerals which require disturbance of relatively large areas for recovery of relatively small quantities of minerals; and (iii) deposits in the beds of streams and other bodies of water.
- (b) The Secretary by regulation shall establish a registry of small miners. The Secretary shall issue a certificate of registry to individuals who file for registry under such regulations and who state that they qualify as small miners under this Act and the regu lations issued thereunder. The registration shall be for such period as the Secretary by regulation shall specify but not less than five years. The Secretary shall send to each registered small miner at his address of record with the registry copies of rules and regulations applicable to mineral operations regulations applicable of Secretary may rethe payment of a registration which shall not exceed the fair share of direct costs of registration and services thereunder. Failure to pay fees shall not be a basis for refusal to register a small miner but may be a basis for refusal to send him copies of rules and regulations. Upon conviction in a court of competent jurisdiction of knowingly and willfully concealing the fact that was not a small miner under the terms of this Act, a registered individual shall be subject to forfeiture of all interests secured under this Act in addition to the penalties of law governing false statements to officers of the United States.
- (c) The Secretary shall by regulation establish the terms and conditions for prospecting pursuant to the authority of this section. Such terms and conditions shall be consistent with the provisions of this Act and shall be designed to further its goals and objectives.
- (d) The Secretary shall designate smallminer prospecting areas under this section to the fullest extent he finds feasible under the standards and criteria of this Act and shall terminate such designations whenever

he finds that continuance would be inconsistent with this Act.

(e) Registry under this section shall authorize a small miner to enter upon Federal lands designated under this section and to engage in prospecting operations thereupon. No permit shall be required for such prospecting; neither shall disclosure be required as to the specific location of the prospecting operations. Notwithstanding the second sentence of this subsection and for the purpose of furthering communication between prospectors and officers responsible for administering Federal lands, the Secretary may require prospectors (i) to give notice to appropriate Federal officers of entry in their general area of jurisdiction for the purpose of prospecting and (ii) to disclose the equipment and methods they will use in prospecting; and for the purpose of assisting pros-pectors in protecting their privilege of possession, the Secretary may authorize prospectors to identify the boundaries of their prospecting areas on the ground and in the records of appropriate offices. Disputes between and among prospectors as to who has the right of possession of a particular tract of Federal lands shall be decided by agreement among the parties in issue or by judgment of a non-Federal court of competent

(f) Discovery of a potential mineral deposit by a prospector under this section shall entitle the discoverer to an exploration lease under subsection (c) of section 303 of this act.

(g) Discovery of a workable mineral deposit by a prospector under this section or a holder of an exploration lease earned under the terms of this section shall entitle the prospector or holder to a development lease or leases under subsection (d) of section 303 of this Act, each of such leases not to exceed one hundred and sixty acres of leased lands: Provided. That the deposits covered by any lease issued, in the judgment of the Secretary based on technical and economic analyses, can be separately developed into a profitable mine. Deposits which do not qualify for a lease under the proviso of this subsection may be leased or sold by the Secretary under other provisions of this Act, and if he does so within twenty years after their discovery by a prospector under this section, the discoverer or his successors in interest shall be entitled to a share of the Federal revenues from such deposit to the extent of the value added to the deposit by the discoverer through his prospecting and exploration operations.

QUANTITY SALES AND FREE USE

SEC. 302. (a) Whenever the Secretary finds that it is feasible and economical to dispose of minerals in a workable mineral deposit in predetermined quantities, he may sell such minerals for removal in a fixed period of time and under such terms and conditions as are stated in his notice of sale. Such minerals shall be sold competitively except in situations, specified by the Secretary in his regulations, where values are so low or competitive procedures.

(b) Notwithstanding the provisions of section 210 of this Act, the Secretary may permit (i) departments and agencies and State and local governments for use in connection with authorized governmental activities and (ii) individuals engaging in the hobby collection of minerals or other forms of outdoor recreation to remove minerals subject to the provisions of this Act without charge or for amounts less than fair market value.

MINERAL LEASES

Sec. 303. (a) The Secretary may dispose of any minerals in mineral deposits subject to the provisions of this Act by means of prospecting leases, exploration leases, and development leases.

(b) Prospecting leases may be issued to authorize the search for hidden mineral deposits. Such leases shall recite the terms and conditions, including but not limited to the evidence of mineralization, which will entitle the lessees to exploration leases or development leases. Prospecting leases shall authorize only prospecting operations on the lands, subject to the terms and conditions of the leases, and shall require the payment of annual rentals. Lessees may mine and remove only so much ore and other material from the lands as is needed to evaluate the prospect. Prospecting leases shall be issued for such term of years as the Secretary determines is adequate for prospecting the lands on a diligent basis but for no more than twenty-five years.

(c) Exploration leases may be issued to authorize the testing of potential mineral deposits to determine whether they are workable mineral deposits. Such leases shall recite the terms and conditions, including but not limited to, the evidence of mineral values which will entitle lessees to development leases. Exploration leases shall authorize the operations necessary to evaluate adequately whether the leased deposits can be developed into profitable mines. Such leases shall authorize the mining and removal of ore or other material from the lands in sufficient amounts to test the characteristics of the ore and its susceptibility to economical mineral processing. Such leases shall require the payment of annual rentals and, when the amount of ore removed is substantial, may require royalty payments also. Exploration leases shall be issued for such period of years as the Secretary determines is adequate for exploration of the leased deposits but for no more than fifteen years.

(d) Development leases may be issued to authorize commercial production from workable mineral deposits. Development leases shall be issued for a sufficient period of time to permit the lessee, operating with due diligence, to develop the mine and to dispose of the minerals in the deposits. Such leases shall include a right of renewal or extension for reasonable periods of time where economic conditions, changes in technology, or other factors other than lack of due diligence prevent exhaustion of the deposit prior to the termination of the leases. Development leases shall require the payment of annual rentals

and royalties.

(e) When the Secretary finds that, in connection with any mineral deposit, he can determine in advance the terms and conditions he would include in explanation leases or development leases or both, he may issue prospecting leases with detailed exploration provisions or detailed exploration and development provisions and he may issue exploration leases with detailed development provisions.

(f) Except where lessees earn under the terms of this section or under section 301 of this Act rights to exploration or development leases or both, leases shall be issued only to the highest qualified bidder at a competitive sale. The Secretary shall specify in his notices of sale the basis on which he will determine the highest qualified bidder. He may specify any basis which in his judgment would best achieve the policies and objectives of this Act, including, but not limited to, encouragement of mineral production and receipt of fair market value for federally owned minerals. Bases for competition which the Secretary may adopt include, but are not limited to, amounts of rentals, royalties, or bonuses; amounts or schedules of investments; amounts or schedules of production; or provisions for environmental rehabilitation; or any combination of acceptable bases.

TERMS AND CONDITIONS OF CONTRACTS

Sec. 304. (a) All leases, permits, and other contracts issued pursuant to this Act shall be subject to such terms and conditions as the Secretary determines are needed to carry out the provisions of this Act.

(b) The terms and conditions required by subsection (a) of this section shall include, but not be limited to, terms and conditions requiring holders of contracts, in addition to compliance with other requirements specified by the Secretary, to—

(1) comply with applicable air and water quality standards established by or pursuant to applicable Federal and State law;

(2) comply with State standards for public health and safety; environmental protection and rehabilitation; and siting, construction, operation, and maintenance of facilities and workings, if such standards are more stringent than applicable Federal standards;

(3) permit inspection of contract areas by representatives of the Secretary for the purpose of checking compliance with applicable regulations and terms and conditions; and
(4) disclose to the Secretary (for Govern-

ment use and, to the extent and in a manner that would not injure the interests of the holder and would benefit the United States in the management of its lands and natural resources, for publication) geologic, mineral, and other subsurface information collected or developed by the holder in the course of his operations pursuant to the contract

(c) The terms and conditions required by subsection (a) of this section shall grant holders of contracts the following rights:

(1) as applicable, the rights specified in sections 301, 302, and 303 of this Act;

(2) the right to use so much of the surface of the contract area as may be reasonably required for the actual extraction and removal of minerals subject to the contract and, if the Secretary, or the head of the department or agency which administers the lands, determines that they are available for those purposes, the right to use nearby Federal lands upon payment of fair market rentals and subject to such terms and conditions as the Secretary and such head may prescribe;

(3) subject to the approval of the issuing officer, the right to assign the contract, as to all or part of the lands covered by the contract and as to either a divided or un-divided interest, to any person qualified to hold such a contract. The assigned interest shall be subject to all the terms and conditions of the original contract and to any existing approved plans of operation, protection, and rehabilitation;

(4) with the approval of the Secretary and upon the payment of fair market value, the right to drill for, produce, and use so much water subject to Federal ownership, appropriation, or utilization in lands in the contract area as may be needed in connection with activities under the contract: Provided, That the production and use of such water would not adversely affect the existing rights of other water users, would not have a significant adverse effect on the environment, and would otherwise be consistent with the provisions of this Act and applicable State water law:

(5) the right to surrender a contract, in whole or in part, subject to compliance with such terms and conditions the Secretary deems appropriate under the provisions of this Act; and

(6) a preferred right to purchase, at their

fair market value and subject to such terms and conditions as the Secretary may specify under applicable law, so much of the lands in the contract area as the Secretary determines can and should be sold under such applicable law.

TITLE IV—PENDING MINING CLAIMS; DISPOSITION OF REVENUES

PENDING MINING CLAIMS

SEC. 401. (a) The provisions of this Act shall be subject to valid rights under the Mining Law of 1872 existing as of the date of approval of this Act. Holders of mining claims under the Mining Law of 1872 for which a discovery of valuable minerals required by the law and the rulings thereunder has been exposed to view as of the date of approval of this Act shall be permitted to continue in their possession and utilization of their claims as if the Mining Law of 1872 had not been repealed so long as their claims remain valid under the provisions of that law and the rulings thereunder. Such claimants may secure patents for their claims only if, within three years after the date of approval of this Act, they apply for such a patent or for a development lease for the mineral deposits in the lands under section 303 of this Act. If a claimant elects to obtain a development lease in lieu of his rights under the Mining Law of 1872, the Secretary shall offer the claimant a development lease containing such terms and conditions the Secretary deems equitable in the circumstances. If the claimant finds that the offered terms and conditions are not acceptable, the Secretary shall consider his election as an application for patent. If the Secretary rejects an application for patent filed pursuant to this subsection on the grounds that the claim is not valid under the Mining Law of 1872, he shall consider the application for patent as an application under subsection (b) of this section.

(b) Holders of mining claims under the Mining Law of 1872 who, on January 1, 1977, had only pedis possessio under that law may continue in possession of their claims for a period of three years after the date of approval of this Act: Provided. That the lands remain open to mining, the claimants give notice to the Secretary within one year after the date of approval of this Act that they intend to continue such possession, and that they continue prospecting operations with due diligence and in compliance with regulations issued under the Federal Land Policy and Management Act of 1976 (90 Stat. 2743; 43 U.S.C. 1701 et seq.) or other applicable law. Within three years after the date of approval of this Act, the Secretary shall, upon application therefor, offer to such claimants a prospecting, exploration, or development lease under section 303 of this Act if he finds, under regulations establishing standards and criteria therefor, that the claimant and his predecessors in interest had sufficient investment in the claim to warrant such an offer on the basis of equity. The Secretary shall take into account the same equitable considerations in determining the terms and conditions of the leases.

DISPOSITION OF REVENUES

SEC. 402. (a) Fifty per centum of all money received, except as provided in subsection (b) of this section and except money paid to third parties pursuant to subsection (g) of section 304 of this Act, and 50 per centum of the cash value of all services, products, and installations received from sales, bonuses, royalties, and rentals of lands and mineral deposits under the provisions of this Act, shall be paid by the Secretary of the Treasury as soon as practicable after March 31 and September 30 of each year to the State within the boundaries of which the lands or deposits are or were located, to be used by such State and its subdivisions as the legislature of the State may direct giving priority to those subdivisions of the State socially and economically impacted by development of minerals leased or sold under this Act for (i) planning, (ii) construction and maintenance of public facilities, and (iii) provision of public service. All other money received under the provisions of this Act, with the exceptions stated in the first sentence of this subsection, shall be deposited in the Treasury as "miscellaneous re-

(b) When lands or mineral deposits leased sold under this Act involve acquired or other lands, a portion of the receipts from which are required by Act of the Congress to be paid to the counties within the bound-aries of which the lands or deposits are or located, the amount to be paid from such lands or deposits to the State in which the counties are located shall be the difference between the amount it would otherwise be entitled to under subsection (a) of this section and the amount to be paid to the

(c) (1) The Secretary is authorized to make loans to the States and their subdivisions in order to relieve social or economic impacts occasioned by the development of minerals leased or sold in the States under this Act. Such loans shall be confined to the uses specified in subsection (a) of this section, shall bear interest at the rate not to exceed the prevailing rate for State bonds at the time of the loan and shall be for such amounts and durations as the Secretary shall determine, except that the Secretary shall limit the amount of such loans to the anticipated revenues to be received by the recipients of said loans pursuant to subsections (a) and (b) of this section for any prospective tenyear period. Such loans shall be repaid by the loan recipients from revenues to be derived from said subsections (a) and (b) at such times and in such amounts as the Secretary determines.

(2) The Secretary, after consultation with the Governors of the affected States, shall allocate such loans among the States in a fair and equitable manner, giving priority to those States and subdivisions suffering the most severe impacts.

(3) Loans under this subsection shall be subject to such terms and conditions as the Secretary determines necessary to assure that the purposes of this subsection will be achieved.

TITLE V-EFFECT ON EXISTING LAW

REPEALS AND REVISIONS

SEC. 501. Subject to valid existing rights and obligations and the terms of this Act:

(a) The following statutes and parts of statutes are repealed as of the date of approval of this Act:

(b) The first sentence of section 1 of the Act of July 31, 1947 (61 Stat. 681), as amended by section 1 of the Act of July 23, 1955 (69 Stat. 367; 30 U.S.C. 601), is further amended, as of the date of approval of this Act, to read as follows: "The Secretary, under such rules and regulations as he may prescribe, may dispose of vegetative materials (including but not limited to yucca, manzanita, mesquite, cactus, and timber or other forest products) on public lands of the United States, including, for the purposes of this Act, land described in the Act of August 28, 1937 (50 Stat. 874; 43 U.S.C. 1181a-1181j) if the disposal of such vegetative materials (1) is not otherwise expressly authorized by law, including, but not limited to, the Act of June 28, 1934, as amended (48 Stat. 1269; 43 U.S.C. 315 et seq.), and (2) is not expressly prohibited by laws of the United States, and (3) would not be detrimental to the public interest.".

(c) The first sentence of paragraph (2) and all of paragraph (3) of section 202 of the Act of October 21, 1976 (90 Stat. 2749; 43 U.S.C. 1712(e) (2) and (3)), are amended, as of the date of approval of this Act, to

read as follows:

"(2) Any management decision or action pursuant to a management decision that excludes (that is, totally eliminates) for two or more years (1) operations under the Federal Land Mining Act of 1977 with respect to a tract of land of five thousand acres or more or (ii) one or more of the principal or major uses with respect to a tract of land of one hundred thousand acres or more shall be reported by the Secretary to the House of Representatives and the Senate.

"(3) Withdrawals made pursuant to section 204 of this Act may be used in carrying out management decisions, but public lands shall be transferred to another department, bureau, or agency only by withdrawal action pursuant to section 204 or other action pursuant to applicable law: Provided, That nothing in this section shall prevent a wholly owned Government corporation from acquiring and holding rights as a citizen under the Federal Land Mining Act of 1977."

SUPERSESSIONS

Sec. 502. Subject to valid existing rights and obligations and the terms of this Act, as of the date of approval of this Act:

(a) The provisions of this Act supersede

(a) The provisions of this Act supersede all provisions of Acts of the Congress applicable to acquired lands of the United States which implicitly or explicitly authorize the disposal of minerals in such lands including, but not limited to, those listed in section 402 of Reorganization Plan Numbered 3 of 1946 (60 Stat. 1100; 5 U.S.C. App. 519), but excluding the Acquired Lands Leasing Act of 1947, as amended (61 Stat. 913; 30 U.S.C. 351 et seq.).

(b) The provisions of this Act supersede all provisions of Acts of the Congress which implicitly or explicitly made federally owned lands subject to appropriation under the Mining Law of 1872 except those relating to minerals in lands in the National Wilderness Preservation System.

(c) The provisions of this Act supersede those in the Act of June 30, 1950 (64 Stat. 311; 16 U.S.C. 508), and in section 402 of Reorganization Plan Numbered 3 of 1946 (60 Stat. 1100; 5 U.S.C. App. 519).

BRIEF DESCRIPTION OF SIGNIFICANT FEATURES OF THE FEDERAL LAND MINING ACT OF 1977

1. INCENTIVES FOR PRIVATE DEVELOPMENT

The bill assumes that the arrangements made by free enterprise in its dealings with private owners of mineral deposits and its other normal business operations provide prospects for profits sufficient to induce industry to undertake the risks inherent in the search for and development of minerals. It calls for "fair market" return to the Government, the amount a private owner realizes in his negotiations with private industry. The bill sets no specific upper or lower limits to Government returns in order that there will be no arbitrary interference with estab-lishing "fair market" requirements. The bill grants authority to the Secretary of the Interior to provide for negotiated adjustments in contracts when changes in eco-nomic and other conditions modify "fair market" relationships. Consistent with the concept of "fair market," it assumes normal business practices.

2. CONSIDERATION OF ALTERNATIVE RESOURCE VALUES

The bill assigns the determination of whether minerals will be available for development to the head of the department or agency which administers the land. To provide an assurance that full weight will be given to minerals values and to the policies of the Congress as expressed in the bill, the bill requires a justification to the Secretary of the Interior whenever a department or agency head refuses to make lands available or requires restrictive provisions. Full consideration is further promoted by provisions in the bill for public participation in, and Congressional oversight of, decision-making. The bill makes no changes in existing law with respect to judicial review or, in substance, with respect to withdrawals of land from mining.

The bill establishes various policies and objectives with respect to the development of Federally-owned minerals and recognizes that there will be day-to-day practical problems in reconciling or harmonizing mineral policies and objectives with other Congressional natural resource and management policies and objectives. It expects these problems to be solved in the give-and-take of democratic processes and procedures, including public participation, Congressional oversight, internal appeals procedures, and judicial review.

3. TREATMENT OF SMALL MINERS

The bill retains a measure of miner-initiated decisions with a modified system of locations by "small miners." Under regulations of the Secretary of the Interior, heads of departments and agencies will determine the lands and mineral deposits open to small miner locations. The bill gives the Secretary of the Interior authority to establish rules and regulations which would permit a location system to operate equitably and consistent with environmental protection and resource management.

4. AVAILABILITY OF LANDS FOR MINERAL DEVELOPMENT

The bill requires a positive administrative action to make lands available for mineral development. For locations by small miners, lands would not be available until "opened" by administrative order but thereafter would remain open until "closed" by administrative order. Otherwise, lands would be available only if offered for lease or sale by the Secretary or his delegate. Offers would be made either on the motion of the Secretary or his delegate or by them in response to applications or nominations.

In order to encourage appropriate mineral development and facilitate industry preparation for development, the bill requires the Secretary to prepare long-range plans for scheduling lands for opening to prospecting and development.

5. CONGRESSIONAL CONTROL OVER THE AVAILABILITY OF LANDS

The bill relies on established Congressional procedures for oversight, legislation, and appropriations for control of executive actions under the bill.

6. ADMINISTRATIVE DISCRETION

The bill sets forth policies, objectives, standards, and criteria to govern the management and disposal of Federal mineral deposits. Within this framework, it grants the Secretary of the Interior and other Federal officials full discretion in the administration of the law and in devising the means to comply with the policies, to achieve the objectives, and to enforce the standards and criteria. It avoids, with a few exceptions, establishing by law details of procedures or other requirements.

To assure that the exercise of discretion will be based on a fully disclosed and carefully devised system of principles and practices adopted only after full opportunity for public participation and Congressional oversight, the bill requires the Secretary of the Interior to issue rules and regulations to carry out its provisions. The bill makes the rule and regulations process subject to the rulemaking provisions of the Administrative Procedures Act.

7. ENFORCEMENT OF DUE DILIGENCE

The bill calls for due diligence but leaves it to the Secretary of the Interior to devise

the means by which due diligence will be enforced. The bill, however, does set maximum limits to the term of years for leases issued under its terms.

8. ALLOCATION OF EXPLORATION AND DEVELOP-MENT OPPORTUNITIES

The bill specifies how opportunities will be allocated. The general rule is that resources will be allocated to the highest qualified bidder. Exceptions are: small miners can earn the right to a lease through locations on a first-come, first-served basis and, where competitive interest is lacking or very low values are involved, specific quantities of minerals can be sold on a first-come, first served basis. In addition, the bill allows donations of minerals to governmental entities and to recreationists.

9. APPLICABILITY OF REGULATIONS

The bill permits the Secretary of the Interior to establish by regulation whether leases will be subject to future regulations and, if so, under what limitations and other conditions. As with other terms and conditions, the fair market value of the lease will be affected by the provisions for applicability of regulations.

10. ADMINISTRATION OF OPERATIONS

The bill centralizes the administration of its provisions in the Secretary of the Interior except for decisions whether lands will be open for mineral development and except also for determinations of terms and conditions related to non-mineral resource management. The latter responsibilities are assigned to the heads of the departments and agencies which manage the lands. The bill permits the Secretary of the Interior to delegate his authority to make quantity sales and to make inspections, enforce rules and regulations, and to carry out environmental protection and rehabilitation functions to departmental and agency heads.

11. PAYMENTS FOR LANDS AND RESOURCES

The bill requires the Secretary of the Interior to collect fair market value for lands and resources disposed of under its provisions. The bill permits collection of less than fair market value in transfers of minerals to governmental agencies and recreationists.

Charges required include rentals for use of surface resources, royalties and bonuses as payments for minerals taken, and payments for surface interest sold. The bill does not specify minima or maxima or any other standard other than fair market value. The bill permits the Secretary to accept cash, minerals, and land developments and improvements which would be of value to governmental programs.

12. REVENUE SHARING

The bill adopts the revenue sharing formula of the Mineral Leasing Act of 1920. Alaska is granted 90% and other States 50% of total revenues, less amounts paid to counties out of mineral revenues pursuant to other existing legislation. State legislatures will determine how the money will be used but are required to give priority to alleviating adverse effects of mineral developments undertaken pursuant to the provisions of the bill. Like the Mineral Leasing Act of 1920, the bill provides for loans to States based on expected revenues for early attack on such adverse effects.

13. ANTI-MONOPOLY

The bill charges the Secretary of the Interior to take the necessary steps to prevent or terminate monopoly and restraint of competition and trade. It requires the Attorney General to advise the Secretary and also to audit actual operations under the bill for that purpose. The bill authorizes the Secretary to adopt any means consistent

with due process to carry out the statutory objective of normal competition.

14. MINERAL INVENTORY

The bill authorizes a comprehensive inventory of Federally-owned mineral interests. It requires the Secretary of the Interior to prepare long-range plans for inventory operations, which would be undertaken only if specifically authorized by Act of the Congress.

Inventory plans and operations would have to be designed to be harmonious with the statutory missions of the various land management programs. The bill requires maximum reliance on the private mineral industry and permits appropriate Government activity also. The bill requires authorized operators to disclose to the United States for Government use information about Federal lands and mineral resources developed and collected during authorized operations.

15. LOW-GRADE DEPOSITS

The bill assumes that acceptable decisions cannot be made with respect to low-grade deposits in the absence of facts about those deposits and the other values in the lands containing the deposits. To develop the needed facts and to assure executive and Congressional consideration of those facts, the bill calls for a comprehensive mineral inventories, planning and Congressional oversight. The bill calls for, but does not specifically authorize, Government-financed research for identifying promising mineral targets. Specific authorizing legislation would be needed. The Government would recover costs to the extent that the research added value to deposits disposed of, which in some cases could be less than actual expenditures and in other cases more.

16. EXISTING MINING CLAIMS

The bill protects existing valid rights. Valid claims existing on the date of the Act would not be adversely affected by the bill. However, holders of such claims would have three years in which to apply for patent. If they fail to do so, their rights thereafter would be limited to the minerals therein and to so much surface use as required for mineral operations.

Claimants having as of January 1, 1977, only a privilege of possession would be granted three years or until the lands were closed to mineral development, whichever is less, to continue their search for minerals. The bill permits them to apply for a lease under its provisions and authorizes the Secretary to issue leases where equitable considerations justify issuance.

17. CLASSES OF LANDS AND MINERALS INCLUDED

The bill supersedes all mineral disposal laws other than the Mineral Leasing Act of 1920, the Acquired Lands Leasing Act of 1947, and a special leasing law of limited application.

By Mr. MATHIAS:

S. 1249. A bill to amend title 5, United States Code, to provide for grade retention benefits for certain Federal employees whose positions are reduced in grade, and for other purposes; to the Committee on Governmental Affairs.

JUSTICE FOR FEDERAL EMPLOYEES

Mr. MATHIAS. Mr. President, I am introducing a bill to provide grade and salary protection for Federal employees whose jobs are downgraded.

The provisions of this bill are essentially identical to those of bills I introduced in the 93d Congress (S. 3693), and in the 94th Congress (S. 94). By reintroducing this bill today—early in this session and at the beginning of a

new administration—I want to demonstrate my conviction that the new Congress and the administration must treat Federal employees with equity in any reorganization that may be undertaken.

Under my bill, an agency would have up to 3 full years to discover an improper classification and downgrade a given job. After that time, if an error is discovered, an incumbent jobholder would be protected from downgrading as long as he or she remains in that job. The job could then be downgraded only after the employee left or was promoted. Nothing in this legislation, of course, would in any way limit the Government's existing ability to demote an employee for cause or to carry out a reduction in force.

Under the present system if a Federal civil servant's position is downgraded, he may continue to receive the original grade's pay for a period of 2 years. The theory is that during that 2-year period the employee with the help of his agency would be able to find another suitable job. In practice, however, this system has not worked. The full burden of finding another position has fallen on the civil servant with little or no help from his agency and his salary was cut at the end of the 2-year period. The inequity of the situation is further aggravated during periods of general Government hiring freezes and periods of reductions in force. Alternative positions simply are not available.

My bill seeks to redress this situation by placing the burden for proper job classification on management and by insuring grade and salary security to Federal employees in the career civil

Downgrading occurs in the Federal civil service when the management of an agency determines that the duties and responsibilities of positions are graded too high. The practice may be initiated by an agency in an effort to hold down costs, to meet ceilings on total employment, or in some cases to "ease out" employees with whom management is incapable of dealing.

The process of position classification is not a scientific one. Civil Service regulations and classification standards are sometimes vague and subject to individual interpretation. Typically, a position classifier looks at the duties of the position and then at the classification standard to determine whether a position is overgraded. But, it is often difficult for the position classifier to distinguish between the position and the person occupying that position as the volume of job classification appeals attests.

Downgrading has been defended in the past by the Civil Service Commission as a part of the merit system to protect the principle of equal pay for equal work. If the Commission is mainly concerned with upholding the merit system, a more humane way to do so, at least in some circumstances, would be to add duties to an employee's job description rather than reducing his grade.

I do not believe our Federal civil servants should be singled out to pay for an agency's poor planning or misman-

agement. A worker who is the victim of mismanagement should not be penalized by a demotion, with a consequent loss of pay and career opportunity, beyond his or her control. Lack of security with regard to job classifications has fostered bitterness and frustration among Federal employees. The most active downgrading operations appear to be taking place in the Defense Department, the largest Federal employer, and in the Department of Health, Education, and Welfare, which employs 140,000 civil servants.

Morale among those dedicated career workers can be shattered as reorganizations and wholesale job classification reviews are instituted. Enactment of this bill will both protect morale and preserve the integrity of the classification and merit systems.

My bill incorporates the principle of equitable estoppel which holds that a party making representations to a second party, which are relied on by that second party, cannot later deny making those representations. Thus, an employee who takes a position relying on the classification assigned to that position should not, in equity, have that status reduced at some later point.

A downgrading can seriously affect an employee's career status by setting him back both in rank and salary. Without full protection for the innocent employee who is performing a capable, competent job, downgrading can only weaken the merit and career ladder system of our civil service.

Several reorganizations of major Federal departments have been proposed as part of a program to streamline the Government and make it operate at peak productivity and efficiency. This is all well and good. However, we must not let able, dedicated, hard-working career civil servants become pawns in such reorganizations.

The President has recently visited several major departments to reassure employees that they will not lose their jobs. The President's expressions of compassion, I believe, are sincere. I look forward to the administration's support of this bill to reassure those employees through law that the integrity of the merit system will be preserved.

The term "bureaucrat" has been much maligned in recent times. Those Americans working as civil servants believe in what they are doing, believe in their Government, and are performing admirably. The important thing is to preserve morale among that dedicated work force by providing grade security. For morale is the driving force which motivates employees to work at top productivity, and which results in truly efficient gov-

Mr. President, I ask unanimous consent that the text of my bill be printed in the Record.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1249

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subchapter VI of chapter 53 of title 5, United States Code, is amended by adding at the end of such subchapter the following new section:

"§ 5366. Retained grade of employee on grade reduction of his position

"Under regulations prescribed by the Civil Service Commission, an employee as defined by section 5102 of this title, or a prevailing rate employee as defined by section 5342(a) (2) of this title, who holds a career or a career-conditional appointment in the competitive service or an appointment of equivalent tenure in the excepted service and whose position is reduced in grade on or after the date of enactment of this section, shall retain the grade which he held immediately before the reduction in grade of such position so long as he—

"(1) continues in the same agency, including an agency to which he is transferred in a transfer of function, without a break in serv-

ice of one workday or more;

"(2) is not reassigned or promoted; and "(3) is not demoted (A) for personal cause, (B) at his request, or (C) in a reduction in force.

The provisions of this section shall apply only to a position that has been classified at the grade from which the position was reduced for a continuous period of at least three years immediately prior to the reduction of such position to a lower grade.".

(b) The table of section of subchapter VI of chapter 53 of title 5, United States Code, at the beginning of such chapter 53, is amended by adding, immediately below the item relating to section 5365 thereof, the following new item:

"5366. Retained grade of employee on grade reduction of his position.".

By Mr. MAGNUSON (by request): S. 1250. A bill to authorize appropriations for the Coast Guard for fiscal years 1978 and 1979 and for other purposes; to the Committee on Commerce, Science, and Transportation

Mr. MAGNUSON. Mr. President, I introduce today, at the request of the Department of Transportation, a bill to authorize appropriations for the Coast Guard for fiscal years 1978 and 1979 and for other purposes.

I ask unanimous consent that the text of the bill and the accompanying letter of transmittal from the Department of Transportation be printed in the RECORD.

There being no objection, the material was ordered to be printed in the Record, as follows:

S. 1250

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are authorized to be appropriated for the United States Coast Guard for the fiscal years 1978 and 1979:

(1) For necessary expenses for the operation and maintenance of the Coast Guard including those relating to the Capehart housing debt reduction—for fiscal year 1978, \$875,261,000; for fiscal year 1979—\$903,000,000.

(2) For acquisition, construction, rebuilding, and improvement of aids to navigation, shore and off-shore establishments, vessels, aircraft, and pollution abatement including equipment and necessary administrative expenses relating thereto:

AIRCRAFT

For fiscal year 1978, \$89,076,000; for fiscal year 1979, \$88,840,000.

VESSELS

For fiscal year 1978, \$85,506,000; for fiscal year 1979, \$85,279,000.

SHORE AND OFF-SHORE ESTABLISHMENTS, AIDS TO NAVIGATION, POLLUTION ABATEMENT, AND ADMINISTRATION EXPENSES

For fiscal year 1978, \$52,018,000; for fiscal year 1979, \$51,881,000.

(3) For alteration or removal of railroad and highway bridges in order to eliminate obstructions to navigation in the navigable waters of the United States—for fiscal year 1978, \$15,100,000; for fiscal year 1979, \$16,400,000.

(4) For necessary expenses for basic and applied scientific research, development, testing, or evaluation of programs and activities of the Coast Guard—for fiscal year 1978, \$22,800,000; for fiscal year 1979, \$23,-000,000.

SEC. 2. The Coast Guard is authorized an end strength for active duty personnel of 38,846 for fiscal year 1978 and 38,846 for fiscal year 1979; except that the ceiling shall not include members of the ready reserve called to active duty under the authority of section 764 of title 14, United States Code.

Sec. 3. Average military training student loads for the Coast Guard are authorized as follows:

 Recruit and special training—for fiscal year 1978, 3,852 students; for fiscal year 1979, 4,113 students.

(2) Flight training—for fiscal year 1978, 109 students; for fiscal year 1979, 114 students.

(3) Professional training in military and civilian institutions—for fiscal year 1978, 415 students; for fiscal year 1979, 419 students.

(4) Officer acquisition—for fiscal year 1978, 1,110 students; for fiscal year 1979, 1,095 students.

SEC. 4. Title 14, United States Code, is amended (1) By adding a new section to Chapter 17 after section 658 as follows:

"SEC. 659. Merger of obligated balances with current appropriations.

'Amounts equal to the obligated balances against appropriations for use by the Coast Guard for operation and maintenance and Reserve training purposes for the two fiscal years preceding the current fiscal year shall be transferred to and merged with current fiscal year appropriations for "Operating Expenses" and "Reserve Training" respectively. Obligated balances for the period commencing on July 1, 1976 and ending on September 30, 1976 may be merged into their respective accounts for Fiscal Years 1977 and 1978. Such merged appropriations shall be available as one fund for payment of obligations properly incurred against such prior year appropriations and against the current fiscal year appropriations. Coast Guard ac-counting shall reflect fiscal year identity of the merged obligated balances until such obligated balances are transferred to a consolidated account as prescribed in section of the Act of July 25, 1956, as amended (31 U.S.C. 701)."

(2) By amending the analysis of Chapter 17 by inserting at the end thereof the following item:

"659. Merger of obligated balances with

current appropriations.'

SEC. 5. Notwithstanding the provisions of any other law, available funds appropriated to or for the use of the Coast Guard for "Acquisition, Construction, and Improvements" may be used to pay for part of the construction and other capital costs of a sewage treatment plant to be built, operated, and owned by the North Marin County Water District (California) and to be used by Coast Guard facilities located in the vicinity of Point Reyes Station, California.

SEC. 6. The Coast Guard is authorized to

SEC. 6. The Coast Guard is authorized to accept and retain funds from the City of Bal-

timore, Maryland, in payment for Coast Guard facilities to be removed by the City incident to the improvement of Hawkins Point Road. The funds shall be available until expended for the construction of replacement facilities. Any funds not obligated by the end of Fiscal Year 1980 shall be paid into the Treasury.

THE SECRETARY OF TRANSPORTATION, Washington, D.C., March 25, 1977. Hon. Walter F. Mondale,

President of the Senate, Washington, D.C.

DEAR MR. PRESIDENT: This letter transmits proposed legislation, "To authorize appropriations for the Coast Guard for Fiscal Years 1978 and 1979 and for other purposes".

The proposed bill contains the Coast Guard's request for authorization of appropriations for fiscal years 1978 and 1979. It also contains provisions to permanently authorize certain accounting procedures (section 4); to authorize a specific construction contract (section 5); and to authorize the use of money to be provided by the City of Baltimore to replace certain Coast Guard facilities which will be removed by the city incident to a road improvement project (section 6).

In compliance with the Congressional Budget and Impoundment Control Act of 1974 (P.L. 95-344), a request for authorization of appropriations for FY-1978 was originally submitted to Congress on January 21, 1976 as part of a legislative proposal which also requested authorizations of appropriations for FY-1977. When the FY-1977 authorization bill was introduced and eventually enacted (P.L. 94-406), there were no references to the 1978 fiscal year request. Since the FY-1978 request has not been acted upon, and since P.L. 94-406 imposed additional requirements upon the Coast Guard for authorizing legislation effective after FY-1977, we are submitting the attached legislative proposal. The request for authorization of appropriations for FY-1979 is included in the proposed legislation to comply with section 607 of P.L. 93-344.

Section 1 of the legislative proposal is responsive to section 5 of P.L. 94-406. Section 5 of P.L. 94-406 requires an authorization for funds to be appropriated to or for the use of the Coast Guard for-(1) operation and maintenance; (2) acquisition, construction, rebuilding, or improvement to aids to navigation, shore or off-shore establishments, vessels or aircraft, and related equipment; (3) alteration of obstructive bridges; and (4) research, development, test, or evaluations related to any of the other categories where authorizations of appropriations are necessary. For reasons of simplicity, individual items within each of the above categories have not been listed. However, the appropriate committees will be furnished detailed information identifying each item for which authorization or appropriations is requested. Furthermore, the Department will be prepared to supply any other information requested by the Congress.

Sections 2 and 3 of the bill respond to sections 6(a) and 6(b) of P.L. 94-406 which require authorization of the Coast Guard's "end strength" and "average military train-

ing loads" respectively.

Section 4 of the proposed legislation permits the Coast Guard to continue its present accounting practice of merging obligated balances of prior year "Operating Expenses" and "Reserve Training" appropriations with current year appropriations for those same purposes. This practice simplifies accounting and eliminates unnecessary paperwork. Although merger of obligated balances has been authorized each year for over 25 years in language contained in the annual appropriations legislation, it has recently been questioned as being subject to a point of

order. Therefore, we are proposing permanent statutory authority to continue these accounting procedures. Section 4 of the proposed legislation applies only to obligated balances from the two years immediately preceding the current fiscal year; older obligated balances are already merged into a special account. (31 U.S.C. 701)

Section 5 of the proposed legislation authorizes the Coast Guard to contribute funds to the North Marin County Water District (California) which will be used, along with other funds, for the construction of a sewage treatment plant. The sewage treatment plant will be locally owned and operated and will serve both the local community and Coast Guard facilities in North Marin County. After substantial study we have concluded that joining with the local community is the least expensive and the most environmentally sound method to dispose of sewage generated by Coast Guard facilities in the area. The details of these studies will be provided to the appropriate committees.

Section 6 of the proposed legislation authorizes the Coast Guard to accept money from the City of Baltimore and use it without the need for appropriation action to replace facilities which will be removed by the City incident to a road improvement project. The United States granted the City of Baltimore an easement in perpetuity of a strip of land running the length of the northern boundary of the Coast Guard Yard, (Baltimore, Maryland) for consideration of one dollar. Located on the strip of land is a Coast Guard facility for temporary lodging and a children's playground. The City has agreed to pay for the construction of replacement facilities. Section 6 of the proposed bill is necessary since, absent special authorization, section 484 of title 31 U.S.C. would require the money to be paid into the miscellaneous receipts of the United States Treasury.

It would be appreciated if you would lay this proposal before the Senate. A similar proposal has been submitted to the Speaker of the House of Representatives.

The Office of Management and Budget has advised that enactment of this proposed legislation is in accord with the President's program.

Sincerely,

BROCK ADAMS.

By Mr. HUMPHREY:

S. 1251. A bill to establish a universal food service program for children; to the Committee on Agriculture, Nutrition, and Forestry.

CHILD NUTRITION ACT OF 1977

Mr. HUMPHREY. Mr. President, I am today introducing the Child Nutrition Act of 1977, a bill to establish a universal food service and nutrition education program for children.

This is a truly comprehensive bill. It would provide that every child attending a school or child care program would receive at least one nutritious meal a day without cost. The same child who is now entitled to free transportation to school, free textbooks, and free instruction in all manner of subjects would be likewise entitled to a free lunch at school.

Passage of my bill would eliminate once and for all the degrading procedure of singling out certain children as being eligible for a free lunch, and certain other children as eligible for a reduced price lunch, while still others, because of higher family incomes, are required to pay the full price.

In this procedure we are, in effect, requiring school officials to perform a welfare function when their real business is education. And the paperwork and administrative costs of sending out application forms to all parents, and processing and evaluating the applications, has become enormously time-consuming and expensive.

The first major purpose of the bill, therefore, is to provide that all children have access to the food they need for good nutrition and good health.

The second purpose of the bill, and also of major importance, is to provide for the establishment of a sound nutrition education program in all of our schools across the country.

It has been well established by health and nutritional experts from throughout this country, based upon scientific studies and surveys, that income alone is no guarantee of good child nutrition.

Many schoolchildren from middleclass families, who would benefit from the program, look down on it because it is sometimes described as being for the

Furthermore, the importance of good nutrition can be seen in the impact it has on the ability of students to learn, to maintain better health, to reduce absenteeism, and lower the dropout rate.

There is little question that the teaching of the principles of good nutrition has been largely neglected in the Nation's educational system. We find poor diets or less than adequate diets prevalent in all segments of the population, regardless of income.

To correct the situation, there is an urgent need to incorporate nutrition education in various phases of the educational system. It need not and should not be a separate course of instruction since it can be given appropriate attention in hygiene, home economics, science, geography, or physical education.

Clearly, it is time that Congress should express national leadership in stimulating and encouraging a positive program to eliminate one major cause of poor nutrition—simple ignorance of the basic principles of good nutrition and its importance to good health.

The bill I am introducing today takes the long-overdue full stride to establish a truly universal school food and nutrition education program.

Among its chief provisions, this bill would—

Provide for pilot programs in at least 10 school systems during the first year the act was in effect.

Establish a National Advisory Council on Child Nutrition, composed of 19 members from all phases of the school nutrition field, including State and local program administrators, parents and students, and representatives of the Department of Agriculture.

Provide \$500 million per year for agricultural commodity purchases to be distributed through the program, and \$100 million for school food service equipment and facilities.

Provide for establishment of child nutrition education services within each State education agency, as part of a full-scale nationwide program to teach our children about proper food and nutrition.

Provide the mechanics for the universal free school lunch program itself, in all public schools and to the greatest extent possible in the private, nonprofit schools as well.

What better time than now to reaffirm the Nation's dedication to an improved educational opportunity for all children? What better time than now to establish a universal school food service program?

It is time the Nation once and for all accepted responsibility for the nutritional well-being for children while they are at school.

Mr. President, I ask unanimous con-sent that the text of my bill to establish a universal food service program for children be printed at this point in the

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1251

Be it enacted by the Senate and House Representatives of the United States of America in Congress assembled. That this Act may be cited as the "Child Nutrition Act of 1977

FINDING AND DECLARATION OF POLICY

SEC. 2. (a) The Congress hereby finds that the proper nutrition of the Nation's children is a matter of highest priority, (2) there is a demonstrated relationship between the intake of food and good nutrition and the capacity of children to develop and learn, (3) the teaching of the principles of good nutrition in schools has been seriously in-adequate, as evidenced by the existence of poor or less than adequate diets at all levels of family income, (4) any procedure or "means test" to determine the eligibility of a child for a free or reduced-price meal is degrading and injurious both to the child and his parents, and (5) the national school lunch and related child nutrition programs, while making significant contributions in the field of applied nutrition research, are not, as presently constituted, capable of achieving the goal of good nutrition for all

(b) It is hereby declared to be the policy of Congress to assure adequate nutrition offerings for the Nation's children, to encourage the teaching of the principles of good nutrition as an integral part of food service programs for children, and to strengthen State and local administration of food service programs for children. It is further declared to be the policy of Congress that food service programs conducted under this Act be available to all children on the same basis without singling out or identifying certain children as different from their classmates.

ESTABLISHMENT OF THE UNIVERSAL FOOD SERVICE PROGRAM FOR CHILDREN

SEC. 3. The Secretary of Agriculture (hereinafter referred to as the "Secretary authorized to formulate and administer cooperatively with the State educational agena universal food service program for children in schools of high school grade and under and in service institutions conducting programs for the benefit of all children. Such a program shall be conducted as an integral part of over all educational efforts to improve the knowledge of the principles of good nutrition among participating children. To the fullest extent practicable, the Secretary shall utilize the available services and expertise of other Federal departments, State educational agencies, and private or-ganizations concerned with nutrition and nutrition education in the formulation of program requirements and regulations. The program shall be so designed as to provide each child an equal opportunity to participate on the same basis as all other children with no discrimination as to time or place of serving or types and amounts of foods of-

APPROPRIATIONS AUTHORIZED

SEC. 4. For each fiscal year there are hereby authorized to be appropriated, such sums as may be necessary to enable the Secretary to carry out the provisions of this Act. Such appropriations for any fiscal year are authorized to be made a year in advance of the fiscal year in which the funds will become available for disbursement to the States. Notwithstanding any other provision of law, any funds appropriated to carry out the provisions of this Act shall remain available for the purposes of the Act until expended.

NUTRITIONAL AND OTHER PROGRAM REQUIREMENTS

SEC. 5. (a) Meals and additional food services provided by schools and service institutions participating in programs under this Act shall meet minimum nutritional requirements prescribed by the Secretary on the basis of tested nutritional research.

(b) Food service programs operated under this Act shall be operated on a nonprofit basis under the supervision of the governing authorities of participating schools or service institutions. Participating schools and service institutions shall offer at least one meal a day without charge to all children in attendance: such meal shall consist of a combination of foods meeting a minimum of one-third of the child's daily nutritional requirements. Additional meals and/or food services before, during, or after the schoolday may be offered to all children in attendance based on economic and/or nutritional needs.

(c) No affidavit or certification shall be required of any parent or guardian in order that a child take part in the food service program operated by the school or service in-

stitution.

(d) Additional foods which make a nutritional contribution may be offered for sale to children during the periods of food service conducted under programs authorized under this Act to the extent such offerings are necessary to meet nutritional needs of pupils in participating schools: Provided, however, That the sale of such additional foods shall be under the management and control of the food service department of the school and proceeds from such sales shall accrue to said department.

The sale of such additional foods offered on a regular basis during the regular school day shall be restricted to those items recognized as making a contribution to, or per mitted by the school to be served as a part of, a meal meeting the nutritional require-

ments prescribed by the Secretary.

(e) State agencies shall determine the eligibility of applicant schools and service institutions to participate in programs authorized under this Act and shall determine their need for assistance to carry out the purposes of this Act and shall establish controls to insure effective use of funds.

DIRECT FOOD ASSISTANCE

SEC. 6. (a) Each school or service institution participating in programs authorized under this Act shall, insofar as practicable. utilize in its program foods donated by the Secretary. Foods available under section 416 the Agricultural Act of 1949 (63 Stat. 1058), as amended, or purchased under section 32 of the Act of August 24, 1935 (49 Stat. 774), as amended, or section 709 of the Food Agriculture Act of 1965 (79 Stat. 1212), may be donated by the Secretary for schools and service institutions for utilization in their feeding programs under this Act (42

U.S.C. 1777).

(b) The Secretary is authorized to utilize annually not to exceed \$500,000,000 of funds available pursuant to section 32 of the Act of August 24, 1935 (49 Stat. 774), as amended, for the purchase and distribution of especially nutritious agricultural commodities and other food to assist participating schools and service institutions in meeting the nutritional requirements under this Act. funds unexpended from funds made available under this section may be used by the Secretary to assist in carrying out the purposes of this Act.

(c) The distribution of funds under this section shall be based on the ratio of the number of meals served in each State in the preceding fiscal year to the total number of meals served in all States in the preceding fiscal year: Provided, That in any State in which the Secretary directly administers school food service programs in the nonprofit private schools of such State, the Secretary shall withhold from the funds to be paid to such State under the provisions of this subsection an amount that bears the same ratio to the total of such payment as the number of meals served in nonprofit private schools in the preceding fiscal year bears to the total of such meals served in all schools served in the State during the preceding year under this Act or under the School Lunch and Child Nutrition Act while such Acts were in effect.

APPORTIONMENTS AND PAYMENTS TO STATES

Sec. 7. (a) The apportionment to each State shall be determined on the basis of two factors: (1) the number of children in average daily attendance during the preceding year in schools and service institutions eligible under the provisions of this Act, and (2) the rate of Federal assistance per child per year. The rate of Federal assistance per child per year shall be \$- per child for all States. The amount of apportionment to any State for any fiscal year shall be determined by multiplying factors (1) and (2).

(b) Funds made available to each State under this apportionment shall be paid to such State by the Secretary on the basis of the level of program participation achieved

by the State.

(c) The Secretary shall certify to the Secretary of the Treasury from time to time the amounts to be paid to any State under the provisions of this Act and the time or times such amounts are to be paid, and the Secretary of the Treasury shall pay to the State at time or times fixed by the Secretary the amounts so certified.

(d) The rate of Federal assistance under subsection (a) (2) of this section shall be adjusted annually to reflect changes in the cost of operating the program under this Act as indicated by the change in the series for food away from home of the Consumer Price Index published by the Bureau of Labor Statistics of the Department of Labor.

USE OF FUNDS

SEC. 8. (a) Funds paid to any State for any fiscal year shall be disbursed to schools and service institutions to assist them in financing the operating costs of their food service program including the costs of obtaining, preparing, and serving food.

(b) Such disbursements may be made by State educational agencies at least monthly and may be made not to exceed ten days prior to the beginning of each month of operations. Periodic adjustments in the amounts of funds so disbursed shall be made to conform with the provisions of section 9 of this Act.

STATE MATCHING

SEC. 9. (a) Expenditures from State or local tax funds, other than for the purchase or acquisition of land or for the cost of construction or alteration of buildings, shall constitute at least 15 per centum of total operating costs of the program.

(b) The assurance of proper nutrition for our children is a public concern. The Congress urges that, whenever possible, assistance be provided from all available State and local sources to children in nonprofit private schools and to children in nonpublic, nonprofit service institutions so that they may receive the full benefits of the programs authorized under this Act. Nevertheless, in situations where such assistance is not forthcoming in adequate amounts, such school and institutions may require of parents a registration fee to help finance the operation of food service programs.

NONFOOD ASSISTANCE AUTHORIZATION

SEC. 10. (a) There is hereby authorized to be appropriated for the first fiscal year of operations under this Act and for any subsequent fiscal year not to exceed \$100,000,000 to enable the Secretary to formulate and carry out a program to assist the States through grants-in-aid and other means to supply schools and service institutions with equipment, other than land or buildings, for the storage, preparation, and transportation, and serving of food to enable such schools to establish or expand food service programs for children.

(b) (1) The Secretary shall apportion 33½ per centum of funds appropriated for the purposes of this section among the States on the basis of the ratio between the number of children enrolled in schools without a food service in each State and the number of children enrolled in schools without a food service in all States.

(2) The remainder of the funds shall be apportioned among the States on the basis of the ratio between the number of children enrolled in schools in each State and the number of children enrolled in schools in all States.

(c) For the fourth and each subsequent year of operation under this Act, all of the funds appropriated for the purposes of this section shall be apportioned in accordance with the provisions of subsection (b)(2) above.

NUTRITIONAL TRAINING AND EDUCATION

SEC. 11. (a) The Secretary of Agriculture (hereinafter refered to as the "Secretary") is authorized to formulate the basic elements of a program to provide for (1) the nutritional training of food service supervisors and employees; and (2) the conduct of nutrition education activities as an integral part of food service operations. Such a program is to be coordinated, at the State level, with other nutrition education measures conducted by education and health agencies.

(b) For the fiscal year 1978, the Secretary is authorized to use not to exceed \$2,000,000 out of funds made available for the conduct of school lunch and child nutrition programs for the purpose of developing a nutritional training and education program as outlined under (a) above. From the funds made available under this subsection, the Secretary shall advance to each State educational agency an amount not to exceed \$25,000 for the fiscal year 1978. The amounts so advanced shall be for the purpose of the employment of a nutrition education specialist in each State educational agency in order to provide for the planning and development of the nutritional training and education program authorized under this Act.

(c) For the fiscal year 1979 and each subsequent fiscal year, grants to the States for the conduct of a nutritional training and education program for children shall be based on a rate of 50 cents for each child enrolled in schools or service institutions within the State. Enrollment data so used will be the latest available as certified by the Office of Education of the Department of Health, Education, and Welfare.

(d) The funds made available under subsection (c) of this section may be used for (1) the planning and conduct of nutritional training programs for food service supervisors and employees; (2) coordinating and

promoting nutrition education activities in local school districts during and as a part of food service operations, (3) grants to public and private educational institutions for the conduct of national training courses for food service supervisors and employees; and (4) related purposes including the preparation of visual aids and other informational materials.

There is hereby authorized to be appropriated the funds necessary to carry out the purpose of this section.

CENTRALIZATION OF FUNDING AND ADMINISTRATION

SEC. 12. Authority for the conduct and supervision of Federal programs to assist schools and service institutions in providing food service and nutrition education programs for children is assigned to the Department of Agriculture. Other Federal agencies administering programs under which funds are to be provided to schools and service institutions for such assistance shall transfer such funds to the Department of Agriculture for distribution through the administrative channels and in accordance with the standards established under this Act.

FEDERAL ADMINISTRATIVE EXPENSES

Sec. 13. There are hereby authorized to be appropriated for any fiscal year such sums as may be necessary to the Secretary for his administrative expenses under this Act.

AGREEMENTS WITH STATES

Sec. 14. The Secretary shall incorporate, in his agreements with the State educational agencies, the express requirements under this Act insofar as they may be applicable and such other provisions as in his opinion are reasonably necessary or appropriate to effectuate the purposes of this Act.

STATE PLANS OF OPERATION

SEC. 15. State educational agencies shall submit to the Secretary plans of operation at least three months prior to the first fiscal year of operations under this Act. Such plans shall include, but not be limited to, the following:

(1) Proposed State and local funding;

(1) Proposed State and local funding;
(2) Plans to extend food service to all eligible schools;

(3) Plans for a nutritional training and education program to be conducted as a part of food service operations;

(4) The types and kinds of food service to be offered to children attending participating schools and service institutions, and procedures and methods to be employed to assure high quality, nutritious, and appetizing meals for participating children;

(5) Plans for supervision and audit of program operations. Such plans of operation must be approved by the Secretary prior to advance of funds to State educational agencies.

(6) Plans for conducting training programs for food service personnel;

(7) Plans for the conducting of experimental or demonstration projects.

STATE ADMINISTRATIVE EXPENSES

SEC. 16. For each fiscal year beginning with the fiscal year 1978, an amount not to exceed 1 per centum of aggregated payments made to such agencies by the Secretary under this Act is authorized to be appropriated to assist in the administration and supervision of the programs authorized under this Act: Provided, That not less than 60 per centum of any funds used under this authority shall directed to the employment of field nutrition supervisors and auditors who have a certificate of training in the subject areas or the equivalent in field supervisory or auditing experience: Provided further, That the funds expended under this section shall be used to supplement the existing level of administrative support services and expenditures therefor for the child nutrition programs in each State.

LOCAL COSTS OF SUPERVISION

SEC. 17. The Secretary is authorized to make grants to State educational agencies, out of amounts appropriated by Congress for the purposes of this section, to assist in the supervision of local program operations. The grant to each State is to be determined on the basis of \$350 for each school attendance unit or service institution participating in the program. Any person employed from funds made available under this section shall be required to have an appropriate certificate of training.

ASSISTANCE TO NONPROFIT PRIVATE SCHOOLS

SEC. 18. (a) Federal assistance for food service to nonprofit private schools shall be provided by the State educational agency either in the form of direct payments or by payments made through the public school system in which the nonprofit private school is geographically located.

(b) In the event that the State educational agency is precluded by law, based on a formal opinion of the attorney general of the State, from making direct or indirect payments to such schools, the Secretary is authorized to withhold funds from the apportionments to such States for the purpose of making direct payments to such schools. Such withholding shall be based on the rate of Federal assistance per child per year for such States as determined under section 7 of this Act and the number of children attending nonprofit private schools in such State.

PILOT OPERATIONS

SEC. 19. In the first full fiscal year following the passage of this Act, the Secretary is directed to begin pilot operations in at least ten school systems, using authorities and funds available under Public Law 91-248, to test and develop the most effective techniques and procedures for effectuating the provisions of this Act and for the purpose of developing appropriate estimates of participation and costs.

ACCOUNTS, RECORDS, AND REPORTS

SEC. 20. (a) States, State educational agencies, schools, and service institutions participating in programs under this Act shall keep such accounts and records as may be necessary to enable the Secretary to determine whether there has been compliance under this Act and the regulations thereunder. Such accounts and records shall at all times be available for inspection and audit by representatives of the Secretary and shall be preserved for such period of time, not in excess of three years, as the Secretary determines to be necessary.

(b) State educational agencies shall provide periodic reports on expenditures of Federal funds, program participation, program costs, and so forth, in such form as the Secretary may prescribe.

EVALUATION

Sec. 21. The Secretary shall provide for the careful and systematic evaluation of the programs conducted under this Act, directly or by contracting for independent evaluations, with a view to measuring specific benefits, as far as practicable, and providing information needed to assess the effectiveness of program procedures, policies, and methods of operation.

NATIONAL ADVISORY COUNCIL

SEC. 22. (a) There is hereby established a council to be known as the National Advisory Council on Child Nutrition (hereinafter in this section referred to as the "Council") which shall be composed of nineteen members appointed by the Secretary. One member shall be a school administrator, one member shall be a person engaged in child welfare work, one member shall be a person engaged in vocational education work, one member shall be a nutrition expert, one member shall be a school food service management expert,

one member shall be a State superintendent of schools (or the equivalent thereof), one member shall be a State school food service director (or the equivalent thereof), one member shall be a person serving on a school board, one member shall be a classroom teacher, one member shall be a supervisor of a school lunch program in a school system in an urban area (or the equivalent thereof); one member shall be a supervisor of a school lunch program in a rural area; two members shall be parents of school age children; two members shall be secondary school students participating in the school lunch program, and four members shall be officers or employees of the Department of Agriculture specially qualified to serve on the Council because of their education, training, experience, and knowledge in matters relating to child food programs.

(b) The fifteen members of the Council appointed from outside the Department of Agriculture shall be appointed for terms of three years, except that such members first appointed to the Council shall be appointed as follows: Five members shall be appointed for terms of three years, five members shall be appointed for terms of two years, and five members shall be appointed for terms of one year; thereafter all appointments shall be for a term of three years, except that a person appointed to fill an unexpired term shall serve only for the remainder of such term. Members appointed from the Department of Agriculture shall serve at the pleasure of the Secretary.

(c) The Secretary shall designate one of the members to serve as chairman, and one to serve as vice chairman of the Council.

The Council shall meet at the call of the chairman but shall meet at least once a year.

(e) Ten members shall constitute a quorum and a vacancy on the Council shall not affect its powers.

(f) It shall be the function of the Council to make a continuing study of the operation of programs carried out under this Act with a view to determining how such programs may be improved. The Council shall submit to the President and Congress annually a written report of the results of its study together with such recommendations for administrative and legislative changes as it deems appropriate. For the purpose of obtaining information incident to making the aforesaid recommendations, the Council, by vote of its members present may request the appearance, at any of its meetings of representatives from governmental or nongovernmental agencies or organizations concerned with the nutrition and welfare of children.

(g) The Secretary shall provide the Council with such technical and other assistance, including secretarial and clerical assistance, as may be required to carry out its functions

under this Act.

(h) Members of the Council shall serve without compensation but shall receive reimbursement for necessary travel and subsistence expenses incurred by them in the performance of the duties of the Council.

DEFINITIONS FOR THE PURPOSES OF THIS ACT

SEC. 23. (a) "State" means any of the fifty States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Trust Territory of the Pacific Islands.

(b) "State educational agency" means the State Board of Education or other agency or officer primarily responsible for the State supervision of public elementary and secondary schools, or, if there is no such officer or agency, an officer or agency designated by the Governor or by State law.

(c) "Nonprofit private school" means any private school exempt from income tax under section 501(e)(3) of the Internal Revenue

Code of 1954.

(d) "Service institution" means private, nonprofit institutions which provide day care or other children services. Children services include public and private nonprofit institutions providing day care or other child care services for handicapped children.

(e) "Operating costs" means the cost of food and nutrition services administration and supervision, labor, supplies, acquisition, storage, preparation, and service of food used in the food service program, utilities, maintenance, repair, and replacement of equipment. This term does not include the cost or value of land or acquisition, construction, or alteration of buildings. The term does not include any part of the general administrative and maintenance expenses for the

total school program.

"Universal food service means a program designed and operated to offer all children in group situations away from home at least one meal a day which meets at least one-third of the child's daily nutritional requirements. Additional meals and/or supplemental food services may be offered to all children in attendance based on economic and/or nutritional needs. All food service programs conducted under this Act would operate without charge to the child. The children to be covered under this Act include those attending schools of high school grade and under and children in service institutions as defined in this Act. The term also includes a program of nutrition education as an integral part of food service operations to teach all children the basic principles of good nutrition and the importance of good nutrition to health.

EFFECTIVE DATE

SEC. 24. The effective date of this Act, other than section 19, which is effective with the passage of this Act, is one year subsequent to the fiscal year in which it is passed. Beginning with the first year of operation of this Act, the National School Lunch Act of 1946, as amended, and the Child Nutrition Act of 1966, as amended, are hereby superseded.

By Mr. HUMPHREY (for himself and Mr. Tower):

S. 1252. A bill to transfer the functions of the Passport Office to a new agency of the Department of State to be known as the U.S. Passport Service, to establish a Passport Service Fund to finance the operations of the U.S. Passport Service, and for other purposes; to the Committee on Foreign Relations.

U.S. PASSPORT SERVICE

Mr. HUMPHREY. Mr. President, today my distinguished colleague from Texas (Mr. Tower) and I are introducing legislation to transfer the functions of the Passport Office to a new agency of the Department of State to be known as the U.S. Passport Service. Our bill would also establish a Passport Service Fund to finance the operations of the U.S. Passport Service.

Mr. President, in July 1955, I noted on the floor of the Senate certain major deficiencies in the operations of the Passport Office—deficiencies which had been the subject of complaint to numerous Members of the Senate since 1951.

On March 1, 1956, I introduced S. 3340, which called for the reorganization of the Passport Office and for the establishment of a semiautonomous Agency within the Department of State to be known as the U.S. Passport Service. The bill died in that session of Congress due to the opposition of the Department of State.

Since March 1, 1956, a total of 35 bills have been introduced in both Houses of Congress which, in one form or another, proposed the establishment of a semiautonomous U.S. Passport Service under the direct supervision of the Secretary of State. The Members of each House who have introduced this legislation encompass the entire political spectrum. They have been members of both the Democratic and Republican Parties. They have been both liberal and conservative in their views.

The Passport Office is a large, growing business which needs a business-type budget to function efficiently and to meet ever-increasing demands on its services. This bill proposes a semiautonomous agency responsible directly to the Secretary of State, similar to the relationship which now exists between the Commissioner of the Immigration and Naturalization Service and the Attorney General in the Department of Justice. The growth and projected growth of the Passport Office clearly justify these changes in or-

ganizational status.

In 1952, when the Bureau of Security and Consular Affairs was created by statute and the Passport Office was made a constituent part of that Bureau, the Passport Office was issuing and renewing 373,729 passports. In 1976, the Passport Office issued 2,816,683 passports and employed over 900 people in Washington and 11 field agencies located around the country. Earlier projections based on a standard 11.5-percent increase in volume per year indicate that by 1982 the Passport Office will be issuing over 8 million passports per year.

The future number of employees and field offices will depend on what, if any, changes are made in the organizational and production systems. Obviously, changes will have to be made to cope

with this type of growth.

The Department of State is quite properly geared to its foreign policy functions. It is not, and was never intended to be, a business operation. In its midst, however, has grown this separate entity, the Passport Office, which is in every sense a business. As presently organized, it does not fit into the organizational

structure of the Department.

The legislation which has been introduced since 1956, as does the measure we are introducing today, proposed a revolving fund. Stated in its simplest terms, a revolving fund would permit the Passport Office to plow back into its operation some of the revenue which it returns to the Treasury each year. Between 1969 and 1976, the Passport Office returned to the Treasury in excess of \$90 million over and above its direct domestic operating costs. Under a revolving fund, the Passport Office could use some of the money to modernize and improve its operations in an effort to upgrade the quality of service provided to the American public

The legislation also provides for an elaborate business-type accounting procedure, periodic audits by the General Accounting Office, and annual reports to the President and Congress.

The Department of State in the past has opposed legislation of this nature, primarily on the theory that such legislation would interfere with the Secretary's authority to organize his own Department. Such an argument, if directed against statutory proposals to alter the normal staff functions concerned with the formulation of foreign policy, would indeed have merit. However, the Passport Office clearly does not fit into this category. It is a business organization whose primary concern is direct service to the American public.

To exemplify how the present arrangement creates an unnecessary and undue burden on the American people, I requested the workload figures and areas which would be affected by the establishment of passport field agencies in Texas, Michigan, and Connecticut, I will request that these analyses be included in the RECORD at the end of my remarks.

Mr. President, as my colleagues should readily see, the present arrangement is both archaic and impossible to administer in light of the needs of the American people. Each year I receive literally hundreds of complaints over the unnecessary delays in the handling of pass-

port applications. We will soon be circulating a letter inviting Senators to cosponsor this measure, Mr. President, I ask unanimous consent that section-by-section analysis of our legislation be printed at this point in the RECORD for study by my colleagues, along with the text of the bill and the workload figures and areas affected by the establishment of passport field agencies in Texas, Michigan, and Connecticut.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 1252

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there is hereby established in the Department of State the United States Passport Service (hereinafter referred to as the "Service"), which shall have as its purpose the administration of the laws and regulations relating to nationality, documentation, protection, and control of international travel of nationals of the United States.

Sec. 2. All functions, powers, duties, and authority of the Passport Office of the Department of State, together with those funds, assets, contracts, liabilities, commitments, authorizations, allocations, personnel, properties, and records of the Department of State which the Secretary of State shall determine to be primarily related to, and necessary for, the exercise of such functions, powers, duties, and authority, are hereby transferred to the Service.

SEC. 3. The Service shall be headed by a Director, who shall be appointed by the Secretary of State and responsible directly to him for the administration of the Service. The Director shall be appointed in accordance with the civil service laws in the grade of GS-18 of the General Schedule as prescribed in the Classification Act of 1949, as amended. Sec. 5108(c) of title 5, United States Code is hereby amended to include 1 GS-18 position for this purpose. The Director may furthermore place a total of 5 positions in the U.S. Passport Service in GS-16 and 17.

The Director-

(a) shall be responsible for the administration of the Service, the supervision and assignment of all personnel who are engaged in carrying out the laws and regulations administered by the Service, and shall possess such other powers and authorities as may

be necessary to carry out the provisions of this Act:

(b) may appoint and fix compensation of officers and employees of the United States Passport Service. Such appointments and compensations shall be under the appropriate civil service laws:

(c) may appoint such other officers and employees as Passport Agents as may necessary to carry out the provisions of this Act and to prescribe their functions, duties and compensation:

(d) the Director may designate in writing persons appointed in accordance with subsections (b) and (c) above to administer oaths, affirmations, affidavits and take depositions in connection with their official

(e) is hereby authorized and empowered to establish, staff, and maintain passport facilities at such locations in the United States and abroad as the need for efficient and convenient public service may from time to time require. The funds necessary for the establishment and operation of such agencies and offices shall be drawn from the fund authorized and established by section 4 of

(f) to obtain the services of experts and consultants in accordance with the provisions of section 3109 of title 5, United States Code:

(g) to acquire by purchase, lease, condemnation, or in any other lawful manner, any real or personal property, tangible or intangible, or any interest therein; to hold, maintain, use and operate the same; and to sell, lease, or otherwise dispose of the same at such time, in such manner, and to the extent deemed necessary or appropriate;

(h) to construct, operate, lease, and maintain buildings, facilities, and other improvements as may be necessary, without regard to the provisions of title 40, United States Code;

(i) to enter into contracts or other arrangements or modifications thereof, any government, any agency or department of the United States, or with any person, firm, association, corporation, and such contracts or other arrangements, or modifications thereof, may be entered into with or without legal consideration, with or without performance or other bonds, and without regard to section 3709 of the Revised Statutes, as amended (41 U.S.C. 5) or any other provision of law relating to competitive bidding;

(j) to make advance, progress, and other payments which the Director deems neces-sary under this Act without regard to the provisions of section 364B of the Revised Statutes, as amended (31 U.S.C. 529); and

(k) is authorized to establish passport and such other fees as are necessary to carry out the purposes of this Act.

Sec. 4. (a) There is hereby established a fund for the Service (hereinafter referred to as the "fund"). The fund shall be capitalized on the basis of an initial appropriation by the Congress to the fund of a sum of at least \$59,700,000, which sum is hereby authorized to be appropriated out of any money in the Treasury not otherwise appropriated and shall include:

any unexpended balances of appropriations, the inventories, and other physical assets of the Passport Office (exclusive of buildings occupied and land), such inventories and other physical assets to be capitalized at their fair and reasonable value;

(ii) assumption by the fund of all obligations, commitments, and liabilities of the Passport Office as of the effective date of this

(iii) all property and other physical assets of the Passport Office (except buildings and land), and there shall be deposited into the fund all amounts received by the from whatever source derived, including all proceeds arising from the disposition of any property or other assets acquired by the fund.

(b) The fund shall be available without fiscal year limitation for financing the direct costs and expenses of operating and maintaining and improving the operations of the Service.

(c) Any surplus accruing to the fund in any fiscal year shall be deposited into the general fund of the Treasury as miscellaneous receipts during the ensuing fiscal year: Provided, that any such surplus shall be applied first to restore any impairment of the capital of the fund.

SEC. 5. In accordance with the provisions of existing law

(a) there shall be prepared and submitted annually a business-type budget program for the Service;

(b) there shall be installed and maintained in the Service an integrated system of accounting, including proper features of internal control, which will (1) assure adequate control over all assets and liabilities of the fund. (2) afford full disclosure with respect to the financial conditions and operations of the fund according to the accrual method of accounting, and (3) supply on the basis of accounting, results and data for the annual budget of the Service with respect to the last completed fiscal year. The system of accounting shall conform to principles and standards prescribed by the Comptroller General of the United States as to accomplish the purposes of this section, and shall be subject to such review by the Comptroller as may be necessary to assure its conformance with the principles and standards prescribed and its effectiveness in operation; and

(c) the financial transactions, accounts, and reports of the fund shall be audited annually by the General Accounting Office and a copy of each report or audit shall be furnished promptly to the President and the Congress.

SEC. 6. All other laws, or parts of laws, in conflict or inconsistent with this Act are, to the extent of such conflict or inconsistency, repealed or made inapplicable to the

ANALYSIS OF THE PROPOSED BILL TO CREATE A UNITED STATES PASSPORT SERVICE

Sections 1 and 2: These sections of the proposed Bill create a semi-autonomous United States Passport Service in the Department of State to replace the existing Passport Office. They vest in the Service all powers, functions, duties of the present Passport Office together with all of its funds, liabilities, contracts, personnel, properties and records.

Section 3: The Service will be similar in organizational status to the Immigration and Naturalization Service of the Department of Justice and the Customs Service of the Department of the Treasury. The Director of the Service will be appointed by and be responsible directly to the Secretary of State for the administration of the Service, eliminating numerous unnecessary bureaucratic layers between the operation of a public service and the only essential policy guidance level required.

The highest rank in the General Service schedule, GS-18, which the present Director of the Passport Office holds, is given statutory sanction for the Direction of the Service. This is accomplished by specifically placing the position under Section 5108(c) of Title 5 of the United States Code in order that the grade need not be allocated from the general allotment of supergrades for the Department of State. The Director is also granted authority to specifically designate five supergrade positions in the Service commensurate with assigned responsibilities. This is vital if the Service is to attract and retain the highly qualified professional personnel it will need for management, accounting, and similar purposes.

The proposed Bill grants to the Service, through the Director, the necessary resources to carry out its duties and responsibilities. The need for the kind of authority enumerated in the Bill, is based on the hard realities of experience by the Passport Office over the many years of its existence.

As set forth in the bill, these resources include:

(a) The authority to assign all personnel who are engaged in carrying out the laws and regulations administered by the Service. The lack of this power, has, on many occasions, caused serious and unnecessary delays and other problems in the efficient administration of passport and citizenship laws of the United States.

(b) The authority to appoint all personnel under applicable Civil Service statutes to carry out the functions of the Service.

(c) The authority to appoint passport agents. While this authority now exists for certain Passport Office employees, this provision extends that authority to the appointment of employees of other government agencies who perform passport functions (e.g., Post Office employees and Military Agents, clerks of courts, magistrates, etc.). In order to insure uniform performance of the functions assigned to passport agents, it is necessary to exercise control over the number and quality of such agents as well as know who they are, which is not true in all cases presently. They are in the front line of contact with the American public and represent the Service and the United States Gov-

ernment in this capacity.

(d) The authority to empower passport agents and certain other employees minister oaths in connection with their duties is without statutory basis at present although it is provided for by regulation. This subsection would grant this authority

without question.

(e) The authority to establish and mainpassport facilities presently resides in the Secretary of State but is rarely exercised. There are presently eleven Passport Agencies in the United States which issue passports. Most have been in existence for a long period of time. The last agency to be opened was at Philadelphia in 1967, despite a steady increase in volume of passports issued. Since the Philadelphia Passport Agency was opened, the volume of passports issued has grown to approximately 237,000 in FY 1976. For 8 years the Passport Office has recognized the need for additional facilities to serve the needs of the American public. The U.S. Passport Service must have the authority to meet needs and demands for more efficient, effective and convenient public service.

(f, g, and h) The authority in the Service to acquire its own physical facilities, whether by lease or construction is vital. The Passport Office has a long history of being moved from place to place and assigned to various physical structures without regard to the peculiar requirements of its functions. Since 1943, the Passport Office has been moved five times. Since 1974, the Passport Office has been working with the General Services Administration (GSA) in an attempt to secure a facility designed to meet its specific physical needs. The Senate Public Works Committee, in Senate Public April 1976, requested GSA, under Section 11(b) of the Public Buildings Act, to report on the feasibility of such a new structure. The report has not yet reached the Committee. These subsections of the Bill would give the Passport Service the authority to acquire property and buildings to meet its special needs.

(i) The Passport Office presently must work through the Department of State's central contract office despite that office's unfamiliarity with Passport Office needs and the types of contracts required to more efficiently produce passports. This has resulted in serious delays in consummating vitally needed contracts and on occasion in costly errors. The Passport Office presently employs an engineering staff, an experienced contract officer and an experienced contract lawyer. This Bill would grant the Service the authority to utilize this talent and experience to consummate contracts in a manner most efficient and economical for the Government and ultimately to the public.

This subsection is a necessary companion to the authority of the Service's au-

thority to contract.

Beginning in 1902, and even in the depth of the depression in 1932, the Congress has indicated a policy and legislated passport fees which clearly show that the issuance of United States passports shall return revenue ("profit") to the United States Treasury. If the Passport Office is not permitted to modernize itself, the cost of producing a passport will exceed the \$10 passport fee set forth in Section 214, Title 22 of the United States Code. The present fee was established in 1968 and has not been increased since that year, notwithstanding the drastic inflationary costs of materials and labor which has occurred in the 9 year period.

If the Congress continues to require that passport fees return revenue to the Treasury and if the United States Passport Service is to operate on a business-like basis, selling a necessary product to the public, it is essential the Service have the authority to adjust passport fees upward or downward as the economy may justify. This becomes even more necessary if a revolving fund, as set forth in Sections 4 and 5 of the Bill, is established for

Section 4: This provision establishes a revolving fund for the U.S. Passport Service. An initial capitalization of the fund is granted by appropriation based on realistic estimates of the costs of all passport operations including a pro-rata share of services performed for the Service by the Department of State. The initial capitalization also includes the fair market value of all existing assets of the present Passport Office. During each fiscal year, revenue brought in by the Service from passport fees and other services would be used for operating costs and to restore any impairment to the fund. At the end of each fiscal year, all revenue received over and above the capitalization of the fund would be deposited to the Treasury as miscellaneous receipts. The fund would cover all expenses of the Service, including the establishment of agencies and the construction and/or lease of facilities to house itself. The authority granted by Section 3(k) of the Bill to establish passport and other fees for services rendered would ensure that revenues at all times offset the expenses of operating the

Section 5: This section provides for a business-type annual budget and sets up strict accounting procedures under which the revolving fund must operate. It further provides that the fund's operating and accounting procedures must be in accord with principles and standards prescribed by the Comptroller General of the United States, Annual audits and reports are required to be submitted to the President and the Congress.

Section 6: This provision constitutes a general repeal of statutes or parts of statutes which conflict or are inconsistent with the United States Passport Service Bill.

In all respects, the proposed Bill creates a semi-autonomous United States Passport Service with the resources and flexibility to meet the constantly growing demands of the travelling American public for passport services without additional cost to American taxpayers. It provides fast, efficient and cost effective service to the public, which it deserves and for which it pays through its fees. It also permits the decentralization of passport services, thus bringing them closer to the AmeriWORKLOAD FIGURES AND AREAS AFFECTED BY THE ESTABLISHMENT OF PASSPORT FIELD AGENCIES IN TEXAS, MICHIGAN, AND CON-NECTICUT

Texas: There is no Passport Field Agency in Texas. Applications for passports accepted in the State of Texas are either forwarded to New Orleans or to Los Angeles for processing. Over 63% of the workload in New Orleans originates in the State of Texas, while Los Angeles receives approximately 7,000 passport applications each year from Texas. The approximate total count of passport applications from the State of Texas reached 135,520 in calendar 1976.

Complaints from passport applicants from Texas who have required emergency services that in such cases, Texans hire planes to fly to either Los Angeles or to New Orleans in order to obtain expeditious services.

Specifically, Los Angeles handles all Texas passport applications originating in all coun-West of the Pecos River. New Orleans handles all Texas passport applications originating in all counties East of the Pecos

The growth of Texas in every conceivable category of population and human endeavor is well known. The Passport Office has recommended the establishment of a Passport Field Agency in Texas as the most efficient, economic, and expeditious method of handling the ever-increasing volume of overseas travel from that State. The Passport Office's recommendations were in line with the clearly stated policies of the last five Administrations, and the specific aims of the past five Presidents of the United States who stressed more emphasis on public service, efficiency and decentralization.

Michigan: There is no Passport Field Agency in Michigan. Applications for passports accepted in the State of Michigan are either forwarded to Washington, D.C. or Chicago for processing. Over 14% of the work-load in Washington, D.C. originates in the State of Michigan, while Chicago receives approximately 21,000 passport applications each year from Michigan. The total count of passport applications from the State of Michigan reached 93,600 in Calendar Year 1976 and conservatively will reach 108,000 in Calendar Year 1977. Passport applicants from Michigan continuously complain about having to fly to Chicago, Washington, D.C. New York in order to obtain emergency passport services.

Specifically, Washington, D.C. handles all Michigan passport applications from the en-Lower Peninsula. Chicago handles all Michigan passport applications originating

in the Upper Peninsula. The growth of Michigan in every conceivable category is well known. As the fifth largest city in the United States, Detroit is the country's largest producer of motor vehicles and one of the nation's largest financial centers. It has ranked as the number one city in the nation in value of foreign exports or manufactured products. Detroit serves much of the heavily populated mid-west as an international travel center for both business and tourist travel abroad. Passport volume from this area has climbed by 800% since 1949, the date of reopening of the Chicago Agency, the nearest field agency to Detroit.

Connecticut: There is no Passport Field Agency in Connecticut. The entire northeastern United States is served by the three existing agencies at New York, Boston and Philadelphia. Applications for passports accepted anywhere in Connecticut must be forwarded to Boston for processing. 24% of the workload in Boston originates in

the State of Connecticut.

Passport applicants from Connecticut, especially the southern tier adjacent to New York, constantly complain about the delays encountered in forwarding their applica-

tions to the Boston Agency. As a result, thousands who reside in the southern portion of Connecticut personally travel to the New York Agency for quicker service. This volume is in addition to the heavy volume already handled by the New York Agency from all Boroughs and the Counties of Orange, Putnam, Westchester, Rockland, Nassau and Suffolk. Nearby New Jersey applicants (about 37,000) also tend to apply in person at the New York Agency rather than travel to distant Philadelphia.

As a result, the New York Agency's vol-ume during Calendar Year 1976 was 363,000

applications, of which 128,000 (35%) were executed in person at the New York Agency counter. Due to severe personnel and space limitations imposed upon the Passport Office, this volume created serious condi-

tions at the New York Agency.

The establishment of an additional Field Agency in either southern Connecticut or in the New York Metropolitan area would have significant impact upon easing these unacceptable conditions caused by heavy volume at the New York Agency.

By Mr. BROOKE:

S. 1255. A bill to provide for reconstruction assistance for the victims of the recent earthquakes in Italy, and for other purposes; to the Committee on Foreign Relations.

ITALY DISASTER ASSISTANCE ACT OF 1977

Mr. BROOKE. Mr. President, I am today introducing legislation that will authorize further assistance for the victims of the earthquakes in Italy that occurred in the summer and fall in 1976. The \$25 million proposed for this purpose in this bill will become available in

fiscal year 1978

I believe all Americans can be pleased with the excellent use of the original \$25 million provided to assist victims of this terrible disaster. Those funds are being utilized to construct schools in the Italian Provinces of Udine and Pordenone and an old-age home to be built by the National Association of "Alphini" Veterans. An additional old-age home may also be built with these funds. Amounts have also been allocated to cover the costs of the emergency supplies that were made available in the immediate aftermath of the disaster.

While a good start has been made on helping the affected populace rebuild their destroyed homes and cities, much more needs to be done. Italian estimates place the total cost of the damage from one of the worst earthquakes to strike Europe at \$4.9 billion. While the major burden for meeting the rehabilitation and reconstruction needs must be borne by the people of Italy, I am convinced that the American people are willing to make this modest additional contribution to their efforts.

Legislation similar to the bill I am proposing has been introduced in the House. Moreover, there is a bill pending in the Senate that would provide \$10 million for assistance to Italy in fiscal year 1977. I certainly support that initiative by Senator Kennedy and Senator Pell and ask that my name be added as a cosponsor to their measure.

The original \$25 million plus the \$10 million proposed for fiscal year 1977 plus the \$25 million I am proposing for fiscal year 1978 will enable the American

people to make a significant contribution to the renewal of hope for the people of the Friuli region of Italy. I, therefore, hope that the Senate Foreign Relations Committee, in its consideration of foreign assistance authorization for fiscal year 1978, will give serious consideration to the proposal I am introducing today.

By Mr. MATHIAS:

S. 1256. A bill to eliminate the complete immunity from criminal, civil, and administrative jurisdiction currently given to all foreign diplomats and their staffs and to establish the Vienna Convention on Diplomatic Relations as the basis for diplomatic privileges and immunities in

the United States; and

S. 1257. A bill to require that members of the diplomatic community accredited to or resident in the United States shall, as a prerequisite to owning or operating a motor vehicle in the United States, satisfy the appropriate issuing authority that any claims for personal injury or property loss resulting from such operation will be satisfied by an insurer and are enforceable by a direct action against such insurer; to the Committee on Foreign Relations.

DIPLOMATIC IMMUNITIES ACT OF 1977 AND DIPLOMATIC INSURANCE PROTECTION ACT

Mr. MATHIAS. Mr. President, I am today introducing two bills aimed at achieving important, interrelated goals: Modernizing our antiquated diplomatic laws and helping insure that American citizens, who suffer personal injury and property damage in accidents involving diplomatic personnel, are not left without remedy. Before describing the two bills in detail, let me illustrate the inequities of our present system of diplomatic immunity.

Almost 3 years ago, a married coupleboth prominent Washington physicianswere driving in the District of Columbia when a car ran a red light and slammed into their car. The drivers of both vehicles suffered painful injuries, but they paled in comparison to those inflicted upon the female physician. This tragic incident confined her to a hospital bed for over a year and a half. It rendered her a quadriplegic; it deprived the Washington area of a skilled doctor at the peak of her talents. Compounding the tragedy was the failure of the victim to obtain any financial compensation from the offending driver to help offset the enormous medical costs incurred. For this was no ordinary accident. The driver of the other vehicle was a cultural attache of a foreign embassy and thus was fully shielded from legal suit by the doctrine of diplomatic immunity. The only recourse for the victim was to make a futile request to the driver's embassy for indemnification. Thus, the victim received no compensation for her injuries, despite indisputable evidence that the driver of the second vehicle was at fault.

How can we permit such an intolerable and inequitable situation to exist? The answer lies in two major deficiencies in the system of diplomatic immunity that prevails in this country. First, our diplomatic immunity law, unchanged since its enactment in 1790, provides absolute immunity from criminal, civil, and administrative jurisdiction for all diplomatic personnel, regardless of rank or dutes. This outdated law fails to distinguish between an ambassador and his cook and thus gives far broader diplomatic immunity than our own envoys enjoy abroad. Second, and equally serious, there is no adequate mechanism in this country to compensate individuals injured in traffic accidents involving diplomatic personnel. The law precludes you from suing diplomatic personnel to recover for damages and, in fact, adds insult to injury, by subjecting to possible criminal penalties anyone who attempts to bring such a legal action. This is an intolerable situation, especially in a locale such as the Washington area, where there are such a large number of diplomatic personnel-it must be corrected without further

Last year Congress took a step in the right direction when it enacted the Foreign Sovereign Immunities Act (Public Law 94-583). This law allows recovery against foreign nations for the tortious acts committed by its officials and employees while acting within the scope of their employment and it permits execution against any insurance policy held by the foreign nation covering any such accidents. Under this new law, a foreign nation no longer is immune from suit for tortious acts-including auto accidents-committed by its representatives performing their official duties. It will provide some relief for Americans. But, alone it does not guarantee fair and equitable compensation for Americans injured in car accidents with diplomatic personnel. The Foreign Sovereign Immunities Act has two loopholes:

There is no requirement that the for-

eign nation obtain insurance.

It does not cover all those situations where the injurious acts are committed outside the foreign employee's official duties.

Obviously, more legislation is needed to supplement Public Law 94-583.

I am convinced that the two bills I introduce today fill these loopholes, satisfactorily update our diplomatic laws, and help insure adequate compensation to Americans involved in auto accidents with foreign diplomatic personnel.

In developing this legislative package, I have been ably assisted by the distinguished international law scholar, Professor Adrian Fisher, former legal advisor to the State Department and presently is on the faculty of the George-

town University Law Center.

The first bill would repeal the 1790 diplomatic immunity statute and establish the 1961 Vienna Convention on Diplomatic Relations as the basis for determining diplomatic privileges and immunities in the United States. This legislation is the Senate counterpart of a bill previously introduced in the House of Representatives by the distinguished Virginia, Representative from Mr. FISHER. This legislation would have the salutary effect of replacing the absolute immunity conferred upon all diplomatic personnel, regardless of rank or function. with the Convention's provisions making the degree or scope of immunity commensurate with the rank and duties of the embassy personnel. Thus, no longer would an embassy chauffeur or cook engaged in wrongful conduct injurious to an American citizen be granted exactly the same scope of immunity from our legal processes as an ambassador would enjoy

It seems to me that the Vienna Convention, carefully drafted by the United Nations International Law Commission and debated at length by 81 participating states at the 1961 Vienna Diplomatic Conference, is more appropriate to modern day diplomatic realities than the antiquated 1790 statute. In addition, since the Convention is self-executing, it automatically became part of U.S. domestic law upon ratification in 1972, without need for further congressional implementation. Hence, repeal of the 1790 statute would eliminate legal ambiguities which result from statute and Convention existing simultaneously, and it would bring the U.S. grant of diplomatic immunity into conformance with the Vienna Convention, and contemporary international practice.

Repeal of the 1790 act would not, however, eliminate the serious problem of insuring compensation to American citizens who suffer personal injuries and property damage in an auto accident with diplomatic personnel. Repeal would restrict the scope of immunity conferred, but, standing alone, it would not provide economic protection for injured

Americans.

For example, an American citizen driving lawfully through the streets of metropolitan Washington whose car is rammed by a car driven by the Ambassador of a foreign country on his way to an official meeting at the Department of State might not be able to collect damages because of the two loopholes I just described which the Foreign Soverign Immunities Act did not plug. Section 31 of the Vienna Convention, to which the United States became a party on December 13, 1972, would still preclude the American from suing the Ambassador. Congress must develop a mechanism that recognizes the inviolability of a diplomat, but at the same time, provides an aggrieved victim with an efficient, sure means of adequate and just compensation. The second bill I now introduce creates such a procedure.

At least 13 foreign countries, mostly European, and including 12 that are signatory to the Vienna Convention, require that members of the diplomatic community accredited to or present in such country, maintain some form of motor vehicle insurance, in order to insure that victims of motor vehicle accidents involving such a member are adequately compensated for their injuries and losses. The United States is one of the few Western countries which does not require such insurance. However, in seeking to adopt an appropriate procedure to provide for adequate compensation for injured Americans, it must be remembered that Congress cannot infringe upon a diplomat's inviolability from legal action. Consequently, a procedure merely requiring a diplomat to carry automobile liability insurance would not be an effective tool, since the injured party cannot sue the diplomat in order to obtain compensation. Therefore, compulsory auto liability insurance must be coupled with a mechanism providing for direct enforcement of the policy against the insurer without in any respect impinging upon the important protections afforded those enjoying diplomatic immunity. I am convinced that my bill will achieve this result. Specifically, my bill would:

Require compulsory auto liability insurance for all diplomats or those holding equivalent immunity and preclude a State from giving a diplomat a driver's license or car registration approval unless adequate proof of insurance is dem-

onstrated:

Allow an injured party to bring an action against the diplomat's insurance company; and

Preclude the insurer from asserting the diplomatic immunity of the insured as a defense against any claim covered

by such policy.

By focusing on the insurer rather than on the diplomat, my bill avoids any necessity of legal proceedings against a diplomat. The concept of mandatory direct action auto liability insurance is not novel.

The concept of direct action insurance has been upheld by the U.S. Supreme Court.

The administrator of the Maryland Department of Motor Vehicles, Ejner Johnson, has urged Congress to adopt a system which prevents a diplomat's insurance company from claiming as a defense the immunity of the diplomat.

As an illustration of how this proposal might work in practice, assume the following hypothetical situation: "A," a fully accredited diplomat, runs a red light in Maryland and hits an automobile driven by "B," a Maryland resident who suffers serious bodily injury resulting from the collision and whose car is virtually demolished. "A" carries auto liability insurance required by this proposal.

Under the provisions of the Convention, "A," under most circumstances, would be immune from any lawsuit, assuming, of course, the diplomatic immunity is not expressly waived. Under my proposal, however, "B" would have a direct cause of action against "A's" insurance company. Again, the question of legal action directly against the diplomat never arises. At the same time, the injured party, "B," has his day in court and therefore at least an opportunity to receive some form of compensation for his injuries.

My second proposal would also create within the Department of State an office to review claims against members of the diplomatic community which for some reason are not satisfied under the insurance provisions of this bill. The office, where appropriate, would pay out sums to satisfy these claims from a fund financed by the U.S. Government. The United States in turn would seek reimbursement from the foreign nation involved.

As a Senator from a State where a large number of individuals possessing diplomatic immunity live, I am keenly aware both of the need for modernizing

existing laws to bring them in conformity with current international practice and the need to devise a mechanism to insure that Americans injured in auto accidents are not left without redress. At the same time, I am in agreement with the scope of diplomatic immunity provided by the Vienna Convention and recognize that the purpose of such immunity is not to benefit individuals, but to insure the efficient performance of diplomatic duties. This purpose can be fulfilled best if the concept of diplomatic immunity keeps pace with theory of risk sharing contained in our developing law of insurance.

I urge my colleagues to support these proposals and to help bring about a much-needed overhaul of our diplomatic immunity laws in the 95th Congress.

By Mr. MAGNUSON (for himself, Mr. Allen, Mr. Church, Mr. Danforth, and Mr. Thurmond):

S. 1258. A bill to provide for the designation of the libraries of accredited law schools as depository libraries of Government publications; to the Committee on Rules and Administration.

DESIGNATION OF LIBRARIES OF ACCREDITED LAW SCHOOLS AS DEPOSITORY LIBRARIES

Mr. MAGNUSON. Mr. President, title 44 of the United States Code provides for the designation of libraries in the United States to receive certain Government publications. These are commonly known as Federal depository libraries.

There is a group of libraries which are in dire need of depository status, but are unable to do so because of the restrictive nature of title 44. The libraries I am referring to are all from American Bar Association accredited law schools. The law students at these institutions have been at a great disadvantage over the years without these publications. The need for these publications is even greater today due to the growing impact that the legal profession has upon the agencies which contribute materials to the Federal depository system and vice versa. The legislation I have introduced would give these ABA accredited law schools the option of becoming Federal depository libraries.

Nearly one-half of the 164 ABA accredited law schools have no direct access to U.S. Government documents. The absence of these publications has a crippling effect on these law schools. Law Libraries are the center of research and study for the law students and also for the faculty members who need to enhance their specialties. Without these Government publications students in law classes such as constitutional law, Federal taxation, administrative law, all labor law courses, and many more will suffer immeasurable harm since they will not have the benefit of current trends in these specialized areas.

The necessity for depository status of these law school libraries is especially vital to fulfill not only the constant needs of the students, who must keep abreast of their classes and the increasing influence of law in all three branches of Government; but also faculty members; citizens of the community, who will have access to these Federal docu-

ments; and businesses whose interest may be effected by Government reports,

opinions, or bulletins.

Mr. THURMOND. Mr. President, I rise in support of the bill introduced by the able Senator from Washington (Senator Magnuson). This bill will provide for the designation of the libraries of accredited law schools as depository libraries of Government publications.

Mr. President, a great need has arisen among law school libraries of this country to become Federal depositories. However, under the present law, that is not possible. The current law limits the number of depository libraries in each congressional district to a very few.

The need for Government documents in law libraries has reached a critical stage as more and more courses are structured around governmental regulations. This is especially true of courses in administrative law, collective bargaining, and labor law. In my home State, the University of South Carolina School of Law offers one of the most outstanding course programs in labor law in this country. The students must often do without documents vital to their instruction because of the problems inherent in obtaining Government documents.

Not only law students, but often entire legal communities are reliant on these documents. The University of South Carolina School of Law is the only law school in South Carolina and is the law center for the entire State. Making this library a depository library would vastly improve the resources available for the whole legal community in my State.

Now, Mr. President, this situation is not unique to South Carolina. Even in large States with a number of law schools, having all the resource materials for legal research available in one building will tremendously improve the speed and quality of legal research. Of course, this improvement will accrue to the benefit of the public through upgraded legal services.

Mr. President, I am very pleased to be a cosponsor of this important legislation. We would do a great service to the people of the United States by acting fa-

vorably upon it.

By Mr. BROOKE (for himself, Mr. Kennedy, and Mr. Haskell):

S. 1259. A bill to amend the Small Business Act to authorize loans under such act to small business concerns adversely affected by temporary local economic and/or weather conditions and to permit deferral of repayment; to the Select Committee on Small Business.

Mr. BROOKE. Mr. President, as I have pointed out before to my colleagues in the Senate, there is a severe economic crisis in the town of Mashpee, Mass., as a result of Indian land claims which have put all the titles in the town under a cloud. Unlike any of the larger political entities who are defendants in similar suits, the town of Mashpee is not large enough to keep its economy functioning smoothly in the face of these claims. I have been working with the people of Mashpee to determine what kind of in-

terim emergency assistance would be most useful pending final resolution of the claims.

My research with townspeople and people doing business in the town of Mashpee has led me to conclude that the most urgent need for emergency help is the need of those local small businesses who depend upon the real estate market for their activity. Since all real estate transactions in Mashpee have come to a halt many of these businesses are threatened with bankruptcy. Although at the moment we can offer no permanent solution to this economic problem because the only permanent solution will involve clearing the titles, I believe we can keep Mashpee businesses alive until the suit is settled and they can pursue their normal activities. As I see it in most urgent need is for working capital to keep minimal activities underway.

Unfortunately, no existing small business assistance program would cover the plight of the Mashpee businesses. Not only is the Small Business Administration conservative in its interpretation of what constitutes a commercially reasonable loan, for example, there have been questions raised as to whether the cloud on title disqualifies any businesses from eligibility for SBA assistance, but also most available loan programs would not help Mashpee businesses even if such assistance were awarded.

For example, the situation in Mashpee cannot qualify under any existing disaster assistance statutes so that immediate widespread assistance is simply not available. An even more practical consideration is that existing SBA loan programs of course require a conventional agreement regarding payment of principal and interest by the borrower, but Mashpee businesses which have no cash flow at the moment are truly unable to meet the obligations at very near

erm.

Therefore, I have been working for some weeks with the Small Business Committee and specifically with my colleague Senator Haskell, who is the acting chairman of the Senate Select Committee on Small Business, to come up with a solution with Mashpee. The result of our labors is the bill I am filing today for myself, Senator Haskell and for Senator Kennedy.

This bill provides a new section in the Small Business Act which will provide a special set of considerations for the Administrator to take into account when receiving loan applications from small businesses where an unusual economic dislocation has resulted from some unforeseen cause not covered under any

other disaster statute.

The section says that an extraordinary, temporary and/or local economic condition, including bad weather, of the kind that has affected some ski resort areas, and of course including such social events as the Indian land claims suit being filed will make small businesses in the areas affected eligible for this special consideration. The loans may be either directly from the Small Business Administration or may come in the form of loan guarantees.

Furthermore, the Administrator has the discretion to defer any repayment of principal or interest on these loans for a period of a year. These provisions are essential; they bring business people in Mashpee or in areas which may in the future suffer unprecedented and unpredictable events, such as pollution from an oil spill or extraordinarily unseasonable weather, into the ranks of those eligible for Federal small business assistance. Furthermore, it sets up terms which would meet the real needs for a flow of working capital in the short term.

A second part of my bill, which contains language which has already passed the House of Representatives, changes the conditions under which every loan program administered by the Small Business Administration is set up. In the future, when this provision becomes law, the Administrator will be empowered to defer repayment of principal and interest on any of these loans in the event that a small business can be determined to have a good chance of succeeding with such deferment and a certainty of bankruptcy without it. This added flexibility is essential if we are to meet the many varied and sometimes unpredictable needs of small enterprises in our Nation. The protections of this kind of flexibility should not be limited only to the businesses I specified in the first part of the bill, namely, those who suffer from an unnatural and unusual disaster. All small businesses served by the Small Business Administration should have the opportunity to fall back on such emergency provisions.

I believe, Mr. President, that it is also essential that we change the Small Business Act in another way. As I testified before the Senate Select Committee on Small Business on March 3, it is essential that we redefine all disaster assistance for small businesses so that not only tornadoes, floods, fire, and hurricanes, the conventional set of disasters, qualify people for assistance so that unforeseen and unusual events will also trigger such aid. Senator HASKELL and I have drawn more general provisions and he will be introducing shortly legislation for himself and for me which will amend the Small Business Act so as to protect small enterprises against a far wider and more flexible range of adverse economic impacts.

In all candor, I must reiterate my statement of 2 days ago which I made when I introduced the emergency mortgage assistance for Mashpee which passed the Senate on April 4. This kind of emergency assistance for either homeowners of small businesses is no panacea for Mashpee. It will assist hardship cases with a minimal level of support for the short term. It will avert extreme personal economic tragedies. It will not alleviate all the economic injuries and all the suffering that befall the people of Mashpee. Nothing can provide such a across-theboard solution except the final settlement of the Indian land claims. I intend to do everything I can to hasten that long-awaited solution.

Mr. President, I ask unanimous con-

sent that my bill to amend the Small Business Act and the section-by-section analysis of the bill and a report I have prepared on my efforts to work for the people of Mashpee, which I believe it is important for my colleagues in the Senate to read and understand, be printed in the RECORD following my remarks.

There being no objection, the bill and material were ordered to be printed in

the RECORD, as follows:

S. 1259

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, (a) That section 7 of the Small Business Act amended by adding at the end thereof the following:

- "(1) The Administration is empowered to make loans either directly or in cooperation with banks or other lenders through agreements to participate on an immediate or deferred basis repayable in not more than 3 years to small business concerns which have been adversely affected by an extraordinary temporary and/or local economic or weather condition. The Administration shall permit in connection with any loan under this subsection a deferral of repayment of principal and interest for not to exceed one year where it determines such action would be appro-
- (b) Section 4(c)(1)(B) of such Act is nended by inserting "7(1)," after "7(1),"

amended by inserting "7(1)," after "7(1),"
(c) Section 7(c) (4) of such Act is amended by inserting "7(1)," after "7(i),".

(d) Section 5 of the Small Business Act is amended by adding at the end thereof the

following new subsection:

- "(f) (1) Subject to the requirements and conditions contained in this subsection, upon application by a small business concern which is the recipient of a loan made under this Act, the Administration shall assume the small business concern's obliga-tion to make the required payments under such loan or shall suspend such obligation if the loan was a direct loan made by the Administration. While such payments are being made by the Administration pursuant to assumption of such obligation or while such obligation is suspended, no such pay-ment with respect to the loan shall be required by the small business concern.
- "(2) The Administration shall assume or suspend for a period of not to exceed five years any small business concern's obligation under this subsection only if-
- "(A) without the assumption or suspension of the obligation, the small business concern would, in the opinion of the Administration, become insolvent or remain insol-
- "(B) with the assumption or suspension of the obligation, the small business concern would, in the opinion of the Administration, become or remain a viable small business entity; and
- "(C) the small business concern executes satisfactory agreement in writing as provided by paragraph (4).
- "(3) Notwithstanding the provisions of sections 7(a) (4) (C) and 7(i) (1) of this Act, the Administration may extend the maturity of any loan on which the Administration as sumes or suspends the obligation pursuant to this subsection for a corresponding period of time.
- "(4) (A) Prior to the assumption or suspension by the Administration of any small business concern's obligation under this subsection, the Administration, consistent with the purposes sought to be achieved herein, shall require the small business concern to agree in writing to repay to it the aggregate amount of the payments which

were required under the loan during the period for which such obligation was assumed or suspended, either-

"(i) by periodic-payments not less in amount or less frequently falling due than those which were due under the loan during such period, or

pursuant to a repayment schedule agreed upon by the Administration and the small business concern, or

'(iii) by a combination of the payments described in clause (i) or clause (ii)

(B) In addition to requiring the small business concern to execute the agreement described in subparagraph (A), the Administration shall, prior to the assumption or suspension of the obligation, take such action, and require the small business concern to take such action, including the provision of such security as the Administration deems appropriate in the circumstances, as may be necessary or appropriate to insure that the rights and interests of the lender will be safeguarded adequately during and after the period in which such obligation is so assumed or suspended.

"(5) The term 'required payments' with respect to any loan means payments of principal and interest under the loan."

(e) Section 4(c) of the Small Business Act is amended by inserting in clauses (1) (A) and (2) (A) thereof "5(f)", after the word "sections".

SECTION-BY-SECTION ANALYSIS OF A BILL TO AMEND THE SMALL BUSINESS ACT

(a) A new loan authority is given to the SBA administrator to make direct loans or loan guarantees available to otherwise sound small businesses when an extraordinary disaster affects the local economy. Such disaster need not be a natural disaster as defined in the Disaster Assistance provisions of the Act. Rather it may be a temporary economic condition caused by unpredictable factors including but not limited to weather or social events.

Loans made under this section are 3 year loans but the SBA may defer any repayment of either principal or interest for the first

- (b) and (c) technical conforming amendments
- (d) Provides that all loans programs administered under the Act may be given additional flexibility in that the SBA may assume a small business' obligations under such programs for a period not to exceed 5 years.

This assumption of the obligations for a suspension period may only be made if the Administrator determines 1) that the business would fail without it but succeed with it and 2) that the business provides security and a plan for repayment.

(e) technical conforming amendments.

SENATOR EDWARD W. BROOKE'S REPORT TO THE PEOPLE OF MASHPEE

On February 28th, I attended an open town meeting in Mashpee and discussed with hundreds of residents of that town the impact of the Indian land claims. I discussed a number of potential solutions to the severe economic problems the suit has caused. Some were solutions I had already investigated and found to be undesirable, such as extinguishing the Indian claim through retroactive legislation or complete Congressional indemnification of the properties affected. Many others seemed to be potentially useful ways of mitigating the adverse impacts of the suit. And I promised to continue working on my own ideas and on those that were presented to me in the town meeting. Today, I am presenting this interim report to the people of Mashpee to detail some steps I have taken since that meeting to provide further assistance to the townspeople and

to get various items of information that were asked of me.

EMERGENCY ECONOMIC ASSISTANCE

First, I promised to continue to seek ways to provide economic assistance to homeowners and entrepreneurs who were suffering unusual hardships as a result of the cloud over all titles. As I pointed out at the meeting, I had already looked into all existing disaster relief statutes and found them to offer no assistance in the Mashpee case.

The research my staff and I did in Mashpee with banks and financial institutions led me to conclude that the most pressing needs is for working capital for those small businesses who are out of business because of Mashpee's depressed real estate market. Therefore, I have been working with the Senate Small Business Committee members to get the law changed so as to help Mashpee and other areas on whom unforeseen casualties fall.

On April 6 I introduced a bill which Senator KENNEDY has cosponsored and which Congressman STUDDS has now introduced in the House providing for a new category of small business loans to provide working capi-tal to otherwise sound businesses affected by temporary economic adversity. These loans may be either direct loans from SBA or loan guarantees. And the business may be permitted to delay repayment of principal or interest for at least the first year. I expect this bill to have an excellent chance of passage.

Also, we have been concerned that continuing unemployment in Mashpee will begin to affect homeowners' ability to pay their mortgages in the near future. To provide standby relief, I submitted and Senator KENNEDY cosponsored an amendment to the Emergency Homeowners Relief Act. Now, the Secretary of HUD can review Mashpee's unique plight and, if unemployment statistics warrant it, make available to those unemployed homeowners, who are truly incapable of meeting their mortgages and are threatened with foreclosure, payments to financial institutions for mortgage obligations on their principal residence. One million dollars was appropriated for such use in Mashpee. I should point out that I have called this "standby assistance" because I know of no move by banks as yet to foreclose on people's homes. However, since Housing Act amendments were being considered by the Senate, I felt it prudent to provide such authority although I fervently hope it will not be needed.

A third action I pledged to take was to contact title insurance companies to see if they might write policies that would permit properties to be transferred in Mashpee in those cases in which people desperately need to move for personal or economic reasons.

On March 21 I invited executives of companies holding policies in the town to meet with me in Washington and I asked them to consider this bold but justifiable undertaking. I can now report that two of the participants in that meeting, the Lawyers Title Insurance Company, Chicago Title Insurance Co., have agreed to insure properties of who would suffer exceptional personal hardships were they unable to sell. However, there is still a lot of work to do on this project. Other insurers need to be persuaded to follow this progressive example and financial institutions need to become involved in the problem. I intend to pursue this matter vigorously.

To look for additional interim assistance for the town, I had the Federal Regional Commission set up a meeting between the town selectmen and all Federal agencies that might be able to offer help. The resources available were detailed for the officials. Most of the agencies stated that, in most cases, the pending land claims would not be a bar to providing their regular program benefits.

LONG TERM SOLUTION

I continue to believe that the greatest hope for Mashpee lies in the hands of the President of the United States, and that his appointment of a personal delegate to serve as negotiator or conciliator can bring about a solution which both sides can accept and which the Congress will be willing to support.

I first joined Speaker O'NeILL, Senator Kennedy, and Congressman Studds in asking the President to send an emissary on February 9 of this year. After my visit to Mashpee, I sent him a telegram detailing what I learned and outlining how badly the mediator or conciliator is needed, especially in light of the appointment of a Presidential representative to work on the claims in Maine.

After another month of White House inaction, I wrote again on March 26 and asked President Carter to meet with me and/or with the parties involved if he had some reservation standing in the way of a possible appointment. To date, the White House has agreed to meet with both plaintiffs and defendants in the near future. I hope this will signal the beginning of the exercise of Presidential oversight and influence we so badly need.

I also pledged to keep an open mind about the proposal advanced by some to make part of Mashpee a national park in spite of the apparent opposition of the National Park Service. Although there is no change in the NPS's general posture, they have agreed to review any concrete proposal. I have therefore asked those in Mashpee who were advancing this suggestion to give me a written preliminary proposal.

Finally, I discussed at the town meeting, my strong feeling that the burden on local property taxes resulting from the town's legal fees is too heavy for the slender municipal resources and I pledged to investigate all possible sources of relief. The Library of Congress undertook this work and has reported back to me that, while there is no existing source of funding that can be tapped while the litigation is ongoing, legal fees may be legislated by the Congress. I again pledge to do everything I can to assure that the final congressional legislative package, whatever it may be, includes reimbursement to the town of Mashpee.

RELATED ISSUES

I was asked if members of the Mashpee tribe were receiving assistance to help them in the unique economic situation in the town, whereas other citizens did not seem to be eligible. I have looked into this with all the agencies that could conceivably be involved and there is no evidence that any Indian has received any special assistance. Although I assume that Indians may be eligible for any routinely available grants and assistance which they may be receiving I am satisfied there has been no special or unique consideration given members of the tribe as a result of the suit.

Also I was asked to look into two other federally related matters by participants in the public meeting. First, I was asked whether Federal funds to the Native American Rights Funds were financing the tribe's attorney's activities. They are not. The Native American Rights Fund provides a wide range of services to Indians and Indian tribes and Federal funds from HEW and the Legal Services. However, a subdivision of NARF, the Eastern Indian legal support project, pays for the costs of the Mashpee and other Eastern litigation and that EILSP is entirely funded by the Lilly Endowment of Indianapolis, Ind., a private foundation.

I expect to keep pursuing all avenues of possible assistance for Mashpee, and I will

continue to be in touch with all parties to this suit. I feel we have made great strides in the last few weeks. But I must reiterate that all the help we have begun to secure is only an interim solution. It is directed at those cases of most severe personal suffering to avoid acute personal tragedy. It cannot relieve the real, but less extremely injury suffered by many more citizens of the town. Such relief will come only when the cloud over titles is removed by virtue of a final settlement of the claims. I will do whatever I can to hasten that ultimate solution.

Mr. KENNEDY. Mr. President, since August 23, 1976, the residents of Mashpee, Mass., have been in the middle of a land dispute which has clouded title to virtually all property in Mashpee. The people in Mashpee are currently involved in discussions which, within a reasonable time could lead to resolution. During these discussions, however, the economic stability of Mashpee is declining drastically.

While all sides remain confident that an amicable resolution can be achieved, property owners are experiencing extraordinary temporary hardship. The clouded title has made it impossible for the banking community to approve the once normal transactions of mortgage loans or even home improvement loans.

Last Friday, my amendment to the 1977 supplemental appropriations bill was adopted by the Senate, and earlier this week conferees agreed to retain in the bill the \$1 million which I added to give Mashpee homeowners the ability to obtain temporary assistance. Additional minor adjustments to the authorizing legislation were made on Monday; when these are accepted by the House, these funds will be available for homeowners in danger of foreclosure.

In addition to the crisis facing homeowners, the business community of Mashpee is experiencing similar economic repercussions. The situation of Dante and Eva Paliuca is typical of many small business persons in the community. The Paliucas opened a family-style restaurant in Mashpee 3½ years ago, obtaining a mortgage for \$135,000.

During the recent economic recession, which hit the Northeast especially hard, the Dantes managed to make ends meet. Many of the restaurant's customers are in some way connected with Mashpee's home building and home improvement industry. Since the suit has clouded title and brought the real estate and associated construction businesses to a standated construction businesses to a standated considerably.

The Paliuca family has had to dip into their small savings to help keep abreast of the payments on the remaining \$90,-000 mortgage. Mr. Paliuca has indicated to my office that if some type of relief is not forthcoming soon, his savings will run out and he will have to close his business

The bill I am sponsoring today with my colleagues, Senator Brooke and Senator Haskell, a member of the Senate Small Business Committee, will open up the possibilities for businesses such as the Paliuca's to apply for temporary assistance. The legislation would create a

program at the Small Business Administration to make short-term loans in areas adversely affected by an extraordinary temporary or local economic condition, like that presently affecting Mashpee.

I understand that the Small Business

I understand that the Small Business Committee intends to report out legislation on this subject in the next few weeks. I am hopeful that the provisions contained in this bill will be enacted, so that the business community of Mashpee will have the opportunity to obtain temporary financial assistance until the present negotiations are concluded.

By Mr. HART (for himself, Mr. Kennedy, Mr. Brooke, and Mr. Hatfield):

S. 1260. A bill to amend section 5701 of the Internal Revenue Code of 1954 to establish a Health Protection Tax; to the Committee on Finance.

THE HEALTH PROTECTION TAX ACT OF 1977

Mr. HART. Mr. President, today Senators Kennedy, Brooke, Hatfield, and I are introducing the Health Protection Tax Act of 1977, which would repeal the existing flat rate Federal cigarette excise tax and replace it with a graduated tax based on tar and nicotine content.

Mr. President, we, as Americans, have looked upon our people as our greatest resource and have valued our children as our greatest hope for the future. However, as a nation we have not yet committed ourselves to making the kind of public policy decisions which will prevent this most precious resource from being wasted through needless illness and early death.

For example, it has become increasingly obvious during recent years that environmental factors play a major role in contributing to disease. Unfortunately, all too often research is done, conclusions are drawn, and environmental hazards are identified, but we ignore obvious solutions to problems when those solutions involve more than nominal, short-term costs. As a result, we continue to allow many toxic substances to pollute our water, our land, and our air.

Probably the most glaring example of this refusal to deal with a known hazard is our attitude toward smoking. One quarter century ago, we had the preliminary data suggesting that cigarette smoking caused lung cancer. Over a decade ago, the Surgeon General's report clearly established that cigarette smoking causes lung cancer. Despite this, however, the 1975 HEW report to Congress on smoking and health begins by stating, "Cigarette smoking remains the largest single, unnecessary and preventable cause of illness and early death" in the United States.

Mr. President, the bill we are offering here today is designed to deal in a rational and reasonable way with the growing problem of cigarette smoking. The Health Protection Tax Act establishes a five-bracket tax to be phased in over a 4-year period. In the first year, our proposal would actually reduce the price of low tar and nicotine cigarettes by 8 cents per pack while increasing the price of the

most toxic "high" tar and nicotine cigarettes by as much as 12 cents per pack. By the fourth year, the tax will be completely phased in and the tax will then range from 8 cents less per pack to 42 cents more. Therefore, by decreasing the price of the "safest" low tar and nicotine cigarettes and substantially increasing the price of the most toxic cigarettes, this proposed reform in the Federal tax will provide a strong incentive for smokers to switch to "safer" low tar and nicotine cigarettes.

The urgent need for this action has been clearly documented in countless hearings and reports. During the 94th Congress, a number of Nobel-prize-winning scientists joined our Nation's leading physicians to testify before the Senate Health Subcommittee that smoking high tar and nicotine cigarettes is the leading preventable cause of disease in the United States. At that time they estimated that well over one-quarter million Americans die prematurely each year as a result of cigarette smokingwith heart disease and lung cancer ranked as the leading smoking-induced causes of death.

The force of this testimony has been augmented by the large number of national health organizations who have given their full support to our proposal. These groups include the National Cancer Advisory Board, the American Cancer Society, the American Heart Association, the American Lung Association, the American Public Health Association. the American Nurses Association, the National Kidney Foundation, the American College of Chest Physicians, the American Association of Neurological Surgeons, the American Medical Student Association, Action on Smoking and Health, the Cystic Fibrosis Foundation, GASP, the Metro-Washington Coalition for Clean Air, the National Health Federation, the National Health Education Committee, Inc., and the Cancer Insti-

Even more recently however, the Nation's leading environmental organizations issued a joint report, "The Unfinished Agenda," in which they listed the most critical environmental issues of the coming decade. It is no surprise that these prestigious groups included cigarette smoking among the 70 issues out-

Mr. President, it would be an understatement to say that the health problems now facing the country as a consequence of cigarette smoking are of crisis proportions. In order to better comprehend the magnitude of this problem, consider the following: Approximately one out of every three Americans smoke. American adults have a per capita consumption of more than 4,000 cigarettes per year. Eighty percent of our annual 84,000 lung cancer deaths are caused by cigarette smoking. Cigarette smoking costs our health care system between \$11.5 billion and \$30 billion each year.

It is clear that smoking-induced diseases are exacting an intolerable price from the American public, both in terms of human suffering and in terms of unnecessary financial drain on our econ-

Mr. President, I submit that there is no reason why Americans should have to put up any longer with so high a cost. The Health Protection Tax Act will aid significantly in insuring the health of millions of Americans by reducing the incidence and the threat of smokinginduced diseases.

One final point. Those opposed to this legislation will try to argue that the health protection tax constitutes a ban on cigarettes. That charge is simply false. We could not, and should not attempt an absolute ban on cigarettes. What we are proposing, however, is to provide an incentive for smokers to reduce their consumption of the toxic products contained in cigarettes. Any reduction in the amount of toxic substances inhaled by cigarette smokers will ultimately result in a reduction of smoking-related deaths and disease.

Mr. President, I ask unanimous consent that the bill be printed in the Rec-

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Health Protection Tax Act of 1977."

FINDINGS AND DECLARATION OF PURPOSE

SEC. 2. (a) The Congress finds that-

(1) preventable environmental factors pose serious threats to the health of the American

(2) cigarette smoking is one of the principal contributors to the high incidence of cancer and disease of the heart, lungs, and other vital organs;

(3) overwhelming scientific evidence exists that the harmful factors contained in cigarette smoke are tars and nicotine: and

(4) current approaches to prevention of disease caused in whole or in part by smoking have been inadequate.

(b) The purpose of this Act is to establish a health protection tax to aid in reducing the threat and incidence of diseases related

to cigarette smoking. HEALTH PROTECTION TAX

SEC. 3. (a) Subsection (b) of section 5701 of the Internal Revenue Code of 1954 (relating to the rate of tax on cigarettes) is amended to read as follows:

"(b) CIGARETTES .-

"(1) Imposition of tax.—There shall be imposed on every cigarette manufactured in or imported into the United States, regardless of weight, which contains-

(A) from 10.0 to 19.9 toxic units, a health

protection tax of \$0.0025:

"(B) from 20.0 to 29.9 toxic units, a health protection tax of \$0.0075; "(C) from 30.0 to 39.9 toxic units, a health

protection tax of \$0.015; and '(D) 40 or more toxic units, a health pro-

tection tax of \$0.025 (2) DEFINITION OF TOXIC UNITS.—For the

purposes of subsection (b)(1) above, the number of 'toxic units' means the sum of—
"(A) the number of milligrams of 'tar,'

"(B) 10 times the number of the milligrams of 'nicotine' which are contained in

such cigarette.
"(3) APPLICABLE RATE.—The applicable tax rate provided in subsection (b) (1) above

shall be 40 percent of such rate for cigarettes removed during the calendar year 1978, 60 percent of such rate for cigarettes removed during the calendar year 1979, 80 percent of such rate for cigarettes removed during the calendar year 1980, and 100 percent of such rate for cigarettes removed during the calendar year 1981 and thereafter.

"(4) DETERMINATION OF TAR AND NICOTINE

"(A) Testing by Federal Trade Commission.—The Federal Trade Commission (hereinafter referred to as the 'Commission') shall from time to time (but at least once each calendar year) determine or cause to be determined the tar and nicotine content (calculated in milligrams per cigarette) of each brand of cigarettes manufactured in or imported into the United States. The conditions, methods, and procedures for conducting such determinations shall be promulgated by the Commission in regulations issued by it for purposes of this paragraph. Until such time as such regulations are first issued, the conditions, methods, and procedures for conducting such determinations shall be those approved by the Commission for formal testing which are in effect on the date of the enactment of the Health Protection Tax Act of 1977.

"(B) Certification to the Secretary .ing the last calendar quarter of each calendar year, the Chairman of the Commission shall certifiy to the Secretary the tar and nicotine content of each brand of cigarettes manufactured in or imported into the United States. Such certifications shall be used by the Secretary to determine the rate of tax to be imposed on cigarettes for the period beginning with the first day of the calendar year beginning after such certification is made, and

during such calendar year.

(C) The Commission and the Secretary shall promulgate regulations for the purposes of testing, certifying, and imposing taxes under this subsection on new brands of ciga-rettes introduced for sale.".

(b) The amendments made by subsection (a) shall apply to cigarettes which the manufacturer or importer of such cigarettes removes (within the meaning of section 5702 (k) of such Code) after the dates specified in section 5701(b)(3) of such Code.

(c) The Federal Trade Commission and the Secretary of the Treasury or his delegate shall promulgate regulations for the purposes of section 5701(b) of the Internal Revenue Code of 1954 within 60 days after the date of the enactment of the Health Protection Tax Act of 1977.

Mr. KENNEDY. Mr. President, I am pleased to join the Senators from Colorado (Mr. HART) and Massachusetts (Mr. BROOKE) in introducing this legislation, which seeks to impose a differential tax on the tar and nicotine content of ciga-

It has become increasingly clear in recent years that environmental factors are the most important contributors to preventable diseases of the American people. In the face of growing concern with health problems and the rise in cost of health care, public health experts and other concerned individuals are demanding with ever increasing forcefulness and justification that the Nation devote more of its attention to the prevention as well as the cure of disease.

Foremost among the preventable environmental hazards which contribute to the ill health of the people and to the heavy burden of health care costs is the smoking of cigarettes. It is now over 25 years since the first preliminary data were published suggesting that cigarette smoking increases the incidence of lung cancer, and 12 years since the Surgeon General's report established an incontrovertible relationship between cigarette smoking and cancer. Since then, evidence has mounted documenting the staggering impact of cigarette smoking on the health of Americans:

Cigarette smoking causes well over 250,000 excess deaths in the United

States each year;

ing was issued.

Cigarette smoking is one of the leading identifiable causes of cardiovascular disease known to scientists today

Cigarette smoking is the single leading cause of noncancerous lung disease in the United States today; and

Cigarette smoking is responsible for over 80 percent of all cancer of the lung, killing some 70,000 Americans each year.

A 30-year-old American male who does not smoke can expect to live 51/2 years longer than his counterpart who smokes one pack a day, and more than 8 years longer than the individual who smokes over two packs of cigarettes a day.

The additional deaths and disease resulting from cigarette smoking adds over \$11.5 billion to the already burgeoning costs of the health care delivery system

in the United States. Despite the increasing publicity about the harmful effects of smoking, and despite the mandatory warning label which all cigarette packages now contain about the dangers to health of cigarette smoking, we find the smoking of cigarettes once again on the increase. Most alarming is the epidemic of smoking among our young people. The percentage of teenage girls smoking cigarettes, for example, has increased from 8 to 15 percent since the Surgeon General's warn-

Mr. President, it is clear that one cannot legislate a total ban upon cigarette smoking, but it is also clear that alternative courses of action to meet this challenge are not only available to us, but in fact required of us. Simply raising the price of all cigarettes by imposition of an across-the-board tax is inadequate, as was well illustrated by the failure of a sharp rise in the price of gasoline to seriously affect the driving habits of the American people. The present bill, therefore, proposes to deal with this problem in the most effective way known to an open and democratic society-the imposition of a differential tax on the tar and nicotine content of cigarettes such that a financial incentive will be provided to consumers to reduce their consumption of high tar and nicotine products, while a financial incentive will be provided to industry to develop less hazardous cigarettes for a public which seems unwilling at this point to give up smoking completely.

The Subcommittee on Health and Scientific Research will be holding oversight hearings this spring on Federal support of biomedical research. Those hearings will highlight the potential benefits of preventive health care and of research into methods of preventing disease. Clearly, when research highlights areas like cigarette smoking, in which

changing behavior can substantially lessen this country's burden of disease and disability, we in the Congress have the obligation to translate that knowledge into public policy.

Mr. President, it is a great pleasure to join my colleagues in introducing this

By Mr. DECONCINI:

S. 1261. A bill to provide for the current capital treatment of certain estimated losses experienced in connection with the loss of savings through fraud and mismanagement of an uninsured thrift institution; to the Committee on Finance.

Mr. DECONCINI. Mr. President, I am introducing legislation that will help to alleviate the hardships caused to depositors when Lincoln Thrift Association of Phoenix, Ariz., and U.S. Thrift Association of Tucson, Ariz., were placed under a temporary receiver, and ultimately a

court appointed trusteeship.

Lincoln Thrift Association and U.S. Association, which had 66 branch offices in Arizona, raised \$52,887,492 from about 20,000 investors. There were approximately 33,000 different accounts between the two thrift associations. They offered the public an opportunity to purchase essentially three types of securities in the form of interest bearing debt instruments: First, passbooks with interest generally at 6 percent; second, time certificates at between 1 to 4 years maturity at generally from 61/2 to 8 percent; and third, subordinated notes from 8 to 9 percent with normally a 5-year maturity date. Within these classifications of security holders, there were variations on the particular terms of the debt instrument. All of these securities were registered under Arizona law. As of December 3, 1975, the thrift associations had outstanding securities in the following

	Lincoln thrift	U.S. thrift
Passbooks Time certificates Subordinated notes	\$13,207,325 22,915,000 6,780,000	\$3,728,008 8,578,500 3,077,500
Totals	42,902,325	15,384,008

Both thrift associations were qualified under Arizona law, which allowed them to receive funds from investors and then reinvest the investors' funds. They were not regulated as such under Federal law and were not insured by an agency of the Federal Government.

In Arizona, thrift companies were regulated by the securities division of the Arizona Corporation Commission. Under Arizona law, restrictions were placed on the use which a thrift company can make of funds supplied by its investors. These restrictions. which were designed to uphold the safety and liquidity of the assets, included prohibitions against purchase of real estate, prohibitions of loans to officers and directors of the thrift association, prohibitions against unsecured loans, the limitation of loans to 2 years, and the maintenance of statutory reserves.

On October 29, 1975, the Securities and Exchange Commission commenced a formal investigation which was greatly assisted by the Arizona Corporation Commission and the Arizona attorney general. The Commission filed a civil injunctive action in the U.S. District Court for the District of Arizona on November 24, 1975, against Lincoln Thrift Association; Lincoln Leasing Corp.—a wholly owned subsidiary of Lincoln Thift Association; U.S. Thrift Thrift U.S. Association: Leasing Corp.—a wholly-owned subsidiary of U.S. Thrift Association; Omaha Surety Corp. of Phoenix, Ariz.; Robert H. Fendler of Phoenix, the principal officer and director of the corporate defendants who owned and controlled both thrift associations; James R. Holman of Phoenix, Ariz., the attorney for the corporate defendants; and Leonard H. Forman of Phoenix, Ariz., the public accountant for the corporate defend-

The complaint alleged that the defendants violated the antifraud provisions of the Federal securities laws in the offer and sale of the thrift certificates, thrift passbooks and other debt instruments issued by Lincoln Thrift Association. The complaint also alleged that the defendants did not use the investors' funds in the manner described in their prospectus and advertising, but instead, appropriated the investors' funds to finance their own speculative enterprises. The defendants further charged with concealing the insolvent financial condition of the respective thrift associations from investors by preparing and distributing

false financial statements.

In addition, the complaint alleged that the defendants misrepresented the safety of the investment by falsely stating the adequacy of the insurance which was purported to protect deposits in the thrift associations. This purported insurance was provided by Omaha Surety Corporation of America, an undisclosed affiliate of both Lincoln Thrift Association and U.S. Thrift Association. The assets of Omaha Surety Corporation of America were insufficient to cover the insurance written and were composed of receivables from the thrift associations. The insurance purported to have terms which resembled insurance provided by the Federal Deposit Insurance Corporation. In addition to seeking an injunction to prevent future violations of the Federal securities laws, the Securities and Exchange Commission asked the court to appoint an equity receiver to take charge of the assets of the thrift associations in order that all investors could be treated equally.

The Honorable Walter E. Craig, U.S. district judge, entered a temporary restraining order immediately which prevented the withdrawal of funds from the thrift associations and the dissipation of any assets by the defendants or the destruction of any documents pending further hearings on the matter. A hearing was held on November 26, 1975, and evidence was submitted with respect to the violations of the law and the appropriateness of the appointment of a temporary receiver for the corporate defendants. After hearing the evidence, the court continued the temporary restraining order until December 2, 1975, and ruled that a temporary receiver would be appointed at that time. On December 2, the court appointed Continental Service Corp., a subsidiary of the Continental Bank of Phoenix, Ariz., as the temporary receiver.

The temporary receiver's duties under the court order were to conserve and marshal the assets of Lincoln Thrift Association, U.S. Thrift Association, and their numerous subsidiaries for the benefit of investors and to report to the court the true condition of the companies.

On March 15, 1976, the temporary receiver and its auditors filed a three volume report with the court. This report stated that Lincoln Thrift Association, U.S. Thrift Association, and their numerous subsidiaries and affiliates as of December 3, 1975, on a consolidated basis, had total assets of \$38,028,204 and total liabilities of \$69,183,983. These liabilities include \$52,887,492 due to investors.

Additionally, the report revealed that the thrift associations were operated in violation of virtually every regulation under the Arizona State Thrift Company Act. The thrift associations' statutory reserves were not maintained in Government securities or cash as required to insure liquidity, but were invested in affiliated companies. That is, the statutory reserves in U.S. Thrift Association consisted of investments in Lincoln Thrift Association and its subsidiaries. Conversely, the statutory reserves for Lincoln Thrift Association consisted of investments in U.S. Thrift Association and its subsidiaries. Since each entity was insolvent, the statutory reserves were worthless. The proceeds from the sale of the securities were illegally invested in real estate, illegally loaned to officers and directors of the thrift associations and illegally loaned in unsecured transactions or in transactions in excess of 2 years. Investors' funds were unlawfully used by the thrift associations for operating overhead, salaries, and other business expenses.

As the result of the insolvency of the two thrift associations and the mismanagement by former officers and directors, the temporary receiver recommended that the assets of the thrift associations remain under court supervision. Negotiations with the defendants resulted in their consenting to the entry of an order appointing an independent board of trustees and special counsel for the thrift associations on May 7, 1976. At the same time the court entered a consensual permanent injunction against further violations of the antifraud provisions of the Federal securities laws against Robert H. Fendler, Lincoln Thrift Association, U.S. Thrift Association, Lincoln Leasing Corp., U.S. Thrift Leasing Corp., and Omaha Surety Corporation of America.

Mr. President, I might add, that in light of the developments relative to Lincoln Thrift and U.S. Thrift Associations, which were the only thrift associations operating in Arizona, the Arizona State Legislature recently repealed the Thrift Company Act.

The trustees are charged with managing the remaining assets of the companies in the best interests of the investors and are required to report to the court the best methods of either liquidating or reorganizing the companies.

Mr. President, I ask unanimous consent that the summary of the report and recommendations of the trustees, regarding Lincoln and U.S. Thrift Associations, be printed in the Record at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SUMMARY OF REPORT AND RECOMMENDATIONS OF BOARDS OF TRUSTEES RE PLAN FOR COM-PANIES IN TRUSTEESHIP

On March 1, 1977, the Boards of Trustees for Lincoln Thrift Association, U.S. Thrift Association and Subsidiaries and Affiliates ("Boards of Trustees") filed with Judge Walter E. Craig, United States District Court for the District of Arizona, a document entitled "Report and Recommendations of Boards of Trustees Re Plan for Companies in Trusteeship." The Trustees' Report recommends that Judge Craig make the following decisions:

First, determine to adopt a plan for orderly liquidation of the companies in trusteeship. Second, determine that the claims of holders of subordinated capital notes should be reduced by 50% before they participate in distributions.

Third, determine that all companies in the trusteeship should be treated on a consolidated or "one ball of wax" basis, by putting their net assets into a common fund to be distributed to all claimants against all trusteeship companies equally.

Fourth, authorize the Trustees to make the following distributions immediately:

(a) to all trade creditors and thrift pass-book holders having claims of \$100.00 or less, the full amount of their claims;
 (b) to all other thrift passbook holders

(b) to all other thrift passbook holders and investment certificate holders, 10% of their claims;

(c) to all holders of subordinated capital notes, 10% of their discounted claims (5% of their original claims).

The Trustees' recommendations are based on the following analysis, as set forth in their Report:

1. When this action was filed the companies in trusteeship were insolvent. A consolidated and combined balance sheet for the companies prepared by the Trustees' staff shows that as of October 31, 1976, they had assets of \$35,639,105.00 and liabilities of \$68,-148,522.00, with a net deficit (or accumulated loss) of \$32,509,417.00. This confirms the audit report of Arthur Andersen & Company and the Receiver's report.

2. It would not be possible for the two thrift associations (Lincoln Thrift Association and U.S. Thrift Association) and their several subsidiaries to be reactivated and operated as a single business enterprise, as they operated prior to the filing of this action. The companies would not have enough assets to meet their liabilities and there is no reason to believe that they could earn enough income to pay their operating expenses. Moreover, if the thrift associations were reactivated, there would be no insurance protection for despositor-investors and the possibility of a "run" on the associations would be extremely high.

3. Although they have tried, the Trustees have been unable to find any financial institution or other business organization that would be interested in taking over the com-

panies in trusteeship by merger, purchase or otherwise.

4. None of the companies in trusteeship nor any of their subsidiaries is a strong enough company to serve as a cornerstone for reorganization of the companies.

5. Theoretically, it would be possible to take the assets of the companies in trusteeship and use them to create a new company which might produce good earnings for the benefit of depositor-investors and other creditors. Whether such an enterprise would be successful, however, is highly uncertain. It would depend on such factors as the state and future of the U.S. economy, whether able management could be attracted and retained, and whether the new business would be hurt because it came out of the Lincoln Thrift disaster.

6. The Trustees do not recommend the adoption of a plan to start a new company. It would make depositor-investors and other creditors captive investors in a court-sponsored business enterprise, the success of which would be uncertain. No cash distribution could be made to depositor-investors, creditors and others because the new company would require ail available cash to operate. Even if the new company was successful, it could take many, many years for the new company to earn enough profits to pay depositor-investors and creditors the amount of the claims they have against the companies in trusteeship.

panies in trusteeship.
7. The Trustees believe and recommend that the Court should approve a plan for liquidation of the companies in trusteeshipthat is, a plan to sell their assets for cash and pay the proceeds to depositor-investors, creditors and other claimants through several installment payments as funds are available. Such a plan should be one for orderly liqui--that is, not a "fire sale" ' but the sale of assets over a period of time and on terms that would get the highest prices. Trustees believe that if such a plan is adopted, it can be completed within about 18 to 24 months.

8. The Trustees estimate that if all depositor-investors, creditors and other claimants are allowed to participate in a plan of liquidation, each of them would ultimately realize approximately 32¢ to 39¢ per dollar of his claim. The money would be paid out in several installments, the first of which could be paid immediately. As payments were made, each investor could decide for himself whether to use the money to pay bills, or to invest, or to put in an insured bank account.

9. The subordinated capital notes (including variable interest rate notes) issued by Lincoln Thrift Association and U.S. Thrift Association have provisions to the effect that the people who bought them are not entitled to share in any distribution which is made upon insolvency until all general creditors (including holders of thrift passbooks and investment certificates) have first been paid in full. If these provisions are enforced, people who bought subordinated capital notes will not get anything, through liquidation or otherwise. Some might say that the subordination provisions should be enforced because people who bought the notes should have read and understood what they were buying. The Trustees agree in part with this. But they have concluded that the subordination provisions should only be partly enforced, because most investors who purchased subordinated capital notes did not understand what would happen if the thrift associations should go broke. Accordingly, the Trustees recommend that the value the subordinated notes should be cut in half and their holders then treated the same as holders of passbooks and investment certificates as to the half of their investment which remains.

10. The effect on other depositor-investors, creditors and claimants of not permitting holders of subordinated capital notes

to participate in distributions would be this: If the Trustees' recommendations are accepted, the other depositor-investors and creditors instead or receiving 32¢ to 39¢ per dollar of their claims, would receive from 35¢ to 42¢. If subordinated capital note holders are not permitted to participate at all, other depositor-investors and creditors would re-

ceive 38¢ to 46¢.

11. The Trustees believe and recommend that all of the trusteeship companies should be dealt with on a consolidated basis or as "one ball of wax". This means that all of the money of all of the companies should be put into a common fund, to be distributed to all claimants equally. This treatment is justified because the former management treated all of the companies as a single business, mixing up their assets and properties, keepaccounting records by the same staff of bookkeepers, and transfering funds back and forth among the companies without any real business purpose or justification. More-over, it would be extremely expensive to hire accountants to try to go back over the books and records of the companies to redistribute the available assets and liabilities among them on a fair basis, based on generally accepted accounting principles.

12. The Trustees recommend that if the Court approves a plan of liquidation for the companies in trusteeship, the Trustees be authorized to make the cash distributions which are set forth at the beginning of this summary. The Trustees' proposal to pay people having claims of \$100.00 or less in full is made to eliminate approximately 6,000 depositor-investors and other claimants from further involvement in this proceeding. These claims average about \$35.00 and many of them are smaller than the annual cost of keeping the records of such claims.

Payment of these claimants in full will also reduce by approximately 6,000 the number of persons to whom notices of future

hearings would have to be sent.

Mr. DECONCINI. As the trustees' report indicates, a majority of depositors of Lincoln and U.S. Thrift Associations should shortly receive a partial return of their investment, although minimal. Further, it is estimated, that any final settlement of depositors' claims may be an additional 2 years in the future.

Mr. President, the legislation I am introducing today directs the Secretary of the Treasury to allow individuals victimized by the Lincoln Thrift affair to recapture part of their losses through the application of various tax provisions. These individuals, primarily senior citizens who lost their life savings, would be permitted to treat their loss as a loss from the sale or exchange of a capital asset. The approach taken by this legislation is justified by the very unusual circumstances surrounding the Lincoln Thrift collapse and the large number of persons who will be unable to gain any relief in any other manner.

The legislation provides, in addition, that the taxpayer would be able to declare the loss immediately rather than wait the period of years it will take before the savings are declared worthless. Each taxpayer affected would be allowed to deduct \$2,000 of losses against taxable income. Another special provision for persons 65 years or older has been added, allowing them to deduct twice the normal amount, or \$4,000. As under current law, the individual would be allowed to carry the losses forward up to the total amount of the loss. In the event that the individual recovers more of the loss than anticipated, there

is a recapture provision which treats the difference between the losses declared and the losses incurred as taxable income at the time of final disposition by the courts.

This bill is an attempt to provide a measure of immediate relief to those depositors who have financially suffered from this thrift fiasco. Families had deposited their entire life's savings, as much as \$25,000 or \$35,000, with dreams of realizing a secure retirement, only to discover their dream had vanished because of the fraudulent practices of these thrift companies. Well over 50 percent of the depositors are 65 years of age, or older, with many on fixed incomes, such as social security.

Obviously, all depositors will not receive the benefits of this proposed legislation, only those with a taxable income. But enactment of this bill will be a direct message from the U.S. Congress to the 20,000 depositors of U.S. and Lincoln Thrift that we are concerned about their welfare, that we do have a humane interest in their financial difficulties, and that we are responsive to their needs.

In conclusion, I want to quote a portion of a letter from a retired citizen of Sun City, Ariz., that further demonstrates the necessity for such legislation:

As you well know many folks in Arizona have lost money because of either Lincoln Thrift or U.S. Thrift. It has now been over a year that our money has been held up and goodness only knows when even a fraction thereof will be released to us. In addition it would appear that that fraction will be rather small. According to current rulings of the IRS we cannot take any credit on our income tax until that fraction is finally determined. Some of us may even die before that figure is determined. Even a ten or twenty percent credit would be wonderful if we were allowed to claim same on our 1976 tax returns and to do it now.

Mr. President, I ask unanimous consent that the text of this legislation be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1261

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the case of a taxpayer who establishes, to the satisfaction of the Secretary of the Treasury, the amount of the loss he may reasonably be expected to suffer in connection with his savings (whether in the form of demand or time deposits) in a thrift institution which was placed under a temporary receiver in December, 1975, and which, as of March 14, 1977, was being administered by trustees appointed by a judge of a United States District Court, the amount of the loss so established by the taxpayer shall, at the election of the taxpayer (made at such time and in such manner as the Secretary may require), be treated as a loss from the sale or exchange of a capital asset suffered for the taxable of that taxpayer beginning with or in 1977 for purposes of chapter 1 of the Internal Revenue Code of 1954. In the case of a taxpayer who has attained the age of 65 years before January 1, 1978, the provisions of section 1211(b) (2) of the Internal Revenue Code of 1954 (relating to limitations on capital losses for taxpayers other than corporations) shall be applied, under the preceding sentence by substituting "\$4,000" for "\$2,000" where it appears in subparagraph (A). If the amount of such loss is finally determined to be smaller than the amount established by the taxpayer under the provisions of this Act,

the difference between the two amounts shall be treated as income to the taxpayer, for purposes of such chapter, on the date of such final determination.

> By Mr. RIBICOFF (for himself, Mr. Percy, Mr. Javits, Mr. Magnuson, Mr. Cranston, Mr. Metcalf, Mr. Mathias, Mr. Jackson, and Mr. Metzenbaum):

S. 1262. A bill to establish an independent consumer agency to protect and serve the interest of consumers, and for other purposes; to the Committee on Governmental Affairs.

Mr. RIBICOFF. Mr. President, I introduce for appropriate reference the Con-

sumer Protection Act of 1977.

Legislation to create an Agency for Consumer Advocacy is familiar to most Members of this body. The bill being introduced today is in most respects identical to S. 200 as introduced in the 94th Congress, which passed the Senate in May 1975, by a vote of 61 to 28. The House also passed consumer protection legislation in the 94th Congress and, but for the opposition of President Ford, I am confident that the bill would have been enacted last year.

This year, supporters of this bill are pleased to have the strong support of President Carter. Working together with the President, I am confident that we will finally see the enactment of this

much needed consumer bill.

Over the past 7 years the Senate has considered, discussed, debated, and analyzed, to an unprecedented degree legislation to create an Agency for Consumer Advocacy. Over that period of time, the House has passed bills similar to this on three occasions and the Senate twice.

The President has indicated that he intends to implement this legislation, to a great extent through reorganization by consolidating and eliminating duplicating consumer functions in the Federal bureaucracy. I strongly support such an approach to the creation of this Agency. It will lessen the actual cost, eliminate ineffective offices which are not serving the consumer and assure that the ACA will be the central consumer agency in the Federal Government. The bill provides for the submission of a reorganization plan in section 22.

This bill creates a Federal Agency for Consumer Advocacy—ACA. The bill au-

thorizes the ACA to:

Represent consumer interest by participating in Federal agency proceedings and activities and in resulting judicial review;

Obtain and disseminate information important to consumers.

Serve as a clearinghouse for consumer complaints by receiving, reviewing and transmitting complaints from the public.

Conduct studies and surveys to assure that it understands consumer preferences.

In addition, the act contains a number of important safeguards to assure that the rights of persons in private enterprise will not be infringed upon. I ask unanimous consent that a list of those principle safeguards be inserted in the Record following this statement.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RIBICOFF. The ACA is not a major new spending program. The authorization levels for the ACA are \$15 million for the first year; \$20 million for the second; and \$25 million for the third year. It will cost the average American taxpaying family about \$.25 per year. Moreover, providing the new Agency with a limited 3-year authorization will enable the Congress to reevaluate the performance of this Agency in serving and protecting the interests of consumers and will insure that if the Agency is not doing a good job it will be reauthorized. This sunset provision is an essential feature of the bill.

The Committee on Governmental Affairs has undertaken an extensive study of the regulatory agencies pursuant to Senate Resolution 71-94th Congress, 1st session. One of the major portions of our study has involved the need for more balanced advocacy at the agencies. Detailed study of the need for consumer representation has shown that the ACA is a most effective way to ensure that regulatory agencies take into consideration the views of consumers before making important decisions which have significant impact.

Mr. President, this bill is responsible legislation. It is designed to give consumers a voice in government. It breaks new ground. Enactment of this legislation will prove to the American consumer that the Congress is serious about regulatory reform-about making Government more responsive to the people's needs.

As chairman of the Committee on Governmental Affairs, I will seek to move this bill expeditiously to the floor for Senate consideration. Hearings have been scheduled for the week of April 18th.

Mr. President, I believe that this year the American people will finally get an Agency for Consumer Advocacy and I urge my colleagues to support this important bill.

I ask unanimous consent that the brief summary and explanation of this bill be printed in the RECORD at this

There being no objection, the material was ordered to be printed in the RECORD, as follows:

8. 1262

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Consumer Protection Act of 1977".

STATEMENT OF FINDINGS AND PURPOSES

SEC. 2. (a) The Congress finds that the sterests of consumers are inadequately represented and protected within the Federal Government; vigorous representation and protection of the interests of consumers are essential to the fair and efficient functioning of a free market economy. Each year, as a result of this lack of effective representation before Federal agencies and courts, consumers suffer personal injury, economic harm, and other adverse consequences in the course of acquiring and using goods and services available in the marketplace.

(b) The Congress therefore declares that-(1) A governmental organization to represent the interests of consumers before Federal agencies and courts could help the agencies in the exercise of their statutory responsibilities in a manner consistent with

the public interest and with effective and responsive government. It is the purpose of this Act to protect and promote the interests of the people of the United States as consumers of goods and services which are made available to them through commerce or which are made available to them through commerce or which affect commerce by so establishing an independent Agency Consumer Advocacy.

(2) It is the purpose of the Agency for Consumer Advocacy to represent the interests of consumers before Federal agencies and courts, receive and transmit consumer complaints. develop and disseminate formation of interest to consumers, and perform other functions to protect and promote the interests of consumers. The authority of the Agency to carry out this purpose shall not be construed to supersede supplant, or replace the jurisdiction, functions, or powers of any other agency to discharge its own statutory responsibilities according to law.

(3) It is the purpose of this Act to promote protection of consumers with respect to the

(A) safety, quality, purity, potency, healthfulness, durability, performance, repair-ability, effectiveness, dependability, availability, and cost of any real or personal property or tangible or intangible goods, services, or credit;

(B) preservation of consumer choice and a competitive market:

(C) price and adequacy of supply of goods and services:

(D) prevention of unfair or deceptive trade

(E) maintenance of truthfulnenss and fairness in the advertising, promotion, and sale by a producer, distributor, lender, retailer, or other supplier of such property, goods, services, and credit:

(F) furnishing of full, accurate, and clear instructions, warnings, and other information by any such supplier concerning such property, goods, services, and credit.

(4) This Act should be so interpreted by the executive branch and the courts so as to implement the intent of Congress to protect and promote the interests of consumers. and to achieve the foregoing purposes.

ESTABLISHMENT

SEC. 3. (a) There is hereby established as an independent agency of the United States within the executive branch of the Government the Agency for Consumer Advocacy. The Agency shall be directed and administered by an Administrator who shall be appointed by the President, by and with the advice and consent of the Senate, for a term coterminous with the term of the President, not to exceed four years. The Administrator shall be an individual who by reason of training, experience, and attain-ments is exceptionally qualified to represent the interests of consumers. There shall in the Agency a Deputy Administrator who shall be appointed by the President, by and with the advice and consent of the Senate. The Deputy Administrator shall perform such functions, powers, and duties as may be prescribed from time to time by the Administrator and shall act for, and exercise the powers of, the Administrator during the absence or disability of, or in the event of a vacancy in the office of, the Administrator. On the expiration of his term, the Administrator shall continue in office until he is reappointed or his successor is appointed and qualifies. The Administrator may be re-moved by the President for inefficiency, neglect of duty or malfeasance in office.

(b) No employee of the Agency erving in such position may engage in any business, vocation, other employment, or have other interests, inconsistent with his official responsibilities.

There shall be in the Agency a General Counsel who shall be appointed by the Administrator.

(d) The Administrator is authorized to appoint within the Agency not to exceed five Assistant Administrators.

POWERS AND DUTIES OF THE ADMINISTRATOR

SEC. 4. (a) The Administrator shall be responsible for the exercise of the powers and the discharge of the duties of the Agency, and shall have the authority to direct and supervise all personnel and activities thereof.

(b) In addition to any other authority con-ferred upon him by this Act, the Administrator is authorized, in carrying out his func-

tions under this Act, to-

(1) subject to the civil service and classification laws, select, appoint, employ, and fix the compensation of such officers and employees as are necessary to carry out provisions of this Act and to prescribe their

authority and duties:

(2) employ experts and consultants in accordance with section 3109 of title 5. United States Code, and compensate individuals so employed for each day (including traveltime) at rates not in excess of the maximum rate of pay for Grade GS-18 as provided in section 5332 of title 5, United States Code, and while such experts and consultants are so serving away from their homes or regular place of business, pay such employees travel expenses and per diem in lieu of subsistence at rates authorized by section 5703 of title 5. United States Code, for persons in Government service employed intermittently;

(3) appoint advisory committees composed of such private citizens, including consumers and business representatives, and officials of the Federal, State, and local governments as he deems desirable to advise him with respect to his functions under this Act, and pay such members (other than those regularly employed by the Federal Government) while attending meetings of such committees otherwise serving at the request of the Administrator compensation and travel expenses at the rate provided for in paragraph (2) of this subsection with respect to experts and consultants: Provided, That all meetings of such committees shall be open to the public and interested persons shall be permitted to attend, appear before, or file statements with any advisory committee, subject to such reasonable rules or regulations as the Administrator may prescribe;

(4) promulgate, in accordance with the applicable provisions of the Administrative Procedure Act, title 5, United States Code, such rules, regulations, and procedures as may be necessary to carry out the provisions of this Act, and assure fairness to all persons affected by the Agency's actions, and to delegate authority for the performance of any function to any officer or employee under his

direction and supervision;

(5) utilize, with their consent, the services personnel, and facilities of other Federal agencies and of State, regional, local, and private agencies and instrumentalities, with or without reimbursement therefor, and to transfer funds made available under this Act to Federal, State, regional, local, and private agencies and instrumentalities as reimbursement for utilization of such services, personnel, and facilities;

(6) enter into and perform such con-tracts, leases, cooperative agreements, or other transactions as may be necessary carry out the provisions of this Act, on such terms as the Administrator may deem appropriate, with any agency or instrumentality of the United States, with any State, or any political subdivision thereof, or with any per-

accept voluntary and uncompensated services, notwithstanding the provisions of section 3679(b) of the Revised Statutes (31 U.S.C. 665(b));
(8) adopt an official seal, which shall be

judicially noticed;

(9) establish such regional offices as the Administrator determines to be necessary to serve the interests of consumers: (10) conduct conferences and hearings and

otherwise secure data and expression of opinion;

(11) accept unconditional gifts or donations of services, money or property, real, personal, or mixed, tangible or intangible;

(12) designate representatives to serve or assist on such committees as he may determine to be necessary to maintain effective Itaison with Federal agencies and with State and local agencies carrying out programs and activities related to the interests of consumers: and

(13) perform such other administrative activities as may be necessary for the effective fulfillment of his duties and functions.

(c) Upon request made by the Administrator, each Federal agency is authorized and directed to make its services, personnel, and facilities available to the greatest practicable extent within its capability to the Agency in the performance of its functions. An agency shall not be required to provide such services, personnel, or facilities to the Administrator where to do so would seriously affect in an adverse manner the agency's ability to carry out its responsibilities, including any responsibility the agency has to protect the public health or safety.

(d) The Administrator shall prepare and submit simultaneously to the Congress and the President, not later than February 1 of each year beginning February 1, 1978, an annual report, which shall include a descrip-

tion and analysis of-

 the activities of the Agency, including its representation of the interests of consumers before Federal agencies and Federal courts;

(2) the major Federal agency actions and Federal court decisions affecting the interests of consumers;

(3) the assistance given the Agency by other Federal agencies in carrying out the

purposes of this Act;

(4) the performance of Federal agencies and the adequacy of their resources in enforcing consumer protection laws and in otherwise protecting the interests of consumers, and the prospective results of alternative consumer protection programs;

(5) the appropriation by Congress for the Agency, the distribution of appropriated funds for the current fiscal year, and a general estimate of the resource requirements of the Agency for each of the next three fiscal years;

(6) consumer complaints received (in summary form) and actions taken there-

on: and

(7) the extent of participation by consumers in Federal agency activities, and the effectiveness of the representation of consumers before Federal agencies, together with recommendations for administrative actions to deal with problems discussed in the report, to protect and represent the interests of consumers more effectively, and to carry out the purposes of this Act.

(e) The Federal Register shall publish a notice indicating that the annual report prepared pursuant to subsection (d) of this

Section is available.

FUNCTIONS OF THE AGENCY

SEC. 5. (a) The Agency shall, in the performance of its functions, advise the Congress and the President as to matters affecting the interests of consumers; and shall protect and promote the interests of the people of the United States as consumers of goods and services made available to them through the trade and commerce of the United States.

(b) The functions of the Administrator shall be to—

(1) represent the interests of consumers before Federal agencies and courts to the extent authorized by this Act;

(2) conduct and support research, studies, and testing to the extent authorized in section 9 of this Act;

(3) submit recommendations annually to

the Congress and the President on measures to improve the operation of the Federal Government in the protection and promotion of the interests of consumers;

(4) obtain information and publish and distribute material developed in carrying out his responsibilities under this Act in order to inform consumers of matters of interest to them, to the extent authorized in this Act:

(5) receive, transmit to the appropriate agencies and persons, and make publicly available consumer complaints to the extent authorized in section 7 of this Act.

(6) conduct conferences, surveys, and investigations, including economic surveys, concerning the needs, interests, and problems of consumers: *Provided*, That such conferences, surveys, or investigations are not duplicative in significant degree of similar activities conducted by other Federal agencies;

(7) cooperate with State and local governments and encourage private enterprise in the promotion and protection of the interests of consumers;

(8) keep the appropriate committees of Congress fully and currently informed of all the Agency's activities, when asked or on his own initiative, except that this paragraph is not authority to withhold information requested by individual Members of Congress:

(9) publish, in language readily understandable by consumers, a consumer register which shall set forth the time, place, and subject matters of actions by Congress, Federal agencies, and Federal courts, and other information useful to consumers;

(10) encourage the adoption and expansion of effective consumer education pro-

grams;

(11) encourage the application and use of new technology, including patents and inventions, for the promotion and protection of the interests of consumers;

(12) encourage the development of informal dispute settlement procedures in-

volving consumers;

(13) encourage meaningful participation by consumers in the activities of the Agency; (14) coordinate its activities with the activities of other executive departments and

agencies with respect to consumers; and (15) perform such other related activities as he deems necessary for the effective fulfillment of his duties and functions.

REPRESENTATION OF CONSUMERS

SEC. 6. (a) (1) Whenever the Administrator determines that the result of any Federal agency proceeding or activity may substantially affect an interest of consumers, he may as of right intervene as a party or otherwise participate for the purpose of representing an interest of consumers, as provided in paragraph (2) or (3) of this subsection. In proceeding, the Administrator shall refrain from intervening as a party, unless he determines that such intervention is necessary to represent adequately an interest of consumers. The Administrator shall comply with Federal agency statutes and rules of procedure of general applicability governing the timing of intervention or participation in such proceeding or activity and, upon intervening or participating therein, shall comply with laws and agency rules of procedure of general applicability governing the conduct thereof. The intervention or participation of the Administrator in any Federal agency proceeding or activity shall not affect obligation of the Federal agency conducting such proceeding or activity to assure pro-

cedural fairness to all participants.

(2) Whenever the Administrator determines that the result of any Federal agency proceeding which is subject to the provisions of section 553, 554, 556, or 557 of title 5. United States Code, relating to administrative procedure, or which involves a hearing pursuant to the administrative procedural

requirements of any other statute, regulation, or practice, or which is conducted on the record after opportunity for an agency hearing, or which provides for public notice and opportunity for comment, may substantially affect an interest of consumers, he may as of right intervene as a party or otherwise participate for the purpose of representing an interest of consumers in such proceeding.

(3) With respect to any Federal agency proceeding not covered by paragraph (2) of this subsection, or any other Federal agency activity, which the Administrator determines may substantially affect an interest of consumers, the Administrator may participate by presenting written or oral submissions, and the Federal agency shall give full consideration to such submissions of the Administrator. Such submissions shall be presented in an orderly manner and without causing undue delay. Such submission need not be simultaneous with that of any other person.

(b) At such time as the Administrator determines to intervene or participate in a Federal agency proceeding under subsection (a) (2) of this section, he shall issue publicly a written statement setting forth his findings under subsection (a) (1), stating concisely the specific interest of consumers to be protected. Upon intervening or participating he shall file a copy of his statement in the proceeding.

(c) To the extent that any person, if aggrieved, would by law have such right, the Administrator shall have the right, in accordance with the following provisions of this subsection, to initiate or participate in any Federal court proceeding involving a Federal agency action—

(1) The Administrator may, as of right, and in the manner prescribed by law, initiate any civil proceeding in a Federal court which involves the review of a Federal agency action that the Administrator determines may substantially affect an interest of consumers. If the Administrator did not intervene or otherwise participate in the Federal agency proceeding or activity out of which such agency action arose, the Administrator, before initiating a proceeding to obtain judicial review, shall petition such agency for rehearing or reconsideration thereof, if the statutes or rules governing such agency specifically authorize rehearing or reconsideration. Such petition shall be filed within sixty days after the Federal agency action involved, or within such longer period as may be allowed by applicable procedures. The Administrator may immediately initiate a judicial review proceeding if the Federal agency does not finally act upon such petition within sixty days after the filing thereof, or at such earlier time as may be necessary to preserve the Administrator's right to obtain effective judicial review of the Federal agency action. Where the Administrator did not intervene or otherwise participate in a Federal agency proceeding or activity, the Administrator shall not be permitted to initiate a judicial proceeding with respect to such agency proceeding or activity unless the court shall first have determined that initiation of such a proceeding by the Administrator would advance the interests of justice. In advance of the initiation of such a proceeding by the Administrator, he shall file a statement setting forth the reasons why he did not intervene or otherwise participate in the Federal agency proceeding or activity out of which the contemplated judicial proceeding arises, for the court's consideration in connection with its determination whether the initiation of such judicial proceeding would advance the interests of justice.

(2) The Administrator may, as of right, and in the manner prescribed by law, intervene or otherwise participate in any civil proceeding in a Federal court which involves the review or enforcement of a Federal agency action that the Administrator determines

may substantially affect an interest of con-

(3) The initiation or other participation of the Administrator in a judicial proceeding pursuant to this subsection shall not alter or affect the scope of review otherwise appli-

cable to the agency action involved.

(d) When the Administrator determines it to be in the interest of consumers, he may request the Federal agency concerned to initiate such proceeding, or to take such other action, as may be authorized by law with respect to such agency. If the Federal agency fails to take the action requested, it shall promptly notify the Administrator of the reasons therefor and such notification shall be a matter of public record.

(e) Notwithstanding sections 514-519 inclusive, of Chapter 31, title 28, United States Code, appearances by the Agency under this Act shall be in its own name and shall be made by qualified representatives designated

by the Administrator.

- (f) In any Federal agency proceeding in which the Administrator is intervening or participating pursuant to subsection (a) (2) of this section, the Administrator is authorized to request the Federal agency to issue, and the Federal agency shall, on a statement or showing (if such statement or showing is required by the Federal agency's rules of procedure) of general relevance and reasonable scope of the evidence sought, issue such orders, as are authorized by the Federal agency's statutory powers, for the copying of documents, papers, and records, summoning witnesses, production of books and papers, and submission of information in writing.
- The Administrator is not authorized to intervene or appear in proceedings or activities of State or local agencies and State courts, or to engage directly or indirectly, in lobbying activities before State or local agencies, or the Congress, in the manner prohibited by section 1913 of title 18, United States Code:
- (h) Nothing in this section shall be construed to prohibit the Administrator from communicating with, or providing informa-tion requested by any Federal, State, or local agencies and State courts at any time and in any manner consistent with law or agency rules.
- (i) Each Federal agency shall review its rules of procedure of general applicability, and, after consultation with the Administrator, issue any additional rules which may be necessary to provide for the Administrator's orderly intervention or participation, in accordance with this section, in its proceedings and activities which may substantially affect the interests of consumers. Each Fed. eral agency shall issue rules determining the circumstances under which the Administra-tor may be allowed to make simultaneous submissions under subsection (a) (3) of this section. Any additional rules adopted pursuant to the requirements of this subsection shall be published in proposed and final form in the Federal Register.
- (j) The Administrator is authorized to represent an interest of consumers which is presented to him for his consideration upon petition in writing by a substantial number of persons or by an organization which includes a substantial number of persons. The Administrator shall notify the principal sponsors of any such petition within a reasonable time after receipt of any such petition of the action taken or intended to be taken by him with respect to the interest of consumers presented in such petition. If the Administrator declines or is unable to represent such interest, he shall notify such sponsors and shall state his reasons therefor.

CONSUMER COMPLAINTS

SEC. 7. (a) Whenever the Administrator receives from any person any complaint or other information which discloses— (1) an apparent violation of law, agency

rule or order, or a judgment, decree, or order of a State or Federal court relating to an interest of consumers; or

(2) a commercial, trade, or other practice which is detrimental to an interest of consumers:

he shall, unless he determines that such complaint or information is frivolous promptly transmit such complaint or information to any Federal, State, or local agency which has the authority to enforce any relevant law or to take appropriate action. Federal agencies shall keep the Administrator informed to the greatest practicable extent of any action which they are taking on complaints transmitted by the Administrator pursuant to this section.

- (b) The Administrator shall promptly notify producers, distributors, retailers, lenders, or suppliers of goods and services of complaints of significance concerning them received or developed under this section unless the Administrator determines that to do so is likely to prejudice or impede an action, investigation, or prosecution concerning an alleged violation of law.
- (c) The Administrator shall maintain a public document room containing, for public inspection and copying (without charge or at a reasonable charge, not to exceed cost), an up-to-date listing of all consumer complaints of significance which the Agency has received, arranged in meaningful and useful categories, together with annotations of actions taken in response thereto. Unless Administrator, for good cause, determines not to make any specific complaint available, complaints listed shall be made available for public inspection and copying: Provided, That-
- (1) the party complained against has had a reasonable time to comment on such complaint and such comment, when received, is displayed together with the complaint;
- (2) the agency to which the complaint has been referred has had a reasonable time to notify the Administrator what action, if any, it intends to take with respect to the complaint:
- (3) the complainant's identity is to be protected when he has requested confidentiality. Whenever the complainant requests that his identity be protected, the Administrator shall place an appropriate designation on the complaint before making it available to the public:
- (4) no unsigned complaints shall be placed in the public document room.

CONSUMER INFORMATION AND SERVICES

SEC. 8. (a) In order to carry out the purposes of this Act the Administrator shall develop on his own initiative, and, subject to the other provisions of this Act, gather from other Federal agencies and non-Federal sources, and disseminate to the public in such manner, at such times, and in such form as he determines to be most effective, information, statistics, and other data including, but not limited to matter concerning-

- (1) the functions and duties of the
 - (2) consumer products and services;
- (3) problems encountered by consumers generally, including annual reports on interest rates and commercial and trade practices which may adversely affect consumers;
- (4) notices of Federal hearings, proposed and final rules and orders, and other per-tinent activities of Federal agencies that affect consumers.
- (b) All Federal agencies which, in the judgment of the Administrator, possess information which would be useful to sumers are authorized and directed to cooperate with the Administrator in making such information available to the public.

STUDIES

Sec. 9. The Administrator is authorized to conduct, support, and assist research, studies, plans, investigations, conferences, demonstration projects, and surveys concerning the interests of consumers.

INFORMATION GATHERING

Sec. 10. (a) (1) The Administrator is authorized, to the extent required to protect the health or safety of consumers, or to discover consumer fraud or substantial economic injury to consumers, to obtain data by requiring any person engaged in a trade. business, or industry which substantially affects interstate commerce and whose activities he determines may substantially affect an interest of consumers, by general or specific order setting forth with particularity the consumer interest involved and the purposes for which the information is sought, to file with him a report or answers in writing to specific questions concerning such activities and other related information. Nothing in this subsection shall be construed to authorize the inspection or copying of documents, papers, books, or records, or to compel the attendance of any person. Nor shall anything in this subsection require the disclosure of information which would violate any relationship privileged according to law. Where applicable, chapter 35 of title 44, United States Code, shall govern requests for reports under this subsection in the manner in which independent Federal regulatory agencies are subfect to its provisions.

(2) The Administrator shall not exercise the authority under paragraph (1) of this subsection if the information sought-

(A) is available as a matter of public record: or

(B) can be obtained from another Federal agency pursuant to subsection (b) of this section; or

- (C) is for use in connection with his intervention in any agency proceeding against the person to whom the interrogatory is addressed if the proceeding is pending at the time the interrogatory is requested.
- (3) In the event of noncompliance with any request submitted to any person by the Administrator pursuant to paragraph (1), any district court of the United States within the jurisdiction of which such person is found, or has his principal place of business. shall issue an order, on conditions and with such apportionment of costs as it deems just. requiring compliance with a valid order of the Administrator. The district court of the United States shall issue such an order upon petition by the Administrator or on a motion to quash, and upon the Administrator's carrying the burden of proving in court that such order is for information that may substantially affect the health or safety of consumers or may be necessary in the discovery of consumer fraud or substantial economic injury to consumers, and is relevant to the purposes for which the information is sought, unless the person to whom the interrogatory or request is addressed shows that answering such interrogatory or request will be unnecessarily or excesively burdensome.
- (4) The Administrator shall not have the power to require the production or disclosure of any data or other information under this subsection from any small business. For the purpose of this paragraph, "small business" means any person that, together with its affiliates, including any other person with whom such person is associated by means of a franchise agreement, does not have assets exceeding \$7,500,000; or does not have net worth in excess of \$2,500,000; or at the time of proposed discovery by the Administrator does not have more than the equivalent of one hundred and fifty full-time employees. Nothing in this paragraph shall be construed to prohibit the Administrator from requesting the voluntary production of any

such data or information. Notwithstanding this paragraph, the Administrator shall have the power, pursuant to paragraph (1), to obtain information from a small business if necessary to prevent imminent and substantial danger to the health or safety of consumers and the Administrator has no other effective means of action.

(b) Upon written request by the Administrator, each Federal agency is authorized and directed to furnish or allow access to all documents, papers, and records in its possession which the Administrator deems necessary for the performance of his functions and to furnish at cost copies of specified documents, papers, and records. Notwithstanding this subsection, a Federal agency may deny the Administrator access to and copies of—

(1) information classified in the interest of national defense or national security by an individual authorized to classify such information under applicable Executive order or statutes, and restricted data whose dissemination is controlled pursuant to the Atomic Energy Act (42 U.S.C. 2011 et seq.);

(2) policy and prosecutorial recommendations by Federal agency personnel intended

for internal agency use only;

(3) information concerning routine executive and administrative functions which is not otherwise a matter of public record;

(4) personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy:

(5) information which such Federal agency is expressly prohibited by law from disclosing to another Federal agency, including but not limited to, such expressly prohibited information contained in or related to examination, operating, or condition reports concerning any individual financial institution prepared by, on behalf of, or for the use of an agency responsible for regulation or supervision of financial institutions;

(6) information which would disclose the financial condition of individuals who are customers of financial institutions; and

(7) trade secrets and commercial or financial information described in section 552 (b) (4) of title 5, United States Code—

(A) obtained prior to the effective date of this Act by a Federal agency, if the agency had agreed to treat and has treated such information as privileged or confidential and states in writing to the Administrator that, taking into account the nature of the assurances given, the character of the information requested, and the purpose, as stated by the Administrator, for which access is sought, to permit such access would constitute a breach of faith by the agency; or

(B) obtained subsequent to the effective date of this Act by a Federal agency, if the agency has agreed in writing as a condition of receipt to treat such information as privileged or confidential, on the basis of its reasonable determination set forth in writing that such information was not obtainable without such an agreement and that failure to obtain such information would seriously impair performance of the agency's function. Before granting the Administrator access to trade secrets and commercial or financial information described in section 552(b)(4) of title 5, United States Code, the agency shall notify the person who provided such information of its intention to do so and the reasons therefor, and shall, notwithstanding section 21(b), afford him a reasonable opportunity, not to exceed ten working days after receipt of such notice, to comment or seek injunctive relief. Whenever notice is served by mail, such notice shall be considered to be received three days after the date on which it is mailed. Where access to information is denied to the Administrator by a Federal agency pursuant to this subsection, the head of the agency and the Administrator shall seek to find a means of providing the information in such other form, or under

such conditions, as will meet the agency's objections.

(c) Consistent with the provisions of section 7213 of the Internal Revenue Code of 1954 (26 U.S.C. 7213), nothing in this Act shall be construed as providing for or authorizing any Federal agency to divulge or to make known in any manner whatever to the Administrator, solely from an income tax return, the amount or source of income, profits, losses, expenditures, or any particular thereof, or to permit any Federal income tax return filed pursuant to the provisions of the Internal Revenue Code of 1954, or copy thereof, or any book containing any abstracts or particulars thereof, to be seen or examined by the Administrator, except as provided by law

LIMITATIONS ON DISCLOSURES

Sec. 11. (a) Except as provided in this section, section 552 of title 5, United States Code, shall govern the release of information by any officer or employee of the Agency.

(b) No officer or employee of the Agency shall disclose to the public or to any State or local agency any information which was received solely from a Federal agency when such agency has notified the Administrator that the information is within the exceptions stated in section 552(b) of title 5, United States Code, and the Federal agency has determined that the information should not be made available to the public; except that if such Federal agency has specified that such information may be disclosed in a particular form or manner, such information may be disclosed in such form or manner.

(c) The following additional provisions shall govern the release of information by the Administrator pursuant to any authority conferred by this Act, except information released through the presentation of evidence in a Federal agency or court proceed-

ing pursuant to section 6-

(1) The Administrator, in releasing information concerning consumer products and services, shall determine that (A) such information, so far as practicable, is accurate, and (B) no part of such information is prohibited from disclosure by law. The Administrator shall comply with any notice by a Federal agency pursuant to section 11(b) that the information should not be made available to the public or should be disclosed only in a particular form of manner.

(2) In the dissemination of any test results

(2) In the dissemination of any test results or other information which directly or indirectly disclose product names, it shall be made clear that (A) not all products of a competitive nature have been tested, if such is the case, and (B) there is no intent or purpose to rate products tested over those not tested or to imply that those tested are superior or preferable in quality over those not tested.

(3) Notice of all changes in, or any additional information which would affect the fairness of information previously disseminated to the public shall be promptly dis-

seminated in a similar manner.

(4) (A) Where the release of information is likely to cause substantial injury to the reputation or good will of a person, the Administrator shall notify such person of the information to be released and afford him a reasonable opportunity, not to exceed ten working days after receipt of such notice, to comment or seek injunctive relief, unless immediate release is necessary to protect the health or safety of the public. Whenever notice is served by mail, such notice shall be considered to be received three days after the date on which it is mailed. The district courts of the United States shall have jurisdiction over any action brought for injunctive relief under this subsection, or under section 10(b)(7).

(B) Nothing in this paragraph shall affect the rights of the public to obtain information under section 552 of title 5, United States Code.

(d) In any suit against the Administrator to obtain information pursuant to the provisions of section 552 of title 5, United States Code, where the sole basis for the refusal to produce the information is that another Federal agency has specified that the documents not be disclosed in accordance with the provisions of subsection (b) of this section, the other Federal agency shall be substituted as the defendant, and the Administrator shall thereafter have no duty to defend such suit.

NOTICE

. Sec. 12. (a) Each Federal agency considering any action which may substantially affect an interest of consumers shall, upon request by the Administrator, notify him of any proceeding or activity at such time as public notice is given.

(b) Each Federal agency considering any action which may substantially affect an interest of consumers shall, upon specific request by the Administrator, promptly pro-

vide him with-

 a brief status report which shall contain a statement of the subject at issue and a summary of proposed measures concern-

ing such subject; and

(2) such other relevant notice and information, the provision of which would not be unreasonably burdensome to the agency and which would facilitate the Administrator's timely and effective intervention or participation under section 6 of this Act.

(c) Nothing in this section shall affect the authority or obligations of the Administrator or any Federal agency under section 10

(b) of this Act.

SAVING PROVISIONS

SEC. 13. (a) Nothing in this Act shall be construed to affect the duty of the Administrator of General Services to represent the interests of the Federal Government as a consumer pursuant to section 201(a)(4) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 481(a)(4)).

(b) Nothing in this Act shall be construed to relieve any Federal agency of any responsibility to protect and promote the interests

of consumers.

(c) Nothing in this Act shall be construed to limit the right of any consumer or group or class of consumers to initiate, intervene in, or otherwise participate in any Federal agency or court proceeding or activity, nor to require any petition or notification to the Administrator as a condition precedent to the exercise of such right, nor to relieve any Federal agency or court of any obligation, or affect its discretion, to permit or facilitate intervention or participation by a consumer or group or class of consumers in any proceeding or activity.

proceeding or activity.

(d) Nothing in this Act shall be construed to affect the duty of the Small Business Administration to aid, counsel, assist, and protect the interests of small business concerns, pursuant to section 631(a) of the Small Business Act of 1958 (15 U.S.C. 631

(a)).

DEFINITIONS

SEC. 14. As used in this Act, unless the context otherwise requires—

context otherwise requires—
(1) "Administrator" means the Administrator of the Agency for Consumer Advocacy.

cacy;
(2) "Agency" means the Agency for Consumer Advocacy;

sumer Advocacy;
(3) "agency action" means the whole or part of an agency "rule," "order," "license," "sanction," "relief," as defined in section 551 of title 5, United States Code, or the equivalent or the denial thereof, or failure to act;

(4) "agency activity" means any agency process, or phase thereof, conducted pursuant to any authority or responsibility under law, whether such process is formal or informal:

(5) "agency proceeding" means agency

"rulemaking", "adjudication", or "licensing", as defined in section 551 of title 5, United States Code;

"commerce" means commerce among (6) or between the several States and commerce

with foreign nations:

(7) "consumer" means any individual who uses, purchases, acquires, attempts to purchase or acquire, or is offered or furnished any real or personal property, tangible or intangible goods, services, or credit for personal, family, or household purposes;

(8) "Federal agency" or "agency" means "agency" as defined in section 551 of title

5, United States Code. The term shall include the United States Postal Service, the Postal Rate Commission, and any other authority of the United States which is a corporation and which receives any appropriated funds, and, unless otherwise expressly provided by law, any Federal agency established after the date of enactment of this Act, but shall not include the Agency for Consumer Advo-

cacy;
(9) "Federal court" means any court of the United States, including the Supreme Court of the United States, any United States court of appeals, any United States district court established under chapter 5 of title 28, United States Code, the District Court of Guam, the District Court of the United States Customs Court, the United States Court of Customs and Patent Appeals, the United States Tax Court, and the United

States Court of Claims;

(10) "individual" means a human being; "interest of consumers" means any (11) health, safety, or economic concern of consumers, including but not limited to the factors enumerated in section 2(b)(3), involving real or personal property, tangible or intangible goods, services, or credit, or the advertising or other description thereof, which is or may become the subject of any business, trade, commercial, or market-place offer or transaction affecting commerce, or which may be related to any term or condition of such offer or transaction. Such offer or transaction need not involve the payment

(12) "participation" includes any form of

submission:

(13) "person" includes any individual, corporation, partnership, firm, association, institution, or public or private organization

other than a Federal agency;

or promise of a consideration;

(14) "State" means each of the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Canal Zone, Guam, American Samoa, and the Trust Territory of the Pacific Islands: and

"submission" means participation (15) through the presentation or communication of relevant evidence, documents, arguments,

or other information.

CONFORMING AMENDMENT

SEC. 15. (a) Section 5314 of title 5, United States Code, is amended by adding at the end thereof the following:

"(60) Administrator, Agency for Consumer

Advocacy.

(b) Section 5315 of such title is amended by adding at the end thereof the following: "(100) Deputy Administrator, Agency for Consumer Advocacy."

(c) Section 5316 of title 5, United States Code, is amended by adding at the end thereof the following new paragraphs:

"(135) General Counsel, Agency for Con-

sumer Advocacy.

"(136) Assistant Administrators, Agency for Consumer Advocacy (5)."

EXEMPTIONS

Sec. 16. (a) This Act shall not apply to the Central Intelligence Agency, the Federal Bu-reau of Investigation, or the National Security Agency, or the national security or intelligence functions (including related pro-

curement) of the Departments of State and Defense (including the Departments of the Army, Navy, and Air Force) and the military weapons program of the Energy Research and Development Administration, to any agency action in the Federal Communications Commission with respect to the renewal of any radio or television broadcasting license, or to a labor dispute within the meaning of section 13 of the Act entitled "An Act to amend the Judicial Code and to define and limit the jurisdiction of courts sitting in equity, and for other purposes", approved March 23, 1932 (29 U.S.C. 113), or of section 2 of the Labor Management Relations Act (29 U.S.C. 152), or to a labor agreement within the meaning of section 201 of the Labor Management Relations Act, 1947 (29 U.S.C. 171).

SEX DISCRIMINATION

Sec. 17. No person shall on the ground of sex be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity carried on or receiving Federal assistance under this Act. This provision will be enforced through agency provisions and rules similar to those already established, with respect to racial and other discrimination, under title VI of the Civil Rights Act of 1964. However, this remedy is not exclusive and will not prejudice or cut off any other legal remedies available to a person alleging discrimination.

LIMITATIONS RELATING TO SMALL BUSINESS AND FAMILY FARMING INTERESTS

SEC. 18. (a) It is the sense of the Congress that small business and family farming interests should have their varied needs considered by all levels of government in the implementation of the procedures provided throughout this Act.

(b) (1) In order to carry out the policy stated in subsection (a), the Small Business Administration and the Department of Agriculture (A) shall to the maximum extent possible provide small business and family farming interests with full information concerning the procedures provided for throughout this Act which particularly affect such interests, and the activities of the various agencies in connection with such provisions, and (B) shall, as part of its annual report, provide to the Congress a summary of the actions taken under this Act which have particularly affected such interests.

(2) To the extent feasible the Administrator shall seek the views of small business and family farming interests in connection with establishing the Agency's priorities, as well as the promulgation of rules implementing this Act.

(3) In administering the programs provided for in this Act, the Administrator shall respond in an expeditious manner to the views, requests, and other filings by small business and family farming interests.

(4) In implementing this Act, due consideration shall be given to the unique problems of small business and family farming interests so as not to discriminate or cause unecessary hardship in the administration or implementation of the provisions of this

(5) For the purposes of this section, the rm "small business" shall have the same term meaning as provided in section 10(a)(4) of this Act.

AUTHORIZATION OF APPROPRIATIONS

SEC. 19. There are authorized to be appropriated to carry out the provisions of this Act, not to exceed \$15,000,000 for the fiscal year ending September 30, 1978 not to exceed \$20,000,000 for the fiscal year ending September 30, 1979, and not to exceed \$25,000,000 for the fiscal year ending September 30, 1980, Any subsequent legislation to authorize appropriations under this Act for the fiscal year beginning October 1, 1980, shall be referred in the Senate to the Committee on Government Affairs and to the Committee on Commerce.

EVALUATION BY THE COMPTROLLER GENERAL

SEC. 20. (a) The Comptroller General of the United States shall audit, review, and evaluate the implementation of the provisions of this Act by the Agency for Consumer Advocacy.

(b) Not less than thirty months nor more than thirty-six months after the effective date of this Act, the Comptroller General shall prepare and submit to the Congress a report on his audit conducted pursuant to subsection (a), which shall contain, but not be limited to, the following:

(1) an evaluation of the effectiveness of consumer representation Agency's

activities:

(2) an evaluation of the effect of the activities of the Agency on the efficiency, effectiveness, and procedural fairness of affected Federal agencies in carrying out their assigned functions and duties;

(3) recommendations concerning any legislation he deems necessary, and the reasons therefor, for improving the implementation of the objectives of this Act as set forth in

section 2.

(c) Copies of the report shall be furnished to the Administrator of the Agency for Consumer Advocacy, the chairmen of the Senate Committees on Commerce and on Governmental Affairs, and the chairman of the Committee on Government Operations of the House of Representatives.

(d) Restrictions and prohibitions under this Act applicable to the use or public dissemination of information by the Agency shall apply with equal force and effect to the General Accounting Office in carrying out its

functions under this section.

MISCELLANEOUS PROVISIONS

Sec. 21. (a) Nothing in this Act should be construed to limit the discretion of any Federal agency or court, within its authority, including a court's authority under rule 24 of the Federal Rules of Civil Procedure, to grant the Administrator additional participation in any proceeding or activity, to the extent that such additional participation may not be as of right, or to provide additional notice to the Administrator concerning any agency proceeding or activity.

(b) (1) No act or omission by the Administrator or any Federal agency relating to the Administrator's authority under sections (a), (d), (f), and (j), 7, 10, 11, and 12 of this Act shall affect the validity of an agency action or be subject to judicial review: Pro-

vided. That-

(A) the Administrator may obtain judicial review to enforce his authority under sections 6 (a), (d), (f), (i), and (j), 10, and 12 of this Act: Provided, That he may obtain judicial review of the Federal agency determination under section 6(f) of this Act only after final agency action and only to the extent that such determination affected the validity of such action;

(B) a party to any agency proceeding or a participant in any agency activity in which the Administrator intervened or participated may, where judicial review of the final agency action is otherwise accorded by law, obtain judicial review following such final agency action on the ground that the Administrator's intervention or participation resulted in prejudicial error to such party or participant based on the record viewed as a whole; and

(C) any person who is substantially and adversely affected by the Administrator's action pursuant to section 6(f), 10(a), or 11 of this Act may obtain judicial review, un-less the court determines that such judicial review would be detrimental to the interests

(2) For the purposes of this subsection, a determination by the Administrator that the result of any agency proceeding or activity may substantially affect an interest of consumers or that his intervention in any proceedings is necessary to represent adequately an interest of consumers shall be deemed not to be a final agency action.

(3) The Administrator's determination. pursuant to subsections 6(a)(2), 6(a)(3), and 6(d), that an agency action may substantially affect an interest of consumers shall be subject to review during judicial

review of a final agency action.

TRANSFER OF PROGRAMS, OPERATIONS, AND ACTIVITIES

SEC. 22. (a) The President is hereby directed to submit, not later than one hundred and twenty days after the date of enactment of this Act, a reorganization plan to the Congress pursuant to chapter title 5, United States Code, which provides for the transfer to the Agency of those consumer-related programs, operations, and activities of Federal agencies which can be performed more appropriately or with greater efficiency by the Administrator under the authority contained in this Act. Such plan shall be consistent with the Agency's responsibilities under section 5 of this Act.

(b) The Administrator, pursuant to section 4 of this Act, shall be responsible for incorporating such programs, operations, and activities as may ultimately be transferred and for issuing such organizational directives he deems appropriate to avoid any duplication of effort and to otherwise carry out the purposes of this section.

PUBLIC PARTICIPATION

SEC. 23. (a) After reviewing its statutory authority and rules of procedures, relevant agency and judicial decisions, and other relevant provisions of law, each Federal agency issue appropriate interpretations, guidelines, standards, or criteria, and rules of procedure, to the extent that such rules appropriate and are not already in effect. relating to the rights of individuals who may be affected by agency action to-

(1) petition the agency for action;

(2) receive notice of agency proceedings; (3) file official complaints (if appropriate) with the agency;

(4) obtain information from the agency; and

(5) participate in agency proceedings for the purpose of representing their interests. Such interpretations, guidelines, standards, criteria, and rules of procedure shall be published in proposed and final form in the Federal Register.

(b) Each Federal agency shall take all reasonable measures to reduce or waive, where appropriate, procedural requirements for individuals for whom such requirements would be financially burdensome, or which would impede or prevent effective participa-

tion in agency proceedings.

(c) Any rules of procedure issued by any Federal agency pursuant to this section shall be published in a form and disseminated in a manner that is designed to inform, and that is able to be understood by, the general public.

COST AND BENEFIT ASSESSMENT STATEMENTS SEC. 24. (a) In furtherance of the purpose and policy of section 2(b)(4) of this Act, and except as otherwise provided in this Act, each Federal agency which is authorized to promulgate rules (as defined in section 551(4) of title 5, United States Code) shall prepare a cost and benefit assessment statement with respect to any rules to which section 553(b) of title 5, United States Code, is applicable, which are likely to have a substantial economic impact, for the agency's consideration in connection with the promulgation of such rules. Each such statement shall be short and concise and, together with such supporting documentation as the agency in its discretion determines to be necessary or appropriate, shall consist of the following three elements:

(1) estimated costs, that are foreseeable as a result of the effective implementation

of such rule:

(2) estimated benefits, that are foreseeable a result of the effective implementation of such rule; and

(3) the apparent relationship, if any, between such costs and benefits.

To the extent deemed practicable by the agency responsible for its preparation, each cost and benefit assessment statement shall indicate in an appendix the assumptions, if any, which were made by it regarding the means, or alternative means, and attendant costs of compliance with the proposed rule. including any manufacturer's costs and consumer costs reflected in the price of any product affected by such rule. Before releasing any cost and benefit assessment statement to the public, such agency shall transmit to the Comptroller General such assessment and any appendix thereto which indicates the assumption made regarding the means and attendant costs of compliance with the proposed rule including any manufacturers' costs and consumer costs reflected in the price of any product affected by such

(b) With respect to any proposed rule subject to the requirements of subsection (2) each Federal Register notice of proposed rulemaking shall request interested persons to submit to the applicable agency, in writing, comments, materials, data, information, and other presentations relevant to the preparation of the required cost and

benefit assessment statement.

(c) Each such agency shall, to the extent it deems necessary or appropriate, seek to obtain comments, materials, data, information, and presentations relevant to the costs and benefits, if any, likely to ensue from effective implementation of any proposed rule, within the time prescribed for consideration of the proposed rule, from other Federal agencies and persons. No extensions of time for comment shall be granted solely for the purpose of receiving any such presentations with respect to such benefits.

(d) Each person who contends that effective implementation of a proposed rule will result in increased or decreased costs. shall furnish to the applicable agency the information upon which he bases such assertion, and which is in his possession, is known to him, or is subject to his control. Such information shall be furnished to the agency in such form, manner, and detail as such agency in its discretion prescribes. Whenever any relevant information, which an applicable agency deems necessary or appropriate to the preparation of a cost and benefit assessment statement, is or may be in the possession or control of a person who may be directly affected by the proposed rule, such agency is authorized to request such relevant information as reasonably described by it, and such person shall furnish such relevant information promptly to such agency. Such request for information shall be enforceable by appropriate orders by any court of the United States. Such information as is furnished shall be considered a statement for purposes of section 1001 of title 18, United States Code.

(e) A cost and benefit assessment statement prepared pursuant to subsection (a) shall be published at the end of the year in the Federal Register in a report which shall contain all cost and benefit assessment statements applicable to rules promulgated during the preceding twelve months. All relevant information developed or received by the applicable agency in connection with the preparation of such statement shall be available to all interested persons, subject to the provisions of section 552 of title 5, United States Code, and other applicable law.

(f) The President shall issue, pursuant to the provisions of this subsection, (1) regulations providing guidelines for Federal agencies as to the nature and content of any cost and benefit assessment statement required by subsection (a) and (2) regulations which shall insure that any agency shall be able to obtain information deemed by it to be necessary or appropriate to the preparation of any such cost and benefit assessment statement. Such regulations shall be issued by the President upon the recommendations submitted to the President by the Office of Management and Budget, the General Accounting Office, and the Agency for Consumer Advocacy. In issuing or modifying any regulations implementing this section, the President shall proceed in accordance with the procedures prescribed by subsections (b) and (c) of the new section inserted by section Public Law 93-637 (88 Stat. 2193; 15 U.S.C. 57a(b), (c)). The President shall provide public notice of proposed rulemaking to implement this subsection within sixty days of the effective date of this Act, and shall issue regulations implementing this subsection within one hundred and eight days of the effective date of this Act. After issuance of any regulations implementing this section, the President shall transmit them to the Congress, together with all recommendations submitted to the President pursuant to this subsection. Such regulations shall take effect ninety legislative days after such transmittal to the Congress by the President, unless either House of Congress by resolution of disapproval, pursuant to procedures lished by chapter 35, title 44, United States Code, and by section 1017 of the Congressional Budget and Impoundment Control Act of 1974 (31 U.S.C. 1407), disapproves such regulations, except that Congress may by concurrent resolution modify such regulations within such ninety-day period, in which case such regulations shall take effect in such modified form.

(g) No Federal officer or agency shall subproposed legislation to the Congress which is likely, if enacted, to have a substan-tial economic impact, unless such legislation is accompanied by a cost and benefit assess-ment statement. The statement required by this subsection shall be prepared in accordance with the provisions of subsection (a). The requirements of this subsection may be postponed upon the request of a committee of Congress having jurisdiction over such legislative proposal, for a period not to exceed thirty days from the date of submission to the Congress of such legislation.

(h) In addition to the definitions in section 14 of this Act, the following definitions shall apply with respect to the provisions of

this section:

the term "rule" means "rule" as defined by section 441(4) of title 5, United States Code:

(2) the term "legislation" or "law" means a statute of the United States or any amend-

ment thereto:

(3) "benefit" includes any direct or indirect, tangible or intangible, gain or advantage which the agency, in its discretion, deems proximately related to the promulgation of a proposed regulation or the enactment of the proposed legislation. The term shall include such non-quantifiable benefits as the agency identifies and describes. Benefits may include the costs that would be likely to result from the agency's failure to act, but which are likely to be avoided the agency's action; and
(4) "cost" includes any direct or indirect

expense, including component costs of production and supply, and any loss, penalty, or disadvantage which the agency, in its discretion, deems proximately related to the promulgation of a proposed regulation, or the enactment of proposed legislation. The term shall include such nonquantifiable costs as the agency identifies and describes.

(i) The Comptroller General of the United States shall monitor and evaluate the implementation of this section. In addition to any other reports or studies made by the Comptroller General relating to this section. he shall, three years after the effective date of this section, conduct a comprehensive review of this section including an evaluation of the advantages and disadvantages of cost and benefit assessment statements and of the nature and extent of Federal agency compliance with this section. The Comptroller General shall prepare and submit to the Congress a report based on such study and review. Such report shall include, but need not be limited to, his recommendations as to the necessity or advisability of the provisions of this section, and of the need to amend subsection (k), or any other provision, of this section. The Comptroller General shall, if he determines that the assumptions contained in any statement submitted to it pursuant to subsection (a) of this section are inaccurate, incomplete, or unjustified so report to the committees of the Senate and House of Representatives having jurisdiction over any Federal department or agency that prepared such statement.

(j) No court shall have the jurisdiction review, or enforce or shall review, or enforce and, except for the general review of the effectiveness of this section provided for in subsection (i), no officer or agency of the United States, other than the agency responsible for the preparation of a and benefit assessment statement and the duly authorized committees of the Congress. shall have the authority to review, or enforce or shall review, or enforce in any way the compliance of any cost and benefit assessment statement with this section, or, except where the agency preparing such a statement seeks to enforce in court its request for information, the compliance, by such agency with any other requirement of this section, including the manner or process by which such statement is prepared: Provided, That a Federal court may, upon the request of any interested person, review and enforce compliance with the provisions of this subsection.

(k) The requirements of this section shall supersede the requirements of any existing executive order imposing any economic, cost benefit, inflationary, or other similar impact assessment requirement. No requirement of section shall alter or supersede any Federal agency statutory requirement, regulation, or lawful practice which such agency determines to be inconsistent with any of the requirements of this section. Further, no agency shall be required to prepare and issue a cost and benefit assessment statement required by this section, if information which would be contained in such statement is encompassed within another statement required by law to be prepared in connection with the promulgation of the applicable

(1) The provisions of this section shall become effective upon the effective date of implementing regulations submitted.

EFFECTIVE DATE

Sec. 25. (a) This Act shall take effect 90 days after the date of enactment or on such earlier date as the President shall prescribe and publish in the Federal Register.

(b) Any of the officers provided for in this Act may (notwithstanding subsection (a)) be appointed in the manner provided for in this Act at any time after the date of the enactment of this Act. Such officers shall be compensated from the date they first take office at the rates provided for in this Act.

SEPARABILITY

Sec. 26. If any provision of this Act is declared unconstitutional or the applicability thereof to any person or circumstance is held invalid, the constitutionality and effectiveness of the remainder of this Act and the applicability thereof to any persons and circumstances shall not be affected thereby.

SUMMARY AND EXPLANATION OF THE CONSUMER PROTECTION ACT OF 1977

The bill would establish an independent, non-regulatory Agency for Consumer Advocacy (ACA) to speak for the interests of the consumer. The Agency will be authorized to advocate the interests of consumers before agencies and the courts and to provide the public with information about consumer matters.

The Agency will have no regulatory or other legal power to force business enterprises to change their practices in any way. Rather, it will operate purely as a spokesman for the consumer before the other agencies that do make decisions affecting the consumer.

CONSUMER ADVOCACY BEFORE FEDERAL AGENCIES

The most important function of the Agency will be representation of consumer interests before Federal agencies and courts. In formal adjudicatory or rulemaking proceedings under the Administrative Procedure Act, the ACA is authorized to intervene as a party. In such cases the Agency will be subject to the same rules as any other person who is a party to the proceedings. The Act directs ACA to refrain from intervening in such proceedings unless necessary to adequately represent the interests of consumers.

When a Federal agency considers a decision affecting the interests of consumers outside a formal adjudicatory or rulemaking proceeding, the Act gives the ACA the right to submit data and other relevant information or arguments. Such submission will be in either written or oral form and presented in such a way as not to hinder the Agency's ability to act expeditiously. This means that if the lead tinsel manufacturers have a meeting with the Commissioner of on the schedule for removing lead tinsel from the market, the Administrator of ACA is entitled to present his views on the subject to FDA officials. The section does not give him the right to be present at the tinsel manufacturers meeting and argue his case at the same time they do.

JUDICIAL REVIEW

The ACA Administrator is also authorized, where necessary to protect consumer interests, to seek judicial review of an agency proceeding reviewable under law. He may also intervene in any judicial proceeding reviewing or enforcing such agency actions. This right to seek review is analogous to the right now enjoyed by private persons aggreeved by agency action. If the Administrator did not participate in the agency proceeding below, he may appeal the agency decision only if he first files a timely petition before the Federal agency for rehearing and reconsideration and the agency fails to act favorably on the petition.

CLEARINGHOUSE FOR COMPLAINTS

The Agency is authorized to act as a clearinghouse for consumer complaints. ACA is required to notify businesses of complaints concerning them, to give them an opportunity to respond, to transmit such complaints to appropriate Federal or state agencles, and to maintain an up-to-date file for public inspection of complaints together with any comments which are received.

GATHERING INFORMATION

The ACA is authorized to obtain the information it needs through the submission

of written interrogatories. However, the Administrator may only use this authority where the information is not publicly available and cannot be obtained from another Federal agency. Moreover, he may not use this authority in an agency proceeding in which the Administrator has intervened. The interrogatories may only be enforced if the Administrator sustains the burden of showing that they are relevant to the purpose for which they are sought and are necessary to uncover consumer fraud or substantial economic injury to consumers or to protect consumer health or safety. Small businesses, which includes about 95 percent of all businesses, are exempted from enforcement of interrogatories.

INFORMATION FROM OTHER AGENCIES

The ACA may obtain information from other agencies. But ACA is expressly prohibited from collecting information from other agencies concerning national security, tax records, internal policy recommendations, and other similar private information. There are also strict limits on the Agency's right to have access to trade secrets. The Agency is prohibited from publicly disclosing any information obtained from another Federal agency if the information is exempted from such disclosure by the other agency.

FUNDING

The bill would provide a limited three-year authorization: \$15 million for fiscal year 1978, \$20 million for fiscal year 1979, and \$25 million for fiscal year 1980.

THE CONSUMER PROTECTION ACT OF 1977 SAFEGUARDS FOR BUSINESS

The Act contains a number of important safeguards to assure that the rights of persons in private enterprise will not be infringed upon by any Agency activity. These safeguards include the following:

1. Restrictions on Information-Gathering. Section 10 delineates the ACA's information-gathering authority, placing restrictions on the Agency's powers to obtain information from business and from government. Generally, the Administrator is authorized to compel disclosure of information only when necessary to protect the health or safety of consumers or to discover consumer fraud and substantial economic injury to consumers. Such information may only be obtained from businesses which substantially affect interstate commerce whose activities substantially affect consumer interests. In addition to these general limitations, specific prohibitions limit ACA power to obtain information from small businesses and from other Federal agencies.

a. The ACA is prohibited from requiring the disclosure of information from small businesses as defined in the Act* (Section 10(a) (4). (Additional small business protections are outlined in this memo, number 8.)

b. The Act also includes a number of restrictions on access to information held by other Federal agencies. The categories of information which ACA has no right of access to include: information classified in the interest of national security; policy or prosecutorial recommendations; personnel and medical files; information which a Federal agency is prohibited from disclosing to another agency; information which would disclose the financial condition of individual bank customers; information from Federal income tax returns (Section 10(c)); and trade secrets and confidential commercial or financial information obtained prior to the enactment of the Act. The ACA has no right of access to any information collected in the future by another agency if the agency

Available statistics show that under this definition, over 95 percent of all businesses would be exempted from interrogatories.

is only able to obtain such information by promising to keep it confidential. And, before ACA obtains any trade secrets or confidential commercial or financial information from another agency, the agency holding the information must first notify the person from whom the information was collected. Such a person will have a reasonable time to comment or seek injunctive relief. (Section 10(b)).

2. Prohibitions on Disclosure of Information. Section 11 governing the ACA's duty to disclose information to the public, prohibits the Agency from disclosing information received from another agency which is exempt from disclosure under the Freedom of Information Act or any other law, and which the Agency has specified shall not be disclosed. (Section 11(b)) Trade secrets or other confidential business information received

from a business, may be withheld by the ACA.

3. Limitations Governing Disclosure of Information. Section 11(c) sets forth provisions governing the release of information by the Administrator. Where the release of information is likely to cause substantial injury to a person, the Administrator is required to notify such person and provide an opportunity for comment and injunctive relief, unless immediate release is necessary to protect the public health or safety. (Section 11(c) (4) In addition, the Administrator is directed to take all reasonable measures to assure that any information it releases is accurate and not misleading or incomplete. Tight restrictions are imposed on the release of information which discloses product or service names. Among other restric-tions, the Agency is prohibited from indi-cating that any secific product is a better buy than any other product.

4. Objections to Interrogatories—ACA Bur-

den. A private party may object to any interrogatory ACA serves on it. In such a case, the burden will be on the Administrator to prove that the information sought substantially affects the health or safety of consumers, or is necessary in the discovery of consumer fraud or substantial economic injury to consumers and is relevant to the purposes for which the information is sought. In addition, no person is required to answer an interrogatory which is unnecessarily burdensome. (Section 10(a)(3), and no small busias defined in section 10(a)(4), is re-

quired to answer an interrogatory.
5. Consumer Complaints—Opportunity to Respond. When, under Section 7, ACA transmits consumer complaints to other government agencies or makes them available to the public, ACA must also forward the complaint to the person who is the subject of the complaint. The only exception to this requirement is when such notification might impede action against a person for a violation of the law. The person's response to the complaint must be made available to the public along with any disclosure of the origi-

nal complaint.

6. Judicial Review Protection. Section 21 (b) (1) gives any party to a final agency proceeding reviewable under law the right obtain judicial review on the grounds that the ACA participation in the proceedings resulted in error prejudicial to the party.
7. Restrictions on Initiation of Civil Pro-

ceedings. ACA's ability to initiate court actions involving agency proceedings in which it did not participate is specifically subject to a requirement that the ACA first petition the agency for reconsideration and is further subject to an initial judicial determination that such action would advance the interests

of justice. (Section 6(c))
8. Additional Small Business and Farmer Protections. Section 18 requires that ACA and all other Federal agencies to keep the unique needs of small businesses and family farmers in mind when implementing the Act. In

addition, the Small Business Administration and USDA are directed to keep small businesses and family farmers informed about the activities of the ACA, and to report to Congress on actions taken under this Act affecting small business and family farmers. Similarly, the Administrator of the ACA is required to consult with representatives of small business and family farmers before establishing the Agency's general priorities or policies, and he is to respond in an expeditious manner to requests and other correspondence from such persons.

9. Assurance of Fairness. Generally, in

carrying out functions under the Act, the Administrator is required to act in accordance with the rules that assure fairness to affected persons. (Section 4(a)(4))

Mr. JAVITS. Mr. President, 17 years after President John F. Kennedy pro-claimed a consumer "Bill of Rights," and 8 years after Senator RIBICOFF, I and others introduced the original consumer protection agency legislation in the Senate, consumers are still the only important group in the economy who do not have an adequate voice at the Federal level.

That potential for effective advocacy remains unrealized as regulatory and other Government agencies continue to make hundreds of decisions every year which directly impact upon the lives and economic, health, and safety interests of 220 million Americans-all of us con-

The fact-established repeatedly during hearings and in floor debate dealing with the need for a consumer agency-is that the consumer is not only not represented in these governmental processes, but that these interests are overwhelmed by scores of advocates representing private sector interests on every issue of major importance in the regulatory system

I am again pleased to join with Senators Ribicoff, Percy, and Magnuson, and our longtime allies in the House. Congressmen BROOKS, ROSENTHAL, and HORTON, in relaunching the effort to enact this bill.

I applaud and commend the strong pledge of support for this bill by President Carter and his superb choice for White House Consumer Affairs Adviser, Esther Peterson.

I have long believed that this bill is of critical importance to the fundamental interests of the American consumer. The case for establishing a strong consumer protection agency has been made with progressively greater force and clarity each year since I and my colleagues introduced the original version. consider it a major priority for the Senate, and today urge my colleagues to approach this legislation and the many refinements and improvements which we have incorporated into it over the years with a fresh perspective.

I recognize that this proposal has had a turbulent history. It has evoked and continues to generate substantial opposition from those who are concerned about the interference and disruption which they allege would spread in the wake of the activities of such an agency.

Mr. President, the Agency for Consumer Advocacy proposed in the bill which we introduce today is sensible, carefully measured legislation which will give the consumer a voice in Government policymaking, without upsetting delicate balances which now exist in the Federal decisionmaking process.

It focuses in one small agency an ability to marshal the facts concerning the economic, health, and safety interests of consumers, and to present these facts on behalf of consumers. That agency is not conceived as, nor can it become a regulatory agency in any sense of the word. It will not harass. It will not frustrate and delay Government action.

In the exercise of its role before other Government agencies, it will only have procedural rights, and will not grant or deny rates, routes, applications or other substantive rights and remedies. I am confident that the agency would not be antibusiness-and it is certainly not antibusiness in its conceptualization.

The ACA would be bound by the same procedural rules and time limits which apply to business and other parties to agency proceedings. Virtually all decisionmaking in the public as well as the private sector is, in the broader sense, adversarial. At the heart of the regulatory system is a requirement that all formal decisions and findings be supported by evidence developed in an adversary process. The fact that agencies and departments of the Federal Government have frequently failed to take into account the interests of the consumer in the regulatory process in contrast to the interests of private sector organizations is a serious institutional flaw which many students of the regulatory system have noted.

We seek to repair that flaw, but in doing so, it is not our intention to create "super agency" of Government. I pledge my continuing review of its operations in the future to assure that it does not become one. The ACA would have limited resources—\$15 to \$25 million—less for example than the Defense Department's public relations office; and it would therefore be able to participate in only a few carefully chosen cases.

Beyond our efforts in the Congress and in the consumer movement itself, we cannot achieve important goals for the American consumer without the full cooperation of American business and industry. I am confident that its past cooperation-founded upon the principle that what is good for the consumer is good for business-will continue and will grow in the years ahead.

It has been well documented that the failure to provide institutionally for the representation of consumer interests at the Federal level has resulted in serious injury. There are many familiar examples of inadequately defined or enforced Federal standards involving flammable fabrics, impure health vaccines, unsafe toys and anticompetitive practices in many industries. The promulgation in 1974 of FEO oil regulations which resulted in passing on double charges to the consumer is another example. Some oil companies interpreted the regulation in such a way as to charge both other oil companies for the crude oil which was sold to them while at the same time in-

cluding the cost of this oil while calculating the prices they would be entitled to charge for refined products. According to testimony before the House Small Business Committee on regulatory activities, \$40 million of overcharges had been passed on to consumers by October of 1974. After initially interpreting the regulation as the companies had, FEO reversed its position, asserting that the regulation never did allow the companies to do what they did.

The Agency for Consumer Advocacy could have intervened at the beginning of the regulatory process and might have prevented the imposition of the double

billing.

While I do not think it necessary to comment upon all of the important provisions contained in our bill, I do wish to emphasize the importance of a few

key provisions:

First. To assure that the ACA will have the information it needs, the bill gives the Agency access to certain data held by other agencies. If it cannot obtain the information from other agencies or public sources, the ACA may also solicit directly from private parties answers to specific questions. Detailed safeguards are established to assure that the confidentiality of any information is guarded, and that in all respects ACA is not able to act in a way that injures the rights of businesses or other private persons. Small businesses are exempted from compulsory disclosure of information except in the case of imminent and substantial danger to consumer health or safety. The ACA will thus have a variety of means, other than actually participating in agency or court proceedings to promote the interests of consumers. It has always been our intent that the ACA will rely on these alternative means when ever possible.

Second. In some instances, the most important agency decisions insofar as consumers are concerned may involve decisions not to investigate or take other action. The bill therefore also gives the Administration the right to participate by submitting written or oral views, and other relevant material, to the agency considering in an informal proceeding a matter effecting consumers. Participation by ACA in informal proceedings parallels the opportunity private persons now have to consult informally with agency officials about matters affecting them.

Third. To make ACA's role as an advocate complete, the bill also gives the ACA the right, like any other person aggrieved by a final agency action, to seek judicial review of agency decisions. Similarly, it permits the ACA to intervene in suits already brought involving agency proceedings affecting consumers. When both a Federal agency and private persons present arguments before a court which do not adequately consider the rights of consumer, the ACA will be able to argue for the consumer.

Fourth. Apart from its responsibility to represent the interests of consumers, the Agency for Consumer Advocacy will also act as a clearinghouse for complaints individual consumers have against business

enterprises. Again, the ACA will have no authority to force business to take any action in response to such complaints. Rather, the ACA will only make sure that the appropriate Federal and State agencies with authority to take any necessary action, and the business enterprise complained about, know about the complaint.

Mr. President, the concepts embodied in this bill have been carefully developed and refined for more than a decade. It is designed to bring about a sharper joinder of issues within our regulatory system. It is imperative that this important reform not be delayed any longer. Senator Ribicoff has announced that hearings will begin in the Governmental Affairs Committee on Monday April 8. We expect to report the bill to the Senate within 2 weeks of that date. I hope and trust that the bill will be debated and passed by the Senate very shortly after that. Early enactment in this session will finally redeem a long overdue pledge to establish the American consumer in a position to have his proper say on governmental decisions which have such an enormous impact upon our society.

Mr. PERCY. Mr. President, it is with great pleasure that I join my distinguished colleagues, Senators RIBICOFF and Javirs, in the introduction of this very important piece of legislation, the Consumer Protection Act of 1977.

For too long American consumers have been asked to suffer the indignities of second-class citizenship; for too long the interests of American consumers have gone unrepresented before Federal agencies and Federal courts; for too long American consumers have suffered the personal injuries and economic hardships of marketplace inequities sanctioned by these same Government institutions; and for too long American consumers have suffered the disregard of Government officials who have placed their own interests above the interest of the people.

Mr. President, I am pleased to sponsor once again legislation that affords American consumers a forceful and responsible voice in governmental matters affecting human safety and economic justice; legislation I feel will once again earn the support of this Congress. I am pleased that President particularly Carter today urged prompt passage of

this important legislation.

Two years ago, this Senate passed by a substantial margin legislation virtually identical to the Consumer Protection Act of 1977 which we are introducing here today. The purpose of this legislation is to accord consumers effective representation of their interests before Federal agencies and courts with the expectation that much of the human suffering and economic hardships experienced by consumers on a daily basis can be significantly reduced by the active encouragement of a more responsive Government.

To carry out this purpose, the Consumer Protection Act of 1977 would create an independent Agency for Consumer Advocacy—ACA—with the authority to intervene in Federal agency proceedings

or initiate civil proceedings in the Federal court system whenever it determined an agency action might substantially affect an important interest of consumers.

It is important to understand that the Agency for Consumer Advocacy is not granted the authority under this legislation to make law, set standards, or regulate industries. When we first held hearings on this legislation, it quickly became apparent to those of us most interested in tackling this problem that if there was one thing we did not need it was another regulatory agency. What we needed, and continue to need, is the creation of an agency to intervene in the affairs of existing regulatory bodies to advocate the interests of consumers. Extensive hearings have made clear that Government's failure to redress and prevent consumer abuses in the marketplace stemmed in large part from Government's failure to elicit and consider consumer opinion on matters directly impacting upon consumer interests.

While we have set our sights high in planning the mission of this new agency, I am painfully aware of the built-in limitations which cumbersome bureaucracies carry with them. I have, for this reason, insisted that the Consumer Protection Act of 1977 place a reasonable limit on appropriations, thus assuring an organizational size that is manageable, yet at the same time adequate to serve the purposes of the act. I have insisted, in addition, that the Agency for Consumer Advocacy restrict its activities to issues which directly impact upon marketplace transactions and then, only where the interests of consumers are not otherwise adequately represented. In this way, the Agency for Consumer Advocacy should be able to selectively target its issues and intelligently allocate its resources to matters where it can expect to have a measureable impact.

I am mindful of the fact that much can and should be done by the ACA to protect consumer interests, short of formal intervention into the affairs of other agencies. My experience has taught me that not only is the Government insensitive to many of the problems consumers complain about, but unfortunately some businesses all too frequently fail to acknowledge the scope and severity of problems suffered by their customers. Thus, this legislation authorizes the ACA to collect and evaluate information from consumers, businesses, and other agencies. This should enable the ACA to identify problem areas and get the appropriate agency to handle the matter, without necessarily instituting a formal proceeding.

Over these past years, in preparing this legislation we have been careful to consult with lawyers, economists, and experts in the field of agency procedure. But as a former businessman, I have been particularly sensitive to the concerns of the business community. I am gratified that we have earned the support of such outstanding national corporations as Mobil Oil Corp., Marcor, and its sub-sidiary, Montgomery Ward, Connecticut General Life Insurance Co., United

Artists, Gulf and Western, Warner Communications, Jewel Companies, Inc., Bantam Books, Stop and Shop Corp. Inc. Stride-Rite Shoes, The Dreyfus Corp., and many others. Just last month Peter E. Haas, president of Levi Strauss and Co. in San Francisco, sent a letter to President Carter expressing his strong support for the early enactment into law of legislation such as we have introduced here today.

This is not to say that there is not still residual resistance within certain segments of the business community. But this legislation is expressly designed to ensure that in protecting the consumer, the agency does not unduly or unfairly harass business and that the regulatory process is made more fair, expeditious, and accountable to the needs of consumers. To assure this result, we have consulted closely with representatives from the business community to write into the bill significant safeguards against undue interference with responsible business practices and the orderly functions of Government. These include the follow-

BUSINESS SAFEGUARDS

1. Restrictions on Information Gathering. Section 10 delineates the ACA's information gathering authority, placing restrictions on the Agency's powers to obtain information from business and from government. Generally, the administrator is authorized to compel disclosure of information only when necessary to protect the health or safety of consumers or to discover consumer fraud and substantial economic injury to con-sumers. Such information may only be obtained from businesses which substantially affect interstate commerce whose activities substantially affect consumer interests. In addition to these general limitations, specific prohibitions limit ACA power to obtain information from small businesses and from other Federal agencies.

(a) The ACA is prohibited from requir-ing the disclosure of information from small businesses as defined in the Act. (Section

10(a)(4))

The Act also includes a number of restrictions on access to information held by other Federal agencies. The categories of information which ACA has no access to, include: information classified in the interest of national security; policy or prosecutorial recommendations; personnel or medical files; information which a Federal agency is prohibited from disclosing to another agency; information which would disclose the financial condition of individual bank customers; information from Federal income tax returns; and trade secrets and confidential commercial or financial information obtained prior to the enactment of the Act (the ACA has no right of access to any information collected in the future by an agency if the agency is only able to obtain such information by promising to keep it confidential). Before the ACA obtains any trade secrets or confidential commercial or financial information from another agency, the agency holding the information must notify the person from whom the information was collected. Such a person will have reasonable time to comment or seek injunctive relief. (Section 10 (b))

2. Prohibition on Disclosure of Information. Section 11 governing the ACA's duty to disclose information to the public, prohibits the Agency from disclosing any of

the following:

(a) information received from another agency which is exempt from disclosure under the Freedom of Information Act or any other law, and which the agency has specified shall not be disclosed. (Section 11(a)

(b) trade secrets or other confidential business information received from a business, except where necessary to protect the health and safety of consumers. (Section

11(a)(1))

3. Limitations Governing Disclosure of Information. Section 11(b) sets forth provisions governing the release of information by the Administrator. Where the release of information is likely to cause substantial injury to a person, the Administrator is required to notify such person and provide an opportunity for comment and injunctive relief, unless immediate release is necessary to protect public health or safety. In addition, the Administrator is directed to take all reasonable measures to assure that any information it releases is accurate and not misleading or incomplete. Tight restrictions are imposed on the release of information which discloses product or service names. Among other restrictions, the Agency is prohibited from indicating that any specific product is a better buy than any other product.

4. Objections to Interrogatories—ACA Burden. A private party may object to any interrogatory ACA serves on it. In such a case, the burden will be on the Administrator to prove that the information sought substantially affects the health or safety of consumers, or is necessary in the discovery of consumer fraud or other unconscionable conduct and is relevant to the purposes for which the information is sought. In addition, no person is required to answer an interrogatory which is unnecessarily burden-some. (Section 10(a)(3))

5. Consumer Complaints-Opportunity to Respond. When, under Section 7, ACA transmits consumer complaints to other government agencies or makes them available to the public, ACA must also forward the complaint to the person who is the subject of the complaint. The only exception to this requirement is when such notification might impede or prejudice action against a perfor a violation of the law. The son's response to the complaint must be made available to the public along with any disclosure of the original complaint.

6. Judicial Review Protection, Section 21 (b) (1) gives any party to a final agency proceeding reviewable under the law the right obtain judicial review on the grounds that the ACA participation in the proceedings resulted in the error prejudicial to the

7. Restrictions on Initiation of Civil Proceedings. ACA's ability to initiate court actions involving agency proceedings in which it did not participate is specifically subject to a requirement that the ACA first petition the agency for reconsideration and subject to an initial judicial determination that such action would not impede the in-

terests of justice. (Section 6(c))
8. Additional Small Business Protections. Section 18 requires the ACA and all other Federal agencies to keep the unique needs of small businesses in mind when implementing the Act, and requires the ACA to treat all businesses, whether large or small, in an equitable fashion. In addition, the Small Business Administrator is directed to keep small businesses informed about the activities of the ACA, and to report to Congress on actions taken under this Act affecting small businesses. Similarly, the Administrator of ACA is required to consult with representatives of small businesses before establishing the Agency's general priorities or policies, and directs the Agency to respond in an ex-peditious manner to requests and other correspondence from small businesses.

9. Assurance of Fairness. Generally, in carrying out functions under the Act, the Administrator is required to act in accordance with rules that assure fairness to affected persons. (Section 4(a)(4))

Mr. President, there is one further statement I should like to make to those who are concerned that this legislation may unduly burden the business community. Last year I helped cosponsor an amendment to S. 200, now contained in this year's proposed legislation, that each Federal agency which is authorized to promulgate rules prepare a cost and benefit assessment statement with respect to any rule likely to have a substantial economic impact. The statement would consist of: First, a brief description of the estimated costs that are foreseeable as a result of the effective implementation of any such rule; second, a description of the estimated benefits that are foreseeable as a result of the effective implementation of such a rule; and third, a statement of the apparent relationship, if any, between such benefits and costs.

It is my belief, supported by a commanding majority of my esteemed colleagues, that Federal agencies should attempt to estimate the costs and benefits of implementing rules which are expected to have a substantial impact upon our economy. This provision finally causes the Federal Government to place in sharp focus the trade-offs that must be made each time it imposes itself upon the business community and our society at-large. I cannot state too strongly how important I think it is to the responsive governance of this society that we begin to force agencies to think out the consequences of their actions, to determine how effective their programs are likely to be and at what costs to the American

Mr. President, recognizing that our efforts as reflected in this proposed legislation represent a culmination of years of work and reasonable compromise, I am intent on expending my efforts on trying to improve it even further. I am particularly concerned about the broad scope of the agricultural exemption pushed through the Senate during the floor debate last year. Upon reviewing the language of the House agricultural amendment, I am convinced we can draft and adopt language which incorporates the good intentions of the original sponsors of the Senate amendment without suffering through its considerable over-

I intend also to examine most carefully the amendment of Representative McCloskey, as adopted last session in the House version of this legislation. I share the concern of my distinguished colleagues in the House regarding any programs, operations or activities presently performed in existing Federal agencies that might possibly be duplicated or be performed more appropriately by the ACA. If such were the case, I would support efforts to correct that situation and thereby save the taxpayers moneys through consolidation of such programs.

As I have reviewed the legislative history of this proposal, I find that there are two matters of particular importance we have left unattended and to which I intend to address my efforts. First, despite our concern over the egregious delays regulations potentially beneficial to consumers have experienced throughout the Federal bureaucracy, we have not given satisfactory statutory guidance to help expedite the efforts of the ACA. I do not pretend now to have the solution, but I can assure you that every effort will be made to find one.

The second matter concerns establishing, from the outset, the standards of success to which we expect to hold this new agency. Frequently, Members of Congress charge Government administrators with not meeting levels of achievement arbitrarily established at some point after the occurrence of some event which they view to be contrary to the spirit or letter of an agency's mandate. I believe we owe it to ourselves and to the future administrator of the ACA to notify him in advance of the standards to which he will be held accountable. While I am not prepared now to offer specific suggestions, I do expect to direct my attentions to this matter during committee consideration.

In conclusion, I want to emphasize once again that an agency for consumer advocacy would begin to redress the imbalance in the regulatory process which permits the voices of special interests and big money too often to silence the voices of consumers.

An agency for consumer advocacy would afford consumers a role in dealing with the principal economic issues before the country at this time and help to put a halt to the productivity slump and price spirals which undercut our economic system.

An agency for consumer advocacy would restore integrity to the free enterprise system by helping to put back in balance the bargaining power of consumers when they deal with producers and suppliers of goods and services.

An agency for consumer advocacy would help correct the tattered image of American business by focusing acutely on the actions of those few unscrupulous firms which have held the rest of American industry up to scorn and disrepute.

An agency for consumer advocacy would be a catalyst for timely, effective actions in the public interest by those very Government agencies and bureaucracies which have too often turned away from the legitimate health, safety, and economic concerns of American consumers from every region of the country and from every walk of life.

Finally, this legislation will be seen as a beacon to Government and industry that the day of the consumer is finally at hand. The Agency for Consumer Advocacy will be seen as a signal for improved quality of goods and services, for fairness in advertising and promotion, and for honesty in the marketplace.

Mr. President, I need not remind you that in addition to the widespread business support I have already mentioned, this legislation has received the endorsement of the American Bar Association, the American Trial Lawyers, the Association of the Bar of the City of New York, the Chicago Council of Lawyers, the National Governors' Conference, and

the National Association of Attorneys General. Needless to say, it has also received glowing endorsements from representatives of such highly respected national consumer and public interest groups as Common Cause, Consumer Federation of America, National Consumer's League, Consumer Action for Improved Food and Drugs, Consumer's Union, Public Citizen, and the National Consumer's Congress.

Mr. President, I ask unanimous consent that the recent letter of endorsement for this legislation, dated March 1, 1977, from the President of the Levi Strauss & Co. to President Carter, to which I referred earlier in my remarks, be printed in the Record at this time.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

MARCH 1, 1977.

The PRESIDENT, Washington, D.C.

Dear Mr. President: I am writing to inform you of Levi Strauss & Co.'s strong support for the early enactment into law of a Consumer Protection Agency bill so long as that bill contains carefully balanced benefits and safeguards for consumers, business and other government agencies approximating those embodied in the two similar bills passed by the Senate and House last year.

We believe a bill containing the essential features of the latest Senate and House versions would be beneficial and fair to all concerned. Such a bill would reflect the constructive results of several years of intensive effort, compromise and refinement by all interested parties working with both Houses of Congress.

Of prime importance, such a bill would establish a separate consumer agency with the power to represent consumer interests in proceedings of other agencies but without the power to change the substantive laws administered by those agencies or to issue any regulations of its own.

We do not believe the national interest would be served by giving the new agency the authority to issue its own regulations or change the substantive laws administered by other agencies.

We do, however, believe that having a separate consumer agency with the authority to represent consumer interests in proceedings of other agencies will improve the prospects of such interests being consistently and fully considered. This will give consumers additional grounds for confidence in the fairness and soundness of our government's procedures and decisions which affect the pocketbook, health and safety of all of us.

In addition, we must remember that businessmen can go to the Department of Commerce, farmers to Agriculture, bankers to Treasury and workers to Labor and find government officials with expertise and responsibilities regarding their problems, needs and views. We believe that consumers should also have a separate home within the councils of government.

Virtually any bill including the latest versions passed by the Senate and House can always be further improved. Certain features of these measures are still subject to intensive debate between experienced persons of goodwill, both within the business community and between business and other segments of our society. Nevertheless, we believe the nation would be better served by enacting a measure approximating the latest Senate and House versions now rather than to delay further or make any major changes in what the Senate and House have produced as the result of years of impressive, thoughtful effort.

We therefore take great pleasure in joining with numerous other individuals and organizations—business and non-business alike—to support the efforts of those in the Senate and House who have labored so long and hard for the passage of a fair and effective Consumer Protection Agency bill. We are particularly pleased to be able to support the leadership in this regard provided by California's own Senator Cranston, as well as by Senator Magnuson and especially by the bill's three original Senate sponsors—Senators Javits, Percy and Ribicoff.

We urge you and your Administration to give the latest Senate-House versions of this legislation your most careful consideration and fullest possible support. Should you need anything further from us in regard to this legislation, please do not hesitate to call on me or on our General Counsel, Peter T. Jones, and Washington counsel, Harry McPherson, who have worked on this matter for several years.

We also wish you the very best in your efforts to serve our national interests at home and abroad and congratulate you for getting us off to a good start.

Warmest regards,

PETER E. HAAS, President.

Mr. METZENBAUM. Mr. President, the No. 1 priority for our Nation's consumers is the creation of an independent agency for consumer groups, an agency to represent and speak for consumers before other agencies. By whatever name the agency is called, what must be its essential feature is its "independence."

For too long the consumers of this Nation, who number more than 200 million. have watched revolving doors spin out decisions which affect their daily lives, but neglect their daily well-being. For this reason it is essential now that consumer protection be approached through procedural reform which generates regulatory reform. Procedural reform is on its way the very moment that an independent agency that represents consumers is accorded procedural rights. The only sensible way to reform regulatory decisions which affect us all is to have consumer representation input into those decisions.

Through a comprehensive study of conflicts of interest in regulatory agencies, independent as well as executive branch, Common Cause found that serious proindustry bias permeates the top echelons of the entire Federal bureaucracy. In its study, "Serving Two Masters" it revealed that:

Of 42 regulatory commissioners appointed during fiscal years 1971 through 1975, 22 came from companies regulated by the agencies they joined or for their law firms.

Of 36 commissioners who left during the same five-year period, 17 went to work for companies their agencies had regulated or for their law firms.

Of 139 top employees of the Energy Research and Development Administration 50 came from ERDA contractors and 23 from other private energy companies. ERDA spends nearly \$500 million a year seeking ways to overcome the U.S. energy crisis.

Of the top 429 employees of the Nuclear Regulatory Commission, 279 came from NRC licensees or contractors and 28 from other private energy enterprises; of the 279, in addition, 192 came from firms that had contracts with ERDA as well as the NRC. The NRC grants licenses to utilities to build nuclear power plants.

Of the NRC's 162 consultants, 105 were being retained by NRC licensees and contractors.

Of 66 top Interior Department officials 1/3 previously worked for private enterprises that have Interior leases or contracts, or came from other enterprises involved in energy activities.

Of 1,406 Defense Department officials and employees who left between 1969 and 1973 to go to work for Pentagon contractors, ¼ went to work for suppliers that they had dealt with while on the public payroll or that were in their official jurisdiction.

Of the 12 attorneys who have left the Food and Drug Administration's law office to enter the private sector over the last five years, all but one have gone to work for FDA regulated companies or their law firms.

Of 29 former officials who left government for industry, 20 contacted high ranking associates in their former agencies about policy matters or specific proceedings.

Clearly, the "revolving door" between regulated industries and regulatory agencies has been spinning at a speed equal to that of the Earth on its axis.

A 2-year congressional investigation, concluded last year, revealed that the major defect of nine Federal regulatory agencies is their commitment "to the special interests of regulated industries and lack of sufficient concern for underrepresented interests" of the public.

This is all recent news, albeit consistent in its unrelieved message that the public interest has too few ears in Washington, while special interest ears pervade the capital, perked for input into virtually every decision which affects health, energy, environment, safety, and the cost of goods for every one of us.

But, while this is all recent news, President Kennedy warned us way back in 1962, in his Special Message to the Congress on Protecting the Consumer Interest:

Consumers, by definition, include us all. They are the largest economic group in the economy, affecting and affected by almost every public and private economic decision. Two-thirds of all spending in the economy is by consumers. But they are the only important group in the economy who are not effectively organized, whose views are not heard

The Federal government—by nature the highest spokesman for all the people—has a special obligation to be alert to the consumer's needs, and to advance the consumer's interests.

Advance the consumer's interests. "Advance" is the key word here. American consumers may be the recipients of every decision, policy, and program promulgated by the Federal Government; but rarely do they know in advance what it is they are to receive, and too often what they receive had not been advanced for their benefit. Rather, too often, "the deed is done" before they find themselves the victims rather than the beneficiaries of those decisions, policies, and programs.

It is precisely this situation which prompts the need for an independent agency, free from all considerations but the public's, with the power to participate in a decisionmaking process which transfers benefits, not burdens, to the public. To date, the reverse has been the trend.

For example, a study released last September by the House Subcommittee on Oversight and Investigations' Committee on Interstate and Foreign Commerce, cited the FTC's ex parte meeting with lawyers for the American Gas Association prior to its refusal to issue a complaint for unfair and deceptive practices against the natural gas industry. And on the heels of the FTC's decision came the winter of 1976–77, the winter with too little gas and too big gas bills. And who is paying for this decision—the American consumer.

We can speculate what might have happened had an independent consumer advocate participated in an advocacy role in that FTC decision. We might have prevented some of the suffering and cost borne by the people of this Nation. Now, after the damage-after the consumer has paid the toll in suffering and dollars-an investigation into the natural gas industry proceeds. But it does so only with the prodding that might be unnecessary if an agency to protect the consumer were working full time. and before the fact as well as after. Without such consumer representation we are at best installing red lights reluctantly and haphazardly, and only after the damage has been done.

After the damage has been done, we, the consumers, pay the toll—with our health, our safety, our dollars—to heat our homes—to use our phones—to travel—to put food on our tables—to repair products we haven't even paid for yet.

And the catalog of examples is, unfortunately, endless.

Prevention with respect to the consumer means protection instead of damage—and protection necessitates a participatory role in the decisions Government makes. Such a role, to be effective, must be independent of, and free from, all relationship with any department or agency mandated to make such decisions.

Now some would argue that the best way to advance consumer protection would be to place within each Federal department and agency a consumer representative arm. Not so. To place representatives for the consumer within agencies and departments as a substitute for an independent agency does not wholly speak to the problem and, in fact, circumvents it.

While on the one hand I am encouraged and gratified by the administration's recent appointments in executive departments and regulatory agencies, I do not view them as a substitute, but rather as reinforcement for a separate and independent consumer advocate agency. Persons who have strong consumer records are now moving into the executive branch, in key positions in the White House, the agencies, and executive departments. While such persons do much to change the Washington image from one of nonresponsiveness to one of commitment to consumer interests, "they will no longer be advocates, but administrators, who will, at the least, have to give the appearance of impartiality. They will no longer be their own bosses,

but will have to answer to their new bosses. * * * Instead of taking on consumer issues across the board, they will be limited to the causes that fall within the confines of their official jurisdictions,"—Linda E. Demkovich, National Journal, March 12, 1977.

It goes without saying that their presence is welcome. In fact, no one could be more welcome than Esther Peterson whom I have known and esteemed for many years, and whose presence in the administration personifies both the highest ideals and the most effective record in terms of consumer interests. She has been a pioneer in the consumer movement and her appointment as President Carter's Special Assistant for Consumer Affairs reaffirms her pivotal role and the Federal Government's firm commitment to a philosophy which serves the public. But, to foster a wholly responsive Federal Government dedicated to the public interest, and to cement the direction already generated by the administration's noteworthy appointments, an independent agency for consumer protection is a must

A consumer department within the structure of any business is good business. The very phrase "consumer rep" or "consumer complaint department" or "consumer center" conveys an image of concern for the public. In fact, though, such arms are too often merely public relations ploys. And even if they are well-intentioned, working parts of a whole structure, they are only one part, and cannot always function in an independent adversary role by the very nature of their position.

A consumer agency armed with independence and advance knowledge would redress the balance now absent from the decisionmaking process. Only an agency with the staff, funds, and time to participate fully in any proceedings affecting consumers could afford those consumers the means to equitable representation. Such an agency would have prior knowledge of all proceedings, the right to all information, the right to conduct investigations on issues presented by consumers, and the right to petition regulatory agencies to take corrective action.

Finally, others would argue that a new agency or department of any kind is the last thing we need in the Federal Government right now. It is time to cut out and cut back. No one could agree with this view more than I. But to erase a wasteful, ineffective, obsolete Government agency must not preclude creating an essential, effective, timely one. I am a cosponsor of both "Sunset" and regulatory reform legislation. And I am a cosponsor of the Consumer Protection Act of 1977—because in no way is any one of these bills inconsistent with the others. On the contrary, they are consistent and harmonious arms of needed legislation.

I am proud to participate in whatever steps it takes to transform this landmark legislation into concrete reality. 1977 is the first year of America's third century; let it also mark the genesis of an independent agency for the American consumer within the Federal Government. By Mr. HATHAWAY (for himself and Mr. Muskie):

S. 1263. A bill to amend the Fishery Conservation and Management Act of 1976 in order to expedite the filling of a vacancy on a Regional Fishery Management Council which occurs prior to the expiration of a term; to the Committee on Commerce, Science and Transportation.

Mr. HATHAWAY. Mr. President, I am introducing a bill in the nature of an amendment to the Fishery Conservation and Management Act which relates to a problem which has arisen in the administration of the regional fishery councils. The amendment establishes a procedure for the selection of a voting member of the council when a vacancy occurs on a council prior to the natural expiration of the term. Such vacancy might occur as the result of the death or resignation of a member, as in fact has happened in the case of the New England Fishery Council.

Last November, the loss of a Maine member of the New England Fishery Council created a vacancy in that council, with all but 3 months of the 2-year term yet to run. Now, 5 months later, the Secretary of Commerce has not yet selected a replacement for that vacancy, and the replacement may well come from a State other than Maine, although the seat was originally one from the State

The apparent reason for this delay results from the Secretary's interpretation of section 302(b) (3) of the act. Under this section, the Secretary has requested all the Governors of the New England States to submit lists of eligible individuals for this vacancy which occurred as the result of death. The State of Maine submitted its three nominees on December 7; however, on April 6, the New England Council continues to be missing the services of one of its voting members.

I do not feel that this situation was intended to be handled in this manner, and the amendment I am submitting today would clarify the process whereby vacancies occurring in the middle of a term are filled. The amendment requires first, that such vacancies be filled from nominees submitted by the Governor of the State of residence of the person originally appointed to fill that term; second, it requires that the Governor of this State submit his nominees within 20 days of the occurrence of the vacancy and that the Secretary of Commerce make the appointment within 20 days of receipt of those names. The other applicable requirements of the act as relates to the list of qualified individuals would remain in force under this procedure so that any list the Governor submitted would have to include the names of at least three "qualified individuals" as defined under the act.

I think that this is a fair approach to the problem. It is in accord with the intention of the act to balance State representation on the councils, and to insure that the councils are a fully effective body for the development of fishery management plans. I hope that quick action can be taken to remedy the situa-

tion which has already arisen, and to prevent it from recurring in the future. Mr. President, at this time I ask

Mr. President, at this time I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1263

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 302 (b) (3) of the Fishery Conservation and Management Act of 1976 (Public Law 94-265) is amended to read as follows:

(3) Successors to the voting members of any Council (except an individual appointed to fill a vacancy occurring prior to the expiration of a term of office) shall be appointed in the same manner as the original voting members. An individual appointed to fill a vacancy occurring prior to the expiration of a term of office shall be appointed for the remainder of that term and shall be appointed from a list of qualified individuals submitted by the Governor of the State of residence of the individual originally appointed for that term. The Governor of such State shall submit his list of qualified individuals to the Secretary not later than 20 days after such vacancy occurs and the Secretary shall make the appointment to fill such vacancy not later than 20 days after such list of qualified individuals is received by him."

(b) Section 302 (b) (1) (C) of such Act is amended by striking out "subparagraph" in the third sentence and inserting in lieu thereof "subsection".

By Mr. CHILES (for himself and Mr. ROTH):

S. 1264. A bill to provide policies, methods, and criteria for the acquisition of property and services by executive agencies; to the Committee on Governmental Affairs.

FEDERAL ACQUISITION ACT OF 1977

Mr. CHILES. Today, for myself and the distinguished Senator from Delaware (Mr. Roth), I am reintroducing legislation to overhaul the Federal Government's \$70 billion a year contracting activities.

This bill, the Federal Acquisition Act of 1977, builds on the legislation, S. 3005, introduced a year ago during the 94th Congress.

During this time, the Senate Subcommittee on Federal Spending Practices has received a complete range of criticism and comments on S. 3005-from executive agencies, the Federal Accounting associations, public interest groups and expert individuals from all fields across the country. Although the constructive contributions are far too numerous to mention individually, special thanks is owed to the invaluable efforts of members of the American Bar Association Section on Public Contract Law, officials of the Office of Federal Procurement Policy, the Defense Department and other executive agencies.

COMPARISON WITH PRIOR LEGISLATION

The section-by-section analysis which follows the bill presents an explanation for many of the changes incorporated here, and the reasoning behind those changes. To characterize them, however, let me say that—

First, The major objectives of the bill remain unchanged: to consolidate and

modernize Federal procurement, with special policy direction to move toward greater reliance on effective and innovative competition; restraints on solesource awards; and a severe cutback on specifications and regulatory controls.

Second, there have been, however, numerous and significant changes in the bill to assure the workability of the mechanisms we have designed to achieve our policy objectives. In general, requirements have been made less rigid, with greater latitude for application of methods and procedures. As a corollary, the role of the Administrator of the Office of Federal Procurement Policy has been strengthened to assure strong, yet reasonable compliance with the goals of the bill.

Third, there is a significant addition to the bill's coverage, a new title devoted to the issue of bid and award protests. It has long been clear to me in my capacity as chairman of the Federal Spending Practices Subcommittee that the area of bid and award protests is both troublesome and neglected. There is widespread dissatisfaction with the General Accounting Office's handling and implementation of protests, including dissatisfaction within the General Accounting Office itself.

Although I do not feel wedded to the particular approach, language or provisions of this new title VII, I do believe the issue needs to be addressed and want to use this reform effort as a vehicle to do so. Title VII represents a baseline to focus debate over a range of both subtle and constitutional ramifications.

With that, let me repeat from last year some of the basic objectives, background, and provisions of this bill.

OVERVIEW

The bill would consolidate and reform the 25-year-old basic laws now controlling Federal contracts and replace them with a modern statute aimed at far more intense and innovative competitive; a crackdown on sole-source awards; and a severe cutback on specifications and regulations.

The proposed legislation would begin to attack the over 4,000 provisions of law currently on the books which control over 13 million contract actions each year for everything from paperclips to nuclear submarines. Huge savings in both dollars and paperwork can be expected by simply bringing many of those laws together into a single, modern framework. Over 80,000 workers administer Federal contracts, with the Defense Department alone accounting for \$47 billion worth in 10.163,087 separate contract actions during fiscal year 1976.

OBJECTIVES

We need a new Federal statute to streamline the acquisition process, to shift the roles of Government and contractors, to increase effective competition, and to unleash new technology.

This new consolidated Federal acquisition statute, I believe, goes right to the heart of the problem caused by confused Government and contractor roles. The legislation mandates a basic requirement for performance-oriented specifications for all contracts—both sealed bid and negotiated.

Product and design specifications will be severely limited so that a wide variety of contractors and products can compete.

The new Federal acquisition statute embodies the philosophy that the public sector may have the problems, but the private sector should be free to propose the most innovative solutions and compete to prove their worth.

SUBSTITUTE COMPETITION FOR REGULATIONS

This new consolidated procurement bill directly seeks to substitute effective competition for regulation in Federal spending.

Nearly everyone shares the popular resentment over Government regulations—and in no area is the damage greater than in Federal contracting.

But, although it is popular to call for eliminating Government regulations, we have to think for a moment. Those regulations grew for an apparent reason: to gain control and accountability. In Federal spending practices, the regulatory controls grew, I believe, because effective competition was dying as the primary control mechanism.

It is not enough to eliminate regulations, we need to put effective competition back to work in their place. That is why the new contracting legislation is aimed at relieving a wide range of Government surveillance requirements but only where effective competition is at work

If you believe half of the business complaints about being buried under Government paperwork, private firms should welcome this approach. Contractors who do business with the Federal Government will have to stand up and be counted in the harsh light of open competition, however, and I am afraid our current contracting policies have gotten some big contractors' eyes adjusted to doing business by cost-plus candle-light.

CAPITALIZE ON NEW TECHNOLOGY

The bill also seeks to design Federal spending practices to unleash a technological offensive to meet the Nation's needs.

Unless and until we can begin to unstack the layers of managers and management from Congress on down, and unless and until we begin to put wide open competition to work instead of enforced regulatory stagnation, and unless and until we do these things—we are going to continue to crush our most invaluable and scarce national resource: the creative talent of American businesses

Talk about American industrial productivity. Talk about standard of living. Talk about agricultural output. Talk about balance of trade and strength of the American dollar shifting military balance. Talk about any of these things, and the odds are that one word will constantly appear: technology. New products and new services to meet growing

Federal spending practices set the economic tone for this country. They set the rules by which major corporations learn to do business, especially high technology firms which are heavily, if not totally, dependent on Federal nourishment.

The new Federal acquisition legislation is designed to convert those Federal spending practices from insensible inhibitors into positive promoters of new technology and to contract with the person offering the best product at the lowest price, not the fellow most adept at filling out forms.

BACKGROUND: PROCUREMENT COMMISSION

Such sweeping legislation was not drafted overnight. Its origins date back to the 2½ years of work by the Law 91–129. The Commission was created by law and was composed of representatives from all areas of government and industry. Its principal task was to review the government-wide procurement activity and make recommendations for reform.

In early 1973, it delivered its final sixvolume report recommending 149 changes to the Congress and the executive branch. This bill implements a number of key recommendations which go to the heart of the process by which the Federal Government spends more than one-fourth of its yearly budget.

The Commission was concerned about the lack of a government-wide set of principles for dealing with industry.

The present statutory foundation is in fact a welter of disparate and confusing restrictions and of grants of limited authority to avoid the restrictions. This problem has arisen in part because Congress has never been called on to focus its attention on the overall procurement process. Furthermore, the inaction of top managers of the executive agencies has aggravated the problems.

In its review, the Commission found that there are two basic procurement systems. The procurement systems of the defense agencies, the Coast Guard, the National Aeronautics and Space Administration—and, to some extent, the Central Intelligence Agency—are governed by the Armed Services Procurement Act of 1974. The procurement systems of many civilian agencies are governed generally by title III of the Federal Property and Administrative Services Act of 1949.

I could go on for hours citing examples of restrictions, inconsistencies, areas where there is absolutely no guidance whatsoever. In fact, our studies revealed more than 30 troublesome inconsistencies between the two organic acts. For example, major inconsistencies involve:

Competitive discussions: The Armed Services Act requires but the Federal Property Act does not, that proposals for negotiated contracts be solicited from a maximum of qualified sources and that discussions be conducted with all sources in a competitive range.

Truth and negotiations: The Armed Services Act requires but the Federal Property Act does not, that contractors and subcontractors submit cost or pricing data.

Negotiation authority for research and development: Both acts require agency head approval to negotiate research and development contracts. Under the Armed Services Act someone below the head of the agency can approve contracts up to

\$100,000. Under the Federal Property Act, the limit is \$25,000.

Negotiation of certain contracts involving high initial investments: The Armed Services Act includes, but the Federal Property Act does not, an exception to the advertising requirement for negotiating certain contracts requiring high initial investment.

Specifications accompanying invitations for bid: The Armed Services Act states that an inadequate specification makes the procurement invalid. Comparable language is not found in the Federal Property Act.

Although some of the inconsistencies stem from special problems originally encountered only by one or a limited number of agencies, most of them arise simply because there are two basic procurement statutes, and because each is amended at different times in different ways by different legislative committees. These basic inconsistencies have proliferated to an overwhelming degree in the flow-down from the statutes to agency, bureau, and local policies, regulations, procedures, and practices. This results in serious inefficiencies and adds enormously to the procurement related costs incurred by the Government and its contractors.

PROVISIONS

The statutory foundation must be changed if significant improvements in unifying procurement policies and procedures are to be achieved. Consolidation of the procurement statutes would be a major step in fostering a single regulatory system which would help rather than hamper those wishing to do business with the Government. It also would focus attention on the fact that procurement is a governmentwide operation and would discourage attempts by parochial interests to obtain special statutory treatment.

For these reasons, this bill sets forth for the first time that it is the policy of the Federal Government to—

First, maintain the independent character of private enterprise by substituting wherever practical, the incentives and constraints of effective competition for regulatory controls.

Second, encourage innovation in the application of new technology.

Third, safeguard the public interest through individual accountability of public officials and the maximum use of effective competition.

These and other principals enunciated in the preamble to this bill were used to guide the development of the proposed legislation

One of the first provisions would be to require the Office of Federal Procurement Policy establish a single simplified set of procurement regulations to cover all agencies of the Federal Government, bringing together the regulations of the Armed Services Act of the Federal Property Act.

Greater statutory uniformity may be viewed by some as a threat to the special missions of the executive agencies. Such a fear is unfounded. This bill even more than the original S. 3005, attempts to

CONGRESSIONAL RECORD—SENATE

confine Congress to some fundamental matters. At the same time, this bill, even more than the original S. 3005, looks to the Office of Federal Procurement Policy to assume the responsibility for amplifying this congressional direction and for creating such restrictions or safeguards as may apply only to some agencies or that prove essential only for limited periods. This approach, I believe, provides a balance of congressional control and executive efficiency. It minimizes the burden on a busy Congress; it also recognizes that when feasible, administrative action by regulation may be quicker, more specific, and more readily adaptable to necessary change. Such latitude is essential to the use of procurement techniques which best insure the success of any Government program in effectively meeting our national needs.

Mr. President, in order to provide more detailed review, I ask unanimous consent that the full text of the bill and a section-by-section analysis be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1264

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled.

DECLARATION OF POLICY

SEC. 2. (a) FINDINGS.—The Congress hereby finds that—

(1) the laws controlling Federal purchasing have become outdated, fragmented, and needlessly inconsistent:

(2) these deficiencies have contributed to significant inefficiency, ineffectiveness, and

waste in Federal spending;

(3) the Commission on Government Procurement has found and recommended that a new consolidated statutory base is needed;

(4) further, existing statutes need to be modernized to focus on effective competition and new technology in that—

 (A) national productivity rests on a base of competitive industry applying new technology in its goods and services; and

(B) Federal spending practices can encourage the Nation's business community by stimulating effective competition and the application of new technology.

(b) Policy—It is hereby declared to be the policy of the United States that the acquisition of property and services by the Federal Government shall be performed so as

(1) best meet public needs at the lowest total cost;

(2) maintain the independent character of private enterprise by substituting for regulatory controls the incentives and constraints of effective competition:

(3) encourage innovation and the application of new technology as a first consideration by stating public needs so that prospective suppliers will have maximum latitude to exercise independent business and technical judgments in offering a wide range of competing alternatives:

competing alternatives;
(4) promote both new and small business
by permitting all qualified and interested
sources to compete for and grow through

government contracts;

(5) provide private contractors with the opportunity to earn a profit on government contracts commensurate with the contribution made to meeting public needs and with comparable profit opportunities available in other markets requiring investments, risks and skills similar to the technical and financial risks undertaken:

(6) safeguard the public interest through individual accountability of public officials and maximum use of effective competition; and

(7) further, to achieve these goals, it is the policy of the United States to rely on and promote effective competition, the efforts of several sellers acting independently of each other, to respond to a public need by creating, developing, demonstrating or offering products or services which best meet that need, whether that need is expressed as an agency mission need, a desired function to be performed, performance or physical requirements to be met, or some combination of these. Effective competition is present when there is—

(A) timely availability to prospective sellers of information required to respond to the public needs:

(B) independence of action by buyer and seller;

(C) availability to the Government of alternative offers that provide a range of concept, design, performance, price, lifetime ownership costs, service and/or delivery;

(D) absence of bias or favoritism in the solicitation, evaluation, and award of contract; and

(E) ease of competitive entry for new and small sellers.

DEFINITIONS

Sec. 3. (a) For purposes of this Act—The term "acquisition" means any relationship entered into to obtain property or services for the direct benefit or use of an executive agency through purchase, lesse, or barter to meet a public need, whether the property or services are already in existence or must be created, developed, demonstrated, and evaluated. Acquisition includes such related functions as determination of the particular public need; solicitation; selection of sources; award of contracts; contract financing and contract performance.

(b) The term "executive agency" means an executive department as defined by section 101 of title 5, United States Code; an independent establishment as defined by section 104 of title 5, United States Code (except that it shall not include the General Accounting Office); a military department as defined by section 102 of title 5. United

States Code;

(c) The term "Agency Head" means the head of an executive agency as defined in subsection (b)

(d) The term "Head of a Procuring Activity" means that official, intermediate between the agency head and the contracting officer, who has the responsibility for supervision and direction of the procuring activity.

(e) The term "property" includes personal property and leaseholds and other interests therein, but excludes real property in being and leaseholds and other interests therein.

(f) The term "services" means all services,

(f) The term "services" means all services, including administrative, support-type, and

professional.

(g) The term "total cost" means all resources consumed or to be consumed in making an acquisition to achieve an end purpose; and may include all direct, indirect, recurring, nonrecurring, and other related costs incurred, or estimated to be incurred in design, development, production, operation, maintenance, disposal, training and support of an acquisition over its useful life span, wherever each factor is applicable.

(h) The term "price data" means actual prices previously paid, contracted, quoted or proposed and the related dates, quantities, and item descriptions existing up to a time as close as practicable to any new agreement

on price.

(i) The term "protest" means a challenge to the solicitation, proposed award, or award of a contract made by an executive agency for the acquisition of property or services.

TITLE I—ACQUISITION METHODS AND REGULATORY GUIDANCE

ACQUISITION METHODS

SEC. 101. (a) An executive agency shall acquire property or services in accordance with the policies specified in section 2 of this Act by utilizing—

(1) the competitive sealed bids method as provided in title II of this Act; or

(2) the competitive negotiation method as provided in title III of this Act; or

(3) the competitive small purchase method

as provided in title IV of this Act.

(b) These methods of acquiring property or services are equally valid alternatives and shall be selected on the basis of the nature of the product or service being acquired, the circumstances of the acquisition, and other criteria as set forth in this Act or as may be established by the Administrator of the Office of Federal Procurement Policy.

REGULATORY COMPLIANCE

SEC. 102. (a) The Administrator of the Office of Federal Procurement Policy is authorized and directed, pursuant to the authority conferred by Public Law 93-400 and subject to the procedures set forth in such public law—

(1) within two years after the date of en-

actment of this Act, to promulgate a single, simplified, uniform Federal regulation implementing the policies and procedures prescribed in this Act and to establish procedures for insuring compliance with such provisions by all executive agencies; and

(2) to make periodic studies of the use of the acquisition methods prescribed by this Act in order to determine whether agency compliance with this Act has been efficient

and effective.

(b) The Administrator of the Office of Federal Procurement Policy shall include in his annual report required under section 8 of Public Law 93-400 a report of his activities under this section, including his assessment of agency implementation of and compliance with the requirements of this Act; specific reductions in the use of Federal specifications pursuant to sections 202 and 302 of this Act; and recommendations for revisions in this Act or any other provision of law.

TITLE II—ACQUISITION BY COMPETITIVE SEALED BIDS

CRITERIA FOR USE

SEC. 201. The competitive sealed bids method should be used in the acquisition of

property and services when-(1) the anticipated total contract price exceeds the amount specified in title IV of this Act for use of the competitive small

purchase procedures method; and (2) the public need can be practicably defined in terms not restricted by security

or proprietary design; and

(3) the private sector industrial base will provide a sufficient number of qualified suppliers willing to compete for and able to perform the contract; and

(4) suitable products or services have been developed and previously supplied in comparable forms so as to warrant the award fixed price contract to a successful bidder selected primarily on the basis of price; and

(5) the time available for acquisition is sufficient to prepare the purchase description and to carry out the requisite admin-

istrative procedures; and

(6) the property or service is to ne acquired and/or used within the limits of the United States and its possessions; and

(7) the price for the property or service has not been established by or pursuant to

INVITATION FOR SEALED BIDS

SEC. 202. (a) The invitation for sealed bids shall be formally advertised in such a way

(1) the time prior to opening the bids be sufficient to permit effective competition; and

(2) the purchase description will be accessible to all interested potential bidders, except where restricted to bidders qualified under a duly authorized set-aside program.

(b) The invitation shall include a description of the method to be used in evaluating bids, including factors other than price.

(c) To the extent practicable and consistent with needs of the agency, purchase descriptions shall be stated in functional terms to permit a variety of distinct products or services to qualify, or, when a particular type of product or service must be designated, in terms of performance specifications which stipulate a range of accept-

able characteristics or minimum standards.
(d) The preparation and use of definitive product specifications in a purchase description shall be subject to prior approval by the agency head. Such approval shall include written justification, to be placed in and made a part of the official contract file, delineating the circumstances which preclude the use of functional or performance specifications and which require the use of detailed product specifications in the purchase descriptions.

Where the use of functional or per-

formance specifications makes it impracticable to plan for award primarily on the basis of price, the contracting officer may request the submission of unpriced technical proposals and subsequently issue an invitation for sealed bid limited to those offerors whose technical proposals meet the standards set forth in the purchase description.

EVALUATION, AWARD, AND NOTIFICATIONS

SEC. 203. (a) All bids shall be opened publicly at the time and place stated in the invitation.

- (b) Award shall be made to the responsibidder whose bid conforms to the invitation and is most advantageous to the government, price and other factors considered.
- (c) Notice of such award shall be made in writing by the contracting officer with reasonable promptness and all other bidders shall be appropriately notified.

TITLE III-ACQUISITION BY COMPETI-TIVE NEGOTIATION

CRITERIA FOR USE

SEC. 301. The competitive negotiation method may be used in the acquisition of property and services when-

(1) the anticipated total contract price exceeds the amount specified in title IV of this Act for use of the competitive small purchase procedures method; and

the acquisition does not meet the criteria established pursuant to section 101 (b) or as set forth in section 201 for use of competitive sealed bids.

SOLICITATIONS

Sec. 302. (a) Solicitations for offers shall be made from a sufficient number of qualified sources so as to obtain effective competition and shall be publicized in accordance with section 8(e) of the Small Business Act, with copies of the solicitation to be provided to other interested sources upon request

(b) (1) When price is not expected to be the deciding factor in making an award, the solicitation shall include both the methodology and relative importance of all significant factors to be used during competitive evaluation and for final selection. In any case, if price is included as a primary or significant factor, the government's evaluation shall be based to the maximum extent practicable on the total cost to meet the Federal need and not on the cost of completing any initial or partial segments of activity.

(2) Any changes in the methodology or evaluation factors which may affect the outcome of the competition shall be promptly

communicated to all competitors.

(c) To the maximum extent practicable, solicitations shall set forth the public need in functional terms so as to permit the application of a variety of technological approaches and elicit the most promising competing alternatives. Solicitations shall not prescribe performance characteristics based on a single approach. Solicitations shall also not prescribe technical characeristics obtained from any potential competitor.

(d) If either the Government or an offeror identifies inadequacies in the solicitation which cause misunderstandings of the public's needs or requirements, clarification of intent shall be made to all offerors in a timely fashion and on an equal basis

EVALUATION, AWARD, AND NOTIFICATIONS

SEC. 303. (a) Written or oral discussions shall be conducted with all qualified offerors who remain in a competitive range solely of obtaining any purpose clarification or extension of offers. An initial offer may be accepted without discussion.

(b) When awards are made for alternative approaches selected on the basis of the factors contained in the solicitation, whether for design, development, demonstration or delivery, to the maximum extent prac-ticable, they shall be sustained in competition until sufficient test or evaluation information becomes available to narrow the choice to a particular product or service.

(c) Until award is made, information concerning the award shall not be disclosed to any person not having direct source selec-

tion responsibilities.

(d) Award shall be made to one or more responsible offerors whose proposal is most responsive to the factors stipulated in the solicitation as required by section 302(b). Notification of award to all unsuccessful offerors shall be made with reasonable promptness.

SINGLE-SOURCE EXCEPTIONS

SEC. 304. (a) Compliance with the procedures prescribed in sections 302 and 303 need not be continued if-

(1) the agency head makes a determina-tion, before award, that it is impracticable to proceed with the competitive negotiation because more than one prospective source is not available; a public exigency prevails; or a national emergency is declared by the Congress or the President:

(2) such determination, together with the reasons therefor, is in writing and conforms with such regulations as may be prescribed or authorized by the Office of Federal Procurement Policy, pursuant to section 102(a)

(1); and

(3) notice of intent to award such a contract is publicized in advance of the award, pursuant to section 637(e) of title 15, United States Code, and includes a description of the property or service to be acquired and the name of the prospective source.

In such cases, contracts may be made by negotiation with a single offeror selected by the agency. The submission and certification referred to in section 305(b) and the provisions of section 305(c) shall be required in the case of any single-source contract to be awarded pursuant to this section when the amount in question is greater than the amount specified in section 401.

(b) Where there is no commercial usage of the product or service to be acquired under this section, and the agency head determines that substantial follow-on provision of such product or service will be required by the government, the agency head shall, when he deems appropriate, take action through contractual provision, or otherwise, to provide the Government with a capability to establish one or more other competitive sources.

PRICE ANALYSIS AND COST DATA

SEC. 305. (a) Prior to any negotiated award, change, or modification of any contract or subcontract, the contractor and any subcontractor shall be required to submit or identify in writing, with his proposal, price data bearing on the reasonableness of the offer. Each such contractor or subcontractor shall certify that, to the best of his knowledge and belief, such price data is accurate, complete, and current as of the date agreed upon between the parties (which date shall be as close as practicable to the date of agreement on the negotiated price). The contracting officer shall use price analysis techniques to analyze and evaluate the reasonableness of offers where

(1) the price of the contract, subcontract, change, or modification is less than \$500,000; (the contracting officer may at his discretion, however, request pricing data or cost data as provided for in section 305(b) contracts, subcontracts, changes or modifications, where the total amount exceeds the amount specified in section 401 of this Act

but is less than or equal to \$500,000); or (2) the price is an established catalog or market price of a commercial item sold in substantial quantities to the general pub-

(3) the price is already set by law or regulation; or

(4) negotiation is based on adequate price

competition, wherein price is a primary or significant factor; or

(5) there was recent competitive purchase

- under relatively similar circumstances.

 (b) Where the contract or subcontract is a single-source award pursuant to section 304, or for other negotiated contracts when the contract or subcontract does not meet any one of the conditions set forth in section 305 (a)-
- (1) the contractor and any subcontractor shall be required to submit or identify in writing, with his proposal, cost data bearing on the reasonableness of the offered price;
- (2) shall certify that, to the best of his knowledge and belief, such cost data is accurate, complete, and current as of the date agreed upon between the parties (which date shall be as close as practicable to the date or agreement on the negotiated price).
- (c) Any prime contract or change or modification thereto under which a certification is required under subsection (b) shall contain a provision that the price to the gov-ernment, including profit or fee, shall be adjusted to exclude any significant sums by which it may be determined by the agency head that such price was increased because the contractor or any subcontractor required to furnish such a certificate, furnished data which was not accurate, complete, or current.

(d) The agency head may grant a waiver from the provisions of sections 305 (a) and Such waiver shall include a justification, to be placed in and made a part of the contract file, setting forth the reasons why the provisions of sections 305 (a) and (b) must be waived.

(e) At least every three years, beginning with the third year after enactment of this Act, the Administrator of the Office of Federal Procurement Policy shall review and may revise the thresholds cited elsewhere in this section, or any prior revision hereto, notwithstanding any other provision of law, to reflect an increase or decrease by at least 10 per centum in the costs of labor and materials. At least sixty days in advance of its effective date, the Administrator shall report to Congress any such revision which by itself, or cumulatively with earlier increases, represents a 50 per centum or more increase.

ACCESS TO RECORDS

SEC. 306. (a) Until expiration of three years after final payment under a contract negotiated or amended under this title, Comptroller General of the United States and an executive agency or their authorized representatives are entitled to inspect the plants and examine any books, documents, papers, records or other data of the contractor and his subcontractors that pertain to, and involve transactions relating to the contract or subcontract or to the amendment thereof, including for the purpose of evaluating the accuracy, completeness and currency of data certified under section 305, all such books, records and other data relating to the negotiation, pricing, or performance of the contract or subcontract. This provision may be waived for any contract or subcontract with a foreign contractor or subcontractor, if the agency head determines, with concur-rence of the Comptroller General, that waiver would be in the public interest.

(b) Inspections and examinations by executive agencies under subsection (a) shall be conducted only when necessary to insure contract performance. Multiple inspections and examinations of a contractor or subcontractors by more than one executive agency shall be eliminated to the maximum extent practicable by coordinating inspection and examination responsibilities in accordance with regulations to be issued or authorized by the Office of Federal Procurement Policy pursuant to section 102(1).

TITLE IV-ACQUISITION BY COMPETI-TIVE SMALL PURCHASE PROCEDURES METHOD

CRITERIA FOR USE

SEC. 401. (a) The competitive small purchase procedures method may be used in the acquisition of property and services under regulations authorized or prescribed by the Office of Federal Procurement Policy under section 102 (1) when the anticipated total contract price does not exceed \$10,000 but, in lieu of this method, the contracting officer may use either of the competitive methods prescribed in titles II or III of this Act when such use would be more advantageous to the

(b) At least every three years, beginning with the third year after enactment of this the Administrator of the Office of Federal Procurement Policy shall review the prevailing costs of labor and materials and may revise the amount stated in section 401 or any prior revision thereof, notwithstanding any other provision of law, to reflect an increase or decrease by at least 10 per centum in the costs of labor and materials. At least sixty days in advance of its effective date, the Administrator shall report to Congress any such revision which by itself, or cumulatively with earlier increases, represents 50 per centum or more increase.

SOLICITATIONS AND AWARDS

Sec. 402. The Contracting officer may make an award to the contractor whose offer is most advantageous to the Government but shall seek to obtain effective competition to the maximum extent practicable through informal means.

TITLE V-GENERAL PROVISIONS

CONTRACT TYPES

Sec. 501. (a) Contracts may be of any type or combination of types, consistent with the degree of technical and financial risk to be undertaken by the contractor, which will promote the best interests of the Government except that the cost-plus-a percentageof cost system of contracting shall not be used under any circumstances.

(b) The preferred contract form for all contracts shall be a fixed-price type. Where technical or financial risks of negotiated contracts are substantial, fixed-price contracts with options for shorter work increments are preferred to longer cost-type contracts so as to maintain greater control over Government obligations.

WARRANTY AGAINST CONTINGENT FEES

SEC. 502. Each contract negotiated under title III of this Act or an award to be made as a result of the submission of a technical proposal under section 202(e) of this Act shall contain a warranty by the contractor that no person or selling agency has been employed or retained to solicit or secure the contract upon an agreement or understanding of a commission, percentage, brokerage, or contingent fee, excepting bona fide employees or bona fide established commercial or selling agencies maintained by the contractor for the purpose of securing business; and that for any breach or violation of the warranty, the Government may annul the contract without liability or deduct from the contract price or consideration the full amount of the commission, percentage, brokerage, or contingent fee.

CANCELLATIONS AND REJECTIONS

SEC. 503. (a) Where the contracting officer determines that it is in the best interest of the Government, the contracting officer

- (1) withdraw a small purchase order prior to the consummation of a contract;
- (2) cancel an invitation for sealed bids before bid opening or after bid opening but before award: or

(3) cancel a request for proposal and reject all offers.

(b) When requested, the contracting officer shall fully inform any unsuccessful of-feror or bidder of the reasons for the rejection of his offer or bid.

MULTIYEAR CONTRACTS

SEC. 504. (a) Except as otherwise provided by law, an agency may make contracts for acquisition of property or services for periods not in excess of five years, when appropriations are available and adequate for payment for the first fiscal year and the agency head determines that-

- (1) the Government need for the property or services being acquired over the period of the contract is reasonably firm and continuing; and
- (2) such a contract will serve the best interests of the United States by encouraging effective competition or promoting economies in performance and operation.
- (b) The Administrator of the Office of Federal Procurement Policy may grant exceptions to the five year limitation imposed by subsection (a) upon the certification, in such form and of such content as the Administrator may require, by the agency head that such exception is in the best interests of the Government. A copy of each such certification and each exception granted shall be delivered to the Chairman of the Committee on Government Operations and the Committee on Appropriations of the House of Representatives and the Senate, respectively.
- (c) Any cancellation costs incurred must be paid from appropriated funds originally available for performance of the contract, or currently available for procurement of similar property or services, and not otherwise obligated, or appropriations made available for such payments.

ADVANCE, PARTIAL, AND PROGRESS PAYMENTS

Sec. 505. (a) Any executive agency may-(1) make advance, partial, progress, or other payments under contracts; and

(2) insert in solicitations a provision limiting advance or progress payments to small business concerns.

- (b) Advance payments under subsection (a) shall not be made in excess of the amount required for contract performance and shall not exceed the unpaid contract
- (c) When progress payments are made, the Government shall have title to the progress payment inventory and, notwithstanding any other provisions of law, that title may not be divested by any action of the contractor, or proceeding in bankruptcy, or encumbered by any lien or security interest.
- (d) Advance payments under subsection (a) may be made only upon adequate security and a determination by the agency head that to do so would be in the public interest. Such security may be in the form of a lien in favor of the Government on the property contracted for, on the balance in an account in which such payments are deposited, or on such property acquired for performance of the contract as the parties may agree. This lien shall have priority over all other liens.

REMISSION OF LIQUIDATED DAMAGES

SEC. 506. Upon the recommendation of the agency head the Comptroller General of the United States may remit all or part, as he considers just and equitable, of any liquidated damages provided by the contract for delay in performing the contract.

DETERMINATIONS AND FINDINGS

SEC. 507. (a) Determinations, findings, and decisions provided for by this Act may be made with respect to contracts individually or with respect to classes of contracts.

(b) Each determination or decision shall

be based upon written findings of the officer making the determination or decision, and shall be retained in the official contract file.

COMPETITIVE BIDDING INFORMATION

SEC. 508. (a) If the contracting officer or any other agency employee has reason to believe that any bid, proposal or offer evidences a violation of the antitrust laws or provisions of this Act, he shall refer that bid, proposal or offer through the appropriate agency official directly to the Attorney General of the United States for appropriate action.

(b) Upon the request of the Attorney General of the United States, the agency shall make available to the Attorney General information which the Attorney General considers necessary and relevant to any investigation, prosecution or other action by the United States under the antitrust laws or other statute enforced by the Attorney General.

(c) The agency head shall render needed assistance to the Attorney General in any investigation and prosecution flowing from the information provided in subsection (a) or (b) or from other investigation and prosecution in other antitrust matters.

GOVERNMENT SURVEILLANCE REQUIREMENTS

Sec. 509. (a) Notwithstanding any other provision of law, an agency head may grant a waiver from Government surveillance requirements for a period not to exceed two years to that part of a contractor's operation which is separately managed and accounted for if more than 75 per centum of the business activity of that part of a contractor's operation as measured by total sale volume, is being conducted under commercial and competitive Government contracts, where the Government awarded firm fixed-price type contracts or where price was the deciding or a significant factor for award.

(b) Such a waiver shall relieve that con-tractor profit center from Government, but not General Accounting Office surveillance

requirements including:

(1) agency management, procurement system and property reviews;
(2) determinations of the reasonableness

of indirect overhead costs;
(3) provisions of the Cost Accounting Standards Act (PL 93-379);

(4) advance agreements for independent research and development and bid and proposal activities; and

(5) provisions of the Renegotiation Act. (c) Such a waiver shall not be granted, and may be revoked at any time, if the agency head determines that for other reasons, the combination of commercial and government competitive activity is insufficient to insure efficient contractor activity under government contracts.

MAINTENANCE OF REGULATIONS

Sec. 510. (a) Notwithstanding the provisions of title VIII of this Act, or any other provisions of law, regulations, including amendments thereof approved pursuant to subsection (b), relating to federal procurement as determined by the Administrator of the Office of Federal Procurement Policy, promulgated or in effect 180 days before the date of enactment of this Act shall remain in effect until repealed by order of the Administrator of the Office of Federal Procurement Policy or until the lapse of two years after the date of enactment of this Act, whichever is earlier. No regulation preserved by operation of this section may be amended without the prior approval of the Administrator of the Office of Federal Procurement

Policy.
(b) The Administrator of the Office of Federal Procurement Policy is authorized to approve the amendment of regulations preserved under the provisions of subsection (a).

TITLE VI-DELEGATION OF AUTHORITY

DELEGATION WITHIN AN EXECUTIVE AGENCY

Sec. 601. Each agency head may delegate any authority under this Act except the authority to grant waivers under section 509, provided that the authority to make determinations under sections 202 and 304 through 306 shall not be delegated below the level of the Head of a Procuring Activity.

JOINT ACQUISITIONS

Sec. 602. (a) To faciliate acquisition of property or services by one executive agency for another executive agency, and to facilitate joint acquisition by those agencies-

(1) the agency head may, within his agency, delegate functions and assign rewithin his sponsibilities relating to the acquisition;

(2) the heads of two or more executive gencies may by agreement delegate acquisition functions and assign acquisition responsibilities from one agency to another of those agencies or to an officer or civilian employee of another of those agencies; and

the heads of two or more executive agencies may create joint or combined offices to exercise acquisition functions and respon-

sibilities.

(b) Subject to the provisions of section 686 of title 31, United States Code—

(1) appropriations available for acquisition of property and services by an executive agency may be made available for obligation for acquisition of property and services by any other agency in amounts authorized by the head of the ordering agency and without transfer of funds on the books of the Depart-

ment of the Treasury;
(2) a disbursing officer of the ordering agency may make disbursement for any obligation chargeable under subsection (a) of this section, upon a voucher certified by an officer or civilian employee of the acquisition

agency.

TITLE VII-PROTESTS

PURPOSE

Sec. 701. In accordance with the authority of the Budget and Accounting Act of 1921, ch. 18, Title III, section 304, 42 Stat. 24, 31 U.S.C. 44, and this title, protests shall be decided in the General Accounting Office. To the fullest extent possible, the Comptroller General shall provide for the inexpensive, informal and expeditious resolution of protests.

JURISDICTION

SEC. 702. (a) The Comptroller General shall have authority to decide any protest sub-mitted by an interested party in accordance with rules and regulations he shall issue pursuant to Section 704.

(b) No contract shall be awarded after the contracting activity has received notice of a protest to the Comptroller General while the matter is pending before him; provided however, that the head of an executive agency may authorize the award of a contract notwithstanding such protest, upon a written finding that the interest of the United States will not permit awaiting the decision of the Comptroller General, and provided further that the Comptroller is advised prior to the

award of such finding.
(c) With respect to any solicitation, proposed award, or award of contract protested to him in accordance with this Title, the Comptroller General is authorized to declare that such solicitation, proposed award, or award does not comport with law or regulation. If award has been made prior to such declaration the Comptroller General may further declare that the contract shall be terminated for the convenience of the Government.

PROCEEDINGS

SEC. 703. (a) Proceedings shall be informal to the fullest extent possible.

(b) Each decision of the Comptroller

General shall be signed by him or his delegee and shall be binding upon all interested parties including the executive agency or agencies involved. A copy of the decision shall be furnished to the interested parties and the executive agency or agencies involved

(c) (1) All decisions shall be rendered promptly, consistent with the need to develop a complete record, in accordance with regulations to be issued by the Comptroller General pursuant to section 704 of this title.

(2) There shall be no ex parte proceedings before the Comptroller General except that this section shall not be deemed to preclude informal contacts with the parties

for procedural purposes

A conference shall be permitted before decision; however, no transcripts shall be required. Transcripts may be permitted the Comptroller General's discretion or at the request of the interested party, provided the Comptroller General and other interested party shall be furnished a copy. Costs of such transcripts and services shall be borne by the requesting party.

(4) The Comptroller General shall, good cause shown, authorize formal covery proceedings and may sign and issue subpoenas requiring the production of books and records and attendance of witnesses for the taking of evidence. In case of refusal to obey a subpoena by a person who resides, is found, or transacts business within the jurisdiction of a United States District Court, the court, upon application of the Comptroller General, shall have jurisdiction to issue the person an order requiring him to appear before the Comptroller General or his designee to produce the books and records, or to give testimony, or both. Any person who fails to obey the order of the court may be punished by the court as a contempt thereof.

(d) The Comptroller General is authorized to dismiss any protest he determines to be frivolous or which, on its face, does not

state a valid basis for protest.

(e) Where the Comptroller General has declared that solicitation, proposed award, or award of a contract does not comport with law or regulation, he may further declare the entitlement of an appropriate party to bid and proposal preparation costs. In such cases the Comptroller General may remand the matter to the executive agency involved for an initial determination as to the amount of such costs. Declarations of entitlement to monetary awards shall be paid promptly by the executive agency concerned out of funds available for the purpose of the procurement or sale.

(f) The Comptroller General, where he deems appropriate, shall make recommendations for improving the procurement process.

GENERAL PROVISIONS

SEC. 704. The Comptroller General shall perform such acts, make such rules and regulations, and issue such orders, not inconsistent with this Title, as may be necessary in the execution of the protest decision function. He may delegate his authority to other officers or employees of the General Accounting Office.

TITLE VIII AMENDMENTS AND REPEALS AMENDMENTS

SEC. 801. (a) The Agriculture Department Appropriation Act, 1923, is amended by striking out ", after due advertisement and on competitive bids," in the first proviso on the page at Forty-second Statutes at Large, page 517 (7 U.S.C. 416).

(b) Sections 101(d) and 104 of the Department of Agriculture Organic Act of 1944 (58 Stat. 734, 736; 7 U.S.C. 430, 432) are amended by striking out "in the open

(c) Section 2356(b) of title 10, United States Code, is amended by striking out the last sentence.

(d) Sections 4504 and 9504 of title 10. United States Code, are each amended by striking out everything after "United States and inserting in lieu thereof a period.

(e) Sections 4505 and 9505 of title 10, United States Code, are each amended by

striking out the second sentence.

(f) Clause (2) of section 502(c) of the (1) Chause (2) of section 302(c) of the Act of August 10, 1948 (62 Stat. 1283; 12 U.S.C. 1701c(b)(2)), is amended by striking without regard to section 3709 of the Revised Statutes"

(g) Section 502(e) of the Act of December 31, 1970 (84 Stat. 1784; 12 U.S.C. 1701z-2(e)), is amended by striking out ", without regard to section 3709 of the Revised

Statutes.".

(h) Section 708(h) of the Act of June 27, 1934, as amended August 10, 1948 (62 Stat. 12 U.S.C. 1747g(h)), is amended by striking out the proviso at the end.

(i) Section 712 of the Act of June 27, 1934, as amended August 10, 1948 (62 Stat. 1281; 12 U.S.C. 1747k) is amended by striking out and without regard to section 3709 of the Revised Statutes".

(j) Section 208(b) of the Act of June 26, 1934, as amended October 19, 1970 (84 Stat. 12 U.S.C. 1788(b)), is amended by 1014:

striking out the last sentence.

- (k) Clause (4) of section 2(b) of the Act of July 18, 1958 (72 Stat. 386; 15 U.S.C. 634(b)(4)), is amended by striking out: "Section 3709 of the Revised Statutes, as amended (41 U.S.C., section 5), shall not be construed to apply to any contract of hazard insurance or to any purchase or contract for services or supplies on account of property obtained by the Administrator or as a result of loans made under this Act if the premium therefor or the amount thereof does not exceed \$1,000.".
- (1) Section 3 of the Act of April 24, 1950 (64 Stat. 83; 16 U.S.C. 580c), is amended to read as follows:

"SEC. 3. The Forest Service is authorized to make purchases of (1) materials to be tested or upon which experiments are to be made or (2) special devices, test models, or parts thereof, to be used (a) for experimentation to determine their suitability for or adaptability to accomplishment of the work for which designed or (b) in the designing or developing of new equipment: Provided, That not to exceed \$50,000 may be expended in any one fiscal year pursuant to this authority and not to exceed \$10,000 on any one item or purchase."

(m) Section 2(b)(1) of the Act entitled "An Act to authorize the construction of a National Fisheries Center and Aquarium in the District of Columbia and to provide for its operation", approved October 9, 1962 (76 Stat. 753; 16 U.S.C. 1052), is amended by striking out ", without regard to the provisions of section 3709 of the Revised Stat-

utes of the United States (41 U.S.C. 5),".

(n) Subsections 2(a)(1) and 2(b)(1) of the Act of July 26, 1954 (79 Stat. 44; 20 U.S.C. 331a (a) (1), (b) (1), are amended by striking out any references to section 3709 of the Revised Statutes and to section 5 of title 41, United States Code.

(o) Section 224(a) of the Act of November 8, 1965 (79 Stat. 1228; 20 U.S.C. 1034(a)), is amended by striking out ", and, without regard to section 3709 of the Revised Statutes (41 U.S.C. 5).".

(p) Section 7 of the Act of December 20, 1945, as amended October 10, 1949 (59 Stat. 621; 22 U.S.C. 287e), is amended by striking "; all without regard to section 3709 of the Revised Statutes, as amended (41 U.S.C. 5)"

(q) Section 707 of the Act of August 13, (60 Stat. 1019; 22 U.S.C. 1047), is amended by striking out ", without regard to section 3709 of the Revised Statutes'

(r) Section 22(e)(7) of the Act of December 29, 1970 (84 Stat. 1613, 29 U.S.C. 671(e)(7)), is amended by striking out and without regard to section 3709 of the Revised Statutes, as amended (41 U.S.C. 5), or any other provision of law relating to competitive bidding.".

(s) Section 6(b) of the Act of August 31. 1954 (68 Stat. 1010; 30 U.S.C. 556(b)), is amended by striking out "and without regard to the provisions of section 3709, Re-

vised Statutes (41 U.S.C. 5)"

(t) Section 1820(b) of title 38, United States Code, is amended by striking out "section 5 of Title 41" and inserting in lieu thereof the "Federal Acquisition Act of 1977" and by deleting "if the amount of such contract exceeds \$1,000."

(u) Section 5002 of title 38. United States Code, is amended by substituting a period for the comma after "work" and striking out the

remainder of the section.

The Act of October 10, 1940, as amended (54 Stat. 1109; 41 U.S.C. 6a, b(a), (c), (d)), is amended by striking out section 2 and subsections (c) and (d), and by striking out "without regard to the provisions of section 3709 of the Revised Statutes, as amended," in subsection (a). The Act of July 27, 1965 (78 Stat. 276; 41 U.S.C. 6a-1) is amended by striking out any and all references to section 3709 of the Revised Statutes in the sections relating to Architect of the

(w) Section 11 of the Act of June 30, 1936 (49 Stat. 2039, renumbered section 12 in 66 Stat. 308; 41 U.S.C. 45), is amended to read

as follows:

'Sec. 12. The provisions of this Act requiring the inclusion of representations with respect to minimum wages shall apply only purchases or contracts relating to such industries as have been the subject matter of a determination by the Secretary of Labor.

(x) Section 356(b) of the Act of July 1, 1944, as added October 18, 1968 (82 Stat. 1175; 42 U.S.C. 263d(b)), is amended by striking out the references to section 3709 the Revised Statutes and 41 U.S.C. 5 in clause (3), and by striking out the parenthetical phrase "(by negotiation or otherwise)" in clause (4).

(y) Section 1(b) of the Act of October 14, (54 Stat. 1126; 42 U.S.C. 1521 (b)), is amended by striking out the reference Section 3709 of the Revised Statutes in the first parenthetical phrase, and by striking

out the first proviso.

(z) Section 202(b) of the Act of October 14, 1940 (55 Stat. 362; 42 U.S.C. 1532(b)), is amended by striking out the reference to section 3709 of the Revised Statutes.

(aa) Section 309 of the Act of September 1 1951 (65 Stat. 307; 42 U.S.C. 1592h), is amended by striking out clause (a), and amending clause (b) to read as follows:

"(b) the fixed-fee under a contract on a cost-plus-a-fixed-fee basis shall not exceed 6 per centum of the estimated cost;"

(bb) Sections 103(b)(4) and 104(a)(2) of the Act of July 14, 1955, as amended November 21, 1967 (81 Stat. 486, 487; 42 U.S.C. 1857(b)(4), b-1(a)(2), is amended by striking out the references to section 3709 of the Revised Statutes and to section 5 of title 4

United States Code.
(cc) Section 31(b) of the Atomic Energy Act of 1954 (68 Stat. 927; 42 U.S.C. 2051c) is amended to read as follows:

(b) The Commission may make available use in connection with arrangements made under this section such of its equipment and facilities as it may deem desir-

(dd) Section 41(b) of the Atomic Energy Act of 1954 (68 Stat. 928; 42 U.S.C. 2061(b)), is amended by striking out the two sentences immediately preceding the last sentence in this section.

(ee) Section 43 of the Atomic Energy Act 1954 (68 Stat. 929; 42 U.S.C. 2063), is amended by striking out the following: without regard to the provisions of section 3709 of the Revised Statutes, as amended, upon certification by the Commission that such action is necessary in the interest of the common defense and security, or upon a showing by the Commission that advertising is not reasonably practicable. Partial and advance payments may be made under contracts for such purposes.'

(ff) Section 66 of the Atomic Energy Act of 1954 (68 Stat. 933; 42 U.S.C. 2096), is amended by striking out the following: "Any purchase made under this section may be made without regard to the provisions of section 3709 of the Revised Statutes, as amended, upon certification by the Commission that such action is necessary in the interest of the common defense and security, or upon a showing by the Commission that advertising is not reasonably practicable. Partial and advance payments may be made under contracts for such purposes."

(gg) Section 203(e) of the Act of April 3, 1970 (84 Stat. 115; 42 U.S.C. 4372(e)), is amended by striking out the references to section 3709 of the Revised Statutes and to section 5 of title 41, United States Code.

(hh) Section 703 of the Act of June 29 1936 (49 Stat. 2008; 46 U.S.C. 1193), is amended by striking out subsection (a), by striking out "For the construction, reconstruction, or reconditioning of vessels, and" in subsection (c), and by renumbering subsections (b) and (c) as (a) and (b), respectively.

(ii) Section 8(a) of the Act of September 30, 1965 (79 Stat. 894; 49 U.S.C. 1638(a)), is amended by striking out the references to section 3709 of the Revised Statutes and to section 5 of title 41, United States Code, in paragraph (1), and by striking out paragraph (3).

(jj) Section 5012 of title 38, United States Code, is amended by striking out the second sentence in subsection (a) and all of subsection (c).

SEC. 802. The following statutes or provisions of statutes are repealed.

Chapters 135 and 137 and sections 2306, 4535, 4540, 7212, 9535, and 9540 of title 10, United States Code; section 7 of the Act of May 18, 1938 (52 Stat. 406; 16 U.S.C. 833f); section 7 of the Act of March 3, 1875 as amended (18 Stat. 450; 25 U.S.C. 96); section 3 of the Act of August 15, 1876 as amended (19 Stat. 199: 25 U.S.C. 97); sections 602 (d) (3) and 602(d) (10) of the Federal Propand Administrative Services Act as amended (40 U.S.C. 474(3), (10); sections 10(a) and 10(b) of the Act of September 9, (73 Stat. 481; 40 U.S.C. 609(a), (b)); 41 U.S.C. 5; section 2 of the Act of October 10, 1940, as amended October 31, 1951 (54 Stat. 1110; 41 U.S.C. 6a); sections 3710 and 3735 of the Revised Statutes (41 U.S.C. 8, 13); section 3653 of the Revised Statutes, as amended by the Act of July 7, 1884 (23 Stat. 204: 41 U.S.C. 24): title III of the Federal Property and Administrative Services Act of 1949 as amended 41 U.S.C. 254(b): section 10(a) of the Act of September 5, 1950 (64 Stat. 591; 41 U.S.C. 256a); section 510 (a) of the Act of July 15, 1949 (63 Stat. 437; U.S.C. 1480(a)); section 6(e) of the EURATOM Cooperation Act of 1958 (72 Stat. 1085; 42 U.S.C. 2295(e)); section 1345(b) of the Act of August 1, 1968 (82 Stat. 585; 42 U.S.C. 4081(b)); Section 404 of the Act entitled "An Act to authorize appropriations during the fiscal year 1969 for procurement of aircraft, missiles, naval vessels, and

tracked combat vehicles, research, development, test, and evaluation for the Armed Forces, and to prescribe the authorized personnel strength of the Selected Reserve of each Reserve component of the Armed Forces, and for other purposes, Approved, September 20, 1969 (82 Stat. 849).

SECTION-BY-SECTION ANALYSIS OF THE FEDERAL ACQUISITION ACT OF 1977

INTRODUCTION

The law now controlling Federal purchasing have become outdated, fragmented and needlessly inconsistent. The result has been significant inefficiency and waste in Federal

spending practices.

This bill would remedy the current situation by providing a new consolidated statutory base, bringing together existing statutes and modernizing them at the same time.

The focus of the modernization is to substitute effective competition by private enterprise for regulatory controls, thus reducing the regulatory and paperwork burdens. Effective competition and the application of new technology would be stimulated by provisions to assure independence of action by buyer and seller; encourage competitors to submit offers which provide a wide range of alternatives with differing technological concepts; reduce the opportunities for favoritism in the solicitation, evaluation and award of contracts; and reduce the barriers competitive entry for new and small sellers.

Section 2, Declaration of Policy.

The substance of the Findings and Policy is

self-explanatory, as written.
The intent of this Section is to provide the basic thinking and thrust behind the legislation and to thereby provide some definite, yet flexible, guidance for the application and interpretation of the bill's provisions, especially in cases where discretion is permitted or uncertain circumstances arise. It is expected that reference to these policies would guide the resolution of decisions in such cases.

By the same token, however, it is not intended that these statements of Findings and Policy, in and of themselves, be interpreted as detailed requirements or tests of the validity of specific contractual actions for purposes of contract protests or disputes. At most, it would be expected that these policy statements would lend to the weight of argument, and not, by themselves, constitute tests for breach of procedure.

The description of "Effective Competition" contained as policy guidance in paragraph (b) (7) is particularly important in this regard. Although not amenable to rigid and operational definition, this particular de-scription of what constitutes "effective competition" is important to appreciating the thrust of the legislation and the rationale

for many of its provisions. Section 3, Definitions.

"Acquisition" is program-oriented: it includes all steps from establishing the need to contract performance. This definition is another key provision to understanding the modern context of "procurement": an appreciation that the effectiveness of the buying function depends heavily on the way the government's requirements and needs are established in the first instance.

"Total cost" covers all resources consumed in making an acquisition achieve an endpurpose. Although typical cost elements are called out, the definition intends flexibility in the use of the term: the primary intent is a good faith effort to scope the "resources consumed or to be consumed", a common sense proposition far any buyer. The specific details of a "total cost" calculation, as required to the maximum extent in section 302(b)(1), will vary from case to case depending on (1) which factors may or may not be involved and (2) which factors are

or are not susceptible to sufficiently reliable calculations.

"Price data", as contrasted with cost data, factual information related to prices, either actual past prices or proposed prices, which prudent buyers and sellers would expect to have a significant effect on price negotiations.

"Protest" covers procurement contracts as executed within the definition set down in paragraph 3(a) for "acquisition" and does not include relationships entered into primarily for the benefit of the recipient and generally executed through grant or co-operative agreement transactions.

All executive agencies, military departments and the United States Postal Service are covered under this bill. Wholly-owned Government Corporations would not be covered in recognition of the vast variety of peculiar acquisition circumstances which confront these organizations. It would be hoped, however, that in the interest of consistency and uniformity, the provisions of this Act would be followed and tailored for uniform use by each organization, much as is the case today.

TITLE I-ACQUISITION METHODS AND REGULATORY GUIDANCE

Intent-to require that the policies and procedures set forth in this act are used for the acquisition of all property or services by the Federal Government and to require the development of a single, simplified set of procurement regulations.

This title requires that the acquisition of all property or services by executive agencies shall be made in accordance with the policy specified elsewhere in the act: and that Office of Federal Procurement Policy promulgate a single set of simplified regulations to implement the policies and procedures prescribed in the Act and report to the Con-

gress thereon pursuant to P.L. 93-400.

At the core of the bill and this title is the recognition that competitive sealed bidding, competitive negotiation and competismall purchase procedures are equally valid acquisition alternatives, and each should be selected according to the circumstances surrounding the acquisition in ac-cordance with criteria set forth in this act and as may be further stiplulated by the Administrator of the Office of Federal Pro-

The Office of Federal Procurement Policy is given a central leadership role in executing the povisions of the Act, consistent with strong role originally prescribed in P.L.

As compared to S. 3005, the Administrator is placed in a more direct position to achieve the goals of this Act through his powers so that some of specific requirements in the bill can be less rigidly prescribed, with greater latitude for application pursuant to Office of Federal Procurement Policy guidance and regulations.

TITLE II-ACQUISITION BY COMPETITIVE SEALED BIDS

-To set forth several conditions un-Intentder which the competitive sealed-bid method should be used; to require agencies to preferentially describe their needs in functional terms or performance ranges or minimum standards; so as to encourage sellers with differing products or services to compete; to assure an understanding of the bid evaluation procedure by requiring its disclosure in the bid invitation and by requiring that the award be made and publicly explained in the context of the evaluation methodology.

Section 201, Criteria For Use. This section specifies criteria which should be met in order for competitive sealed bids to be considered the appropriate acquisition method.

Section 202, Invitation For Sealed Bids. This section establishes requirements for sealed bid advertising, and requires that the purchase description be written in terms of functions to be performed, ranges of acceptable performance, so as to permit a variety of distinct products or services to qualify. Definitive product specifications would also be permitted to be used—but only qualify. with prior agency head approval and written justification.

Where added protection to the government from unacceptable, yet low-bid, offers is felt necessary, the bill encourages the use of a two-step approach whereby first, an evaluation of unpriced technical proposals would be done and, second, a sealed bid award made to the low bidder among those technical proposals found acceptable.

Section 203, Evaluation, Award and Notifications. This section requires that all bids be open publicly with appropriate prior notice; that the awards be made to the bidder whose bid conforms to the invitation and is determined to be most advantageous to the government, price and other factors considered; and that notice of the award be made in writing with reasonable promptness to all other bidders.

TITLE III-ACQUISITION BY COMPETITIVE NEGOTIATION METHOD

-to encourage more innovative competition; encourage independence of action on the part of contractors making proposals; and limit the use of single-source awards. Broad access to a contractor's plant and records is provided primarily as a safeguard and linked to circumstances when the competition is foreclosed in favor of a singlesource contract.

Section 301, Criteria For Use. The competitive negotiation method is considered appropriate and may be used when the anticipated total contract price exceeds small purchase limits and, more important, the acquisition contemployed will not meet the criteria established for competitive sealed bids in section 201 or pursuant to subsequent Office of Federal Procurement Policy guidance.

Section 302, Solicitations.

Solicitations for offers must be made from a sufficient number of sources so as to obtain effective competition. When awards are to be made with price not the deciding factor, the solicitation shall include the methodology and relative importance of the significant factors to be used in the evaluation of proposals. In any case, when price is a primary or significant factor, the evaluation shall consider, to the maximum extent practicable, the total cost of meeting the Federal need, and not simply cost of completing any one segment of the activity. This use of total cost as a basis for award is to be implemented as far as possible, given the fact that certain cases may not be fully amenable to such

Again to encourage broad innovation and competition, functional specifications are mandated wherever practicable and trans-fusion of technical ideas is prohibited.

Section 303, Evaluation, Award, and Notifications.

This section requires that competition should be sustained to the maximum extent until sufficient test and evaluation information becomes available to narrow the choice to that preferred product or service which best meets the federal need at the lowest total economic cost. All discussions with the contractors would be strictly limited to clarification or substantiation of a competitors' offerings as a practical means to prohibit "auctioneering" tendencies under monopsony situations. This also should effectively prevent the process of technical transfusion from leveling competitors offerings. This section does not preclude the award of contracts to more than one responsible, responsive offeror.

Section 304, Single-Source Exceptions. The intent of the legislation is to bring about a drastic reduction in the proportion of solesource awards and to encourage far broader use of competitive methods. Therefore, exceptions to competitive negotiations are permitted only when the agency head determines that there is only one prospective source; a public exigency, or national emergency prevails; when the exception conforms policies established by the Office of Federal Procurement Policy; and when notification of intention to award such a contract is publicized in advance of the award. In such single-source cases, however, this section imposes the cost data requirements of Section 305 on all contracts greater than \$10,000. It also gives the agency head authority to take action, when appropriate, to provide the Government with the capability to establish one or more competitive sources under a singlesource situation. Both provisions are meant to be disincentives for the use of non-competitive methods.

Section 305, Data Requirements. This "Truth in Negotiation" section sets forth the conditions requiring the submission by a contractor of either cost data or pricing data to the government. These submission requirements can be waived upon a written determination by the agency head.

Price analysis and pricing data: The bill mandates price analysis techniques to be used as a first consideration. Under section 305(a), a contractor and any subcontractor would be required to submit with his proposal any price data (as defined in section 3 (h)) bearing on the reasonableness of his offer prior to any negotiated award, change or modification in a contract or subcontract. This data must be certified as being complete, current and accurate. This requirement does not apply in situations where the contract price is less than \$500,000, (although the contracting officer may, at his discretion, decide to request such data for contracts where the price is less but more than the small purchase limit set in section 401). The submission and certification of price data is also required and appropriate where the price is an established catalogue or market price of a commercial item; where the price is already set by law or regulation; where there was a recent competitive purchase under relatively similar circumstances; or where negotiation has been based on adequate price competition with price as a significant factor.

Cost Data: Under section 305(b), whenever

Cost Data: Under section 305(b), whenever the price data submission requirements do not apply and in all single-source awards, a contractor or subcontractor shall submit cost data and certify such data to be accurate, complete and current.

Section 305(c) also provides the government with the capability to adjust contracts in which price was significantly increased due to the submission of either inaccurate cost data or inaccurate pricing data.

Section 305(d) sets down waiver requirements.

Furthermore, the dollar thresholds in this section can be raised or lowered by the Administrator or OFFP according to a formula provided under section 305(e).

Section 306, Access To Records. This section applies to all negotiated contracts under this title. While blanket authority to gain access to records is provided, it is the intent of the legislation to guide the use of such authority so that it is not abused. Further, the intent is to establish broader access to the company than just to data and pricing information.

Until three years after final completion of a contract negotiated or amended under this title, the Comptroller General and the executive agency are entitled to inspect the

plants, books, documents, papers or records of the contractor and the subcontractor. A waiver may be provided for contracts with foreign contractors or subcontractors. Such inspections shall be conducted only when necessary to insure contract performance. Multiple inspections and examinations of a contractor by more than one agency shall be eliminated to the maximum extent practical by coordinating inspections and examination responsibilities.

TITLE IV—ACQUISITION BY COMPETITIVE SMALL PURCHASE PROCEDURE METHOD

Section 401, Criteria for Use. This section would allow the use of competitive small purchase procedures when the total contract prices does not exceed \$10,000. However, a contracting officer would still be permitted to use the competitive methods prescribed in Titles II and III of this Act should he choose to do so.

At least every three years the Administrator of OFPP would be required to review the \$10,000 ceiling on the use of competitive small purchase procedures. He may find that the ceiling should be changed and this section provides a formula for adjusting the ceiling up or down.

Section 402, Solicitations and Awards. This section would require that the award be made to the contractor offering the property or service being bid upon which would be most advantageous to the government through effective competition.

TITLE V-GENERAL PROVISIONS

Intent—This title generally provides the flexibility to engage in practices and contracts which result in cost savings and reduced administrative burdens whatever of the contract mode. It also prohibits certain types of practices and sets forth circumstances for relief from specific government surveillance requirements.

Regulatory controls would be reduced for contractors whose business activity is primarily commercial and competitive fixedprice Government contracts.

Section 501, Contract Types. Section (a) would disallow the use of cost-plus-a-percentage-of-cost contracting under any circumstance. However, any other type or combination of types consistent with the statute and the financial risk to the contractor may be used. Section (b) establishes fixed-price types as preferred for all contracts, with a preference for adjusting to shorter increments of work (and risk) content before resorting to cost-plus type contracts to cover

larger steps.
Section 502, Warranty Against Contingent Fees. A warranty is required by the contractor to assure that no person or selling agency has been employed or retained to solicit the contract upon any agreement of a commission, percentage, brokerage, or contingent fee, excepting bona fide employees of the contractor. In the event of a breach of the warranty, the government may annul the contract without liability.

Section 503, Cancellations and Rejections. The contracting officer may withdraw a small purchase order prior to the consummation of a contract; cancel invitation for sealed bids openings or after bid openings but before awards; or cancel a request for proposal and reject all officers, if he feels that it is in the fiest interest of the government to do so.

Section 504, Multi-Year Contracts. This section would allow multi-year contracts for periods not to exceed five years when appropriations are available and adequate for payment of the first fiscal year, except as otherwise provided by law. Exceptions to the five year limitation may be granted by the Administrator of OFPP, who in turn, must deliver copies of the exception and the reasons therefor to appropriate committees of Congress

Section 505, Advance, Partial and Prog-

Advance payments would be allowed except that they shall not be in excess of the amount required for immediate contract performance and under no circumstances shall exceed the unpaid contract price. On making such payment, the government shall have title to the progress payment inventory and that title may not be divested by any action of the contractor.

Section 506, Remission of Liquidated Damages. Upon the recommendation of the head of an agency, the Comptroller General may remedy all or part of any liquidated damages provided by the contract for delay in performing the contract.

Section 507, Determinations and Findings. This section requires that determinations provided by this act may be made with respect to contracts individually or with respect to classes of contracts and shall be final. An afficial record shall be kept of such determinations and findings.

Section 508, Competitive Bidding Information. The contracting officer and other employees are required to refer any bids which they suspect show evidence of violation of this Act or anti-trust laws to the Attorney General for appropriate action. The agency shall render all needed assistance and informations that the Attorney eGneral feels is necessary and relevant to this investigation of the matter.

Section 509, Government Surveillance Requirements. This section gives mechanism for implementing the intent to substitute effective competition for regulatory controls. The agency head may grant a waiver from certain surveillance requirements if more than 75 percent of that part of a contractor's business activity which is separately managed and accounted for (generally, for each profit center) is conducted under commercial and competitive government contracts. hTis waiver does not apply to GAO surveillance requirements, however.

Section 510, Maintenance of Regulations. This section gives the Administrator of OFPP authority to keep existing procurement regulations in effect while new consolidated regulations are promulgated during the two year period following enactment of this bill.

TITLE VI-DELEGATION OF AUTHORITY

Intent—To recognize that agency heads, while being responsible for the actions of their agencies, need not personally approve every procurement-related action specified in this Act.

Section 601, Delegation Within An Executive Agency. Agency heads may delegate any authority to make determinations except waivers from government data and surveillance requirements under section 509. Waiver authorities relating to detailed product specifications under section 202 and relating to single source awards under Title III may be delegated to a level no lower than to the head of the procuring activity.

Section 602, Joint Acquisitions. To facilitate joint acquisitions, the head of an agency may delegate functions and assign responsibilities relating to acquisition. The heads of all agencies involved in the joint acquisition may, by agreement, delegate the acquisition functions and assign acquisition responsibility form one agency to another.

TITLE VII

Intent—To the fullest extent possible, to provide for the inexpensive, informal and expeditious resolution by the Comptroller General of protests relating to the award or proposed award of contracts.

Section 701, Purpose. Self-explanatory. Section 702, Jurisdiction. This section gives the Comptroller General authority to decide protests and further prohibits the award of contracts while protest is pending. This prohibition against award may be waived upon written determination by the agency head. The Comptroller General may also terminate contracts for the convenience of the government and declare solicitations, awards or proposed awards not to comport with law or

regulation.

Section 703, Proceedings. Proceedings are to be informal to the maximum extent, with decisions to be rendered promptly, consistent with the need to develop a full record. The Comptroller General will have authority to hold conferences before decisions, to authorize formal discovery proceedings, to issue subpoenas, and to dismiss frivolous protests. In addition, he may require the payment of bid and proposal preparation costs.

Section 704, General Provisions. The Comptroller General is given the authority to issue such regulations as may be necessary in the execution of his functions under this title.

TITLE VIII-AMENDMENTS AND REPEALS

Intent-To modify and repeal existing legislation as may be necessary to achieve the purposes set forth in this Act.

Section 801, Contains necessary amend-ments to other legislation. Section 802 provides the necessary appeals to existing legislation.

Mr. ROTH. Mr. President, I am pleased to join Senator Lawton Chiles as a sponsor of the Federal Acquisition Act of 1977. This legislation is a comprehensive reform and consolidation of our Federal procurement laws designed to enhance competition, promote uniform procedures in competitive procurements, and facilitate the elimination of costly Government regulation and paperwork requirements. This comprehensive reform of the procurement system holds the potential for saving millions of dollars through improved Federal purchasing and spending practices. Additionally, this legislation will foster competitive enterprise in the private sector by reducing reliance on noncompetitive or solesource contracts.

The statutory framework of this bill is intended to implement the basic statutory reform recommendations of the Federal Procurement Commission-1969-72. Senator CHILES and I collaborated in 1974 to implement another principal recommendation of the Procurement Commission by establishing the Office of Federal Procurement Policy within the Office of Management and Budget. A second basic reform eliminated considerable paperwork by expediting purchases of small-purchase items up to a limit of \$10,000. However the inconsistencies and inefficiencies in formal procurement procedures have continued unabated. Thus. this bill is the logical next step in procurement reform that would complete a major portion of the unfinished agenda from the Procurement Commission's recommendations.

The basic statute controlling Federal civilian contract procedures is antiquated and in many instances anticompetitive. The basic law has not been reformed for more than 25 years. Government contracting officers have turned increasingly to sole-source contracts which have the advantage of conforming to agency specifications by prearrangement and by regulation. The trend toward Government contracts with explicit specifications often has squeezed competitive bidding out of the picture and in the process has squeezed out design innovation and technological breakthroughs.

The Federal budget is the largest single force for competition among businesses in this country. The budget is larger by far than the annual production of every major corporation. Furthermore, every major corporation does business with the Government and often conforms its business practice and production facilities to meet Government contract specifications. It is imperative therefore that Federal Government purchasing procedures foster competition and creative enterprise in our economy. If the Federal Government acts as a deadening force in the economy through its contract relationships with businesses, we endanger our whole economy by built-in sluggishness and uncompetitive busines practices. This threat is more than mere speculation when one considers the economic force of the Federal Government's billion in annual contracting activities

The reforms contained in this legislation are built upon several assumptions. The most basic is that the goal of purchasing the best product at lowest cost is best served by open and active competition for Government contracts. Second, the bill assumes that active competition will foster technological innovation and continued economic growth in our economy. Finally the bill accepts that consolidation of the two basic procurement statutes, with reduced reliance on contract specifications spelled out in advance by regulation, will yield considerable savings in Government administration and paperwork costs. The incentives and constraints of open competition will replace to the extent possible regulatory controls by Government.

The major recommendations of the Procurement Commission which this legislation seeks to implement are as

First. The bill would eliminate inconsistencies in the two primary statutes by consolidating them into a common statutory framework applicable to all executive agencies-civilian and military and provide in the statutory base for the Office of Federal Procurement Policy to implement basic procurement policies.

Second. The bill requires the use of formal advertising where sealed bids are obtained from several competitors when conditions permit this approach. Negotiated contracts may be substituted as an alternative to the sealed bid approach.

Third. The bill provides that a competitive number of sources will be solicited to compete for the Government's business. When contracts are not to be awarded on the basis of lowest cost the evaluation criteria must be specified.

Fourth. The agency must disclose the reasons for rejection to the unsuccessful bidder to help foster competition in the

Fifth. The exception to competitive negotiation for a contract is limited to situations where there is only one prospective source or where a public exigency or national emergency exists.

Sixth. The bill contains the provision for the use of simplified procurement procedures for contracts up to \$10,000 in amount. The ceiling would be reviewed periodically.

Seventh. Executive agencies are authorized to enter into multiyear contracts with annual appropriations up to a limit of 5 years.

Eighth. The bill emphasizes fixed price contracts to prevent cost overruns as

much as possible.

This bill could have a substantial and lasting beneficial impact on economic growth and competitive enterprise in this country and I urge my colleagues to give this legislation their careful consideration and active support.

The issues raised by this bill will be carefully reviewed in committee and there will be an opportunity for full comment by persons interested in procurement reform. The bill will be further refined as it proceeds through committee channels.

By Mr. PERCY:

S. 1265. A bill to amend chapter 21 of title 44, United States Code, to include new provisions relating to the acceptance and use of records transferred to the custody of the Administrator of General Services; to the Committee on Governmental Affairs.

PUBLIC ACCESS TO ARCHIVAL RECORDS

Mr. PERCY. Mr. President, a little over 2 years ago, Congress significantly strengthened the provisions of the Freedom of Information Act (5 U.S.C. 552) to facilitate public access to the records of the Federal executive branch.

During that same year-1974 also opened Government dossiers to the individuals who were the subjects of such files when we adopted the Privacy Act. We established a special study panel-this Commission on Federal paperwork-to assess the information gathering, processing, and storing practices of the Federal establishment. We also created an entity—the National Commission on Records and Documents of Federal Officials-to explore "the control, disposition, and preservation of records and documents produced by or on behalf of Federal officials." Both of these commissions are due to report their findings in the immediate future.

Last year Congress enacted the Government in the Sunshine Act, establishing the statutory presumption that the policy deliberations of collegial agencies of the Federal executive branch will be open to public scrutiny unless the permissive exemptions of the statute need be applied to close a particular session.

Consistent with these actions of the Congress, I am, today, introducing a proposal designed to preserve the records of the Nation and facilitate public access to those official holdings. This General Services Administration a few years ago, would amend chapter 21 of title 44, United States Code, to include new provisions relating to the acceptance and use of records transferred to the custody of the Administrator of General Services. While the full text of the measure may be found at the conclusion of my remarks, Mr. President, I would like to briefly outline the effects of the proposal and indicate my reasons for urging its adoption.

First, under present law (44 U.S.C.

2104), when the head of an agency states, in writing, restrictions he believes necessary or desirable in the public interest on the use of examination of records being considered for transfer to the Administrator of General Services for accessioning into the National Archives, the Administrator is obligated to impose restrictions without question and may not relax or remove them without the written concurrence of the agency head. This situation would be changed by my proposal to require the Administrator's concurrence in such access restrictions as might be sought by an agency head. It is important that the Administrator, in consultation with the Archivist of the United States and his expert staff, exercise a discretion in accepting records for archiving when access restrictions are being imposed. In any instance where the Administrator disagrees with the restrictions sought by an agency head, the records in question would, in effect, be refused archival status. Such records would remain with the agency and would be subject to the provisions of the Freedom of Information Act. In brief, the Administrator is being called upon in this proposal to not accept access restrictions inharmonious or otherwise inconsistent with the provisions of the freedom of information law.

Second, existing law (44 U.S.C. 2104) also requires that statutory or other access restrictions remain in force until the records are 50 years old, unless the Administrator orders a longer period of secrecy. My proposal would reduce the 50year duration of a restriction to 30 years and would require the Administrator to consult with the transferring agency before imposing a longer period of restriction. This action is sought to bring archival access restrictions into closer harmony with the spirit and intent of the Freedom of Information Act. However, in the event that concern is raised that this relaxed time constraint might cause the premature release of sensitive information, we must remember that the freedom of information law recognizes the effects of intervening statutes governing the release of certain types of information and also exempts records from disclosure when such would constitute a clearly unwarranted invasion of personal privacy. If the administrator should desire to extend the access restriction period beyond 30 years, justification for doing such should be consistent with standards established in relevant statutory law. Thus, with regard to the protection of personally identifiable information, the standards of the Privacy Act might be cited as a basis for access restrictions extending beyond 30 years. In any event, such extension would hopefully be for a fixed time period and would be selectively used for particular records and not applied to whole files or deposits.

Third, my proposal authorizes the Administrator to relax, remove, or impose restrictions in the public interest following the termination of an agency when no successor entity has been designated. Once again, the Administrator, in consultation with the Archivist and National

Archives experts, would be granted professional discretion to restrict access to archived materials but, as discussed above, justification for so doing should be consistent with the spirit and intent of the Freedom of Information Act and otherwise guided by relevant statutory standards bearer upon government information management.

In summary, Mr. President, I believe that this legislation which I am introducing today, will be agreeable to both the Congress and the executive branch. It is my opinion that it transcends partisan considerations in increasing the responsiveness of Government and in supplementing the spirit and intent of the Freedom of Information Act. I commend this proposal to the attention of my colleagues, and I look forward to its expeditious adoption.

Mr. President, I ask unanimous consent that the bill be printed in the Record at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1265

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That chapter 21 of title 44, United States Code, is amended as follows:

(a) In section 2103 delete the words "fifty years" in subsection (2) and substitute in lieu thereof the words "thirty years"; and

(b) In section 2104 delete the third and fourth sentences in their entirety and substitute in lieu thereof the following:

When the head of an agency states, in writing, restrictions that appear to him to be necessary or desirable in the public interest on the use or examination of records being considered for transfer from his custody to the Administrator of General Services, the Administrator shall, if he concurs and in consultation with the Archivist of the United States, impose the restrictions on the records so transferred, and may not remove or relax the restrictions without the concurrence in writing of the head of the agency from which the material was transferred, or of his successor in function, if any. In the event that an agency is terminated and there is no successor in function, the Administrator is authorized to relax, remove, or impose restrictions on the agency's records when he determines that such action is in the public interest. Statutory and other restrictions referred to in this section shall remain in force until the records have been in existence for thirty years unless the Administrator by order, after having consulted with the Ar-chivist and the head of the transferring agency or his successor in function, determines as to specific bodies of records that for reasons consistent with standards established in relevant statutory law the restrictions shall remain in force for a longer

By Mr. PERCY:

S. 1266. A bill to establish a fund for activating authorized agencies, and for other purposes; to the Committee on Governmental Affairs.

Mr. PERCY. Mr. President, I am introducing today a bill designed to establish a fund for activating new commissions, committees, board, and small agencies during the period immediately following enactment of authorizing legislation and the time their appropriations become available. This bill authorizes an

appropriation of capital of not to exceed \$3 million to the fund for this purpose. Under the provisions of this bill, advances may be made from the fund for operating these organizations for a maximum period of 1 year, provided that such advances may not be made to any organization for which funds have been denied by Congress. Any advances from the fund shall be fully reimbursed from any appropriations made available for which the funds were advanced.

The fund would be administered by GSA, which currently performs administrative support services for more than 40 small commissions and committees. No advances will be made until after the expiration of 30 days from the date upon which the Administrator of General Services, through the Director of Management and Budget, submits a notificatif the Senate and House of Representatives.

This bill will overcome the crippling delays in activating these newly estab-

lished organizations, which in some instances has seriously jeopardized their meeting the time limitations prescribed

by the authorizing legislation. Several examples of these delays were—

The Aviation Advisory Commission was established by Congress pursuant to Public Law 91–258, approved May 21, 1970. This Commission was required to present its report and recommendations by not later than January 1, 1972. However, appropriations were not enacted for the funding of this Commission until May 25, 1971.

The Commission on the Review of National Policy Toward Gambling was established by Congress pursuant to Public Law 91-452, approved October 15, 1970, which provided for appointment of the members after October 15, 1972. The Commission Chairman and members were appointed December 23, 1972, but the initial appropriation was not enacted until October 30, 1973, almost a year later.

The Marine Mammal Commission was established by Congress pursuant to Public Law 92–522, approved October 21, 1972. The Commission Chairman and members were appointed May 14, 1973, but the initial appropriation was not enacted until November 27, 1973, 6 months later.

It is recognized that section 402 of the Congressional Budget and Impoundment Control Act of 1974, Public Law 93-344, provides a procedure for enactment of authorizing legislation approximately 1 year in advance of the fiscal year in which a new program goes into effect. Although section 402 provides a solution to funding problems of large departments and agencies which are dependent upon annual authorizations and can plan for appropriations far in advance, we believe that the small agencies covered by this bill, which were established in response to emergency situations and for short terms, will not be able to take advantage of section 402. Consequently, they are likely to suffer the same funding delays experienced by previously established commissions.

This bill is by no means intended to

encourage the proliferation of small boards, commissions, and other Federal organizations. Rather, it will alleviate a difficult funding situation by enabling legally established organizations of this type to begin to discharge more quickly their needed and duly authorized duties.

Mr. President, I ask unanimous consent that the bill be printed at this point in the RECORD

There being no objection, the bill was ordered to be printed in the RECORD, as

S. 1266

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled. That there is hereby established on the books of the Treasury a fund, which shall be administered by the General Services Administration. The fund may be capitalized at not to exceed \$3,000,000 and shall be available, without fiscal year limitation, for advance funding to activate Federal organizations including boards, commissions, committees, small agencies and other Federal organizations established by act of Congress or by Executive Order of the President, the funding for which is not otherwise provided. Advances from the fund may be made for operating a Federal organization for a maximum period of one year, provided that such advances may not be made to any organization for which funds have been denied by the Congress. Such advances shall be subject to approval by the Director, Office of Management and Budget. No advances will be made until after the expiration of 30 days from the date upon which the Administrator of General Services, through the Director of Management and Budget, submits a notification to the Committees on Appropriations of the Senate and House of Representatives

SEC. 2. Any advances from the fund established by this Act shall be fully reimbursed (without interest) from any appropriations made available for purposes for which the funds were advanced. The fund will also be credited with all reimbursements, and refunds or recoveries relating to personal property and services procured through the fund. Sec. 3. There is hereby authorized to be ap-

propriated, without fiscal year limitation, as capital to the fund created by this Act, an amount not to exceed \$3,000,000.

By Mr. PERCY:

S. 1267. A bill to amend sections 3303a and 1503 of title 44, United States Code. to require mandatory application of the General Records Schedules to all Federal agencies and to resolve conflicts between authorizations for disposal and to provide for the disposal of Federal Register documents; to the Committee on Governmental Affairs.

DISPOSAL OF OBSOLETE RECORDS

Mr. PERCY. Mr. President, at present the Federal Government stores in various facilities over 30 million cubic feet of records. Each year the growth of record holdings within the Government accelerates, and many of these records are held in duplicate or for periods far longer than is necessary or useful.

Today I am introducing legislation to curb this problem and to save over \$3 million annually. This legislation would achieve two ends. First, it would require the mandatory application of the General Records Schedules to records of Federal agencies to assist in the orderly disposition of such records. The General Records Schedules promulgated by the Administrator of General Services describe records of a common nature created by several or all Federal agencies. At present, these records constitute approximately 35 percent, or 10.5 million cubic feet, of the records within the Federal Government. Agency practices regarding disposition of these records under the present law usually result in their retention long after their usefulness has ended. Mandatory application of these schedules for all Federal agencies would require immediate disposal of the records, except in extenuating circumstances-that is, claims, litigation, or unusual operating procedures-when the records have served their normal purposes.

Second, the amendment of 44 United States Code 3303a would clarify the retention period for records in cases where an authorization by the Administrator of a general disposal schedule conflicts with a specific disposal schedule authorized for the records of a particular agency. In cases of such conflict, the shorter retention period is required, although, in extraordinary situations, the agency may apply for an extension.

As presently written, section 1503 of title 44, United States Code, provides for the retention in the National Archives of the originals of certain documents published in the Federal Register The statute also provides for inspection of these documents pursuant to regulations issued by the Administrator of General Services. Four categories of documents are now preserved under the requirement of section 1503:

First. Presidential proclamation and Executive Orders:

Second. Rules and regulations; Third. Proposed rules-notice to the public of proposed issuances-and

Fourth. Notices-hearings, investigations, committee meetings, and so forth.

With the exception of Presidential proclamations and Executive Orders, the historical and intrinsic value of retaining the original of all such documents published in the Federal Register is questionable. The National Archives now houses more than 1,000 cubic feet of Federal Register documents-projected to 2,000 cubic feet by 1980-with such documents receiving little, if any, use.

Due to the growing space problem in the National Archives, the disposal of certain of these documents would be most beneficial. This amendment would authorize the Administrative Committee of the Federal Register to develop and issue disposal schedules applicable to these Federal Register documents. The time retention of the documents would vary depending on the subject matter of each document Presidential proclamations and Executive orders would not be included and would be retained permanently because of their historical value. The implementation of this procedure would be relatively simple, requiring only categorization of the various documents according to the disposal

I feel confident, Mr. President, that this bill makes substantive progress in moving us closer to our commitment to eliminate waste and increase efficiency in the Federal Government That com-

mitment knows no partisanship nor any enemy save bureaucracy itself, and it is one I plan to augment through future introduction of cost-savings proposals like this one.

I ask unanimous consent that this bill and a cost-savings breakdown be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1267

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 3303a of chapter 33, title 44, United States Code, is amended:

(a) by deleting subsection (b) of section 3303a in its entirety, and substituting

in lieu thereof:

"(b) Authorizations granted under lists and schedules submitted to to the Administrator under section 3303 of this title, and schedules promulgated by the Administra-tor under subsection (d) of this section, shall be mandatory, subject to section 3909 of this title. As between an authorization granted under lists and schedules submitted to the Administrator under section 3303 of this title and an authorization contained in a schedule promulgated under subsection (d) of this section, application of the authorization providing for the shorter retention period shall be required, subject to section 2909 of this title.";

(b) By striking out the word "may" and substituting in lieu thereof the word "shall" in the first sntehce of subsection (d); and

(c) By inserting immediately after last sentence of subsection (d) the following new sentence:

"A Federal agency may request changes in such schedules for its records pursuant to section 2909 of this title."

Section 1503 of chapter 33, title 44, United States Code is amended by deleting the fifth sentence and substituting in lieu thereof the following sentence:

'The original shall be retained by the General Services Administration and shall be available for inspection under regulations prescribed by the Administrator, unless such original is disposed of in accordance with disposal schedules promulgated by the Administrative Committee of the Federal Register pursuant to regulations issued under this chapter; however, originals of Proclamations of the President and Executive Orders shall be permanently retained by the Administration as part of the National Archives of the United States."

ESTIMATED ANNUAL SAVINGS THROUGH MAN-DATORY APPLICATION OF GENERAL RECORDS

Items 1 through 3 are based on agency submissions of ten comprehensive schedules per year which do not contain General Records Schedules as issued by GSA.

1. Eliminate agency manpower costs of scheduling records common to several or all Federal agencies. These manpower costs cover such activities as (1) inventorying files; (2) devising series description; (3) establishing disposition standards; and compiling lists of items for incorporation in agency records control schedules.

Estimated annual savings: \$150,000; 10

man-years at \$15,000 per man-year.

2. Eliminate NARS and GAO manpower evaluating those portions of agency schedules covering records common to several or all Federal agencies, and (2) comparing the agency disposition standards for such records with approved disposition standards in the General Records Schedules.

Estimated annual savings: \$80,000; 4 man-years at \$20,000 per man-year. 3. Reduce agency manpower and equip-

ment costs of publishing and printing agency records control schedules. The cost of NARS printing of increased number of General Records Schedules will be significantly less than the combined agency costs of publishing and printing individual schedules for records common to several or all Federal agencies.

Estimated annual costs (agency): \$50,000; Estimated annual costs (NARS): \$20,000 (preparation): \$5,000 (printing); Estimated

total savings: \$25,000.

4. Reduce NARS and agency manpower and equipment costs of storing an estimated 500,000 cubic feet of records (5% of 10 million cubic feet) common to several or all Federal agencies for varying periods of time in Federal records centers and agency file space.

Estimated annual savings \$2,694,000; 300,000 cu. ft. at \$8.98 per cubic

Estimated annual savings (NARS): \$144,000; 200,000 cu. ft. at \$.72 per cubic foot

Estimated total annual savings: \$2,838,000.

5. Reduce NARS manpower costs of processing transfers of records common to several or all Federal agencies into Federal records centers under a wide variety of individual agency records control schedules, since agencies increasingly will incorporate the mandatory General Records Schedules into agency records control schedules as supplements.

Estimated annual savings: \$75,000; one-half man-years per FRC at \$10,000 per man-

year

Estimated total annual savings \$3,024,000 to the government would result from mandatory application of General Records Schedules.

> By Mr. PERCY (for himself and Mr. RIBICOFF): S. 1268. A bill to increase the compensation of the Chairman and the members of the Board of Governors of the Federal Reserve System and of the Director and Deputy Director of the Office of Management and Bugdet; to the Committee on Governmental Affairs.

Mr. PERCY. Mr. President, the recent report of the Commission on Executive, Legislative and Judicial Salaries recommended significant increases in the compensation of Federal executives as a means of improving and restoring public confidence in Government institutions. The executive pay raises now in effect, together with the enforcement of strict codes of public conduct, should significantly enhance the Government's ability to attract executive personnel of exemplary competence and integrity.

The Commission ended its outstanding work with the observation that "a significant number of Federal Government jobs, both in the supergrades and executive levels, are evaluated erroneously."

It then goes on to identify two prominent examples of such erroneous classification which I believe to be so deserving of immediate rectification, that I commend them to my colleagues for immediate and positive action-specifically, the Director of the Office of Management and Budget and the Chairman of the Federal Reserve Board. Accordingly. I am proposing legislation which, by amendment to title 5 of the United States Code, would raise these positions from level II to level I of the executive schedule and correspondingly would raise the positions of OMB Deputy Di-

rector and Federal Reserve Board members from executive level III to level II.

The Bureau of the Budget was renamed the Office of Management and Budget in Reorganization Plan No. 2 of 1970, reflecting a basic change in the emphasis of that Office. In addition to its function of assisting the President in the preparation and execution of the Federal budget, the executive management responsibilities of OMB were expanded in the areas of program evaluation, interagency coordination, intergovernmental relations, management and organization improvement, development of new information systems, recruitment and development of career manpower, legislation review, and the coordination of Federal statistical services. OMB functions have been further elaborated and expanded by the Legislative Reorganization Act of 1970, and the Congressional Budget and Impoundment Act of 1974, which significantly enlarged the budget-making process, and by other recent enactments.

Recognition of the crucial role of the Office of Management and Budget spurred the passage of Public Law 93-250 in 1974, to require Senate confirmation of the appointments of both the Director and Deputy Director of OMB. The House report accompanying this bill openly acknowledged the widespread view that, and I quote, "Next to the President, the Director-of OMB-is the most powerful person in the executive branch." With reference to the "vast power and importance" of this position, the report notes:

The Director is not one of the "faceless" confidential advisers to the President. He stands in his own right as a policymaker and administrator. He directs an organization of 660 employees. His circulars and bulletins regulate, control, and limit Government performance in a variety of ways. More than 60 statutory provisions relate to the duties of the Director or his office.

Since the positions of Director and Deputy Director of OMB were assigned their current salary levels by the Federal Executive Salary Act of 1964, the Federal budget has more than tripled in sizefrom \$118.6 billion in fiscal year 1964 to an estimated \$417 billion in fiscal year 1977. The duties and responsibilities of the Director of OMB are comparable in importance to those of other officials at executive level I, but the Director is the only member of Cabinet rank subject to Senate confirmation who is not at that pay level. This differentiation can no longer be justified.

The compensation of the Federal Reserve Board Chairman at level II of the executive schedule is equally anomalous. As reported by the Commission on Executive, Legislative, and Judicial salaries:

By any standard, the Chairman of the Federal Reserve Board has responsibilities that one could argue are roughly equivalent to the Secretary of the Treasury. His position has many aspects of a career jobgiven the 14 year tenure. Thus, it does not offer the prospect of a short Government

A comparison of the salaries of the 12 Federal Reserve bank presidents with the current rate of executive level II reveals that all but one of the bank presidents received higher compensation

than the Chairman of the Federal Reserve Board. The salaries of the bank presidents range from \$2,500 to \$45,000 more than executive level III, the current pay level of the six members of the Federal Reserve Board.

Before the enactment of an executive pay raise bill in 1949-Public Law 81-359-the Chairman and members of the Board received the same compensation as Cabinet members, then \$15,000 annually. This earlier recognition of the Board's significance to national monetary policy and its now pervasive impact on the economy and society as a whole should be affirmed. It might also be noted that the statutory authorization for the Federal Reserve System-12 United States Code-has strict conflict of interest provisions that would easily satisfy modern efforts to impose rigorous codes of conduct on public officials.

Mr. President, I don't need to read the tea leaves to know that the subject of pay increases often strikes a disconsonant cord in many of us. Certainly it does not make for good press and, in the minds of many who are not asked to fill the shoes of those for whom a pay raise is proposed, there smacks of the "big spending" syndrome all over again.

Nevertheless, we must shoulder the responsibility to eliminate inequity whenever possible. The total cost of raising the levels of these nine inequitably compensated positions, as proposed, would be \$52,000 annually. While this is not a great deal of money by most modern standards-the issue is not the amount of money but whether these positions are to be reclassified to more accurately reflect their levels of complex and vitally important responsibilities. I can think of no other positions where the complexities and demands of a modern world have so increased these responsibilities and outstripped current classification levels. We cannot ignore these realities. It is for these reasons that I urge the expeditious adoption of this legislation...

Mr. President, I ask unanimous consent that the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1268

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 5312 of title 5, United States Code, is amended by adding at the end thereof the following:

"(14) Director, of the Office of Management and Budget.

(15) Chairman, Board of Governors of the Federal Reserve System."

(b) Section 5313 of title 5, United States Code, is amended-

(1) by striking out-

"(10) Chairman, Board of Governors of the Federal Reserve System.

"(11) Director of the Bureau of the Bud-get."; and

(2) by adding at the end thereof the following new paragraphs:

"(24) Members, Board of Governors of the Federal Reserve System.

"(25) Deputy Director of the Office of Management and Budget.".

(c) Section 5314 of title 5, United States Code, is amended-

(1) by striking out-

(A) "(34) Deputy Director of the Bureau

of the Budget.
(B) "(43) Members, Board of Governors of the Federal Reserve System.".

ADDITIONAL COSPONSORS

S. 76

At the request of Mr. STONE, the Senator from Washington (Mr. Jackson) was added as a cosponsor of S. 76, a bill to amend title XVIII of the Social Security Act to authorize a payment under the medicare program for certain services performed by chiropractors.

S. 247

At the request of Mr. GOLDWATER, the Senator from Indiana (Mr. BAYH) was added as a cosponsor of S. 247, to provide recognition to the Women's Air Force Service Pilots.

S. 682

At the request of Mr. Magnuson, the Senators from New Hampshire (Mr. Mc-INTYRE and Mr. DURKIN), the Senator from Washington (Mr. Jackson), and the Senator from Minnesota (Mr. Hum-PHREY) were added as cosponsors of S. 682, the Tanker Safety Act of 1977.

S. 701

At the request of Mr. Pell, the Senator from New Jersey (Mr. WILLIAMS), the Senator from West Virginia (Mr. Ran-DOLPH), the Senator from Maine (Mr. HATHAWAY), the Senator from New York (Mr. Javits), and the Senator from Vermont (Mr. STAFFORD) were added as cosponsors of S. 701, the Emergency Educational Assistance Act.

S. 718

At the request of Mr. STONE, the Senator from Hawaii (Mr. Matsunaga) was added as a cosponsor of S. 718, to amend chapter 19 of title 38, United States Code, to require the Administrator of Veterans' Affairs to provide veterans with certain cost information relating to the conversion of Government-supervised insurance to individual life insurance policies.

S. 906

At the request of Mr. Pell, the Senator from Minnesota (Mr. HUMPHREY) was added as a cosponsor of S. 906, a bill to prohibit discriminatory practices with respect to physically handicapped per-

S. 1011

At the request of Mr. Roth, the Senator from Missouri (Mr. DANFORTH) and the Senator from Arkansas (Mr. Mc-CLELLAN) were added as cosponsors of S. 1011, to amend title 18, United States Code, to prohibit the sexual exploitation of children and the transportation in interstate or foreign commerce of photographs or films depicting such exploitation.

S. 1040

At the request of Mr. ROTH, the Senator from Arkansas (Mr. McClellan) was added as a cosponsor of S. 1040, to amend the Child Abuse Prevention and Treatment Act to prohibit the sexual exploitation of children and the transportation and dissemination of photographs or films depicting such exploitation.

S. 1072

At the request of Mr. Cannon, the Senator from Hawaii (Mr. Matsunaga) and the Senators from Minnesota HUMPHREY and Mr. Anderson) added as cosponsors of S. 1072, to establish a universal voter registration program.

SENATE RESOLUTION 124

At the request of Mr. KENNEDY, the Senator from Minnesota (Mr. Anderson) and the Senator from Illinois (Mr. STEVENSON) were added as cosponsors of Senate Resolution 124, relating to the ending of all nuclear explosions.

SENATE CONCURRENT RESOLUTION 15

At the request of Mr. WEICKER, the Senator from South Dakota (Mr. Abou-REZK), the Senator from Alaska (Mr. GRAVEL), and the Senator from Oregon (Mr. HATFIELD) were added as cosponsors of Senate Concurrent Resolution 15. to reduce the threat of chemical warfare.

AMENDMENT NO. 180

At the request of Mr. BUMPERS, the Senator from Michigan (Mr. GRIFFIN) was added as a cosponsor of Amendment No. 180 to the bill (H.R. 3477), the Tax Simplification and Reduction Act of

AMENDMENTS SUBMITTED FOR PRINTING

YOUTH EMPLOYMENT AND TRAINING ACT OF 1977-S. 1242

AMENDMENT NO. 184

(Ordered to be printed and referred to the Committee on Human Resources.) Mr. JAVITS (for himself and Mr. HUMPHREY) submitted an amendment intended to be proposed by them to the bill (S. 1242) to provide employment and training opportunities for youth.

AGRICULTURE AND CONSUMER PROTECTION AMENDMENTS-S. 275

AMENDMENT NO. 185

(Ordered to be printed and referred to the Committee on Agriculture, Nutri-

tion, and Forestry.)

Mr. RIEGLE. Mr. President, I would like to submit for Senator McGovern and myself, an amendment to S. 275, which would authorize Federal payment of administrative costs for the supplemental food program. This program provides iron- and protein-rich commodities to low-income pregnant women and to children under 6 who are in need of nutritional supplements.

A child deprived of proper nutrition will never develop to full mental capacity. Proper nutrition must occur in two stages. The first of these is very early in pregnancy. The unborn child is completely dependent on what nutrition is available to its mother. If a woman does not receive proper nutrition during her pregnancy, there is a very good chance that her child's brain or body will never develop to its potential capacity.

The second critical stage where proper nutrition is a must, begins about the 20th week of pregnancy and continues until at least 2 years after birth. This stage is perhaps the most vulnerable stage of

brain development, and inadequate nutrition will inflict a lasting damage that cannot be corrected.

The child whose brain is damaged or whose growth is stunted because of poor diet faces a life of dependency and poverty. If we simply examine the human plight of nutritionally vulnerable women and children, the moral considerations involved would seem to be of such consequence to insure that adequate steps be taken to prevent such damage. However, if that is not enough, then costcutters could approach this from a dif-ferent vantage point. The costs associated with providing nutritional supplements to vulnerable women and children are far less than the cost to future generations in terms of providing health care, lost productivity, and perhaps deon the public assistance pendency system.

There are presently about 44 supplemental feeding programs serving over 104,000 women and children, the largest being Focus: HOPE in Detroit. The Department of Agriculture provides about \$17.1 million worth of food a year for all the programs, but no funds to pay administrative, delivery, storage, public information or nutrition education costs. This has meant that program sponsors have been forced to seek money for those activities from local and State agencies or other Federal departments. Many programs have not been able to secure outside funding sources and have been forced to close. The supplemental food program operated jointly by the Memphis Area South project and the St. Jude Children's Research Hospital in Memphis, Tenn., is currently facing this particular crisis, and may soon be forced to close its doors to hundreds of needy pregnant women and children. Other programs have, at times, had food available but no way to get the commodities to the people they seek to help.

This legislation would provide permanent authority for the supplemental food program. It would also require the Agriculture Department to provide additional funds of up to 20 percent of the value of commodities to each program to pay administrative and other nonfood costs. Based on a projected budget authority of \$17.6 million for fiscal year 1978, the proposal would cost at most \$3.52 million in additional funds.

The amendment will also require the Agriculture Department to:

Provide nutritional food recognizing the cultural patterns of the recipients: Provide equivalent substitutions if a

shortage of a particular item occurs; and Provide specific types of foods which are to be made available, including any special formulas for babies or pregnant women declared necessary by qualified

medical personnel.

This program provides the most efficient and effective means by which we can tackle the problem of malnourishment and prevent the problems of those who might be permanently damaged by diet deficiencies. The only "medicine" which can prevent malnourishment and undernourishment is food. By providing administrative moneys for supplemental food programs we can insure that these

programs will continue to prescribe food for vulnerable low-income women and children as a preventive "medicine."

The late Senator Philip A. Hart and Senator McGovern introduced similar legislation in the second session of the 94th Congress. I can think of no greater tribute the Congress could pay to Phil Hart, than to insure that a program to which he was deeply committed be able to continue to provide nutritional supplements to pregnant women and children.

Mr. President, I ask unanimous consent that a list of States operating supplemental food programs in November 1976, an article about the nutritional benefits of the supplemental feeding program, an article about the effects of malnutrition, and the text of the amendments be printed at this point in the Record

There being no objection, the material was ordered to be printed in the RECORD, as follows:

AMENDMENT No. 185

On page 96, line 2, "(a) immediately after "SEC. 1304.".

On page 96, between lines 6 and 7, insert a new subsection (b) as follows:

(b) The Agriculture and Consumer Protection Act of 1973, as amended, is amended by—

(1) redesignating section 5 of the Act as section 6; and

(2) inserting after section 4 of the Act a new section as follows:

"COMMODITY SUPPLEMENTAL FOOD PROGRAM

"Sec. 5. (a) (1) In carrying out the supplemental feeding program (hereinafter referred to as the 'commodity supplemental food program') to which reference is made in section 4 of this Act, the Secretary of Agriculture shall pay to each State or local agency administering any such program all administrative costs in any fiscal year not in excess of an amount equal to 20 per centum of the total amount of the value of commodities made available to the State or local agency for such program in such fiscal year. In no case shall any State or local agency receive less for administrative expenses in any fiscal year than it received in the fiscal year in which this section was enacted.

"(2) Within six months after the date of enactment of this section, each State or local agency participating in the commodity supplemental food program shall submit to the Secretary a report describing the manner in which nutrition education services are being provided to the recipients of food under the program. The payment of administrative expenses by the Secretary under paragraph (1) of this subsection shall not, however, be conditioned upon the submission of such report by any State or local agency.

"(3) During the first three months of any commodity supplemental food program, or until such program reaches its projected caseload level, whichever comes first, the Secretary shall pay those administrative costs necessary to commence the program success-

"(b) The Secretary of Agriculture shall take into account medical and nutritional requirements and cultural eating patterns to the extent necessary to provide a nutritionally adequate diet for recipients under the commodity supplemental food program.

"(c) The Secretary of Agriculture shall make appropriate provision for equivalent substitutions of commodities where shortages occur in the commodity supplement food program.

program.

"(d)(1) Administrative costs for the purposes of the commodity supplemental food program shall include, but not be limited

to, expenses for information and referral, operation, monitoring, nutrition education, start-up costs, and general administration, including staff, warehouse and transportation personnel, insurance, and administration of the State or local office.

the State or local office.
"(2) In carrying out the commodity supplemental food program, the Secretary of Agriculture shall require that the food made available to any recipient under such program include, but not be limited to, the following: dried egg mix, canned fruits, canned fruit juice, canned vegetables, iron fortified cereal, infant cereal, canned meat and canned poultry, evaporated milk, instant fortified nonfat dry milk, peanut butter, instant potatoes, dried beans, and corn syrup. In addition, the Secretary shall require that the food contain commercially formulated preparations specifically designed for women or infants in those cases where, in the opinion of qualified medical personnel, such formulations are necessary to meet the medical and nutritional needs of the individual program recipient involved.

"(3) During each fiscal year the commodity supplemental food program is in operation, the same types and varieties of commodities in the same proportional amounts as are available at the beginning of the fiscal year (or as were available during the fiscal year ending June 30, 1976, whichever is greater) shall be maintained

throughout the fiscal year.

"(e) The program authorized by this section shall be carried out supplementary to the special supplemental food program, the food stamp program (without regard to whether an area is under the food stamp program), and the food distribution program. The commodity supplemental food program shall operate side by side with any existing special supplemental food program, if the State or local agency responsible for carrying out such commodity supplemental food program establishes safeguards to prevent participation by households and individuals in both the commodity supplemental food program and the special supplemental food program and the special supplemental food program.

"(f) No State or local agency may prohibit children under six years of age from receiving benefits under the commodity supplemental food program if they are otherwise eligible to receive such benefits.

"(g) The Secretary of Agriculture is authorized to issue such regulations as may be necessary to carry out the commodity supplemental food program.".

NUTRITIONAL BENEFITS FROM FEDERAL FOOD ASSISTANCE

(A Survey of Preschool Black Children From Low-Income Families in Memphis)

(By Anthony G. Kafatos, M.D., M.P.H., and Paul Zee, M.D., Ph. D.)

Approximately 4,000 preschool black children from low-income families in South Memphis participated for three years in a supplementary food program sponsored by the U.S. Department of Agriculture. Part of this group received additional benefit from food stamps, day-care centers, and an infant-feeding program. We evaluated the effects of this participation in 250 children selected randomly from the enrollment list of the supplementary program. Each child was examined for height, weight, head circumference, and levels of hemoglobin, serum iron, and vitamins A and C. The data were then compared with those from a similar survey in the same area conducted three years before.

The results of this comparison indicate considerable improvements in height and weight and a reduction in the incidence of anemia and in the numbers of children with low plasma vitamin A levels.

In the absence of other recognizable intervening factors, we conclude that federal food assistance programs were primarily responsible for the observed nutritional improvements. (Am J Dis Child 131:265-269, 1977)

In 1969, high frequencies of stunted growth and anemia were found within the preschool population of a predominantly black com-munity in South Memphis. These defi-ciencies were attributed to an inadequate diet due to low family income, and these data provided us with baselines for evaluating the effects of increased federal food assistance to the children of this urban community. Reported here are the results of a follow-up nutrition survey conducted in 1972 after the study population had participated for three years in a supplementary food pro-gram sponsored by the U.S. Department of Agriculture (USDA) and had received additional benefit from food stamps, day-care centers, and an infant-feeding program. centers, and an infant-feeding program. These findings, by comparison with baseline values, demonstrate considerable improvements in height and weight and a significant decrease in the frequency of anemia.

COMMUNITY CHARACTERISTICS

The subjects of this survey were all residents of a predominantly black community in South Memphis. The area encompasses nine census tracts and in 1970, had a population of 37,520, of whom 4,972 were under 6 years of age.2 Living conditions from 1969 to 1972 were typical of those in urban poverty neighborhoods: nearly 20% of the 10,902 occupied housing units were dilapidated or deteriorating; overcrowding was common, with more than one person per room in 30% of the houses; and many homes were without adequate kitchen or plumbing facilities. The median family income for each of the nine census tracts ranged from \$2,986 to \$4,783 a year. Yearly earnings for one half of the families were below official poverty guidelines, and 34% to 54% of this group received public financial assistance. According to census statistics, 11.4% of the male labor force was unemployed in 1970.2

Averaged data on infant mortality and prematurity in the community were available for the period of 1966 to 1971 (Memphis and Shelby County Public Health Department, unpublished data, September 1973). From 1966 to 1968, infant mortality per census tract ranged from 22 to 84 per 1,000 live births (Memphis mortality, 25 infants); from 1969 through 1971, they ranged from 13 to 37 per 1,000 live births (Memphis mortality, 17.5 infants). The incidence of low birth weights ranged from 18 to 28 per 100 live

Footnotes at end of article.

births in 1966 to 1968 (Memphis rate, 12 infants) and from 14 to 25 per 100 live births in 1971 (Memphis rate 10.1 infants)

Three clinics staffed by nurses and nurse practitioners from the Public Health Department are open in the area on weekdays to provide immunizations and treatment for minor illnesses. Before 1969, the majority of preschool children in this community did not benefit directly from federal food assistance. Only 14% of the families participated in the food stamp program, and USDA supplementary foods were not being distributed in the area. The nutritional status of these children was poor. Approximately 50% of the preschool population were below the 25th percentiles for height and weight on anthropometric charts, and low plasma vitamin A levels and anemia were common. These deficiencies correlated with low income and a consequent inability to obtain a sufficient quantity and quality of food. Early in 1969 a supplementary food pro-

was initiated in the community through a contract between the U.S. and Tennessee Departments of Agriculture, the Memphis and Shelby County Health Department, St. Jude Children's Research Hospital, and Memphis Area Project South (MAP-South), a black self-help organization that has been active in the area since 1967. Families in need of supplementary food are identified by MAP-South neighborhood aides who live and work in the community. Medical personnel at St. Jude Hospital authorize the distribution of food, using the following criteria to determine eligibility: (1) the family must reside in the MAP-South area (nine census tracts), (2) family income must be below poverty guidelines of the federal government, and (3) the children must be less than 6 years of age.

The types and quantities of supplementary food are determined from criteria of the USDA. The monthly allotment for children of three different age groups is presented in Table 1. In addition, a prepared infant formula enriched with iron, minerals, and vitamins had been provided since 1970 to all newborns in the community for the first six months of life. This formula and occasionally other foods are financed from private sources

POPULATION SAMPLE

The population surveyed consisted of approximately 4,000 preschool children enrolled in the supplementary food program in 1972. Cross-sectional samples and sampling procedures were similar to those in the 1969 survey. Every 12th family chart was taken from the MAP-South files for a total of 340 charts. Despite at least three attempts, 26% of the families could not be contacted at home or the legal guardian was not available to give consent. Another 32% of the families were lost because of incomplete or incorrect addresses or because a child had become ineligible for the survey. Moving without leaving a new address was the most frequent cause of our failure to locate families in the original sample. The migratory nature of the study population was not unexpected, as the 1970 census indicated that 49% of the residents had moved since 1965.2

From the 340 charts, we were able to locate 154 families with 250 preschool children (primary sample). The distribution of this sample by age and sex is given in Table 2. A secondary sample of 60 children, or every 4th child in the primary sample, was brought to the St. Jude Nutrition Clinic for a complete pediatric work-up.

MATERIALS AND METHODS

All home visits and measurements were made by one of us (A.G.K.) with the help of an assistant from the St Jude Nutrition Clinic. The purpose of the visit was explained to the parents and with their consent, the child's general condition was evaluated. Recumbent length or height was measured with a metal tape permanently attached to a plank with a fixed headboard. Weights were determined with a portable scale that was standardized with a 11.3-kg weight before each examination. Each height and weight was plotted on the appropriate anthropometric percentile grid of Stuart and Stevenson. Head circumferences were measured with a plastic tape and plotted on the Nellhaus grid.⁵ The variability in physical measurements between the 1969 and 1972 surveys could not be tested.

Total	153	110	147	140

¹ Total boys and girls: 300 in 1969, and 250 in 1972.

Capillary blood was obtained for the following tests: (1) hemoglobin concentrations and red and white blood cell counts by Coulter counter, which automatically computes the hematocrit and red blood cell indices; total serum protein content and serum albumin value,6 (3) vitamin A and C levels.79 Test results were analyzed by the X-square method.10

Children in the secondary sample received complete pediatric examination. This included blood tests for the presence of sickle cell hemoglobin and glucose-6-phosphate dehydrogenase deficiency, 11 as well as measurement of serum iron value and total ironbinding capacity.12

RESULTS

In 1969, 16% of the preschool children in this urban community were below the 3rd percentiles for height and weight on the Stuart-Stevenson grid, and 50% were below the 25th percentiles. 14 By 1972, heights had shifted significantly to a more normal distribution, and weights were significantly improved in the 25th and 50th percentile groups (Table 3). Head circumferences were more than two standard deviations below the reference mean in 15% of 300 children surveyed in 1969. Three years later, the frequency of below-normal head sizes was 12% among 250 children who were 0 to 6 years of age and 9% among 77 children who were 0 to 2 years of age, all of whom had received an enriched infant formula for the first six months of life.

The possible contribution of low birth weights (<2.500 gm) to the above findings was examined. Precise birth weights were

available for 226 of the 250 children in our primary sample. Of this number, 30 children weighed less than 2,500 gm at birth. In the present survey, 45% of this group were above the 50th percentile for height; the remaining children were clustered in the lower percentiles. As shown in Table 4, this latter group did contribute to the excess number of small children encountered during the survey but the effect was slight.

TABLE 3.—DISTRIBUTION OF HEIGHTS AND WEIGHTS ON ANTHROPOMETRIC CHARTS 1

¹ Data from Interdepartmental Committee on Nutrition for National Defense.

² P<0.001.

Mean hemoglobin concentrations and hematocrit readings are shown in Table 5. Although averaged hemoglobin values were normal (> 10 gm/100 ml) for the 0- to 3-year-old age group in both surveys, the frequency of anemia was significantly greater in 1969 than in 1972 (Table 6). In the first survey, 27.7% of preschool children had hemoglobin levels of less than 10 gm/100 ml, compared to 10.9% three years later. This decrease in prevalence of anemia was more clearly demonstrated in the children who were born after 1970 and who were thus eligible for an iron-enriched formula during the first six months of life. Only 10% of this group had hemoglobin values below 10 gm/100 ml, whereas in the prior survey the rate for children born from 1967 to 1969 was 40%. When low-birth-weight infants were excluded, these frequencies were 11% and 39%, respectively. Significant decreases in frequency of anemia were also noted for the 3- to 6-year-old age group (Table 6).

Serum iron values for 55 children from the 1972 secondary sample substantiated the presence of iron-deficiency anemia (Fig. 1). Fifty-three per cent of the children less than 2 years of age had transferrin saturation values under 15%, and 37% of those between 2 and 6 years of age had values of less than 20%, which is compatible with iron deficiency. Thirty-six per cent of the children had normal hemoglobin levels associated with low transferrin saturation. The prevalence of sickle cell hemoglobin (7%) and the glucose-6-phosphate dehydrogenase deficiency (11%) in the secondary sample was comparable to that in the general black population.

The mean plasma vitamin A concentration (\pm SD) in 1969 was 22.6 \pm 13.0 μ g/100 ml and in 1972 it was 26.8 \pm 20.3 μ g/100 ml. Mean carotene levels (\pm SD) were 90.2 \pm 33.2 μ g/100 ml and 88.9 \pm 39.7 μ g/100 ml, respectively; in both survey years, two thirds of these values were within the low or acceptable range, i.e., below 100 $\mu g/100$ ml. Inherent in the vitamin A-carotene procedure is the possibility that the high carotene values may be associated with low vitamin A levels. This correlation was indeed present in our sample but to a low de-(correlation coefficient, r=0.30) when deficient vitamin A levels were correlated with their associated carotene concentration. Carotene values ranged from 14 to 197 ug/100 ml and fell well within the range of linearity for our method, which is from 0 to 300 μ g/100 ml.

Although no gross clinical signs of hypovitaminosis A were noted in 1969, 44% of 57 randomly selected preschool children had plasma vitamin A levels below 20 $\mu g/100$ ml (Table 7), the lowest acceptable value in healthy children.9 In 1972, only 27% of 250 children had levels below this concentration. Ascorbic acid concentrations, not measured in 1969, were low in 18% of all children examined and deficient in 5.2% (Table 7). Albumin levels below 3.5 gm/100 ml were

found in 5.7% of 209 children in 1969 but in only 2% of the 248 children examined in 1972, which represents a statistically significant improvement (P<.05).

Physical examinations, chest roentgenograms, and skin tests for tuberculosis and histoplasmosis showed no evidence of serious chronic infections. The incidence of mild

upper respiratory tract or skin infection was 25% in 1969 and 20% in 1972. White blood cell counts higher than 10,000/cu mm were found in 20% of the children in 1972.

Economic conditions in the community remained depressed during the evaluation period (Table 8). Half of all families surveyed earned less than \$2,500 a year, compared to \$1,838 a year in 1969. The 1972 federal poverty guidelines 3 list \$2,790 as the lowest acceptable annual income for a family of two and \$5,880 for a family of seven, the median number in this study. Participation in the federal food stamp program rose from 14% in 1969 to 56% in 1972, while percentage of children receiving free meals at day-care centers rose from 0% to 10%. The median charge for food stamps purchasing \$145 of food was \$38 a month Seventeen per cent of these households did not spend additional cash for food; the remaining families spent an extra \$35 a month on meals.

COMMENT

Federal support to child nutrition programs increased substantially during the three-year period from 1969 to 1972. In fiscal 1972 Congress appropriated \$1.2 billion for this purpose, a three-fold increase over the 1969 appropriation.13 Although several smallscale evaluations have been completed and ambitious studies are underway,13 14 the benefits of this strengthened federal support are still doubted by some.15

TABLE 8.-INFORMATION FROM FAMILY INTERVIEWS 1

Data compiled from 130 (1969) and 145 (1972) successful

The present survey indicates definite nutritional improvement among black preschool children who participated in federal food assistance programs in South Memphis. High frequencies of retarded height and weight, noted in 1969, had significantly decreased by 1972, with the distribution of heights approaching that for healthy white children living under normal conditions of home life in Boston (Table 3). Data for healthy black children receiving optimal care were not available for comparison; however, growth rates for blacks have been found by others to be nearly identical to those of whites.16, 18 The frequency of anemia also improved significantly during this period, from approximately 25% in 1969 to 11% in 1972 (Table 5).

As in most large-scale nutrition surveys, the data in this study are cross-sectional and do not speak to the nutritional experience of individual children. We encountered uncontrollable variables that prevented direct correlation of food consumption with nutritional improvement. For instance, we were not able to monitor a child's actual daily intake of food, nor could we control whether or not a family collected its food allotment on a regular basis. Nevertheless, in the absence of other recognizable intervening factors, we believe that the following factors were primarily responsible for the observed nutritional improvements; community implementation of a USDA supplementary food program, (2) six-months'

provision of a fortified infant formula to all newborn infants in the community, (3) a 56% participation in the food stamp gram, and (4) free meals provided by day-care centers. Changes in family size and annual family income (Table 8) were not sufficient to be considered as major contributing factors. A social and political awakening within the population could have stimulated greater self-reliance and resourcefulness and hence resulted in improved diets, but this possibility could not be substantiated. A reduced rate of prematurity in the ninecensus-tracts area would have contributed to improved growth indices, but the annual percentages of low birth weights in the 1969-to-1972 period were not significantly different from each other (16.0%, 16.5%, and 17.6%, respectively).

Despite the improvements demonstrated by this survey, a number of nutritional deficiencies still persist in this preschool population. A probable explanation is that the food packages are not designed to guarantee intake of all necessary nutrients. The persistence of anemia in these children undoubtedly stems from insufficient iron to supplement the home diet. Farina, a wheat cereal fortified with iron, is distributed throughout the community but is disliked by most of the children and consequently not eaten. The high incidence of low vitamin A and C levels may be due to a variety of reasons: the scarcity of vegetables and fruits in the Memphis ghetto diet; the aversion of most children to vegetables, even if they are offered; and the low vitamin A content of the supplementary foods. Some of these deficiencies could be corrected by proper nutritional counseling, which presently is a serious omission in food distribution programs involving commodities or stamps. However, the expense of providing a large population with professional counseling can be prohibitive. Certainly a less expensive and equally effective approach would be to adjust the commodity food program to the deficiencies of its recipients. Such programs should also provide more protective foods. A striking example of how effective this can be was shown by an earlier study of infants who received a six-months' supply of iron-fortified formula after birth.19 Frequencies of anemia and hypovitaminosis A in this group were significantly lower than in a similar group fed evaporated milk.

We conclude that federal food assistance to preschool children produces significant improvements in growth rates and other nutritional measurements and that such programs should be improved and continued to eradicate persisting deficiencies.

STARVED BRAINS-"A GENERATION OF CLUMSY, FEEBLE-MINDED MILLIONS

(By Roger Lewin)

We know the picture well: the bloated bellies, stick-thin arms, and sad listless eyes that mark severe malnutrition. Countries sapped by chronic food shortages or thrown into despair by sudden devastating famines and war have burned those images into our conscience. But less dramatic, and therefore more insidious, are the effects of long-term undernutrition, which more than 300 million children already suffer.

Although these children may escape the worst rigors of starvation, there is now mounting and inescapable evidence that their intellectual development suffers damage from which there is no chance of complete re-

The beautifully complex architecture of the human brain follows an innate blueprint, but factors in the environment of the growing infant partly influence its final form, and therefore its final performance. One major factor during the early stages of brain development, we now realize, is an adequate supply of food. Without the necessary flow of nutrients the brain simply cannot create the structures-the cells, the wiring, and the complex circuits—that fuse to form the functioning human mind.

Researchers in Europe, Africa and South America are also learning of a delicate but crucial interplay between adequate diet and environmental stimulation in the first two years of life. During this critical period the brain's potential has to be reached, or it is too late. There is no second chance. An infant deprived of nutrition or stimulation will never develop to full mental capacity. The implications of this situation are frightening: cycles of poor nutrition and environmental poverty enhance each other, leading to personal suffering and chronic social malaise. Today 70 percent of the world's population seriously risks permanent brain damage.

The critical period of development of the human brain results from its peculiar pat-

tern of growth. At birth an infant's brain has already reached 25 percent of its adult weight, and by six months it is half way to the final target. In comparison, total body weight at birth is a mere five percent of its adult maximum, and reaches the 50 percent mark only at age 10.

Until recently we had no clear picture of the stages and timing of human brain growth. Now, John Dobbing and Jean Sands of the University of Manchester, England, have examined the composition of almost 150 human brains ranging in age from 10 weeks of gestation to seven years. What they found helps us understand the effects of malnutrition in children.

PROGRESS OF THE BRAIN

Basically, the brain grows in two stages. First, between weeks 10 and 18 of pregnancy, the adult number of nerve cells develops. Second, beginning about week 20, the brain's packing cells (the oligodendroglia) begin to followed by the production of the insulating material (myelin) that coats the long fibers along which the nerve cells send their messages. This second stage continues for at least two years after birth: myelination progresses at a lower rate until the age of four years. The second stage, known as the brain-growth spurt, represents the most vulnerable period of brain development. It is the critical period when inadequate nutrition and lack of stimulation inflict the most lasting damage.

Before Dobbing and Sands laid out clearly the timing of the human brain's growth spurt, we assumed that most of the brain's important development took place prenatally and was more or less complete by birth. But their demonstration that about five-sixths of the growth spurt comes after birth forced an awareness of the hazards of prolonged malnutrition in the early years of life.

There are several ways of exploring what happens to an infant nurtured in an impoverished womb and born into a world where he or she is deprived of food. One can study what physically happens to the brain or one can examine the physical and behavioral consequences of malnutrition in animals. Or one may observe children born under deprived cirmumstances and determine the effect of environmental factors in

improving or worsening their condition.
One thing that is more or less safe from nutritional insult in the growing human brain is the number of nerve cells it contains. Because this number is established very early in pregnancy, at a time when outside nutritional factors fail to impinge on the developing fetus, the brain's basic nervecell complement escapes unscathed. There however, a major exception. The cerebellum, a wrinkled structure at the back of the brain that coordinates movement of the arms and legs, is vulnerable to nutritional deprivation because its nerve-cell generation and growth spurt are delayed. A starving brain risks delayed creation of the oligodendroglia and the later myelination of the nerve fibers. The particular vulnerability of the cerebellum is important because damage to this structure goes a long way toward explaining the reported clumsiness and remanual skills of malnourished duced children.

MALNOURISHED NEURONS

One thing that brain researchers readily admit is that they have measured what is easiest to measure. The feature of brain development that is probably most difficult to quantify, but is almost certainly the most important, is the lacework of connections between the nerve cells (neurons). Reliable reports show that the major part of the nerve fibers, the axons, shrink in diameter in malnourished animals. But the really crucial area of interneuron communication centers on the end of the axon, where it branches into literally thousands of tiny fingers that make contact with the neighboring neurons. B. G. Cragg from Monash University, Australia, has had a crack at this problem, and what he finds is most disturbing.

Cragg did some microscopic investigations of the cerebral cortex in rats malnourished early in life. In what must have been a crashingly tedious experiment, he counted the number of minute nerve endings (the synapses) in the cortex of undernourished animals. He found a 40 percent reduction, compared to normal rats. Cragg suspects too that some of the synapses may have been unable to function because of molecular breaks. The creation of the interneural network is one of the brain's major construction projects during the first two years of life, so Cragg's result is crucial and needs to be confirmed. If the undernourished cerebral cortex really lacks almost half of its interconnections (or even a 10th), the consequences for brain function are frightening. The planet may be raising a generation of clumsy, feeble-minded millions.

A crucial point about all these experiments is that moderate degrees of malnutri-tion—of the sort that 300 million children experience daily-can produce these physical side effects and deficiencies. More important, we cannot repair these physical deficiencies by normal feeding once the brain growth spurt has passed.

The typical undernourished child is shorter and lighter than his counterpart in affluent countries. He is about 70 percent of his correct weight, and the brain weight and head diameter are marginally smaller as well. The next step we've taken is to find out what this means for intellectual and social activity.

In the attempt to find the consequences of chronic undernutrition, most research groups have used the longitudinal study, observing the progress of a group of children over a period of years. for example, Joaquín Cravioto and Elsa DeLicardie studied a group of infants born in 1966 in a small rural village in southwest Mexico. They have been observing the children ever since. The village "normal" background of undernutrihas a tion, but the researchers concentrated on 22 children who at times had had almost no food and thus had been severely malnourished.

FOOD AND LANGUAGE

Cravioto and DeLicardie studied nutrition and mental development against the background of social and economic factors. Their outstanding discovery was the effect of malnutrition on language development and verbal-concept formation. As a group, the severely malnourished children began to lag behind in language at about six months. At the age of one year the matched control group had language development equivalent to 334 days, compared with 289 days for the hunger group. By three years the gap was 947 days to 657.

Because verbal concepts are a basic area of human intelligence, the researchers gave children tests to measure their understanding of 23 pairs of opposites (such as big-little, long-short, in-out). At 31 months of age the control group of normals understood an average of 5.46 concepts, compared with 3.92 for the malnourished children; by 46 weeks their scores were 16.92 and 12.16; and at 58 weeks the controls knew 20 of the concepts, three ahead of the malnourished group. Even after 40 months the children who had suffered malnutrition in infancy were behind control children in language development and concept formation. Although the worst physical symptoms of their malnutrition were gone, and although they did make up some of the lost ground, they didn't catch with their healthier playmates. The trend line suggests they never will.

Because the poverty that produces severe malnutrition also produces deprived environments. Cravioto and DeLicardie compared the home lives of the children. They used the Caldwell Inventory of Home Stimulation to measure factors such as frequency and stability of adult contacts, the number of voices the child hears, availability of toys and games, whether the child's needs are met, and how many restrictions there are on the child's activity. The researchers found that the malnourished infants came from homes that were significantly impoverished in activity that brings the human mind alive.

Although this poor environment of the malnourished children contributes to their slowed intellectual development, Cravioto claims that it is not the sole explanation. This conclusion is supported by Stephen Richardson and his colleagues, who studied a community of children in Jamaica, and found that malnutrition is as damaging as an impoverished social life. Richardson measured the physical and intellectual status of a group of boys, aged seven to 11 years, who had during the first two years of their lives suffered severe malnutrition. These children were smaller in stature, lighter in weight, and had smaller heads than normal children. Behaviorally, they were disadvantaged too; they did less well in formal tests of reading, writing and arithmetic; teachers found their school performance to be poorer, with more special problems in classwork.

Further, the previously malnourished children were less popular among their school-mates. When Richardson asked all the children to pick the three peers in their class with whom they most preferred to spend their time, they named the malnourished children much less frequently. This is a tricky result to untangle, but the cause may have some parallels with the observation that malnourished animals are socially disturbed and more irritable. Perhaps the children were

too.

CURING DEPRIVED CHILDREN

Now researchers are beginning to ask what can be done to help children who do not get adequate food and environmental enrichment.

One aspect of intellectual performance remains resistant to repair in malnourished children, regardless of whether or not they get additional food and special schooling—short-term memory. So far no program has been able to help deprived children gain a normal ability to remember what they just learned.

Another compensation study is underway in a poor agricultural village in Mexico, Tezonteopan. Few families in Tezonteopan show signs of severe and clinical mainutrition, but almost all are chronically underfed, barely managing to survive. Passive children and tired mothers barely communicate, rarely play. Adolfo Chavez is studying the long-term effects of supplementary food on both parents and children. He began his food supplements with pregnant women and continued them throughout the brain growth spurt, i.e. until the children were over two years old.

For a start, the supplemented mothers produced babies that were roughly eight percent heavier than normal in the village, and this weight advantage continued and expanded. But behavioral differences appeared rapidly too. The test children showed superior language development within the first year, and in simple physical activity they far outshone their underfed fellows. On a measure of movement, they were three times as active by age one year, and four times as active by age two.

Further, the well-fed children spent less time in their cots, walked at a younger age, were more vigorous in play, and were more likely to take the lead in play, and were generally much more independent. And because of their greater activity and exploratory behavior, their parents and siblings took a greater interest in them, which in turn

was strengthened by the infants' tendency to smile more. The whole family dynamics gained a higher level.

Some Tezonteopan fathers even took an active part in child care, something they almost never do. They were enthused by having a vigorous, alert child. Several were so impressed with their "special" children that they declared to Chavez, "This child will not be a farmer like me."

Chavez's work reveals the tragedy and the promise. Millions of people today accept deep, grinding hunger and poverty as normal and inevitable, and pay the price with lowered intellect and activity. We know that if the brain is not well fed during its critical period of growth, it will never develop to the full and rich potential that is our heritage. We also know that massive doses of good diet, fun and games, teaching and stimulation can help to overcome the intelligence gap that malnutrition leaves in its wake.

Ultimately, the efforts to untangle the effects of malnutrition and a poor environment may make little difference in the real world, where the two exist in a vicious circle. Poverty inflicts a double insult—its victims condemned to a dearth of food and a sterile environment. The combination is at work daily, eroding the mental capacity of 300

million children.

ADDITIONAL STATEMENTS

AMBASSADOR SPRUILLE BRADEN'S
PERCEPTIVE ANALYSIS OF
UNITED STATES-LATIN AMERICAN RELATIONS

Mr. HELMS. Mr. President, Ambassador Spruille Braden is America's foremost senior diplomat. His public career spans more than four decades; and that followed many years of success in the private sector.

Ambassador Braden's accomplishments are legion. He has done more than any living American to improving relations between our neighbors in Latin America and the United States.

As Assistant Secretary of State for American Republic Affairs, as Ambassador to Argentina and Cuba, as a resident of Chile—in so many capacities—he has gained a first-hand working knowledge of Latin America. He knows the people, their individual national heritages, the issues that unite them—as well as divide them.

He has negotiated with them. His success with the negotiations that ended the Chaco War is well known, to cite only one example.

He knows Latin America in all of its diversity, its cultural richness, and its potential.

Knowing Ambassador Braden's background and his continuing interest in United States-Latin American relations, I was interested to read recently his speech to the Belair Council of the Navy League of the U.S.A. I want to share this perceptive analysis of a number of current areas of interest in United States-Latin American relations with my colleagues.

Ambassador Braden points out four major critical areas in the Western Hemisphere. The first is Argentina, which exemplifies, Ambassador Braden points out,

How a superior, educated, wealthy and religious nation, possessing virtue and great

mental and physical assets, for over three decades has suffered a deluge of evils as her government sank into the depths of degradation, corruption, venality and irresponsibility. Murder, torture, kidnapping, terrorism and guerrilla warfare ensued.

But Ambassador Braden sees hope for Argentina under its new government. I note a recent Time magazine assessment of the Argentine Government's first year in power. On the whole, Time seems to feel that stability is returning to the country. From my own visits there, both during the Peron government, and during the new government's administration, I am inclined to agree that Argentina is on the road to recovery. But dangers still abound, as Ambassador Braden so ably shows.

Another critical area that Ambassador Braden mentions is Chile. In Chile, the situation deteriorated much further than in Argentina, as the Ambassador points out:

Unfortunately, the Chileans, overly confident in their dedication to democracy, credulously did not awaken to the threat of communism and loss of freedom until their backs were against the wall.

But now, the Ambassador continues. Despite the catastrophic economic and social results of the Marxist regime, the Chilean people have tightened their belts and are repairing the damage. Their record on "human rights" is now better than the majority of the countries in the United Nations who accuse them.

Putting the issue into a proper perspective, Ambassador Braden states that:

On reflection, we must see that Chile and Argentina are major battlegrounds between East and West, between the forces of communism and freedom.

The Ambassador is correct, of course. Too often, I am afraid, we overlook this simple but irrefutable fact.

Ambassador Braden names Cuba and the Panama Canal as two other areas of Hemispheric concern. "Cuba as a full-fledged Soviet satellite and Soviet-occupied fortress, is a major danger to the United States," he says, pointing also to Cuba's intervention in Africa as a blatant act against the interests of the free world.

Regarding the Panama Canal, Ambassador Braden reminds us that:

Our sovereignty and ownership of the Canal Zone in perpetuity twice has been reaffirmed by U.S. Supreme Court decisions, by many leading Panamanian statesmen, Presidents and Ministers, as well as by lower U.S. Courts.

Mr. President, there is much more important information in this excellent statement of Ambassador Braden. So that Senators may have the benefit of Ambassador Braden's years of experience, I ask unanimous consent that his speech before the Belair Council of the Navy League, entitled "Soviet Threat to the Panama Canal," be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

SOVIET THREAT TO THE PANAMA CANAL (Address by Ambassador Spruille Braden)

It is an honor to be invited by Mr. David Gill Evans, President of the Belair Council of the Navy League of U.S.A. to address this

distinguished and knowledgeable audience. I am grateful indeed, just as I am proud of life membership in the Belair Council of the

Navy League of the U.S.A.

During many years of an active life throughout the Americas, I have accumulated many convictions and I hope perspicacity, in keeping with the old Spanish say-The devil knows more by reason of his age, than because he is a demon"

One of my strongest persuasions is that the greatest threat to "our civilization" is a world-wide breakdown in morality. This we witness in and out of government pene-trating every strata of society.

I further believe that the most widely destructive of all immoralities is that centered in and emanating from Moscow. Vide:

(1) The unending and outrageous cruel-ties perpetrated on the Russian people, as described by Solzhenitsyn;

(2) The so-called "liberation" movements propagated everywhere by Soviet agents, foreign Communists and misguided dupes;

(3) Russian ambitions for world hegemony. The Soviet already is progressing by strides in its plans to convert the American republics into a conglomeration of satellite and slave states.

Today I shall summarize only the four most critical areas in the Western Hemis-

First: Argentina exemplifies how a superior, educated, wealthy and religious nation, possessing virtue and great mental and physical assets for over three decades has suffered a deluge of evils as her government sank into the depths of degradation, corruption, venality and irresponsibility. Murder, torture, kidnapping, terrorism and guerrilla warfare ensued.

The cause of all this was the breakdown in morality and Communist infiltration.

As far back as 1945, when I served as Ambassador in Buenos Aires, the then vice president and dictator, Peron, while pretending opposition to Communists, actually was intriguing closely with them; they had replaced the Nazis in his esteem.

Simultaneously he, his mistress, later wife, Evita, and his henchmen, enriched themselves on a vast scale.

When Peron died, his third wife and heir, Isabelita (a former bar girl) suddenly found herself the nominal head of a government which had fulfilled 85% of the program laid down by Karl Marx and Friedrich Engels. Presently she is imprisoned for stealing pub-Mc funds.

As Argentina was about to fall completely into Communist hands, the armed forces, under General Jorge Rafael Videla (a man highest character) seized power. They enlisted in their government some patriotic and experienced civilians, such as the new Minister of Economy, Martinez De Hoz. As a result of the military's firmness and courage, Communism, terrorism and corruption gradually are being eradicated. Argentina at long last now may hope eventually to retrieve its old position as a responsible, respected and prosperous nation. Realistic reforms may recapture Argentina's idealism.

From 1922 through 1938 I knew Argentina at the apex of its prosperity, political and social well-being. But in 1945, when I returned as Ambassador, I witnessed the beginnings of the decomposition, Communism and its twin, terrorism, later almost leading that pitiable nation into the jaws of

destruction.

What I saw beginning 30 years ago in Argentina, I now observe starting in the U.S.A.—traditionally cherished ideals are attacked, while disintegrating corruption is tolerated and exotic ideologies are circulated through our schools, the media, and pretty much everywhere.

Second: The collapse of Chile into Communism was more precipitous and complete

than Argentina's; First came the election to power of the Social-Democrats (actually Socialists); four years later they helped the Marxist, Allende, to the Presidency, with only a 35 percent constitutional vote.

This accession to power with his Socialist-Communist cohorts, was planned, incited and aided by the Soviet Union. Moscow was anxious to create another Communist satellite in Latin America, and in so doing, obtain a naval base at Talcahuano on Chile's South Pacific coast, just as it had acquired its naval bases, underground submarine pens, missile sites, encampments and other facilities in Cuba

Unfortunately the Chileans, overly confident in their dedication to democracy, credulously did not awaken to the threatening communization and loss of freedom until

their backs were against the wall.

For more than a year the populace, deceived and helpless, allowed matters to drift. Finally, they were awakened with a bang by the killings and tortures, imprisonments and property confiscations, plus the influx of trained commissaries and guerrillas from the Soviet Union, Cuba and elsewhere, along with shiploads of arms and munitions for the Allendistas, fierce fighting broke out between Communists, both national and foreign, and patriotic Chileans.

The first mass protest was staged by women from all walks of life demonstrating in the streets and surrounding the Presidential palace, banging pans and kitchenware. Some arrested: others physically abused. There followed a paralyzing strike by truck

drivers.

In the nick of time, the military intelli-gence discovered that Allende and his coconspirators had developed a so-called plan" to assassinate within one week all top military officers and leading citizens.

Immediate counter-action was imperative. It was taken and thousands of Communists, guerrillas and criminals were arrested:

Allende committed suicide.

The new military government had to fight fire with fire. Some ill-treatment even of innocent people, was unavoidable if Chile were to be saved from Moscow-controlled communism.

Please believe me when I assert that:

(1) The only thing the Communists respect or fear is physical force greater than their own.

(2) A Communist commitment or pledge is very rarely fulfilled.

Chile is the only nation, with scant aid from abroad, which has been able, by the courage and sacrifice of its citizenry, to overthrow a firmly established Communist dictatorship which had seized power nefariously and by trickery. Chile still has to defend her independence from armed Communist bloc attacks from within and without her borders; it also must clear away the lies and deceit disseminated throughout the world, by Communists and too often believed by the guileless.

Despite the catastrophic economic and social results of the Marxist regime, Chilean people have tightened their and are repairing the damage. Their record on "human rights" is now better than the majority of countries in the United Nations who accuse them.

On reflection, we must see that Chile and Argentina are major battlegrounds between East and West, between the forces of communism and freedom.

Third: Cuba, as a full-fledged Soviet satellite and Soviet-occupied fortress, is a major danger to the United States.

At Moscow's command, Havana dispatched 15,000 or more troops to fight for communism in Angola, Mozambique, and elsewhere in Africa. The USSR maintains at least 10,000 of its own military, KGB and intelligence services in Cuba. It directs that island's forces, provocateurs and espionage services

in and out of Cuba. It operates the missile, naval and submarine bases I have mentioned.

Castro first attracted notice as a gangster and murderer. Under his regime, thousands have been tortured and killed, 20,000 to 40,000 political prisoners are suffering or perishing in prisons today.

Yet despite all of these horrors and the threat to the U.S.A. from only 90 miles off our shores, there are those high in government, even business, who advocate renewing diplomatic relations with Cuba. How blind

or callous can they get?

Fourth: It suffices to say about Panama that our sovereignty and ownership of the Canal Zone in perpetuity twice has been re-affirmed by U.S. Supreme Court decisions, by many leading Panamanian statesmen, presidents and ministers, as well as by lower U.S. courts. As recently as December 17, 1976, District Judge Guthrie F. Crowe stated that he believes the U.S.A. owns the Canal Zone. "I think the United States is the owner of this property by reason of the treaties with Panama and Colombia, payments to the French (Canal Co.) and the creation of the land commission in which people from Panama and the United States functioned as a court with thousands of claimants. land) was paid for with United States

Our title is every bit as secure legally as are our territorial acquisitions from France,

Spain, Mexico, Denmark and Russia.

The total U.S. investment in Panama is

estimated at nearly \$7 billion.

The arguments by our State Department and its representatives as to why we should negotiate a new treaty ceding our full rights to the Canal and the Zone are largely fallacious in substance and logic.

The illegally constituted dictator, Torrijos, threatens that unless we deliver the Panama Canal Zone and operations of the canal to his government within a limited period, we will have to wage another Vietnam war in that area.

Castro reportedly has several thousand troops now in Panama, and, of course, could bring back his armies from Africa, already trained in Angola. The State Department and our negotiators supinely agree that Torrijos will precipitate guerrilla warfare and sabo-

Actually Torrijos fears if we do not sign the new treaty, he will be thrown out of power. In this event, he knows Moscow and Castro could not rescue him. On the other hand, if, with the help of the latter two, he can deliver the canal, even indirectly to the comintern, he will be assured of his job for life, just as

We have defended the canal for 70 odd years, through two world wars, countless riots and attempted sabotage. Are we so weak and timid that we must now run away from Torrijos' and Castro's Soviet-inspired threats and blackmail?

The real issue for the U.S.A. is not vis-a-

vis Panama, but the U.S.S.R.

If we lost the Panama Canal Zone to the Soviets, even indirectly, this humiliation would be disastrous indeed. It might well cause our friends and allies, especially in Latin America, to lose all respect for and confidence in us and abandon our leadership, in order to play with the Soviet. Everybody wants to be with the winner.

The following bits of history are pertinent: A. Phillip II of Spain declared that whoever controls the Caribbean will dominate the western hemisphere. President Jefferson expressed the same thought. Admiral Mahan. one of our greatest strategists, warned that any enemy of the U.S.A. controlling the Caribbean could invade our gulf coast and so proceed up the Mississippi Valley to cap-ture the heartland of the United States.

B. Lenin listed in sequence the following "musts" for the Soviets to make effective their world dominion:

CONGRESSIONAL RECORD — SENATE

(1) Secure U.S.S.R.'s western borders through absorption or Moscow rule;

(2) Communize and control the Far East, especially Southeastern Asia;

(3) Proceed similarly in Africa; (4) The same for Latin America;

The United States, thus surrounded,

would fall like over-ripe fruit.

Lenin's successors raised point 6; to build their naval forces to overwhelming strength, accompanied by widely dispersed and fully equipped bases. Their objectives include the domination of all sea lanes, passages and routes; among these the Panama Canal is paramount.

Self-evidently the aforementioned six points are well on the way to successful fruition. The security of Russia's western frontier, including Latvia, Lithuania, Estonia, the Ukraine, and Eastern European countries has been ratified by the Helsinki agreement signed August 1, 1975, by the United States and other western governments.

Moscow and Havana jointly have violated the Helsinki Agreement in Angola, Mozambique and elsewhere, Communists have ignored concessions obtained by the free world at Helsinki stipulating greater freedom of movement for western journalists and promises to insure human rights throughout the

Warsaw Pact Nations.

The Soviet Union's hankering to control the Panama Canal Zone was openly stated by Major Sergei Yuworov in an article pub-lished in the Soviet military organ "Red lished in the Soviet military organ "Red Star", reproduced by the Cuban magazine "Bohemia" on March 17, 1957 in respect of the canal:

"Due to its privileged location at the juncture between South America and the rest of the continent, including the Canal, which permits U.S.A. warships to operate simultan-eously in the Atlantic and Pacific, must for the Soviet Union be considered as a 'priority zone'."

He adds that Panama can be attacked from Central America, Colombia or from Cuba, Puerto Rico and other Caribbean islands. He intimates that some or all of these can serve as Soviet naval bases.

It is essential for us to remember that for over a quarter of a century, we have been beset by one humiliation after another, each of them contrived, usually financed, militarily aided and equipped by Moscow.
Our major blunders or defeats in policy

and/or action were:

MacArthur prohibited from crossing the

Yalu or bombing the bridge; The inconclusive falsely labeled U.N. action in Korea:

Failure to lend help by air to the Hungarian uprising against Russian troops;

Non-resistance to the Berlin Wall;

No aerial help at the Bay of Pigs;

The Cuban missile crisis—tearing up the Monroe Doctrine:

Our shameful commitment to Khrushchev neither to invade Cuba nor permit others to do so:

The "no-win" war in Vietnam; and

The so-called "Paris Peace Treaty with honor," with which North With complied.

This series of surrenders only become explicable when one reads National Security Council Report No. 68 (NSC-68) of April 14, 1950, drafted after President Truman's orders as a statement of our basic policies with respect to the U.S.S.R.

The study, opinions and conclusions of NSC-68 were based on reports from the Secretaries of State and Defense; they also were considered in at least one council meeting by the Secretary of Treasury and the heads of the other three top economic agencies of the Government.

The content and portent of this super "top secret" 65-page document has been kept completely unknown to the public, Congress, and even senior Army, Navy and Air Corps officers commanding at the time of the aforelisted humiliations.

The "top secret" classification, pursuant

to law, terminated in April, 1975. On September 30, 1976, a brilliant journalist, Alice Widener, began publishing her exposé and analysis of NSC-68. She sums up its principal aims as follows:

"To avoid nuclear war but to accept a Soviet nuclear first strike against us if necessary, hoping to ward it off by building up our own and our allies' military, economic, and

social strength as a deterrent.
2. "To confine U.S. military action to strictly limited counter-actions.

3. "To seek co-existence with the Soviet Union in the hope that democracy will win out eventually against dictatorship, that time would be on our side, and that the U.S.S.R. would undergo changes eventually leading to abandonment of its goal of world domination.

4. "To try to contain the expansion of the Soviet Union beyond its territory, but not to do anything directly challenging Soviet

prestige.

"In conceding Soviet prestige as untouchable, NSC-68 seeks to protect the Soviets from any kind of effective attack—be it mili-

tary, ideological, or psychological."
NSC-68 is a self-contradictory document, at times dove-ish and weak; at others hawkish and vigilant. On the one hand, it accurately sets forth the objectives of the U.S.A. for peace and freedom, as laid down by the Constitution and the Founding Fathers.

On the other hand, it describes the fundamental and unchangeable program of the

U.S.S.R. as follows:

"The design, therefore, calls for the com-plete subversion or forcible destruction of the machinery of government and structure of society in the countries of the non-Soviet world and their replacement by an apparatus and structure subservient to and controlled from the Kremlin. To that end, Soviet efforts are now directed toward the domination of the Eurasian land mass. The United States, as the principal center of power in the non-Soviet world and the bulwark of opposition to Soviet expansion, is the principal enemy whose integrity and vitality must be subverted or destroyed by one means or another if the Kremlin is to achieve its fundamental design.

Later, NSC-68 states:

"With particular reference to the United States, the Kremlin's strategic and tactical policy is affected by its estimate that we are not only the greatest immediate obstacle which stands between it and world domination, we are also the only power which could release forces in the free and Soviet worlds which could destroy it. The Kremlin's policy toward us is consequently animated by a peculiarly virulent blend of hatred and fear."

NSC-68 continues to characterize all the evils of totalitarian dictatorship and the latter's determination to dominate the world only limited by expediency. It says:

"It is estimated that, within the next four years (i.e. from 1950), the U.S.S.R. will attain the capability of seriously damaging vital centers of the United States, provided it strikes a surprise blow and provided further that the blow is opposed by no more effective opposition than we now have programmed.'

The first time I read NSC-68, I said:

"In each assumption the authors establish a series of ideals as definite possible objectives to be carried out, then turn around and prove that these ideals are utterly impossible of accomplishment. The ink on NSC-68 was no sooner dry than the outbreak of the Korean war made a mockery of this dogooding optimism."

The Comintern's leaders-perhaps due to

blood and inheritance—possess a strain of oriental innate cruelty, dishonesty and a shrewd depravity. They follow the precepts of Sun Tzu, who in China 600 to 500 years before Christ, wrote the following in a military textbook:

"Undermine the enemy first, then his army will fall to you. Subvert him, attack his morale, strike at his economy, corrupt him, sow internal discord among his leaders; destroy him without fighting him.'

This is precisely the formula Moscow successfully has pursued and is directing against

the U.S.A.

As a result, we are drawing nigh to the finish line. Yet there has been no perceptible inclination by either Democratic or Republican administrations to get rid of the NSC-68 policy recommendations, which so often have imperilled and still are entrapping United States' security with an apparently endless chain of humiliations.

If, due to our innate kindness of spirit and our legions' teachings of peace, we endure and add to the list I have already given you one more humiliation, one more breach of a solemn agreement, one more surrender of our rights and sovereignty under the 1903 treaty with Panama, then indeed the Caribbean, adjoining waters and sea lanes will become part and parcel of a huge Soviet lake.

If this happens, we then may have three options:

(1) If possible, to rebuild a definitive su-

periority in military power and defenses.

(2) To await a Soviet blackmailing ultimatum for surrender.

(3) Nuclear war.

May God save us from the last two alternatives.

ONE GOOD POEM DESERVES ANOTHER

Mr. PROXMIRE. Mr. President, on the occasion of the confirmation by the Senate of Dr. Lyle Gramley to be a member of the Council of Economic Adviser. I reported the nomination to the Senate and made some observations on Dr. Gramley's close association with the Federal Reserve Board and its renowned Chairman Arthur Burns and Dr. Gramley's intention to return to the Fed's fold after he completed his tour on the Council of Economic Advisers. My awkward, versified questioning of Dr. Gramley's dependence on Dr. Burns elicited an interesting response by Chairman Burns that I must share at this point with the Senate. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the response was ordered to be printed in the RECORD, as follows:

FEDERAL RESERVE SYSTEM. Washington, D.C., March 25, 1977. Hon. WILLIAM PROXMIRE,

U.S. Senate, Washington, D.C.

DEAR BILL: One good poem deserves another, and accordingly I am enclosing my contribution.

Sincerely yours,

ARTHUR F. BURNS.

MARCH 22, 1977.

Mr. LYLE E. GRAMLEY, Council of Economic Advisers, Washington, D.C.

DEAR LYLE: Your confirmation, it appears, has provided the inspiration for some versification, if not poetry. With apologies to the Bard of Avon, if not the Rhymer of Wisconsin, I offer:

AN ODE TO LYLE

We know one thing for sure about Lyle, To say "Burns' Man" does not make him smile.

He's a force independent In battle, resplendent A man of distinction and style.

Let Burns-or Prox-have the last word! Misgivings like these are absurd. As a Prox's complaint

That he may be faint I know Gramley's stock is preferred.

Now on a more personal note

I confess to a lump in my throat, As I wish you goodbye, But, if things go awry, We're no longer in the same boat!

My warm congratulations on your confirmation and very best wishes for success in your challenging new job. I shall miss you greatly here at the Board, but I am encourged by the prospect of continuing to benefit from your views.

Sincerely yours,

ARTHUR F. BURNS.

Mr. PROXMIRE. To which I simply retort:

To say Gramley's not Burns' boy Is with our credibility to toy. Where does Gramley come from? The Fed And by whom is that august body led? Y'see Gramley's relation to Good King Arthur Was more than son to father. It was child to Mother.

And to make sure there is no doubt Where will Gramley go when from the CEA

he's out? Not to business, not to teach, not to retire But back to the Fed where he'll be a rehire. A conflict of interest I neither charge nor spy But Burns' influence on CEA thru Gramley none can deny.

So if Carter's economic policies are soon in retreat

His economic expansion on a down-beat, The nation's economy taxes only right turns. The answer, loud and clear: is King Arthur

GENOCIDE CONVENTION

Mr. PROXMIRE, Mr. President, I find it mystifying that the United States has not yet signed the Genocide Convention. The treaty is one closely identified with the best traditions of this Nation.

We have long expressed our commitment to other areas of human rights. Now we must act to include the most fundamental of all rights-that of life itself-within our scope of concern. It is time that we express to the world our horror and disgust with the heinous crime of genocide. The vital first step must be ratification of the United Nations Convention on Genocide. Anything less is a contradiction of this Nation's founding principles.

The Genocide Convention represents a tangible commitment to peace and human dignity. Therefore, I call upon my colleagues in the Senate to act upon this treaty without further delay.

ICE BREAKERS MAY TRANSPORT CANADIAN GAS

Mr. STEVENS. Mr. President, the Federal Power Commission will make its recommendation to the President on the selection of a route for the transportation of Alaska's natural gas on May 1. Under consideration are three proposals. One is the all-American route which

would transport gas down from Alaska's North Slope to LNG vessels where it would be shipped to the west coast. The other two proposals would pipe gas from Alaska through the unchartered wilderness of Canada to the lower 48.

There is an unspoken, unheralded significance about the all-American proposal: that is the unique flexibility of the LNG system. It is a transportation system whose time has come.

LNG will soon be on six of the seven continents-everywhere but Antarctica-making it truly worldwide in nature. A recent entry is Australia, where the Gas and Fuel Corporation of Victoria announced plans to build an LNG facility. The Australian venture is among 175 worldwide LNG projects in operation, under construction, planned, or proposed. Of that number, 135 are in the United States and Canada.

LNG technology is not new to my own State of Alaska. There is in operation a facility in Kenai, Alaska, for the liquefaction of natural gas. It was built to withstand earthquakes of a far greater magnitude than the one which demolished much of Anchorage and other parts of Alaska on Good Friday 1964.

During the past 10 years of operation, the LNG facility at Kenai has set an exemplary safety record.

At present there are no operating LNG facilities on the west coast. Yet our Nation is starved for natural gas. How then to ship today the commodity to the area that needs it the most.

The question is being answered at this very moment as a giant LNG vessel, laden with 1.267 billion cubic feet of Alaskan natural gas, half the estimated daily production of Prudhoe Bay, steams through the Panama Canal toward Boston where natural gas is so vitally needed.

This mercy ship is expected to arrive toward the end of this month in Boston, the first of its kind shipping Alaskan natural gas. This is not necessarily to say that such a feat can be done; it is to bring to the attention of my colleagues, especially those whose constituents are wondering if they are going to have natural gas next winter, that such an accomplishment should be done. Shipping natural gas from the gas-rich fields in Alaska to those sections of the Nation where it is so desperately needed, should and must be commonplace.

The logic of using an already proven method of transportation of natural gas with such awesome and simple flexibility is apparent. Consider building 4,000 to 6,000 miles of pipe through virgin Canadian territory, past miles of inhospitable land and forbidding climate, past stacks of redtape that comes from squabbles between province and Federal Government. between Canadian natives and Federal Government, and then consider that transportation of natural gas by LNG vessel is already a fact of life by means of an all-American system independent of internal problems of others. The choice of LNG is truly the only option for a nation so reliant on natural gas.

Even the Canadians themselves are pursuing the possibilities of LNG. It was announced recently in Canada that plans to move Arctic Islands gas to eastern markets using icebreaking LNG vessels are taking a step forward.

I ask unanimous consent to have printed in the RECORD an article that appeared recently in the Oil Daily about the Canadian study of shipping LNG.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ICE BREAKERS MAY TRANSPORT CANADIAN GAS (By Robert Gibbens)

MONTREAL.—Plans to move Canadian Arctic Islands gas to eastern markets using icebreaking natural liquefied gas tankers are taking a step forward.

A feasibility study is to be done by five well-known shipping companies in partner-ship with Panarctic Oils, the owner of 16 trillion cubic feet of reserves in the Central Arctic Islands; Petro-Canada, the new national oil company and Alberta Gas Trunk Line (AGTL), owned by the Alberta government.

The five shipping companies, which together have North America's broadest experience of Arctic shipping, are Canada Steam-ship Lines, controlled by Power Corp. of Canada; Upper Lakes shipping, of Toronto; Genstar, of Montreal and Vancouver, conby the Belgian Societe Generale group; Crowley Maritime Corp. of San Francisco; and Federal Commerce and Navigation, of Montreal. They are grouped together in Arctic Transportation and for the purpose of the study as Sverdrup shipping.

The study is known as the Arctic Petro-Carriers Project (APCP). It goes hand-inhand with another feasibility study that Panarctic Oil, Petro-Canada and AGTL are to do on a co-pilot 250-million-cubic-feetdaily gas liquefaction plant located at southeast Melville Island near the Melville onshore and offshore gas fields. They have proved reserves of about 121/2 trillion cubic feet. Cost of the APCP, the marine end of the LNG transportation system study, will probably be \$1 million or more, borne 40% by the shipping companies and 60% by Panarctic, Petro-Canada and AGTL. The bids are out on the LNG pilot plant study and the contract will be awarded shortly.

The marine study will cover ship and gas container technology, ice movement, Arctic terminal operations, environmental impact, economic and other aspects. The deadline is Sept. 1, the same as for the LNG plant study.

The whole Arctic LNG system would have only one-sixteenth the capacity of a proposed polar gas 48-inch pipeline running from the same area via the Boothia peninsula to Toronto, Montreal and the U.S. market. But it could be in operation in 1982-83 at a cost of rather more than \$1 billion, whereas the pipe project requires several more years of gas exploration and development and would cost \$7-\$8 billion. Its massive throughput relies on U.S. markets.

The LNG system would enable Panarctic and partners to get revenues for their gas much earlier. Work has already begun on the maritime study in Montreal,, and three types of vessels are being considered: standard 125,000-cubic-meter LNG tankers with extra power and ice-strengthening, similar tankers with less power but using a powerful tug to push in heavy ice conditions and huge Arctic barges powered by heavy tugs but with similar LNG containers.

The Sverdrup group says "this is more than just an academic study" and will help the owners of the gas to make up their minds on the technical and economic feasibility of getting the gas out with LNG tankers. The would move via Lancaster Sound and the Labrador coast to Saint John, New Brunswick, where Tenneco, Trans-Canada Pipe-lines and Canadian Pacific plan a major LNG terminal, mainly to receive Algerian gas for the northeast U.S.

Alternatively, Melville gas could be piped 250 miles or so to the east coast of Bathurst Islands, near Freeman's Cove, and the liquefaction plant and terminal built there. This would require Class 7 icebreaking tankers, cheaper than the Class 10 ships required to get into southeast Melville all year round. Polar Gas is interested in the pipeline because it wants to prove its own water-crossing technology.

About three tankers would be needed, costing from \$300 million to \$500 million. The LNG plant and gathering system would cost more than \$500 million.

Petro-Canada said in Ottawa the two studies should yield enough information for reports to be made to the National Energy Board and other government agencies by autumn. It promises all communities affected by the plan will be consulted.

MILITARY READINESS CRISIS

Mr. BUMPERS. Mr. President, my friend and colleague on the Armed Services Committee, Senator John Culver, of Iowa, recently made an important report to the committee on the combat readiness of our Armed Forces. Since joining the Armed Services Committee, Senator Culver has done a major service by focusing on the question of combat readiness and suggesting ways to improve our actual defense capabilities. His latest report, based on an inspection trip to 12 military installations in December 1976, and a review of Defense Department documents, presents a serious picture of growing readiness deficiencies. This is a problem which should be of great concern to the Senate and also to the American taxpavers.

Senator Culver found that we can rely on only a small fraction of our forces to be fully prepared for combat. On any given day, only about half of our air-craft and only half of our ships are operationally ready. On many planes, scarce parts are switched and reswitched for every flight. To reduce costs, training has been cut to a point which undermines the combat proficiency of our fighting units. We have also made foreign military sales of modern weaponry before filling the requirements of our own forces. And these problems adversely affect the morale of our service men and women, further aggravating shortages of the highly skilled personnel needed to operate our sophisticated military hardware.

Senator Culver believes that it adds little to our defense to have exotic new planes, tanks, and ships on the drawing boards when large numbers of our current weapons are not fully operational today. He concludes that we should assign a higher priority to improved readiness so as to turn our existing forces into usable muscle. The Senator rightly says that when the American taxpayers are asked to spend over \$123 billion a year on defense, they expect strong and capable forces, and they deserve the most cost-effective defense possible.

Mr. President, I recommend Senator CULVER'S readiness report for the attention of my colleagues. It is the latest of his contributions to the work of the Armed Services Committee and our efforts to provide a defense posture which protects the Nation's security at a cost commensurate with our other national priorities.

I ask unanimous consent that the Senator's report be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD. as follows:

THE READINESS CRISTS

America's military forces are in a shocking state of combat readiness. Despite billions of dollars spent on sophisticated new equipment, competitive pay and special bonuses, advanced training, and expanded funding for operations and maintenance, we can rely on only a small fraction of our forces to be fully prepared at any given

Personal on-site visits to operational units confirmed the deplorable figures already reported through the military chain of com-mand and in annual reports to the Congress. In some cases, we found that local situations were even worse.

On any given day, only about half our combat aircraft are operationally ready to perform their missions. In the case of some expensive new systems, the figures for those planes that are fully capable drops as low as 10 percent.

Similarly, because of planned maintenance and unforeseen problems, only about half of our ships are operationally ready at any time.

In order to make our planes capable of performing their missions, parts are frequently taken from other aircraft and then returned afterward. For many planes, there is one instance of this switching and reswitching of parts for every sortie flown.

Maintenance personnel are often overworked and even discouraged from reenlisting by a cannibalization rate that wastes approximately 10 percent of all maintenance man-hours, with some personnel reporting that one-third to one-half their time is spent solely on juggling parts from one aircraft to another.

These problems have been getting worse rather than better in recent years. Since 1973 there has been a steady increase in the percentage of Navy aircraft grounded because of a lack of spare parts; the average last year was about 25 percent. The Air Force cannibalization rate has doubled in the past three years, and the even higher Navy rate is half again as high as in 1973.

Increasing costs have reduced training operations to the point that few soldiers, sailors, and airmen actually get to fire the weapons assigned to them, or with sufficient frequency to develop proficiency. In the mad dash to build up our mushrooming foreign military sales, we have not hesitated to furnish foreign powers with modern weaponry before meeting the needs of our own armed forces.

Shortages of trained personnel, excessive maintenance requirements, inadequate supplies of all spare parts, increasing costs—all of these factors have created a victous cycle of reduced combat readiness and capability. The remedy for each specific problem only aggravates other problems.

In short, we do not have the ready military muscle to match our strength on paper. Consequently, U.S. taxpayers are not getting their money's worth from our hundred billion dollar plus defense budget.

We are wasting probable billions of dollars each year on unnecessary maintenance, caused by unreliable equipment.

We are straining the personnel system to its limits by proliferating advanced systems which require increased numbers of highly trained technical personnel.

We are rushing new programs into procurement when additional research, development, testing, and evaluation might have eliminated costly problems and when adequate consideration has not been given to the logistical demands which these new weapons create.

The solution to these problems is not simply to spend more money, although more funds are clearly needed for certain military activities. On the contrary, defense planners in recent years have frequently chosen to spend limited resources on new equipment and additional research rather than on current readiness. Yet the rush to modernization has occasionally exceeded a pace which would have produced greater reliability and lower life cycle costs.

We have been so caught up in the glamour of new technology that we have neglected our forces in being. Our preoccupation with future distant threats and capabilities has made it questionable, rather than certain, that we could prevail in any conflict in the

near future.

It adds little to deterrence to have exotic new weapons on the drawing boards when large numbers of our current planes, tanks, and ships cannot be relied upon today.

We need to improve our combat readiness now. If this means foregoing or deferring the acquisition of costly new systems or additional personnel, then we should make those tough choices. For deterrence, for crises and contingencies in the next few years, and for improved perceptions of America's strength by allies and adversaries, we must turn our existing forces into usable muscle.

When U.S. taxpayers pay for a division or fleet or an air wing, they expect to get a strong and capable unit. And since military funds are necessarily limited by competing requirements for budgetary restraint and for other government programs, our citizens deserve the most cost-effective defense pos-

WHAT CONSTITUTES READINESS?

Readiness is admittedly a somewhat imprecise concept, incorporating both quantitative measures (such as the numbers of personnel and equipment on hand) and qualitative judgments about the ability of men and machines to carry out assigned missions. There is a complicated reporting system described below, but we discovered that commanders have broad discretion in determining their status. One commander, for example, said that he never considered his units fully trained." Another deliberately downgraded a unit as an incentive to improve. Some commanders report high readiness despite admitted shortages of some people with critical skills and persistent problems with certain kinds of less essential equipment.

Omitted from the specified readiness factors is one which is probably the most important but the hardest to determine-morale. Within broad limits, high morale can make an effective fighting force of a unit which otherwise is undermanned or undersupplied. Similarly, low morale can soften the punch of the best-equipped unit. In fact, of course, high morale and high states of readiness generally go together. Units that have adequate numbers of quality personnel and equipment are usually better able to train and conduct exercises that build cohesive combat forces. When men are overworked with maintenance of inferior equipment, however, or cannot obtain sufficient spare parts or operating hours, they lose interest and job satisfaction. It may be nificant in this regard that commanders who reported the most complaints from subordinate personnel on issues like the perceived 'erosion of benefits" happened to head units which had serious readiness problems, thus indicating another possible link between low readiness and low morale and perhaps poor leadership.

Improving readiness is not a one-shot goal. Rather, it requires a sustained effort of building inventories, improving equipment, retaining skilled personnel, and raising mo-

rale. These tasks go together and take time. But the single most important change is a simple one of perspective: to give combat readiness a high priority and constant attention.

If senior commanders and service budgets are preoccupied with designing or buying newer weapons, rather than having today's forces ready to perform their missions, the Services will respond to and reflect those priorities. On the other hand, if readiness is the touchstone for pride and confidence in our military capability and is recognized as a priority before the acquisition of new weapons systems, readiness will improve and will remain high.

COMBAT READINESS REPORTING SYSTEMS

Active military units are required to report regularly on their combat readiness in accordance with an elaborate system. While there are variations among the Services in the kinds of information reported and the precise definitions used, the reports generally consist of an overall unit readiness figure, plus figures for personnel readiness, equipment and supplies on hand, equipment readiness, and training readiness. In making determinations for these reports, commanders have some discretion and can add special

remarks for further explanation.

Each unit reports a "C-rating" for readiness, both composite and by the four listed categories. C-1 means fully ready to perform its missions; C-2 means substantially ready; C-3, marginally ready; and C-4, not ready. For example, units are C-1 in terms of personnel when they have 95+ percent of their assigned strength (in the Army and Navy; 90+ percent in the Marine Corps and Air Force). They drop to C-4 when their strength is below 75 percent in the Army, 65 percent in the Navy, 70 percent in USMC

and Air Force.

When measuring equipment and supplies on hand, the Army and Marine Corps consider 90+ percent of equipment sufficient for C-1 and below 70 percent requiring C-4. The Air Force uses lower rates of 85+ percent and below 55 percent. The Navy rating includes the overall supply situation as well as numbers of aircraft. A further complication is that the Navy reports in terms of mission area readiness as well as overall combat readiness.

A separate rating is given the equipment actually on hand. The Army calls units C-1 when 90+ percent of their equipment is operationally ready and C-4 when that percenatage drops below 70 percent. The Marine Corps uses 85+ percent and below 55 percent for the same ratings. In the case aircraft, the Navy considers units C-1 when they have 75 percent of their aircraft safely flyable and capable of performing assigned missions; they are rated C-4 when the percentage drops below 40 percent. In the Air Force, units are rated C-1 when over 70 percent of their aircraft are operationally ready and C-4 when the figure drops below 40 percent.

Training is another concept about whose very meaning there is no uniformity among the Services. The Army and Marine Corps tie their ratings to time required to bring units to a fully trained status. The Navy has less specific, more judgmental criteria. The Air Force uses the measure of the percentage of trained air crews that are mis-

sion ready.

An outside observer finds it hard to understand why there should be such differences among the Services as to what constitutes various degrees of combat readiness. Perhaps a more fundamental problem is whether the wide latitude for local judgment results in comparable and accurate reporting. Although many officers admitted the potential for abuse and inflated reporting, since commanders would likely be reluctant to report a decline in readiness

during their command, most officers said that reporting was generally accurate and that readiness is at times even understated rather than exaggerated.

Despite periodic Inspector General visits to check on unit readiness, there is no evidence of any systematic effort to go back and compare actual with reported status, or revise fitness reports when serious problems are discovered. I believe that oversight procedures should be expanded and strengthened, and that officers should be held accountable for exaggerating the condition of their units.

Military personnel generally have a strong dedication to duty and a "can-do" spirit, despite deficiencies in numbers, training, or equipment. But our men and women in the Services deserve better. There are some indications, for example, that a heavy maintenance load sometimes leads to reduced reenlistment rates. Several commanders reported that they lack adequate numbers of personnel in supervisory enlisted grades. Some shortages in critical skills were attributed to competition from private indus-There is thus an apparent need for a flexible incentive system to attract sufficient personnel in these skills and a requirement for close monitoring of the readiness reporting in the personnel area.

Similarly in training, there must be a close watch on readiness. Many units have reduced exercises in order to cut costs. While no one claimed that these reductions lowered proficiency to an unacceptable level, belt-tightening clearly has its limits. These must be carefully studied so that minimum levels can be recognized and maintained.

Not all units, of course, must be fully combat-ready (C-1) at all times. But persistent shortfalls could lead to situations where mobilization and deployment contingency plans are totally unrealistic and unattainable.

OBSERVATIONS IN THE FIELD

During our visit to a dozen military bases, a fair cross-section of our defense establishment, we found the morale of our volunteer forces surprisingly good despite the problems

Nonetheless, the progress that our nation is making toward achieving a hard-fighting force-ready to meet any situation-is, in my judgment, being seriously and unconscionably impeded by a lack of logistics and maintenance support.

Our national interest requires the most cost-effective defense system we can achieve. It is therefore distressing, for example, to find significant quantities of brand new. highly expensive and sophisticated aircraft inoperable because of shortages of repair parts. These problems plague such aircraft which we examined as the F-14, a \$8.7 billion program; the S-3A, a \$3.4 billion program; and the F-15, a \$12.2 billion program. When we pay such sums for modern weapons, we properly expect that they will be kept combat ready and quickly repairable.

I am also concerned that many of our own forces are working hard and training to fight a well-armed and armored enemy without being given the same modern weapons that we find being sent to many foreign countries under our foreign sales program. This is particularly evident in the case of our latest generation of highly accurate antitank weapons, the TOW and Dragon.

At times it seems that modernization of U.S. forces has been subordinated to a big push to develop new weapons for expanded foreign sales. We are being asked by the Defense Department to believe that a major Soviet buildup in the European theatre has serious implications to our NATO forces, but at the same time we find that in fact the modern weapons to counter such a buildup are being provided to support foreign sales, rather than to supply our own units.

In addition, the sales of these highly so-

phisticated weapons to these foreign countries must be considered in light of the requirements that such sales might place our critically skilled manpower capabilities for these systems, as well as the competition on logistics support for these systems.

FORT HOOD, TEX.

The principal readiness issue of the units at Fort Hood is the status of training and logistic material support. Most of the units need additional training to improve their readiness. Yet this division received funds for only 80 percent of the training days which had been requested. We were advised that the constant rotation of units to Europe is causing a problem in stability for training and maintenance. A significant portion of the mechanized equipment, howitzers, and aircraft was below the readiness criteria established at the Corps level. The units at Fort Hood do not have all of the Dragon missile systems that they are authorized. There are other shortages of equipment at Fort Hood, some of which were reportedly created by foreign military sales. Of particular concern were discussions that we had with some of the troops who expressed concern over a shortage of night vision goggles. These troops were concerned that they did not have these goggles but that foreign troops being trained at Fort Hood had these goggles with them. Another concern expressed was with the adequacy of defensive equipment for chemical warfare situations. Helicopter pilots, for example, said that present unwieldy gas masks cannot be used safely by both members of the crew at the same time.

LUKE AIR FORCE BASE, ARIZ.

At Luke Air Force Base, we received a report on the readiness status of the Air Force's newest F-15 aircraft as well as the older F-4 aircraft. At the time of my visit only 23 of the 43 F-15 aircraft at Luke were reported as flyable, with the remainder down either for repairs or supply. We also learned that the unit cost per flying hour of the F-15 is quite a bit higher than that of the F-4 aircraft, and the maintenance man-hours per flying hour were nearly as much as the older F-4 aircraft. Moreover, the F-15 is suffering nearly three times the cannibalization rate of the F-4.

It seems to me that these newer sophisticated systems are demonstrating much higher operating and maintenance costs than the older aircraft that they were intended to replace. During the past year the operational readiness rate for the F-15 aircraft has been consistently lower than the standard established by the Air Force and even lower than the older F-4 aircraft. The Air Force has recently placed many new personnel at Luke who will require significant training to meet qualified skill requirements.

WILLIAMS AIR FORCE BASE, ARIZ.

At Williams Air Force Base, we visited the undergraduate flight training facilities and received briefings on the program being conducted at this location. Many foreign pilots are trained by the Air Force at Williams. The base is operating at this time at only 60 percent of capacity and many trainer aircraft are sitting idle on the runways. Some of the aircraft have been placed in storage at this time. It would appear desirable to explore the possibility of using private contractors for a substantial amount of the training of foreign pilots now being performed by the Air Force.

U.S.S. "CONSTELLATION" AIRCRAFT CARRIER

We observed flight operations of the F-14 aircraft while the carrier was on a training cruise off San Diego. We also discussed the readiness condition of the carrier and visited with the carrier personnel.

The Constellation has significantly improved its personnel manning in the past year to a point where it is now manned to 98 percent of allowance. About 80 percent of the officers and enlisted personnel changed during the latest overhaul, however, thus creating a need for extensive training to reach a proficient degree of readiness. A major problem is the lack of adequate numbers of enlisted personnel for supervisory and training positions (E-4 and E-5 levels) which are necessary to reach a readiness proficiency.

We were concerned to learn that at the time of our visit only three of twenty F-14 pilots on the Constellation had ever fired the Phoenix missile, the principal weapon

of the F-14 force.

With regard to aircraft readiness, we were told that one-fourth of the F-14s assigned to the Constellation were not even aboard because of maintenance requirements. An additional 30 percent of those aircraft aboard were not fully capable. A very serious problem exists with the logistic support of the aircraft on the Constellation, particularly with the F-14 aircraft. Over 10 percent of the total maintenance man-hours were consumed in cannibalization of parts from one aircraft to support another. This is a very cosly support procedure. The maintenance crewmen indicate that a much higher percentage of their direct aircraft maintenance to perform cannibalization actions. While I am encouraged at the "can-do" attitude of the Constellation personnel, I believe that steps to improve the material condition of equipment deserves much higher priority and attention.

NAVAL AIR STATION, NORTH ISLAND, CALIF.

We discussed the readiness of the S-3A aircraft at the Anti-Submarine Warfare Wing headquarters and were seriously concerned to find on two recent completed deployments that this highly expensive and highly sophisticated plane had full system capability only 5 and 6 percent of the time. Current deployments are showing improvement, but such a low rate of readiness for these expensive systems raises serious questions about the quality of our development program.

Despite these problems, I was extremely impressed with the capabilities and determination of our military personnel to operate these highly sophisticated systems.

COMMANDER, NAVAL AIR FORCES-PACIFIC

We visited with the Commander of the Naval Air Forces—Pacific to obtain an overall picture of the readiness of the Pacific Fleet aircraft. Overall, the full systems-capable operational readiness rate of the Pacific fleet aircraft during the years 1974–1976 has averaged between 40 and 45 percent. A major problem again was that cannibalization of aircraft parts consumed over 400,000 man-hours of effort fleetwide between July 1975 and June 1976. This is a tremendous waste of manpower and money and a major indicator of the problems in readiness support to these aircraft. Shortages of key supervisory (E-5 to E-9) enlisted personnel in the machinist mate, bolier technician, and boatswain mate skills are a serious concern on the aircraft carriers in the Pacific fleet.

NAVAL AIR REWORK FACILITY—NORTH ISLAND, CALIF.

At North Island we visited the Rework Facility and observed the overhaul and repair efforts being performed on aircraft and helicopters. The workload at this facility is at 80 percent of capability, and it has a payroll of \$108 million while employing about 6,800 civilian personnel.

Of particular concern was the shortage of white collar supervisory personnel. It seems that the Wage Board rate increases have been significantly higher than Civil Service pay increases, leading qualified wage board employees to avoid being promoted to white

collar supervisory jobs. This issue should be examined further by our Manpower Subcommittee.

1ST MARINE DIVISION-CAMP PENDLETON, CALIF.

We discussed the readiness of the Marine Corps units at Camp Pendleton with the Commander of the 1st Marine Division and visited with units training in field exercises. The major area of concern in the readiness of the 1st Marine Division is the need for more training. The Division appears to be in a period of major buildup after the Vietnam War and from my observations they were "hard at" their training.

The average age of the servicemen in the 1st Marine Division is now only 21 years old, and over 54 percent of the Division troops are 20 years old or younger. The Division also experienced a fine 40 percent first-term reenlistment rate during December 1976.

One major equipment problem was said to be with the M60 machine guns, which have been in short supply and which now are suffering a high failure rate because of cracked receivers. I have since been advised that these problems have been corrected by replacement or repair of defective equipment.

Some enlisted men reported that they had never had an opportunity to fire some equipment assigned to their units, such as flame-throwers and the LAW anti-tank weapon, during the past year. Although the Dragon anti-tank missile is an especially important weapon for an infantry unit such as the 1st Marine Division, this division is not scheduled to receive its allotment until 1978, despite the fact that deliveries have already gone to foreign countries.

MIRAMAR NAVAL AIR STATION-MIRAMAR, CALIF.

We visited the Miramar Naval Air Station to obtain further data on the overall condition of the entire Pacific fleet of F-14 aircraft, F-4 aircraft, and the Navy's E-2B early warning aircraft. We found that the readiness problems observed on the carrier Constellation exist fleet-wide—low operational readiness rates and high cannibalization rates caused by logistics problems.

There is a significant contrast between the readiness of the older F-4 aircraft (about 50 percent) and that of the newer F-14s, which have an operational readiness rate of only 30-40 percent and a full systems-capable rate below 30 percent. The Navy needs to decide whether it can afford to acquire and support these much more capable aircraft at an acceptable readiness rate. At present, we are not getting dependable combat power for our huge initial investment in the F-14.

Engine problems have plagued the F-14 for some time and solutions have been slow in coming. The Navy is currently in the second year of a five-year program, costing \$552 million, to correct some of these deficiencies by improving engine and airframe reliability and survivability, by reworking and improving the plane's structure, and by procuring additional spare parts. Even so, there is a widespread belief that a wholly new engine is needed to give the F-14 the capability for which it was designed. Many of these problems might well have been avoided by better initial planning and a more cautious transition from design to procurement.

Again, I have the highest admiration for the pilots and enlisted personnel who are called upon to operate and maintain these highly sophisticated aircraft. Their dedication despite persistent equipment and supply problems is highly commendable.

The E-2B early warning aircraft is one of the highly sophisticated aircraft which is very difficult to maintain in an acceptable readiness condition. Since 1973, this aircraft has registered a full systems-capable readiness rate of between 30 and 41 percent. The Navy plans to replace this aircraft with a more current version, the E-2C, early next year. In view of these past problems, it remains to be seen whether this newer model will provide improved readiness rates.

COMMANDER, NAVAL SURFACE FORCE, PACIFIC FLEET—SAN DIEGO, CALIF.

We visited the Pacific Surface Fleet Commander at San Diego and received an excellent report on the readiness of the surface fleet in the Pacific.

The major problem appears to be from shortages in the enlisted personnel area. We were advised that the supervisory E-5 and E-6 skill levels were less than 50 percent of allowances. The short-based fleet maintenance assistance groups have only 69 percent of their allowed manning and the new DD963 and LHA ships are also low-manned. The fleet is having equipment problems with boilers, air compressors and main feed pumps, which were attributed to less than thorough overhauls in prior years.

The command is taking some innovative steps to improve the ship maintenance problems. These include providing full funding of maintenance parts requirements for shipboard preventive maintenance for selected test ships and in turn extending periods of

ship operation between overhaul.

The total force condition was reported at about 50 percent operationally ready, with equipment problems causing the most serious degradation. Among the most significant problems mentioned were the installation of new equipment prior to adequate parts support, higher failure rates than predicted by manufacturers, lack of procurement sources for older equipment and difficulties in getting units repaired.

WARREN AIR FORCE BASE-CHEYENNE, WYO.

We visited Warren Air Force Base to discuss the readiness of the Minuteman III forces, as well as observe directly Minuteman operations in their silos.

Accordingly, we toured a control room of the Minuteman wing and observed the operations and controls of our Minuteman missiles. We also had the opportunity to inspect a Minuteman silo and the missile in place.

The Minuteman force which we observed was in as good a readiness condition as possible given the fact that the missiles have never been test fired from site locations. We should, of course, expect peak readiness in our strategic nuclear forces.

STRATEGIC AIR COMMAND HEADQUARTERS—OMAHA, NEBR.

We visited the SAC headquarters to discuss the readiness of our strategic forces and observe the headquarters control of those forces.

In addition, we were briefed on the overall targeting plans and capabilities of our strategic forces and inspected the major control operations of the Strategic Air Command. Much of the discussion was of a classified nature, but the visit was extremely useful to us in obtaining a greater insight into the strategic issues which we will be considering in the months ahead.

RECOMMENDATIONS

In addition to particular observations and specific suggestions related to the bases visited, there are several general recommendations which apply to all services and should help to improve overall readiness.

1. The Defense Department should assign a higher priority to achieving improved readiness and should monitor changes in readiness indicators more closely. Reports to senior officials and to Congress should be systematized and made regularly, such as quarterly, and in sufficient detail and appropriate format so as to highlight problem areas. In addition to unit readiness, the Services should report on system readiness of those items which exhibit serious or persistent problems of manning, maintenance, or

supply. One specific goal should be to reduce

the cannibalization rate for aircraft parts.
2. In order to free funds and personnel to concentrate on improving readiness, the Services should slow down their purchases of new equipment until they "get well" in terms of readiness. Special reviews should be conducted of existing equipment and components which are not functioning as planned in order to determine those which are not cost-effective or essential to mission performance.

3 The President should declare a clear policy of no diversions of critically needed supplies to Foreign Military Sales unless and until U.S. forces have achieved adequate readiness with respect to those items. The current problem is not only that some foreign purchasers receive equipment prior to U.S. units, but also that skilled contractor personnel are sent abroad to help recipients utilize the equipment.

4. The Defense Department should reevaluate current standards of proficiency in view of reduced opportunities for training exercises, flight hours, and live-firings of weapons. Where proficiency has been maintained, curricula and training schedules should be altered; but where proficiency has been seriously degraded, minimum standards should be proposed and cost-saving alternatives such as the use of simulators and other training aids should be exploited.

5. The Department of Defense should strengthen its consideration of the reliability and maintainability aspects of new weapons in several ways.

Testing and evaluation of new weapons should be done in a manner that is realistic to operational conditions rather than to a

laboratory environment.
b. The Department should more closely review the promises that are made by contractors about these features when new programs are undertaken and should insist on appropriate penalties as well as bonuses, depending upon demonstrated performance. If, because of technological difficulties, the preferred readiness criteria cannot be met with the planned levels of reliability and maintainability, the Congress should be so advised prior to the start of production.

c. The Department should also reevaluate the actual results of recent weapon systems in terms of maintability and reliability, comparing these results to the promised specifications or goals at the start of the pro-gram. If it is determined that acceptable readiness criteria cannot be reached within a reasonable time, the consequences for meeting operational commitments should be transmitted to the Committee. We need to be assured before entering into production that new weapons are as reliable and efficiently maintainable as technology permits and as high unit costs demand.

d. In order to make these analyses, the Department will have to develop careful ways of measuring the costs and benefits of in-creasing sophistication in weaponry over its life-cycle so that we can be assured that our true fighting capability improves commensurately as we rely ever more on advanced technology.

POSTCRIPT: MARCH 30, 1977

While this report was in the final stages preparation, two developments occurred which deserve special mention.

First, President Carter chose, in his budget amendments, to increase funds requested for readiness by \$605 million and to slow down the production of some weapons which have been experiencing readiness problems.

Though I plan to review these proposals carefully, I welcome this concrete evidence of the higher priority now placed on improving readiness

Second, I have become aware of a study

of U.S. Army unit readiness reporting completed last spring by a group of officers at the Army War College. This study, based upon an extensive worldwide survey, confirms my own concerns about the reporting system. The study concluded that the Army unit readiness reporting system has a "poor reputation for accuracy and validity"; that "optimistic reporting masks critical problems"; that units "peak" for regular report-ing dates at the cost of "inefficiencies involving untold wasted man-hours"; and that reporting lacks a system of independent checks which could improve the situation. It is imperative that the Army take expeditious action to correct these problems and that other Services also give this problem close scrutiny with overall supervision and guidance from the Secretary of Defense.

PREVENTIVE CARDIOLOGY PROGRAMS

Mr. PERCY. Mr. President, numerous studies have been made in recent years of heart disease, our Nation's No. 1 killer. Most attention is given to major research projects and medical breakthroughs. But equally essential is the implementation of prevention methods by every American through his or her diet and exercise. One of the most commendable developments in preventive cardiac care is the involvement of private industries in employee health pro-

There are over 150 companies in the Chicago area alone which offer preventive cardiology programs for their employees. I would like to particularly bring to the attention of my colleagues and the public Standard Oil's medical and environmental health services program run under the directorship of Dr.

Peter Wolkonsky.

I ask unanimous consent that the following articles on Dr. Wolkonsky's and Standard Oil's innovative and human pioneering of private industries concern for the health of its employees be printed in the RECORD: "Comprehensive Medicine in Industry," from the bulletin of the University of Chicago Medical School and "Heartwatch on Standard Oil Brass," from the Chicago Tribune be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Chicago Tribune, Mar. 27, 1976] A TREADMILL TO FITNESS: HEARTWATCH ON STANDARD OIL BRASS

Top executives at Standard Oil's towering headquarters building on Michigan Avenue are kept in physical condition under one of the more advanced industrial health programs in the nation. In charge of the program is Dr. Peter Wolkonsky, the company's medical director, who observes that every year, "between one and three of our people died of heart attacks at their desks."

As a preventive measure, employes are treated in a cardiac fitness laboratory on the 38th floor. It is equipped with testing and rehabilitation equipment arranged in 12 exercise stations with skip ropes, a punching bag, parallel bars, treadmill and rowing machine.

Lunch hours find the executives crowding into the lab, because, as Dr. Wolkonsky points out, many "feel themselves too busy during the working day to devote an hour to the program."

[From "Medicine on the Midway," bulletin of University of Chicago Medical School, Spring Issue, 1975]

COMPREHENSIVE MEDICINE IN INDUSTRY

Aside from its bright red color, the emergency hot-line on the 38th floor of the Standard Oil Building looks like any other telephone. But it is not just another phone. It brings messages of distress to Standard's medical department. When it rings, specialists rush to the cardio-pulmonary-resuscita-tion cart and set the stop clock. They are ready to handle whatever problem awaits them

The clock tells them exactly how much time elapses between their receipt of the emergency call and the moment they reach the patient's side. For instance, they have to minister to a cardiac arrest victim within five minutes

After that, it's likely to be too late. They can be anywhere in the 80-floor building within two and one half minutes. When the red phone sounds, freight elevator 41 (the one in the building that goes from the top floor to the bottom) automatically cancels all other calls and proceeds directly to the 38th floor.

The emergency cart is equipped with defibrillators, an EKG machine, oxygen masks, external massage, aspirator, drugs and other survival paraphernalia. It is used from three to ten times a month but fortunately has not yet been required for its main intended purpose, the treatment of cardiac emergencies.

This emergency procedure is just one of many aspects of the comprehensive Medical and Environmental Health Services program of the Standard Oil Company (Indiana), under the director of Dr. Peter Wolkonsky. While the medical department is well equipped to handle emergencies, it is geared toward preventing them.

We want to help our employees to stay alive and productive," Dr. Wolkonsky says. 'We practice preventive medicine."

Periodic examinations are the mainstay of the medical program. A thorough medical history is taken. An internist examines the employee, who then goes through a battery of vision audiometer, x-ray, pulmonary func-tion, blood chemistries, electrocardiograph, and other diagnostic tests. If necessary, other indicated medical tests may also be given. "We are looking for everything from gout to cancer," Dr. Wolkonsky says. "These examinations very often uncover problems which the patient did not know he had, and which can be treated. The employee can then arrange to get the proper treatment for his disorder." Periodic examinations are voluntary and confidential, and are offered according to the projected health needs of each age group. Those under 40 can choose to be examined every three years; those 40 to 50 every two years; and those over 50 every year.

"As soon as we have our staff up to full strength," Dr. Wolkonsky says, "each employee will receive a letter from us when he or she is eligible for an examination. Unfortunately, we are not able to do this now because we do not yet have enough doctors."

The medical department provides treatment for occupational injuries or illnesses. Otherwise, except for emergencies, the services are primarily diagnostic. If an examination uncovers an illness or injury, a physician will counsel the employee and recommend that he or she be treated by a specialist or personal physician. If someone does not have a private physician, a department physician can refer him to one. The department tries to work closely with the private physician in following and, when necessary, assisting in managing cases in which positive findings have been made.

Since employees, along with their private physicians, are responsible for management of their personal medical problems, treatment in the medical department is limited to emergency care and to short-term help for temporary problems. For example, a patient may be given pain medication and be put to bed in one of the two-bed wards for a short time. In practice, the doctors and nurses may handle such problems as sprained ankles or migraine headaches, or such potentially major problems as breathing difficulties.

Health care counseling is a vital part of the program. The internist or other medical personnel will explain to the patient what the implications, risks and controls are for his particular problem. A diabetic, for example, would be advised (in cooperation with his private physician) as to the nature of his disease and appropriate management measures, and would use the medical department for necessary follow-up such as routine tests of blood sugars.

Four full-time and two part-time internists, three registered nurses and a laboratory technician provide the medical care for the more than 5,000 employees of Standard Oil Company (Indiana). In addition, they provide emergency treatment for the other tenants of the building. The medical staff sees between 700 and 800 persons a month. Dr. Wolkonsky projects that another three internists are needed to complete the staff.

Medical facilities at the Standard Oil Building include offices, two nursing stations, ten examination rooms, an emergency room, two two-bed wards, laboratory and x-ray facilities, specialized diagnostic and treatment rooms and an exercise room. The diagnostic and treatment rooms are equipped for physiotherapy (including diathermy and whirlpool treatments), cardiac stress testing, pulmonary function, audiometry, and vision testing and endoscopic and gynecologic examina-tions. There is, in addition, a wide variety of medical equipment which can be used in emergencies. If someone breaks a leg while on the job, he can be picked up on a special chair which, when transformed into a mobile bed, can be raised (to place the patient on the examination table) or lowered (to place him in an ambulance). The medical department has x-ray equipment, including imageintensifier, sufficient for routine films and contrast studies.

Coded indicator lights in each doctor's office, in the nursing station, and in waiting areas, show which rooms are in use, which facilities are staffed for service, and which need extra personnel.

"We have a considerable amount of gadgetry," Dr. Wolkonsky says, "but the basis of our program is the sound expertise pro-

vided by the highly trained staff of internists and other medical and health care personnel"

Other significant parts of the medical program are pre-employment and return to work examinations (for those who have been out more than three days due to sickness). Employees and their families are also examined before they leave for overseas assignments.

A cardiac stress-testing laboratory and fitness facility is open to employees in need of cardiovascular rehabilitation and to despositions. ignated men in management "Every year, between one and three people die of heart attacks at their desks," Dr. Wolkonsky says. The cardiac stress-test laboratory is designed to help prevent these deaths. Before admittance to the program, the employee is tested on a treadmill. The amount of energy needed to walk this mill is gradually increased in order to find how much physical exertion the individual can endure. An individualized exercise program, administered by a trainer working under a physician's supervision, is then developed to help improve the employee's physical toler-

There are 12 exercise stations in the cardiac fitness laboratory. They include skip ropes, a stationary bicycle, a rowing machine, balance beam, a speed (punching) bag, medicine ball, a thigh-leg table, wall weights, rings, parallel bars, and weights. Optimally, each person would spend one and a half minutes at each of the stations, with a short rest period between and repeat the program three times each week. Individuals use stations that are specified in their own exercise program. During rest periods, they take their own pulse to make sure that it is higher than it would be when the body is at rest but lower than their maximum endurance capacity. The facility is designed to handle 12 persons at one time or a total of 150 a week.

The cardiac fitness laboratory is open from 8:00 a.m. to 5:00 p.m., and participants are not allowed to talk business or take phone calls while in the exercise room. "Since many of the executives, however, feel themselves to be too busy during the working day to devote an hour to the program," Dr. Wolkonsky says, "our facility is most crowded during lunch hour." Some employees prefer to use the room at the end of the day.

A description of the medical department's services would be incomplete without mention of the environmental-health services section. Director Paul Halley and most of the 17 staff members are graduate engineers, toxicologists or industrial hygienists. They are involved in establishing and maintaining proper standards of safety, hygiene and toxicology control at the numerous facilities of Standard Oil Company (Indiana) and its Amoco subsidiaries.

"We are trying to run the medical department out of business," Halley says with a smile. But there is no competition between the two divisions of the medical program. They are designed to work in tandem to provide top quality health care for the employees.

The safety division has been operating since the 1920s. The hygiene and toxicology division were established by Mr. Halley in 1953. In addition to monitoring the working conditions within the Standard Oil Building, the environmental-health services section monitors the working conditions at the company's various refineries, chemical plants, oil producing areas and marketing departments both in this country and abroad.

Standard Oil of Indiana has had a medical program since 1929. Under the direction of Dr. Wolkonsky, it has developed into one

of the most comprehensive corporate medical programs in the country.

JOSEPH DIXON

Mr. WILLIAMS. Mr. President, this year marks the 150th anniversary of the Joseph Dixon Crucible Co., America's largest and oldest manufacturer of natural graphite, and the world's first producer of, among other materials, the lead pencil. This company, located in Jersey City, N.J., has given faithful and excellent service to American industry and the American consumer during these past 15 decades, and I would like today to acknowledge this achievement by citing for the Record the remarkable story of the company's founder, Joseph Dixon.

Joseph Dixon's work profoundly influenced the course of civilization, yet, the world at large knows little about his remarkable achievements. We could all learn much from his experiences and his firm conviction "that when the thought flashes through your mind, seize upon it and put it down in black and white." With this simple principle, Joseph Dixon became one of the true geniuses of the 19th century and helped lay the foundations for modern society. I ask unanimous consent to have printed in the Record a short statement on the history of this most remarkable life.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

JOSEPH DIXON-A REMARKABLE MAN

The next time you travel by train, use a pencil, ride in a tunnel or use a camera, you will have been affected by the life's work of a remarkable man who was born almost 200 years ago.

His name was Joseph Dixon (1797-1869). He was a chemist, metallurgist, mechanic, scientist and humanitarian—an unusual early American whose work had a profound influence on all of us. While he is remembered chiefily for having perfected graphite crucible (with which he was to assist in raising the melting of metals from the status of a handicraft to that of an industry) and for his work in graphite and pencils, Dixon also experimented successfully in many fields beyond those in which he manufactured.

He perfected destructible inks for use in tinting the paper on which bank notes were to be printed, for the prevention of counterfeiting.

He built the first American locomotive with double drive wheels and a double crank—the double crank so his engine would not stop on "center" and would permit starting up at all times.

He collaborated with Samuel F. B. Morse, whom he showed how to take camera portraits by means of a reflector so the image would not appear reversed. Morse was successful in his attempt to patent the reflector in England and made use of it in telegraphy, especially the Atlantic Cable.

Joseph Dixon began manufacturing graphite crucibles in his home in Salem, Massachusetts, in 1827. With the assistance of two laborers, he turned out a few crucibles a day, by hand, on a potter's wheel. From this humble beginning the company he founded—the Joseph Dixon Crucible Company—grew until it became the largest manufacturer of natural graphite in the world, celebrating its 150th anniversary in 1977.

The chances are that Dixon, with all his

The chances are that Dixon, with all his vividness of imagination, never anticipated the extent to which his company would grow.

CHEMICAL AND BIOLOGICAL WARFARE

Mr. McINTYRE. Mr. President, in keeping with the past practice of the Armed Services Committee to advise the Senate and the public of the activities of the Department of Defense in the area of chemical and biological warfare—CBW—I ask unanimous consent to have printed in the Record at the conclusion of my remarks the report cover letter and the annual report on funds obligated for CBW research during fiscal year 1976 and the transition period.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. McINTYRE, Mr. President, my colleagues may recall that previously the Department of Defense's report on funds obligated in chemical and biolog-

ical warfare research programs were submitted semiannually, as required by section 409 of Public Law 91–121. Subsequent to a General Accounting Office study on executive branch reports to Congress, Public Law 93–608 was passed, changing the Department of Defense semiannual report on chemical and biological warfare program from a semiannual report to an annual one. The Department of Defense advised the Armed Services Committee of its intention to implement this change in reporting frequency on March 14, 1975.

As the cover letter indicates, the next report will cover a 12-month period and will be submitted by the end of Novem-

ber. 1977.

EXHIBIT 1

Hon. Nelson A. Rockefeller, President of the Senate, Washington, D.C. DEAR MR. PRESIDENT: In accordance with

DEAR MR. PRESIDENT: In accordance with the requirements of Section 409, Public Law

91-121, as amended by Section 2, (4) of Public Law 93-608, the report on funds obligated in the chemical warfare and biological research programs during fiscal year 1976 and the transition quarter is enclosed. The next report will cover a 12 month period (FY 77) and will be submitted by the end of November 1977.

The report provides actual obligations

through 30 September 1976.

Section 4 of the Army report provides an adjustment summary which reflects change data to the second half, FY 1975 report. This summary will permit the revision of estimated obligations to actual. The Departments of the Navy and Air Force reported no adjustments to their segments for the second half, FY 1975 report.

The attached report has also been sent to the Speaker of the House of Represent-

atives. Sincerely,

W. P. CLEMENTS, Jr.

1. Chemical research	066	7, 535	
(a) Basic research in life	7. 806 (. 000)	. 265 (. 885)	
sciences. —	(.940)	(.55)	Life sciences basic research in support of chemical materiel:

a study of anticholinesterase effects on mammalian brain stem function the nature of the nerve agent Soman (GD) effects on both inspiration and expiration has been characterized. The dependence of respiratory integrity in the brain stem on conscious or nonanesthetic states has been shown. Specific sites of respiratory blockade by

the brain stem on conscious or nonanesthetic states has been shown. Specific sites of respiratory blockade by nerve agents were shown.

2. In an investigation of the interrelations among cyclic nucleotides and acetylcholine (ACh) in protected and unprotected animals poisoned with GD, it was found that injection of 3 doses of dibutyryl andenosine 3,5 monaphosphate (cAMP) and theophylline resulted in a 50 percent lowering of plasma somanase activity, the enzyme which detoxified GD. Assay procedures were set up for cAMP, cyclic guanosine mononucleotide and ACh. Poisoning of rats with 1 medium lethal dose of GD causes greater than a 2-fold rise in creebral ACh. A report entitled "Synthesis of Cholinesterase Following Poisoning with Irreversible Anticholinesterases: Effects of Theophylline-Ne, 02-Dibutyryl Adenosine 3, 5-Monophosphate on Synthesis and Survival" was submitted for publication.

3. In order to study the mechanism of spontaneous reactivation of GD-inhibited acetylcholine-sterase, it was necessary to develop a model system utilizing acetylcholinesterase inhibited with P-nitrophenyl methylphenylphosphinate to permit an efficient study of perturbing agents on the spontaneous reactivation process. Oral presentation on the above model system was given at the 10th Middle Atlantic regional meeting of the American Chemical Society (February 1976).

4. Studies of sites of action of incapacitating agents in animal brains have shown that anticholinergics injected into dorsomedial thalamus and caudate block pain information and that electrolytic or chemical lesions of central gray matter potentiate morphine analygesia. In preparation of extension of these studies, rat locomotor activity cages were completed.

Defensive equipment program: Exploratory development	11, 770, 000
Advanced development	3, 982, 000
Testing	860, 000

(-.006)(b) General chemical investi-(6, 866)

A new test is being evaluated to determine whether it can be used to product the closest of orage of the training in humans.

(b) The protocol for standardizing the assay of blood cholinesterase by manual and automated methods for all branches of the Department of Defense was completed. An automated method for the determination of concentrations of physostigmine and pyridostigmine in human blood was developed. Quantitative methods for the complete analysis by extraction, ultraviolet, and gas chromotography of a therapeutic mixture containing 3 active ingredients were perfected. A method was developed for the assay of an agent simulant in urine in concentrations 1/80th of those previously reported. Studies were initiated on a more sensitive method for measuring triphosphoninositide activity in the brain to determine whether a specific brain site is involved in GB introxication. Rapid automated methods are being sought to determine the stability of dilute nonaqueous solutions of chemical agents.

SEC, 1.—OBLIGATION REPORT ON CHEMICAL WARFARE PROGRAM FOR THE PERIOD JULY 1, 1975, THROUGH SEPT. 30, 1976 DEPARTMENT OF THE ARMY, RCS DD-D.R. & E. (SA) 1065-Continued

Explanation of obligation

3. Medical effects of chemical agents: Improved procedures for assessing the mutagenic properties of chemical compounds have been established. Chlorpromazine, considered a possible adjunct in prophylaxis and therapy against nerve agents, was shown to be mutagenic to bacteria. Preliminary data shows that a proposed simulant produced mutagens in the fruit fly. Many selected compounds are being reexamined for mutagenicity. The analgesic properties of cholinergic and of anticholingeric compounds were studied to separate motivation changes from sensory deficit and allow more meaningful predictions of the effects in man. Using localized EEG recordings in somatosensory areas of the thalamus and caudate of rats and monkeys, atropine mimicked morphine in depressing pain evoked activity. Scopolamine and benactyzine also produced analgesia as measured by behavioral tests. Furthermore, atropine and benactyzine disrupted (increased) time perception in the rat. Improved equipment and techniques for electroretingraphy, visual evoked response research, tear analysis, and cataract formation have been established. Using a differentially radio-labeled glycolate, the distribution, binding, elimination, and metabolic conversion of the compounds is being studied in subprimate brain, peripheral tissues, and body fluids.

4. Chemical dissemination and dispersion technology:

(a) Studies were conducted to investigate and clarify the mechanisms and methods of the delivery, dissemination, and dispersion of agent materials and to conceive and evaluate new concepts of their use. The resulting technology and data base serves as the foundation for assessing our vulnerability to foreign threat and for the development of advanced deterrent systems as well as combat support systems.

(b) Equations were developed to describe the instantaneous nonsteady state flow during the voiding of bulk liquid fill from spinning cylinders. Successful validation of the equations was obtained for up to 3.000 rpm and the evaluation of higher rates, geometries, a

defensive and deterrent systems requires continuing development of test and assessment procedures, simulation techniques and models, and continuing investigation, development and evaluation of simulant materials.

(b) A mixture consisting of triethyl phosphide, dibutyl amine and ethyl acetate has been developed and successfully used as a stimulant for the XM736 binary nerve agent VX projectile.

(c) Toxicological studies on simulants were conducted to obtain information to support requests for approval by the Office of the Surgeon General. Dimethylmorpholinophosphoramidate (DMMPA) was given prime consideration as an intake simulant for casualty assessment and, in combination with a fluorescent dye, for use in material contamination assessment.

(d) Simulation models were developed to estimate the expected fraction surviving chemical attack when either prophylactic or therapeutic protection or both are provided. Simulation models for chemical agent attack were improved to simultaneously consider both the vapor and liquid particle challenge posed by intermediate volatility agents. Preliminary models to assess the burden of defense equipment (heat stress performance proficiency reduction) have been developed.

(e) A flame photometry device employing sodium chloride was developed to test protective equipment.

(f) Improvements were made to the nitrogen purge/air infiltration procedure which was then used to simulate chemical agent vapor infiltration into tanks, armored personnel carriers and self-propelled howitzers.

6. Technical evaluation of foreign chemical warfare potential:

(a) Support was supplied in the planning, conduct, and evaluation of a series of rocket sled tests, a fuze check test, and a missile flight test using simulant materials. A preliminary transport and diffusion model was completed, and an evaluation of intelligence information based on the preliminary model performed. Reviews of intelligence information were performed as it became available. Planning coordination of Edgewood Arsenal, Md., T

Edgewood Arsenal, Md., Technical Area 12, Chemical Threat Assessment Technology, was also accomplished.

(b) Data from the 2d series of rocket sled tests were reduced which provided an excellent data base for the breakup modeling. The 2d series differed from the 1st series in that free flight was achieved prior to warhead detonation, thus providing an environment similar to flight condition. A combination of the breakup model and dissemination model will provide realistic estimates for area coverage, contamination density, and particle size distribution. The initial breakup model addresses only the subsonic region and will be expanded in fiscal year 1977 to incorporate transonic and supersonic delivery. The 1st validation firing was conducted at White Sands missile range, New Mexico, in July 1976, using a Lance Rocket system. The flight test has confirmed the veracity of the data base obtained from the rocket sled tests as the basis for breakup modeling. Preliminary analysis of disposition data also indicates agreement with the limited model presently available.

(c) Limited sampling data were collected during the White Sands missile range tests of the Little John and Lance rocket systems that contained simulants. The data indicated that from a liquid agent detector point of view, there may be some significant differences in data obtained from dynamic rocket tests as compared to static spray trials. Attempts to obtain spread factor data for a simulant during the rocket sled tests were unsuccessful. Efforts are still continuing in devising a simple, reliable generator for simulants.

7. Chemical training agents and equipment investigations:

(a) Investigations are underway to develop materials which resemble chemical agents in their employment, dissemination, action, and sensitivity to alarm systems, but which leave no harmful effects on troops, their equipment, or the environment. A statement of work in response to a training device requirement has set forth numerous criteria for simulated persistent and nonper

SEC. 1.—OBLIGATION REPORT ON CHEMICAL WARFARE PROGRAM FOR THE PERIOD JULY 1, 1975, THROUGH SEPT. 30, 1976, DEPARTMENT OF THE ARMY, RCS DD-D.R. & E. (SA) 1065—Continued

	Current fiscal year	Contract	Explanation of obligation
			(c) Summary data on dimethyl methylphosphonate obtained from allies on the irritancy, pharmacology, and chronic toxicity (rabbits and rats) failed to meet U.S. criteria for starting human trials with the compound. A biomedical evaluation by the Medical Review Board gave proposed data voids from which a research plan on the toxicology in 4 animals was derived. Laboratory quantities of dimethyl methylphosphonate were synthesized and characterized by nuclear magnetic resonance, mass spectroscopy, gas chromatograph and infrared and found to contain at least 2 impurities. Initial acute toxicity studies in mice and rates via parenteral and oral routes with these samples are underway. Studies on mutagenesis using fruit flies and the Ames test employing salmonella typhimuviam were completed. Acute toxicity studies on bioassay approved pilot plant synthesized dimethyl methylphosphonate were initiated. 8. Chemical safety investigations: (a) A report has been prepared describing the collection and purification of samples for agent identification. A method for high-volume sampling compatible with gas chromatography to furnish a method of detecting and identifying GB and VX in demilitarization products at very low levels. The high volume sampling and chemical ionization mas spectrography will be developed further. (b) Ecological field work on Carroll Island at Edgewood Arsenal, Md., has been completed and initial drafting of the comprehensive report covering this work has been started. Ecological investigations of Gunpowder Neck at Edgewood Arsenal, Md., are in progress and will continue. (c) 2 remote sampling sys ems to be used with controlled toxic test chambers have been designed and 1 is undergoing evaluaton. An automated analytical system is in use and will be interfaced with the sam-
2. Lethal chemical program	. 091	7.166	pling system.
(a) Agent investigations and weapons concepts.	7. 441 (. 080) (1. 629)	. 275 (1.709) (. 000)	(a) Synthetic, analytical, and physiochemical studies of toxic chemicals were performed to assess the lethal agent threat from a possible enemy. A new procedure has been developed for the binary synthesis of a lethal agent of intermediate volatility. A method to reduce the reaction rate of binary agent intermediates has been developed. 2 methods have developed for the in situ thickening of a persistent lethal agent obtained from a binary process.
			(b) Evaluations of methodology and procedures to deliver small-sized drops of agent while maintaining a low temperature and high wind speed environment have continued. Some difficulty was experienced in delivery of small drops of simulated agent. Recalibration of the environmental animal exposure facility to attain controlled temperatures (75°, 40°, and 20° F) and wind speeds (1.1 and 5.5 mi/h) is being completed in preparation for the evaluation of comparative effectiveness of thickened and nonthickened agents. 2. Lethal chemical weapons technology:
			(a) Success was achieved on techniques for binary production of an intermediate volatility agent, with limited work conducted on a number of the practical facets of synthesis. Studies of the reaction of stored intermediates was continued and expanded to ascertain the ultimate effects of intermediate degradation on product yield. Studies of agent physical properties and their effects on the efficiency of munition dissemination were conducted. Work in this area has been very successful in that physical properties causebe modified easily without subsequent interference in reactions or any reduction in product yields. Property modification studies have required dual agent-simulant development, since only the latter can be tested in a number of the conditions of interest.
			(b) Projectile exploratory efforts included experiments to ascertain whether wide variations in internal reactions influence projectile ballistic performance (they do not) and whether mechanical resonances are generated which could influence fuze performance (they are). The study was expanded to include liquid filled flight performance of both long-and short-range fin stabilized projectiles. Technique for increasing the efficiency of chemical dissemination was evaluated. (c) Experimental designs for a 2.75-in rocket warhead were developed. This effort included derivation of analyt-
			ical models for the warheads effectiveness based upon experimental efforts. Testing included rocket firings and dynamic flight evaluation. 3. Chemical agent process technology: Investigation of processes for the synthesis of binary reactants were continued and small quantities of material prepared for test by others. 2 processes for synthesis of dimethyl disulphide of 1 process for pilot scale development. Analytical support was provided for the above activity of the development
AN A seek offer dead to seek	/ DOE>	4 200)	of 1 process for pilot scale development. Analytical support was provided for the above activity of the development and synthesis laboratories. Prior year deobligation resulted from withdrawal of residual funds upon completion of effort.
(b) Agent pilot plant investi- gations.	(005)	100000	Advanced development effort:
	(, 311)	(.000)	1. Lethal chemical agent porcesses: (a) Batches of one of the binary intermediates was made to obtain pilot plant data for scale up. Commercal sources of required chemicals were used. Process studies of alternate methods were contained to obtain data for the economic analysis for the best process for plant scale up. Alternate process studies of subpilot scale size to reduce the large quantities of aqueous waste solutions have been initiated. The waste materials from these studies have been collected to begin studies on waste disposal methods. (b) A filling and closing line design is currently in progress and was 50-percent completed during this period. A total of 180 canisters were filled and closed in support of the engiering development phase of this program. The modular filling and close capability, was used. All equipment functioned well, there were no leakers. A decision was made to use stamping for the inertia welded closure plug. This should eliminate the leakage problem caused by porosity found in the plug cut from round stock.
(c) Tactical weapons sys- tem.	(.000)	(. 245)	Advanced development effort: Lethal chemical materiel: Efforts were initiated in the latter portion of fiscal year 1976 on technology areas relevant to
Leni.	(. 450)	(. 205)	development of a warhead for rocket systems. Contractual effort was begun on problems of large scale fluid mechanics, multiple subsystems and system logistics. Provisions were made for a large scale dynamic simulant test of a rocket warhead concept.
	(.016)	(4.473)	Engineering development effort: Lethal chemical ground munitions:
	(4. 527)	(.070)	(a) The development test II (DT II) of the 155 mm, XM687E1, GB2 projectile was satisfactorily completed and a detailed report covering this phase issued. Similarly, operational test II (DT II) has been completed. This latter involved troops tests to evaluate the adequacy of the projectile in use. The technical data package and reports documentation of the XM687E1 projectile were completed. (b) Engineer design testing of the 8-in, XM786, VX projectile was successfully completed and manufacture of hardware for DT II initiated. In the course of the former, various facets of structural integrity, operational performance, and ballistic performance were successfully demonstrated.

(a) Agent investigations and	(.000)	(.645)	
weapon concepts. —	(, 645)	(.000)	Exploratory development effort: 1. Incapacitating chemical agent investigations: Studies were carried out to devise a reaction suitable for producing a candidate incapacitant by a binary process. Although at least 3 separate approaches seemed promising initially, extensive investigations have failed to provide a feasible solution to this difficult technical problem. Techniques for studying the evaporation kinetics of combinations of selected liquid and semisolid incapacitants were reviewed. Work was conducted to develop analytical methods for identifying incapacitants in trace amounts: one of these used a thin layer chromatography technique, where the base values of candidates were determined relative to 2 reference dyes. Another analytical technique, previously developed for identification of promising incapacitants in work areas such as a manufacturing plant, was refined to give more accurate results. Analytical and physiochemical studies were performed to characterize incapacitants, their precursors, intermediates and sideproducts. The scientific literature was reviewed for new leads on safe, effective incapacitants. No promising leads were discovered. 2. Incapacitating chemical weapons technology: Available data on pyrotechnic incapacitating munitions has been reviewed with no solutions available to solve the safety problem of agent release during an accident. The binary agent approach is being adopted to solve this problem. A literature search has been conducted on lethal binary concepts to determine applicability to incapacitating munition design. The 2-compartment thermal generation principal is the most promising dissemination method available. Laboratory space has been obtained and equipment is being
4. Defense equipment program	. 107	16. 621	modified to perform laboratory studies on binary reaction conditions required prior to design of test munitions. Prior year deobligation resulted from withdrawal of residual funds upon completion of effort.

the most promising dissemination meticula variables. Learnary reaction conditions required prior to design of test munitions, or year deobligation resulted from withdrawal of residual funds upon completion of effort. John of the promision of the detector. Field trips were made to Fort Benning, Ga. Fropic Test Center, Panama, Rocky Mountain Arsenal, Colo, Fort Garson, Colo, and to Nellis air Force Base, Nev. where environmental tests were run with the prototype units in conjunction with all types of troop field exercises. A contract with Southern Research Institute alls for examination of many chemicals to determine laboratory type interferences. This contractor has made field trips to Smoky Mountain National Park and throughout the State of Florida, especially the Verglades, seeking more environmental-type interferences. Results were favorable. A satisfactory immobilized enzyme product for use in the enzyme alarm was achieved through chemically bonding oliniseterase to the surface of urethane foam. An interference compensating circuit, using a 4th electrode was developed and results have been very promising. The fabrication of 3 new enzyme alarm units employing the latest technology was initiated. Based upon the results of studies on the mechanism of detection, improvements were made in the sensitivity and stability of automatic liquid agent detector (14.DJ) paint. An operational effectiveness study based on a user scenario was conducted with results indicating significant casualty reduction associated with the use of the ALAD at the platoon level. Special instrumentation was designed and is being fabricated for 2 field trials.

(b) A special & exwellength CO² (aser system was built and subjected to initial testing. Computer techniques for modeling the laser system response were developed. Based upon the results of an in-house theoretical study and consuptations with outside

3. Chemical decontamination investigations:

(a) Work on the polyvinyi alcohol (PVA) supplemental coating to prevent toxic agents from sorbing into agent promotion materials was held in a beyance after numerous unresolved application, adhesion, and weathering problems became evident. Multiple applications are required for adequate film thickness; film drying time is excessively slow; the sheen (gloss) of the film cannot be reduced to a level acceptable troamouthage purposes; although the PVA is not cold water soluble, it is softened sufficiently by rain water to be easily damaged; the adhesion is only marginal; and the film deteriorates with extended outdoor camediage agent DS2, and having sufficient capacity to effectively decontaminate the largest tactical equipment and vehicles, was shown possible by modification of commercially available spray equipment and the program moved into advanced development in February 1976. After successful application traits at Fort Carson, Colo, the agent resistant urethane paint was determined by the U.S. Army Materiel Development and Readiness Command Surgeon to contain small quantities of a skin, eye, and respiratory irritant. It was dropped from the camouflage pattern program in which the paint is sprayed by troops at company level. As a result of this decision, the following approaches were undertaken: (a) By means of a research and for agent resistance. 4 candidate coatings are now being evaluated for resistance to agent services of the company of the compa

methods of using semiconductor sensors and electromagnetic wave adsorption are also being investigated.

(b) Development efforts have centered on finding an elastomer to replace silicone as the protective mask face-piece material. Polyurethanes thus far offer the most likely successful candidate materials. Several experimental polyurethanes have been investigated and efforts are being made to improve those areas of physical characteristics that are deficient. A contract is being negotiated to conduct a survey of commercially available elastomer falling within the range of required physical, chemical, and optical characteristics. The contract completion date is 6 mo, at which time leading candidate material will be selected for further development.

(c) Components of synthetic sweat which cause the greatest loss in sorptive capacity of activated charcoal were identified. Treatments for activated charcoal which will reduce the effects of poisoning by sweat were briefly examined. The materials are of a type which impart water repellancy to the charcoal without seriously affecting carbon tetrachloride adsorption. The penetration of GD through combat and protective clothing systems was measured. These studies were performed to collect agent vapor penetration data for a base line to be used during the development of new protective clothing systems. A contract request was released to investigate methods of producing fabrics containing sufficient chemical agent neutralizing activity to permit their use in protective clothing. Coordination with the U.S. Army Natick Research and Development Command was continued in an endeavor to develop an integrated plan for the development of chemical protective clothing.

I refforts aimed at increasing our ability to predict gas adsorption by activated carbon beds under dynamic flow conditions special emphasis was given to the study of dimethyl methylphosphonate (DMMP) adsorption as a function of flow velocity. For the case of pure physical adsorption, such as with DMMP, it was found

(e) Medical defense against

chemical agents.

SEC. 1.—OBLIGATION REPORT ON CHEMICAL WARFARE PROGRAM FOR THE PERIOD JULY 1, 1975, THROUGH SEPT. 30, 1976, DEPARTMENT OF THE ARMY, RCS DD-D.R. & E. (SA) 1065-Continued

OBLIGATION REPORT OF RESEARCH, DEVELOPMENT, TEST, AND EVALUATION FUNDS FOR THE PERIOD JULY 1, 1975, THROUGH SEPT. 30, 1976; REPORTING SERVICE: DEPARTMENT OF THE ARMY; DATE OF REPORT: SEPT. 30, 1976; RCS: DD-D.R. & E. (SA) 1065-Continued

Funds obligated

	(millions of dollars)					
	Prior year	In-house				
Description of R.D.T. & E. effort	Current fiscal year	Contract	Explanation of obligation			
(b) Advanced development of defensive systems. –	(033)	(3.744)	Deobligation of prior year funds for reprograming to provide program continuity to the binary program pending congressional release of current year funds.			
Of defensive systems.	(4, 015)	(, 238)	Advanced development effort: 1. Remote sensing alarm: In-house efforts were devoted to preparing for comparison tests against the Navy forward looking infrared detector. This included field tests, repairing the exploratory development hardware and data processing. Immediately prior to the scheduled date for comparison tests at Dugway Proving Ground. The Department of Defense postponed the tests indefinitely as a result of congressional action. 2. New protective mask: The new protective mask will enter engineering development in Maich 1977. A unique transparent silicone rubber has been developed which provides optical clarity, flexibility across the required environmental temperatures.			
			and low compression set characteristics. The use of this material permits the molding of the facepiece and lens as a single part and, therefore, the largest possible visual area is provided. The flexibility of the lens permits it to be utilized with optical instruments without significant loss in field of vision. The outsert for the mask is available in a flexible version for field use and a rigid version which provides ballistic protection for the tank and aircrew applications. The canister of the mask can be utilized on the facepiece or attached to a transitional hose which allows the canister to be mounted in a carrier. The configuration of the new protective mask has been firmly established and the sizing has been so adjusted that the military population, including females, can be accommodated in 3 sizes. A highly unique design of nosecup provides comfort and extends the range of face sizes which can be accommodated. The design of molds and other tools to fabricate the new protective mask			
			has been initiated, and fully molded prototypes will be available for the advanced development testing which will precede entry into engineering development. Processes for coating the molded facepiece with a fluorinated ethylene propylene rubber and polyurethane material have been developed. Irradiation of the facepiece with high-speed electrons is accomplished to increase the hardness in the lens region, to decrease compression set and to eliminate crazing at the interface of the coatings and the facepiece. Permeability tests have been conducted on coated facepieces which indicate that the minimum NATO requirements for permeability can be met. The canister or the new protective mask has been subjected to penetration, rough handling, and environmental use testing. The canister appears capable of meeting the requirement for 10 yr of storage followed by 1 yr of oper-			
			ational use under temperate conditions. Requirements for ease of filter change, etc., have been met. The design of spectacles/inserts and the protective hood have not been finalized. Tests under arctic and tropical conditions using early prototypes indicate that the mask should meet the joint requirements established. 3. Decontamination apparatus for vehicles: Advanced development (AD) was started in Feburary 1976 using information generated earlier. Because of the short development schedule required by the proposed letter of agreement (PLOA) commercially available spray apparatus will be modified to meet the requirements of the PLOA and development will proceed directly from advanced development to type classification. Various types of spray apparatus were obtained from different manufacturers and evaluated for performance charctristics using decontamination agen DS2 simulant where possible. Among the pump types evaluated, the trombone type is superior, as is the stainless steel container. Evaluation of the various materials used in the construction of the spray apparatus for long-term compatibility with DS2 at ambient and elevated temperatures is in progress. A Configuration Control Board has been established for this item and a proposed development plan and an initial draft system specification were drafted. A secretarial determination and findings and backup procurement plan for the advanced development contract have been forwarded for approval. The scope of work for the advanced development contract was prepared. Purchase requests to obtain specially modified commercial spray equipment and drawings from 2 manufacturers have been processed.			
4. Defense: (c) Collective protection sys	(001)	(.307)	Prior year development effort: Modular collective protection equipment (MCPF): MCPF consisting of filter units pass			
tems.	(.521)	(.213)	particulate XM56 (200 ft³/min, XM59 (400 ft³/min, and XM62 (600 ft³/min, together with the entrance, protective, XM10 satisfactorily completed basic DT II/OT II tests. Environmental testing (Arctic, tropic, and desert) will be completed by December 1976. M56 filter unit and M10 protective entrance were type classified for Tacfire use in March 1976. Work continues on MCPE applications to AN/TSQ-73, improved HAWK and Patriot (SAM-D).			
(d) Warning and detection equipment.	(-, 055)	(1.305)	Deobligation of prior year funds for reprograming to provide program continuity to the binary program pending congressional release of current year funds.			
	(1.879)	(.519)	Engineering development effort: 1. Chemical agent detector kit, XM256: Engineering design testing was completed and hardware was made for product qualification testing. Tests were completed satisfactorily and items were fabricated for OT II/DT II. These tests were begun.			
			2. Paper, chemical agent detector, XM9: The engineering design and long-term storage tests on the XM9 were successfully completed. Tests at U.S. Army Training and Doctrine Combined Arms Test Agency, Fort Hood, Tx., established that the XM9 was not sufficiently durable when used on vehicles in a combat environment and found that false profitive scenarios were believed with ISA (Weignet was 12 cms). 			3. A rabbit ear bioassay was developed for thickened agents, decontaminants and barrier materials, Bioanalysis of IM22 decontaminating kits showed poor cleaning of widely dispersed thickened nerve agent GD by kit scrapers of alcohowater solvents. Therefore, acetone was substituted for alcohol in the M258 kit solution I to result in significant better cleaning and decontamination, Methyl and phenyl cellosolve show promise as alternate solvents, especial for prophlyactic applications. The phase diaphragm concept was used to select alternate thickeners, decontaminal solvents, and agent additives. Contractor furnished lipophilic oximes and hydroxamic acids, barrier materials, and histologic assay for irritants and protectives. Effectiveness of barrier film containing fluoropolymar was demo strated. Protocols were written for submission to the Office of the Surgeon General for study of the reservoir function of skin for possible use in protection, protection, and therapy of anticholinesterases.
(f) Materiel tests in support of joint operational -	(, 000)	(. 284)	Efforts were directed toward the field testing of the following: 1. U.S. Air Force chemical/biological (CB) modification kit, structure—KMU 450/F: Test was designed to determine in the control of the
plan.	(. 284)	(.000)	strated. Protocols were written for submission to the Orne of the Surgeon General for study of the reservoir function of skin for possible use in protection, prophylaxis and therapy of anticholinesterases. Efforts were directed toward the field testing of the following: 1. U.S. Air Force chemical/biological (CB) modification kit, structure—KMU 450/F: Test was designed to determine adequacy and reliability of the CB modification kit system to provide protection against penetration of CB agen For this period tests in the area of chemical and biological challenge, exit/entry procedures using biological sin lants, and pressure studies were conducted. Final reports covering all aspects of the test have been published. 2. Long path infrared chemical detector (LOPAIR)/forward looking infrared chemical detector (FLIR) comparison te Test was designed to obtain field test data required for a comparative evaluation of the LOPAIR and FLIR detect systems in a realistic harassing and interdiction for field situation. For this period a test plan and environmen impact assessment (EIA) were developed, coordinated with Army/Navy proponents and published for the LOPAI FLIR comparison test. Laboratory investigations to validate sampling and chemical analysis methods for 2 simulal codispersed with various interferents were completed. Preparation of the Dugway Proving Ground, Utah test si munition modifications and preparation of an EIA for the Navy test site were in various stages of completion wh the test program was suspended.
			3. Decontamination capabilities of chemical units and teams: This test was designed to study the capabilities U.S. forces to decontaminate equipment which had been subjected to a thickened chemical agent attack, determine any measures which might be adopted to improve these capabilities, and to determine the relation effectiveness of standard decontamination procedures on specific agent simulants and to establish a standard baseline time required for effective decontamination of standard Army equipment. Test has been completed. If this period, 26 simulant field trials to obtain data for a time and motion analysis was completed. I5 field trials we a chemical simulant to evaluate comparative decontamination procedures were conducted, 43 laboratory investation tests to estimate the comparative effectiveness of selected decontamination solutions against 4 different.
(g) Army materiel develop-	(.000)	(. 576)	surfaces contaminated with several agents was completed. Tests were conducted on the U.S. Army's defensive equipment and materiel and in the long-term environmental stora and surveillance testing. Test efforts were as follows:
ment tests.	(. 576)	(.000)	and surveillance testing. Test efforts were as follows: 1. Modular collective protection equipment (MCPE): This test effort was designed to perform a DT II test and to determine the capability of the MCPE to meet system specification requirement. Agent and simulant challenge test were conducted. A final report was published. 2. Protective overgarment suit: Test is designed to obtain comparative data on each of the 3 chemical protective su
			with regard to the level of protection afforded after specified intervals of wear, durability, and the degree to wh suits meet the essential characteristics of the U.S. revised military and technical characteristics. Testing in a rea of protective capabilities of new, worn, and stored garments, effects of salt water and fresh water immersisuit of capabilities for spot emergency decontamination, flame resistant capabilities, storage effects, and permeability was accomplished. A final report was published. 3. Chemical/biological test for the stinger guided missile system: Test is designed to determine if system componence can be successfully decontaminated without damage to the system. During this period testing was initiated. T is scheduled for completion in fiscal year 1977. 4. Chemical agent detector kit, XM256: This test effort is designed to perform a DT II test and to determine: (1) technical performance; (2) safety of the items; (3) its maintenance test support package; (4) demonstrate wheth engineering is reasonably complete; and (5) effects of extreme climatic environments. During this period planni was accomplished and testing was initiated. Reports will be published in fiscal year 1977. 5. Chemical agent detector paper XM9: This test is designed to determine if the XM9 meets the design requirement performance standards, and technical characteristics of the requirement, effects of extreme climatic environment on the item, and whether engineering is reasonably complete. For this period, a draft test plan has been prepar and laboratory technology was initiated to determine sensitivity test methods for extreme temperature rang Test will be completed ist quarter fiscal year 1978. 6. Chemical/biological/radiological vulnerability for ground launched laser designator: This test effort is designed determine if system components can be successfully decontaminated after chemical/biological contamination without damage to the system. Test is designed to determine if system components can be accomplished. Test
5. Simulant test support	.000	. 429	undergoing some phase of testing at 1 or more of the test sites. Items consisted of masks, chemical detectors, a chemical alarm units. Efforts were directed toward the planning, conducting, and/or reporting of the following joint operational tests and operations.
-	. 437	. 008	tions research studies: 1. Evaluation of delivery and assessment techniques: This test, consisted of 4 subtests, is in response to Army, Na
(a) Materiel tests in support of joint operations - plans and/or service	(. 437)	(. 429)	and Air Force requirements and is concerned with evaluation of delivery and assessment techniques for simularity systems. Testing was completed in fiscal year 1974. For this period, data analysis was completed and
requirements.			final reports covering all aspects of the test program were published. 2. Hazards evaluation: This test is a research effort with the aim of duplicating the contamination pattern of a massichemical attack with the use of simulants and correlating simulant/agent data to permit hazard and vulnerabil analyses. For this period, data analysis has been completed and a final report has been published.

SEC. 1.—OBLIGATION REPORT ON CHEMICAL WARFARE PROGRAM FOR THE PERIOD JULY 1, 1975, THROUGH SEPT. 30, 1976, DEPARTMENT OF THE ARMY, RCS DD-D.R. & E. (SA) 1065-Continued

3. Evaluation of marine vehicle to massive chemical attack: The U.S. Marine Corps requested a test to evaluate the effective use of a landing vehicle when subjected to a simulated massive chemical attack. Data analysis has been completed and final report has been published.

4. Vulnerability of marine wing weapons unit: This test, in response to a U.S. Marine Corps requirement, involves a marine wing weapons unit performing mission tasks with a nuclear trainer in a simulated toxic environment. The test is designed to evaluate minimum performance degradation caused by a massive chemical attack. For this period, data analysis was completed and a final report was published.

Integrity of spray tanks and hazards to personnel: This operations research study is in response to a U.S. Marine Corps request which will evaluate the effects of chemical agents and decontaminates on the continued integrity of spray tanks and estimates of hazards associated with recycling or decontaminates on the continued integrity of spray tanks and estimates of hazards associated with recycling or decontaminates on the continued integrity of spray tanks and estimates of hazards associated with recycling or decontaminating the tanks. For this period, a literature survey of data has been accomplished. Study will be completed in fiscal year 1977.

7. Thickened agent investigation: This effort is a combination study and test. A study will be performed to determine the relationship of ground contamination to the impaction and distribution on man for thickened materials. The test is designed to obtain data on the dissemination characteristics of bursting munitions filled with thickened simulant and to estimated dose-casualty relationships for such munitions. During this report period, the study has been initiated. A literature survey of all data has been accomplished. Test plan was prepared, coordinated, and published. Testing was initiated. Test is scheduled for completion fiscal year 1977.

8. Agent transfer factors: This test is designed to p

OBLIGATION REPORT OF PROCUREMENT FUNDS FOR THE PERIOD JULY 1, 1975 THROUGH SEPT. 30, 1976, REPORTING SERVICE: DEPARTMENT OF THE ARMY, DATE OF REPORT: SEPT. 30, 1976 RCS DD-D R & F (SA) 1065

OBLIGATION REPORT OF RESEARCH, DEVELOPMENT, TEST, AND EVALUATION FUNDS FOR THE PERIOD JULY 1, 1975 THROUGH SEPT. 30, 1976; REPORTING SERVICE: DEPARTMENT OF THE ARMY; DATE OF REPORT: SEPT. 30, 1976; RCS: DD-D.R. & E. (SA) 1065

	Funds obligated (millions of dollars)		
And the second second second	Prior year In-hous	In-house	
Description of R.D.T. & E. effort	Current fiscal year	Contract	Explanation of obligation
Biological research program	008	11. 400	During the 15-mo period of fiscal year 1976 and fiscal year 1977, the Department of the Army obligated \$17,203,000 for general biological research investigations and the development and test of physical and medical defensive systems. Program areas
	17.735	6. 327	of effort were as follows: Biological research: Basic research in life sciences, total \$387,000
			Defensive systems:
1. Biological research	. 000	.302	Total defensive systems 16, 813, 000 Simulant test support 3, 000
(a) Basic research in life sciences.	. 387	(. 302)	Life sciences basic research in support of biological defense materiel: Basic research in support of biological defense materiel included studies on remote detection and on approaches to improving the XM19 biological agent detector. Theoretical
outilies.	(, 387)	(. 085)	studies on remote detection of biological agents in the atmosphere, furnished estimates of the absorption and scattering efficiencies of microbiological aerosols subjected to ultra violet irradiation, and estimates of the ambient fluorescence background of the atmosphere which supported the potential for a 2d-generation detection concept. Time-intensity chem-

background of the atmosphere which supported the potential for a 2d-generation detection concept. Time-intensity chemiluminescence response patterns were obtained for over 20 different microbiological materials using redesigned instrumentation with which the samples were differentiated into 3 characteristic response groups at the 14°C optimum reaction temperature, in basic research in bioidentification, rapid identification of micro-organisms was achieved by mass spectrometry analysis of the purine and pyrimidine composition of their nucleic acids by contract supported effort as the Mass Spectrometry Research Center, Stanford Research Institute. Identification was accomplished in 1 hr by application of upgraded procedures for extracting, purifying and hydrolyzing nanogram quantities the nucleic acids followed by field ionization mass spectroscopy-fingerprint analyses of the released purines and pyrimidines.

Basic research on new concepts for biological decontamination focused on the feasibility of direct neutralization of airborne biological agents. Theoretical studies have developed models for lactic acid vapor disinfection of vegatative bacteria in aerosol particles. The significant reduction in casualties predicted by the model is supported by laboratory data of effective disinfection of bacterial aerosols with practicable concentrations of lactic acid disseminated as vapors or droplets.

SEC. 2.—OBLIGATION REPORT ON BIOLOGICAL RESEARCH PROGRAM FOR THE PERIOD JULY 1, 1975, THROUGH SEPT. 30, 1976, DEPARTMENT OF THE ARMY, RCS DD-D.R. & E. (SA) 1065-Continu

	Funds on (millions of	ligated f dollars)	
	Prior year	In-house	
Description of R.D.T. & E. effort	Current fiscal year	Contract	Explanation of obligation
2. Defensive equipment program	008	12.630	Exploratory development effort: Physical defense against biological attack:
(a) Physical defense against biological agents.	16. 821 (. 000)	4. 183 (1. 036)	1. The 1st phase of in-house studies to further antiaerosol and protective counter cloud technology associated with the chemical disinfection of biological aerosols was completed and a report prepared. The effectiveness of lactic acid droplets as a decontaminant for vegetative bacterial aerosols in an enclosed chamber was demonstrated.
Signoran agents.	(1.278)	(.242)	strated. A contract to expand these studies and to pursue the development of a biological cloud neutralization system was awarded. The in-house chemical screening program for new vapor phase decontaminants is continuing in an effort to find a suitable replacement for beta-propiolactone and formaldehyde. Several potential disinfectants have been selected for further study. A contract package was completed for the explorator development of a decontamination system for biologically contaminated personnel, equipment and enclousers. The proposed procurement is a 4-yr technical effort planned for fiscal year 1977 through fiscal year 1980. The in-house chemical screening program for potential disinfectants has resulted in the selection of candidates for further study. Biological leakage tests leading toward development of new test technology wer performed using the M9A1 protective mask as the test fixture.
			2. Time-rate chemiliminescence detector performance was evaluated for aerosolized pathogens at Fort Detrict Md., to further establish the applicability for group specific identification of aerosolized materials. Efforts were made to improve the response separation between biological groups for identification. Data are bein, evaluated. A biological all-clear kit for indication of agent presence following biological attack, exploratory development program was initiated. The developmental viability response indicator systems under study ar resazurin and catalase. Responses of the 2 systems to pathogens were obtained; however, improvement in sensitivity are required to establish feasibility of these approaches for further development. Performance of the pattern acquisition and correlation technique system with improved pattern recognition electronics and use of a digital adaptive alarm logic was demonstrated for biological aerosols and ambient background. The theoretical feasibility of remote detection of biological aerosols in the atmosphere has been indicated as:
			result of contract and in-house analysis. Thus a contract was awarded to further establish the capability or remote detection using intrinsic fluorescence. Evaluation of bacterial pathogens of biological defense importance and tissue antibodies procured from the Naval Biosciences Laboratory are being assessed in the chemi luminescent device as a potential means of achieving group specificity.
(b) Biological defense ma-	(002)	(.000)	Prior year advanced development deobligation resulted from withdrawal of residual funds following completion effort.

(b) Biological defense ma-teriel concepts. (-.002)(.000) (—.006) (4, 664) (2.030)

(d) Bioloical defense against biological agents. 10.904

Prior year advanced development edobligation resulted from withdrawal of residual funds following completion effort.

Advanced development effort: Prior year deobligation as a result of residual funds withdrawn upon completion of effort. Engineering development effort: Various functional configurations of the XMI9 biological agent detector were field tested and object of the static cell control of the static cell concept. Among the principal features this design offers is a significant improvement in the reproductifity in detector response to simulant challenges and a major reduction in the volume of agent required to operate the new components employed in the static cell design, measuring the parameters which determine their performance, and testing and evaluating alternate design. As part of these tests, an aerosol testing facility capable of presenting large aerosol particles was assembled. It became evident that additional equipment was needed to establish the range of particle sizes required to thoroughly evaluate the sampling capability of both the XMI9 abolization and was taken to procure the needed equipment and to make the necessary modifications to the existing facility so that a full spectrum of aerosols can be generated and quantitatively assessed. An XMI2 design leading toward a self-contend disposable aerosol sample reservoir was also tested and evaluated. This configuration offers a substantial simplification and reduction of logistics burden. The multi-year prime contract for engineering development of the subject system is under negotiation. To provide the initial impetus to this program, several small contracts have or will be awarded to critically examine selective design areas important to the initial engineering development program. These include the design of the XMI2, alternate aerosol concentrator designs, aerosol generating equipment for use in testing, the design of the AMI2, alternate aerosol concentrator

tious process.

(c) The immune response following irradiation was found to be delayed. This is extremely important in the protection of the soldier against disease in a nuclear environment.

(d) A major breakthrough was accomplished in developing the squirrel monkey as a model for studying respiratory infections. The immediate benefit in this is example by the recent establishment of a model for swine

infections. The immediate benefit in this is example by the recent establishment of a model for swine influenza.

(e) A new and novel technique has been developed for scanning electron microscopy that enable one to visualize infection early in the disease. Virus particles can be detected as early as 7½ hr after virus adsorption to cells. Prevention and treatment of biological casualties: Since mass immunization against all potential biological warfare (BW agents is neither feasible nor practical; vaccines are being developed against key micro-organisms and toxins which experience and current intelligence data suggests to be of potential geographical military importance. New methods of immunoprophylaxis and therapy are being extensively studied, particularly in the antiviral area. Experimental approaches include: Develop new vaccines and toxins; improve efficacy of existing vaccines. Cell-mediated studies; efficacy screening of antiviral compounds; aerogenic administration of antiviral compounds. Benefits include:

CONGRESSIONAL RECORD—SENATE

SEC. 2.—OBLIGATION REPORT ON BIOLOGICAL RESEARCH PROGRAM FOR THE PERIOD JULY 1, 1975, THROUGH SEPT. 30, 1976, DEPARTMENT OF THE ARMY, RCS DD-D.R. & E. (SA) 1065-Continued

OBLIGATION REPORT OF RESEARCH, DEVELOPMENT, TEST, AND EVALUATION FUNDS FOR THE PERIOD JULY 1, 1975, THROUGH SEPT. 30, 1976; REPORTING SERVICE: DEPARTMENT OF THE ARMY; DATE OF REPORT: SEPT. 30, 1976; RCS: DD-D.R. & E. (SA) 1065-Continued

	Funds obl (millions of	gated dollars)	
	Prior year	In-house	
Description of R.D.T. & E. effort	Current fiscal year	Contract	Explanation of obligation

- (a) Vaccine development against potential BW agents such as anthrax. Venezuelan equine encephalomyelitis (VES), tularemia, plague, and Q fever has been completed. Vaccines against chikungunya and Rift Valley fever arborium; infections in Africa and Southeast Asia, are in finite deveracines against bengue type 2, Mayaro virus, and sinbis virus found in South America, Africa, and Southeast Asia are in the early stages of development.

 (b) 2 classes of drugs, tilorone and polyinosinic—polycytidylic acid (PIC), have been shown effective in early protection against VEE and yellow fever by inducing interferon, a nonspecific protective substance. Rimantadine and amantadine have exhibited both prophylactic and therapeutic effects against influenza.

 (c) Lymphocyte transformation assay has been developed to study cell-mediated responses of specified disease agents and to evaluate the cellular effects of vaccines developed and commonly employed at USAMRIID.

 (d) PIC has been shown to be a potent drug for inducing better and quicker protection against VEE by increasing antibody responses. This drug also increases antibody responses to swine influenza.

 Rapid diagnosis of biological agents: This critical block of research supported by both in-house and contract research at a cost of \$1,500,000, is aimed at rapidly identifying the causative agent in any BW attack so that appropriate support we biochemical metabolic status serve as indicators of incubating infections. We must utilize and exploit methodology in various fields of science such as:

 (1) Immunelectrophoresis—to rapidly identify the causative organisms by immunological means.

 (2) Mass spectrometry—to identify metabolites in the body fluids indicative organism. In order for rapid identification of BW agents to be a viable part of the total medical defense program, it must be approached on three interfeated levels: (1) Whether or not infection is in progress; (2) What is the specific agent. The need for rapid diagnosis was exemplified in the recent "Legionaire" dis
- - Study 1: Target vulnerability assessment: A 2-volume report was published; vol. 1 and executive summary, and vol. 2, the complete report (Biological Vulnerability of a specific front to a biological attack, based on political, military and environmental factors associated with that target area.
 Study 3: Response protocol: A report on this study was completed during this period, titled, Biological Defense Protocol. The report is an assessment of current capabilities and biological defense requirements for the U.S. Army in the field. The current capability is based on current attitudes regarding biological defense and training and equipment devoted to biological defense. Information was obtained from several sources. An analysis was made of training preparedness requirements in response to the biological threat.
 Study 5: Target vulnerability analog definition: This study was completed and a report was published (Analog Environmental Parameters for Assessing Target Vulnerability). An analysis was made of environmental remaining at selected sites to determine the duration and frequency of occurrence of conditions that would render the site a susceptible target to a biological attack. For the stringent conditions for attack that were imposed, the frequency of suitable conditions was relatively high.
 Study 8: Target vulnerability: This study involves an assessment of the meteorology and topography, identification of strategic and tactical targets, and identification of possible modes of attack against U.S. forces, should they be involved in operations under this scenario. During this period, a literature review was initiated. Report is scheduled for completion in fiscal year 1977.
 Study 10: Biological detector effectiveness for bomblet attacks: This study will evaluate the detection capabilities for an on-target bomblet against U.S. military forces based on current detector density and location will be examined. Report is scheduled for completion in fis

(f) Army materiel development tests. 3. Simulant test support	(.000) (.107) .000	(.107) (.000) .003	 Study 18: Minimum capability for biological threat: This study will assess the technological requirements for development of biological weapons to meet a number of potential roles for use by groups having a low level of technical capability. During this period an analysis of the existence of the acquisition of the technical capability to produce, stockpile and transport biological materiel for use in biological weapon systems was accomplished. Study will be completed in fiscal year 1977. Study 19: Refinement of target vulnerability analog criteria: This study will provide for further characterization of target vulnerability analogs and will be applied to a number of sites and larger areas. During this period, refinement of analysis techniques has been initiated. Study is scheduled for completion in fiscal year 1978. Obligations were incurred in the modification of an inclosed test chamber and to check out test procedures prior to testing of the XM19 biological agent detector. Testing of the XM19 is scheduled for fiscal year 1977. Obligations were incurred in the reporting of a test program which was in response to unified and specified commands and service requirements. Test was designed to evaluate the relationship between biological decay rate data between the mobile van/microfilament technique and free-floating aerosols. Final report was published during this report period.

Negative.

THE EDUCATION OF EARL McGRATH

Mr. HATFIELD. Mr. President, the April 1977, issue of Change magazine by Edwin Kiester, Jr., offers a profile of Earl J. McGrath, one of the outstanding American educators of our time. This article outlines his distinguished career and also identifies his educational philosophies and insight into higher education in the country today.

Earl McGrath served as Commissioner of Education under President Truman and has provided quality leadership in many arenas of educational pursuit over five decades.

Dr. McGrath has a particular optimism and conviction about the historic mission of the liberal arts college and remains a vital influence on students and teachers today. Those of us concerned with the importance of preserving and communicating moral and spiritual values in our schools frequently call upon him for wisdom and guidance.

Mr. President, I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE EDUCATION OF EARL McGrath (By Edwin Kiester, Jr.)

Earl McGrath is 74 years old and the military moustache has gone snow-white, but he still moves with the same energy and jaunty step as when he and another quick-timing little man named Harry S. Truman were putting the federal government into the education business 27 years ago. I first met McGrath in those days when, as a young magazine writer, I was assigned to interview the U.S. Commissioner of Education on the pending proposal to set aside television channels for educational use. Feeling his firm handshake at the San Francisco airport a few months ago, I was impressed with how little the quarter century had changed him.

Two days of conversation only deepened that impression. For McGrath was then and remains today that rarity in this pragmatic age, a man of absolute and unswerving devotion to a set of bedrock principles. For nearly four decades he has been preaching the gospel that the prime objective of higher education should be teaching; that the welfare of the student should be uppermost; that the development of character and a responsible citizenry are more important than mere transmission of knowledge—and that all this flourishes best in the intimate atmosphere of the small liberal arts college. That such institutions have become an endangered species has not shaken his convictions. McGrath has been retired twice-at 65 from Columbia and at 70 from Temple, But from his current base as director of the program in liberal studies at the University of Arizona and until recently as senior consultant to the Lilly Endowment, at an age when most of his contemporaries have retired to their vegetable gardens, he is still thumping the same pulpit. It should not have surprised me to learn that McGrath's hero is Robert E. Lee, another former college president who threw his energies into an uphill

It should not have surprised me, either, that even before Jimmy Carter's election, McGrath had undertaken a study of the 52 Southern Baptist liberal arts colleges; nor that, in the midst of last year's election campaign in which the prime issue was honestly and trust, he had published a monograph entitled "Values, Liberal Education, and National Destiny." McGrath endeared himself to journalists like me because he always viewed the educational scene through contemporary binoculars and because he always had something cogent and provocative to say about what he saw. That has not changed either.

"As I travel, I talk to many people, and I find them disturbed because the old institutions and principles by which they have lived have eroded," he commented on one occasion. "The relativism, the consequences of the past 25 to 30 years, have taken a heavy toll. People have been left without intellectual, moral, political, or economic moorings.

I recall a speech Walter Lippmann gave to the American Council on Education in 1966. Lippman said that the only institution which could bring society into a cohesive whole again is the university. He said the church can't do it, the government can't do it, who else can do it? But can the university do it? With its present goals and professional politics, I doubt it. It would require rethinking their direction, and there is little evidence of that.

"I am ashamed of what I taught when I was a psychology instructor," he remarked at another point, discussing the view that knowledge is important for knowledge's sake. "Ninety-five percent of them were never going to do any more in psychology. Yet we examined the central nervous system from Labor Day to Thanksgiving. The rods and cones of the retina. The bones of the middle ear. Hot and cold spots in the fingers. All this trash that I had to take because I taking a master's in psychology I embodied into a one-year course, and these poor suckers had to learn it and give it back to me. After this we had the psychology of propaganda, Hitler running all over Europe, the psychology of advertising, neuroses everywhere, to say nothing of crowd psychology, which they wouldn't even hear about unless they took two or three more courses. All of that could have been bundled into a one-year course which would have been of value to all of them."

Of course, to describe Earl McGrath only as a champion of liberal education—or, one soon discovers as a holder of salty opinions—is a little like talking about Babe Ruth in terms of how well he could play the outfield. McGrath's accomplishments go much further. Besides serving as United States Commissioner of Education, he was a post-Presidency confidante of both Truman and Eisenhower; he framed and wrote much of the prophetic 1947 report of the first Presidential Commission on Higher Education: he helped build the Navy's famous wartime V-12 college training program and directed its off-duty study program, which served as a model for later high school equivalency and external-degree programs; he has written prolifically and has received honorary de-

grees from 50 institutions. He was one of the first recipients of the award of the Colloquium on Higher Education, a select group of academic professionals.

Knowledgeable and articulate, he personifies the well-rounded, well-educated man he so admires. Sitting with him in an autumn evening, I found the conversation ranging smoothly and easily over such diverse topics as Lee's strategy at Chancellorsville, Robert Ornstein's research into bilateral specialization of the brain, the importance of intonation in the pronunciation of Chinese, the history of the University of Bologna, ethnography of the Philippines, California versus French wines, the proper backswing on a short iron shot, and the physiological chemistry of diabetes. Once, McGrath recalled, the president of a small and shaky college about to be ousted by his trustees came to him for advice. Perhaps the expert on small colleges could recommend some books that would help him in his plight? "Books on higher education!" McGrath snorted. "I said, 'Go read Othello, John! It's all in Shakespeare! They're trying to do an

Iago on you!" According to McGrath, both his character and his ideas took root during his own smallcollege education-on a campus most of us now associate with educational gigantism. When McGrath matriculated at the University of Buffalo in 1923, its liberal arts college was only two years old, founded to satisfy the Flexner recommendations for better premedical education, and 750 students were rattling around the 75 acres of the former Erie County poor farm. The new student, 20, had not originally planned to attend college. Despite his Irish surname, he had grown up in a German enclave on the outskirts of Buffalo, where his maternal great-grandfather, a bookbinder, had migrated from Saxony and had clustered his children and grandchildren around him in the best Germanvillage manner. The family was long on songfests and sausages but short on the wherewithal to send an ambitious youth to college. After high school graduation, McGrath spent three years in jobs as a bank clerk and a gas-meter reader before a classmate convinced him that he could afford the new col-

One of the reasons McGrath stresses the value of the liberal arts college is that teachers get to know their students and significantly affect their lives. "I have always felt that a person's life and character, his personality and dominant ideas, are shaped more by people and the interaction of personality than by cognitive learning," he says. He can quickly tick off the early influences in his own life—the classmate; the ex-clergyman neighbor who took a liking to the 12-year-old and schooled him in German and French; the philosophy professor who convinced him at graduation to reject a fellowship in German at Yale ("He told me there weren't many jobs for German teachers after World War I, and he was right") and to study psychology at Buffalo.

And most of all there was Samuel P. Capen, a major figure in the history of American colleges and universities, who came to Buffalo as chancellor in 1922 and remained there 30 years. Capen quickly discovered that higher education was a virgin field of study, and he became its first systematic student. Over the next several decades he poured forth a flood of articles, books, and speeches on trends and developments in postsecondary education. He helped found the American Council on Education and became its first president.

McGrath, meanwhile, had attended college without any clear career objectives; he majored in German because of his family background. After studying psychology, he concluded that "I wanted to stay in the academic life but I wasn't certain what I wanted

to do there." Older than his fellow students, he was named an instructor and then assistant dean of the evening division at Buffalo. The next year Capen decided he needed an assistant to help him administer the growing institution and he picked McGrath.

Could anything be more exciting than helping to build an institution from the ground up?" McGrath asks, rhetorically. had opportunities no young administrator could have today. Buffalo was a small university but it was a complex one, and there were only two of us in the central administration so I became familiar with all parts of it. I dealt with the registrar and the bursar. I drew up the budget. I attended all faculty meetings, the medical and the law faculty as well as the liberal arts faculty. I got to know the medical faculty as well as our own. I wrote reports for Capen. I made speeches of my own. I even chauffeured Capen's car. Once, I remember, a student claimed that he got a failing grade because he had rejected a professor's homosexual advances. I had to handle the whole matter. right through the negotiations with the AAUP. I got a good solid grounding in every phase of college operation under the supervision of the country's leading theoretician on the subject."

Equally important to McGrath's education was Buffalo's particular atmosphere. "Buffalo between 1922 and 1935 was one of the most exciting intellectual centers in the country," he says. "Five or six of my own teachers had national, even international, reputations. But it wasn't only that these men were prominent in their fields. They were accessible, not only to discuss educa-tional problems but personal problems. You could see them as human beings, not as platform performers as so many faculty members are today. Oh, I have no doubt that some men and women teaching in the classrooms today may be intellectually superior in their ability to handle ideas or to master a given body of knowledge. But in terms of their influence on the whole person. Well, they couldn't come up to one of my philosophy professors, who only had a bachelor's degree and probably couldn't get an appointment in

McGrath remained at Buffalo nearly 25 years, with significant interruptions. In 1933 he went to the University of Chicago, then under the leadership of Robert Maynard Hutchins, for a doctorate in higher education; the association with Hutchins con-tinues to this day. In 1938 he joined the American Council on Education in Washington to administer a Rockefeller Foundation project to advance general studies programs in small liberal arts colleges. The objective was to establish on 22 campuses course distribution requirements that would provide every graduate the broad education necessary responsible citizenship-to teach "the corpus of knowledge, the complement of intellectual skills, and the cluster of attitudes which all beings, regardless of their special interests or occupations, must have to live a civically enlightened and person-ally satisfying life," McGrath once wrote. This program, which helped to formulate many of the views McGrath was later to expound upon, lasted three years and was cut short by World War II.

In the first few days of 1942, McGrath and four others, including Frank Bowles, later president of the College Entrance Examination Board, and Alvin C. Eurich, now head of the Academy for Educational Development, were summoned by Secretary of the Navy Frank Knox to put together a crash college program for naval officer candidates. The idea was to use existing campuses and faculty to provide two years of college for the new officers before they were commissioned and assigned to sea duty. Four months later, the much heralded V-12 program was

in operation on 50 campuses and the first of thousands of young midshipmen were attending classes in a program that was to last through the war.

McGrath, by now a lieutenant-commander, was called upon for another national service project, this one a pet of President Franklin D. Roosevelt. He was to build a program of off-duty education under which sailors could obtain high school or college credit for classes attended on shipboard or at far-flung duty stations. Or they could study by correspondence. McGrath was given carte blanche to select and train young officers to serve as teachers, to pick his own administrative staff, and to develop the teaching materials. By war's end, he had built a university that stretched as far as Australia and enrolled more than 300,000 students.

These experiences, coupled with the postwar flood of GI students, sharply changed the direction of McGrath's thinking, as it did that of many educators. Whereas he had previously thought in terms of individual campuses and small student bodies, he now recognized higher education as a national concern, involving millions of ambitious young men and women. Meanwhile he returned to Buffalo, then moved on to the University of Iowa as dean of the college of liberal arts and began to move firmly onto the national stage.

In 1947 he was named to the President's Commission on Higher Education. This panel of leading educators, revolutionary for its day, was chosen by President Truman to recommend future federal policy in higher education, especially for the period following the veterans' stampede. Although the federal government was obviously four-square in the higher education business through the financing of the GI Bill, the idea that there should be any kind of continuing policy in an area traditionally reserved to the states and to private agencies provoked a wounded out-. Coming at a time when Truman embroiled with the Republican Eightieth Congress, the Commission was charged with being socialistic, further evidence of government interference with private rights.

Looking back 30 years later, it is difficult to see what the fuss was all about. Much of the first volume of the Commission's report was written by McGrath and T. R. McConnell, now in the Higher Education Research Center in Berkeley, and retrospectively, its program seems tame. The Commission declared that perhaps 49 percent of high school graduates were capable of postsecondary education—an unheard-of statistic in 1947 and that, if necessary, the federal govern-ment should see to it that they received it. The report also highlighted the disparity in educational opportunity among the states and recommended that Washington take steps to correct the inequity. It suggested expansion of the community colleges, better programs of adult education, greater financial assistance for the economically deprived, and accelerated recruitment of minority students.

"From a legislative point of view, the Commission was a failure," McGrath says now. "Not one bill was passed by the Congress as a result of our recommendations. I'm not even sure that any were proposed. Society simply wasn't ready for the idea of a broader federal responsibility in higher education, nor were educators. But I think the report had a very important delayed effect. It was certainly prophetic about the community colleges and adult education. Most important, though, it stirred up thinking about what role the government ought to play in colleges and universities."

In the summer of 1948, John W. Stude-baker, who had been U.S. Commissioner of Education ever since the New Deal, resigned under pressure from the White House. McGrath was asked to study the office, then largely a fact-finding and report-collecting

agency, and to suggest a plan of reorganization to bring it more into line with the increased federal responsibility for the schools. McGrath had little hope that the report he submitted in the waning days of the first Truman administration would be adopted, since it was generally conceded that the President would be roundly trounced at the polls by Thomas E. Dewey. But Truman's unexpected reelection made the report a live issue and its author the leading candidate for the Commissionership.

McGrath will never forget that first meet ing with Truman, a month into the President's second term. "He talked for half an hour or 45 minutes about the problems of education and the importance of education. and then about the office, and what he expected it to be," McGrath recalls. "It was impressive how much understanding he had the subject and how deeply he thought about how to deal with it. And he was quite blunt about what he expected from a Commissioner. He said, 'Now, you've spent your life primarily in colleges and universities, and I have no objection to that background in a Commissioner. I consider higher education important. But I want you to understand that I'm primarily interested in seeing that the broad mass of Americans get a good solid elementary and secondary education. I don't want anyone in the Commissioner's office who's going to spend his time especially advancing the cause of the colleges.

"So I told him," McGrath says, "that I too was interested in the broad education of the people at every level, and we had a few more minutes of pleasant conversation, and then the nomination was sent up to the Senate."

Thus began a friendship that ended only with Truman's death. As Education Commissioner, McGrath was hardly a White House insider, but his regime undoubtedly paved the way for the role government was to play in education later on. "The job was relatively simple in those days," he says. "The money involved was not large, the staff was not large. We had no field officers in the federal districts as they do now. There were no really dramatic issues. Race was coming up—it was already in the courts, but the decision didn't come down until 1954, and I was out by then.

"Still, you could see the handwriting on the wall. I think I testified on 500 bills in my 4 years, which is more than my predecessor in his 14 years. There was the be-ginning of the idea that there should be some federal assistance to the schools, which of course I favored. That was when the bills first came up to give aid to 'impacted' areas, where the federal installations were so large that they monopolized the tax rolls, and I testified in favor of that. I remember Senator Paul Douglas introduced a bill to establish a federal program of education for migrant workers' children, and I testified for that. And I must have made 500 speeches on the subject of the need for elementary school teachers

"Actually, I was a bit of a misfit in the Commissionership. My appointment never sat well with the public school establishment because I was not one of them. But I learned a lot about politics and a lot about the American system in those four years, and that's a subject many educators aren't familiar with, don't want to dirty their hands with. I learned that in America if you want something from the federal government or expect to be affected by it, you'd better speak up and make your opinions known. I think Truman, for example, would have responded to any kind of pressure brought on him by the higher education establishment. I remember one time in the 1930s when an educational delegation led by Willard Givens of the National Education Association called on FDR They had a pleasant chat in the White House, and finally Givens said, 'Mr. President, our delegation is interested in knowing what your administration plans to do for education.' And Roosevelt responded, 'Mr. Givens, I will do anything necessary as soon as I find out what education wants me to do.' That's the way the system works."

Eisenhower's election in 1953 sent Truman back to Kansas City and McGrath followed him. He became a college president for the first time, at the University of Kansas City. The position enabled him to test some of the ideas he had been collecting ever since his days with Capen. It also cemented the relationship with Truman. McGrath was named to the board of the Truman Library and in turn drew on his former boss as a regular guest lecturer in political science and history. The two men lunched regularly at Truman's Kansas City club, where the conversations ranged across history, Greek mythology, and literature, laced with exactly two shots of bourbon. "Mr. Truman was an informed, intelligent, and considerate man." McGrath says, "and I never found a subject that he was not interested in or did not have ideas about."

That included higher education. The only President in this century never to have attended college believed firmly that the times called for mass postsecondary education. On the other hand, he was defensive about what he considered the snobbery of the Ivy League graduates. A born mimic, he delighted in imitating what he believed to be the nasal accent of the "Hahvud boys."

The University of Kansas City was later absorbed into the University of Missouri system and McGrath left. He was then 53 years old, with a long and varied career in higher education, but he had never done what most faculty members do most of their -concentrate on a narrow area of knowledge and pass his theories on to a new generation of scholars. Now he moved to Teachers College at Columbia University to do just that. It was already evident that lib-eral arts education was in decline and that many of the small institutions that had dotted the American educational landscape were in serious straits. As professor of higher education in the Institute of Higher Education and with Carnegie Corporation support, McGrath set out to study them, to advise them, and to define and salvage what was valuable about them. That issue has consumed him ever since and undoubtedly will be the contribution for which he is remembered.

He did not always like what he saw. "I object to the notion come by from the German university that the educational process ought to concern itself only with cognitive learning, that it has no responsibility for the private lives of individuals. I agree with what William James wrote long ago in "The Octopus"—that the tentacles of scholarship have strangled educational programs, especially at the undergraduate level. James was writing about Harvard College, but what he described happened everywhere as a result of the introduction of the standards of German scholarship.

McGrath expounded this view in monographs like "Should Students Share the Power?" and "Liberal Education's Responsibility for the Individual Student." Unlike many members of the academy, he was not surprised at student complaints of the mid-1960s that colleges were dehumanized, depersonalized pressure cookers where faculty members were remote and faceless. And he deplored the publish-or-perish principle.

"We don't have the atmosphere I described at Buffalo in the twenties and thirties," he said, reviewing what he had written in "The Quality and Quantity of College Teachers" and "Are Liberal Arts Colleges Becoming Professional Schools?" "We don't have men or women primarily interested in being teachers of youth, I cannot believe that that way

of life is not extremely rewarding for those who choose it. Yet those who take the ideal seriously are discriminated against, in terms of responsibility and economic advantage. I think this philosophy has rotted away the whole core of liberal education in this country."

Indeed, McGrath has argued, there is scarcely such a thing as a true liberal arts college anymore. Sometime in the heyday of Charles W. Eliot, the idea died out that the objective of higher education was to prepare a person to assume a responsible place in the society rather than to prepare him or her for a professional career. "We used to have at Teachers College a copy of the Harvard catalog of the 1840s," he recalls. "It was printed on two pages and consisted of 33 courses for four years, which every student took. The entire curriculum consisted of Greek, Latin, Hebrew, some rudimentary the classics, some history. mathematics, Then Eliot came back from Germany with his notions of narrow and specialized education, and by the end of the century most of the colleges had instituted course requirements and brought in majors. The humane tradition inherited from Oxford and Cambridge had almost disappeared."

The decline of the small campus has saddened McGrath, who has devoted much of his career to attempting to explain it. Over the past 20 years the small schools, while holding their own in absolute numbers, have controlled a smaller and smaller share of the educational garden, until today only about one in four students attends a private college of 1,000-2,000 students, as contrasted with a one in two ratio in the immediate postwar period. Moreover, a large number of the schools have closed their doors forever, hemmed in by the forces of cheap public tuition and loss of the institutional links that once provided their support.

Yet here, as in many areas of education, McGrath remains optimistic. He has never lost faith in the ideals of the liberal creed, but he believes that today's educators need to "reorient the purposes of liberal arts education." He argues that whereas "traditionally the profession has said, 'Well, these are the disciplines an individual should study to consider himself or herself an educated person,' we ought to come at it from the other direction. We ought to say, 'This is the nature of our society. These are the problems and the concerns with which citizens of that society might have to deal, now or in the future. These are the disciplines that bear on those problems or concerns, and therefore these ought to be the components of liberal education.'

"I don't hold with this idea that you should keep piling up courses on courses in the same narrow area. And furthermore, I don't believe that an advanced course is more taxing than an elementary course. A fifth course in mathematics in the functions of a complex variable is per se no more difficult and more important than a basic course in political science. Quite the contrary, in my judgment.

"The whole academic enterprise has been in the grip of what Hutchins used to call scientism—the idea that whatever we approach has to be approached from the point of view of the scientist. Love, hate, all the human emotions, everything in life. The scientists have repudiated this idea, but now the humanities are infected. Even the departments of religion are fascinated with objective truth. They have abandoned not only revealed knowldge but any knowledge which is epistemologically not scientific."

The former federal official believes that the

The former federal official believes that the government has an important role to play in reorienting the colleges, if only the academic enterprise will let it; but he also has faith that the small colleges themselves will work

their way out of their difficulties. "I can't believe that some small liberal arts colleges, colleges like Allegheny or Muskingum, old respected institutions that have operated for over 100 years, will go under. They have too many loyal alumni who will rally to their support; they are too deeply rooted in their communities to go out of existence. In fact, our studies show that these institutions are far stronger today than in the recent past. Alumni contributions have gone up, some of them have rejuvenated their programs to tie more directly to community needs, many of them have benefited from the fact that students themselves are looking for guldance.

"There is no doubt, though, that unless something is done, some of these small institutions are going to lose students; and some are going to be obliged to close their doors. I'm convinced that a strong program of federal assistance is needed, but not of the type we have seen in the past. I think it ought to be in two parts. There ought to be direct aid to students, which they could spend at whichever college they choose. It ought to be like the GI Bill, with money passing directly through the student's hands.

"I have great fears of large government funds going directly into college treasuries. When they are earmarked for specific purposes, and they can cause great damage to the institution and its objectives, as was evident after Sputnik. Suddenly there were great amounts of government research money for scientific research and graduate programs in the sciences. The intent was not to demean the social sciences and the humanities, but it worked out that way. Students who might have chosen to study psychology picked physics instead, because that's where the grants were. Then when the government withdrew support in the late 1960s, the effects were tragic. Columbia alone lost \$50 million, I remember. Whole programs had to be closed down because there was no more goverment money.

"But we all know that tuition never pays the costs of educating a student. So I think that such direct federal or state aid to the student, a voucher system, should be supplemented by grants to the institution on the basis of the number of students enrolled. But there should be no grant until the student is actually in school, and the money should be paid into the general fund, rather than earmarked for a specific purpose."

But there is another national role for education that McGrath sees as important in the second half of the seventies, and this theme has dominated his most recent publications and speeches. He believes that the United States needs a Presidential commission of thoughtful leading citizens who could study national values and help the nation find a direction for itself in the final quarter of the twentieth century. Once his beloved liberal arts colleges made it their purpose to impart a sense of values to their students; they have lost that goal because society no longer accepts a common standard.

McGrath wishes that he felt that the academic enterprise could "concern itself with necessary reforms and goals and practices," but he does not. "It cannot seem to see that questions like race, and ecology, and war and peace are not conquered by mere application of knowledge but by having a set of values, by having a cohering and enduring set of principles of human conduct around which citizens can rally. I don't think a commission on national choices would have to concern itself with digging up facts, with studying all that is known on the topics considered. What it needs is people who aren't afraid of new ideas and aren't afraid to say what they believe. The right people, without political affiliation, willing to suggest realistic programs that the weight of society could get

behind. Not merely scholars. A commission of public-spirited citizens. I once mentioned this to President Ford, and I believe that it would be fruitful."

Seven decades into an epochal life, McGrath himself exemplifies the kind of broadthinking citizen who might serve on such a commission. He is settled now into the desert sun of Tucson, to benefit his wife's arthritis, but he still ranges all over the globe and produces a steady stream of speeches, articles, and pamphlets. Despite his age he has no intention of retiring, but he does look back on 50 years with some regrets. "I spent almost all my professional life in large institutions," he says. "Columbia with 20,000 students, Temple with 30,000, Iowa with 12,000. I think if I had to do it over again, I would try to find a deanship in some small college of maybe 1,200 students and spend the rest of my life there.

"We were talking about Lee a while ago. You know Lee ended his life as president of Washington and Lee University, down in Lex-Virginia. I was reading the alumni bulletin from that school not long ago and there was an article about an old dean down there, Dean Gilliam, who had just died. He had seen three generations of students cross that campus, not only fathers and sons but grandfathers and grandsons and he knew them all. He was a stern man, a man of principle, like Lee himself; but also, like Lee, he was a humane man, and he was concerned for the individual student, as Lee was concerned for the enlisted man. Each of his students had some favorite, personal memory of him.

"Probably no one ever heard of Dean Gilliam 100 miles from that campus, and yet to me he is what liberal education should be about. To me, his was a worthwhile life, a life that had some meaning, purpose, and impact on the future of our nation."

RULES COMMITTEE REPORT

Mr. CANNON. Mr. President, I ask unanimous consent that a report from the Senate Committee on Rules and Administration pursuant to section 302(b) of the Congressional Budget and Impoundment Control Act of 1974, distributing the committee's allocations under the third concurrent resolution on the fiscal year 1977 budget, be printed in the Record.

There being no objection, the report was ordered to be printed in the Record, as follows:

SUMMER YOUTH EMPLOYMENT-FAMILY SURVEY

Mr. PERCY. Mr. President, recent figures on youth unemployment released by the Department of Labor indicate that job prospects for this group have not improved much over the last year. The unemployment rate for the 16- to 19-year-old age group was 18.5 percent in February. For black and Hispanic youth in urban areas, the situation is even worse. It is clear that Congress must not fail to act as soon as possible to find sound and workable long-term solutions to the special problem of chronic unemployment among our Nation's youth.

In the interest of bringing to light as much information as would be helpful in our deliberations on this matter, I would like to call to the attention of my colleagues a survey prepared by the Chicago Federation of Settlements and Neighborhood Centers concerning 1,600 young persons employed by the Federation in 1975 as part of the mayor's summer youth employment program. Although it pertains only to Chicago youth, the survey contains data applicable on a wider basis to the characteristics of unemployed youth.

Mr. President, I ask unanimous consent that "Summer Youth Employment-Family Survey" be printed in the Record.

There being no objection, the survey was ordered to be printed in the RECORD, as follows:

SUMMER YOUTH EMPLOYMENT—FAMILY SURVEY

From June 23, 1975 through August 22, 1975 the City of Chicago employed approximately 46,738 young persons between the ages of 15 and 21 in a program known as the Mayor's Summer Youth Employment Program. This program was financed through the Mayor's Office of Manpower under the Director, Mr. Sam Bernstein, with funds from the U.S. Labor Department under the (CETA) Concentrated Employment Training

Act. CCUO/Model Cities under its Director, Dr. Erwin France, was allocated 18,000 of these employment positions and in turn subcontracted with the Chicago Federation of Settlements and Neighborhood Centers to employ 1,600 neighborhood youth in the Federation's member agencies.

Federation's member agencies.

All of the 1,600 youth employed by the Federation were certified as eligible by CCUO/Model Citles and therefore met the following Federal and City guidelines:

1. Resident of Chicago and U.S. Citizen.

2. Age 15 through 21 years.

 Member of a disadvantaged family by Federal O.E.O. Poverty Guidelines.
 In August of 1975 a household employment

In August of 1975 a household employment survey was prepared by the Chicago Federation. Supervisors from each of the member agencies were given a ½ day orientation to the survey and were requested to ask all summer youth employees to answer it while under their supervision. The survey was completely confidential and employees were not penalized if they chose not to participate.

All answers were tabulated for computer

All answers were tabulated for computer analysis. The Department of Development and Planning under Commissioner Lewis Hill served as Technical Advisor. The highlights of the computer analysis are as follows:

All youth employees came from families that met the O.E.O. Poverty Guidelines.

967 youth employees responded to the survey, answering one or more questions.

566 or 58.6% of the 967 youth employees responding were female.

401 or 41.4% of the 967 youth employees responding were male.

responding were male.

172 of the youth employees were 15 years

of age.
795 of the youth employees were 16 to 21

years of age.

16.8 years was the average age of the youth

16.8 years was the average age of the youth employes surveyed.

37% of the 967 youth employees reported that they lived in Public Housing (CHA).

63% of the 967 youth employees reported that they lived in Private Housing.

32% or 195 youth employees who lived in private housing reported that their family owned their home.

20% of all youth employees live in homes their families own.

3.2 bedrooms was the average for all households reporting.

38% of the youth employees (356 out of 931) reported that they lived in overcrowded households (U.S. standard of more than 2 persons per bedroom).

41% of the youth employees (206 out of 502) in households receiving public aid reported overcrowding.

OUT OF LABOR FORCE

36% of the 3,326 persons 16 years of age and older were reported by the 967 youth employees not to be in the Labor Force for the following reasons:

	No. re- ported	Per- cent of total	
In school	458	13.8	
In college	97	2.9	
Takes care of family	355	10.7	
Too sick	108	3.1	
Retired	39	1.2	
Too lazy	22	0.7	
100 010	21	0.6	
in military service	21	0.6	
In job training	18	0.5	
In jail	9	0.3	
Other reasons	57	1.6	
	1,305	36.0	

Definition: Unemployment Rate . . . The total number of persons 16 years of age and older in all households who are actively seeking employment (424), divided by the total number of persons 16 years of age and older in all households who are actively seeking employment and those who are employed (2,021).

The unemployment rate for the 967 households surveyed is 20.9%. The unemployment rate for all households where one or more persons receive public aid (502) is 29.3%.

The unemployment rate for all households where no one receives public aid (465) is 13.5%.

Definition: Labor Force Participation Rate... All persons 16 years of age or older who are actively seeking employment or are employed (Labor Force) divided by the total number of persons who are 16 years of age or older.

The Labor Force Participation Rate for all persons reporting is 64%. The 967 youth employees reported 3,326 persons 16 years and older in their households and of that number 2,021 were actively seeking employment or were employed.

The Labor Force Participation Rate for households where one or more persons received public aid was 56.2%.

The Labor Force Participation Rate for households where no one received public aid was 71.5%.

93.2% of the households reporting where one or more persons received public aid (502) purchased food stamps. (34 households did not purchase food stamps.)

12% of the households reporting where no one received public aid (465) purchased food stamps. (405 households did not purchase food stamps even though they met the O.E.O. poverty guidelines.)

All 967 households were eligible to purchase food stamps yet only 528 households

made use of the opportunity.

Similarly, most Employees were able to work for 9 weeks and could work 26 hours per week at a rate of \$2.10/hours. Their maximum earning power for the nine-week period was \$491.40.

USE OF EARNINGS

The 967 employees who responded to the survey indicated that they used their earnings as follows: (They chose the four most important uses and marked 1, 2, 3, and 4 in order of importance . . . No. 1 was most important and No. 4 least important.) Note the point scale gives 4 points for 1st choice; 3 points for 2nd choice; 2 points for 3rd choice and 1 point for 4th choice.

HERBERT BRUCKER

Mr. RIBICOFF. Mr. President, Herbert Brucker, a syndicated columnist and former editor of the Hartford Courant, died Tuesday, April 5, 1977, in the Hartford, Conn., hospital. He was 78.

Herbert Brucker was a distinguished journalist, an inspiring leader and teacher and a courageous and eloquent advocate of freedom of the press. He was a longtime friend of mine. All of us who knew him-and the many thousands more who read his articles, columns, editorials, and books-will miss him very much. I am expressing my deepest sympathy to Herbert's wife, Elizabeth, and other members of the family.

Herbert Brucker was a man of rare intelligence, perception, sensitivity, and principle. He could have succeeded at anything. He chose a career in reporting, because he believed it to be a high calling, one of the highest a person can aspire to.

Herbert Brucker considered journalism and the exercise of a free press to be the fundamental ingredient in the successful functioning of a democracy. He

We can't have government by the people and for the people unless the people know what the government is doing.

Herbert Brucker firmly believed in what he wrote about a free press-and lived his life and reported the news accordingly. By his actions and in his writings, he demonstrated his commitment to a style of journalism steadfast in the face of adversity-yet ever mindful that freedom is not license. Journalism has lost a great voice.

Mr. President, the Hartford Courant printed an obituary and an editorial about Herbert Brucker in its editions of April 6, 1977. I ask unanimous consent that these articles be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

HERBERT BRUCKER, 78, DIES; COURANT EDITOR, COLUMNIST

Herbert Brucker, former editor of The Courant, syndicated columnist and champion of the public's right to know, died Tuesday at Hartford Hospital. He was 78.

Mr. Brucker, whose beliefs in open government, freedom of the press and the "precious right" of the people to have access to the truth were set in miles of typewritten words, began his journalism career in 1923 as a cub reporter for the Springfield Union.

Although Mr. Brucker was a teacher, au-

thor and government adviser, he said he chose journalism as a career in the belief it was one of the most important guards of the democratic process.

"I look upon journalism as one of man's noble callings," he wrote in a recent column, although he cautioned against the news media turning into the "mob media whenever a spectacular event comes along."

Mr. Brucker never made much notice as a reporter, but his deep and compelling belief in the freedom of the press brought him to national acclaim. In 1956, he led a fight against the Eisenhower Administration's ban of American newsmen from visiting the People's Republic of China, including a verbal confrontation with then Secretary of State John Foster Dulles.

It was almost two decades later, however, before American newsmen were allowed into China, accompanying former President Richard M. Nixon on his historic visit to Peking.

Mr. Brucker's editorials, speeches and, more recently, syndicated columns repeatedly rang out the same message throughout his life as an editor, journalist and educator—true democracy and open government must go hand-in-hand.

"We can't have government by the people and for the people unless the people know what the government is doing," he said. 'Judges, government administrators and politicians frequently do not recognize that the right to know belongs to the people."

Mr. Brucker also believed the news media should present events as they are, factually and with "dignity and decorum."

"If we believe in our calling, if we believe it is a high duty to seek the truth according to our lights and to print it, then we must follow the truth whereever it may lead," he

Mr. Brucker's opinions, many of them issued as chairman of the American Society of Newspaper Editor's Freedom of Information Committee from 1956 to 1959, were respected, praised and repeated by journalists throughout the nation.

Dwight E. Sargent, editorial editor of the former New York Herald Tribune, once described Mr. Brucker as having the "bearing of a Senator, the conscience of a Congregational minister, the literacy of a college president and the restless mind of a good lawyer."

Sargent recalled that Brucker, as a reporter for the former New York World, was told by his editor to forget everything he had learned as a student at Columbia School of Journalism.

"Herb never listened, nor forgot, as the old editor shuffled off into obliviation and the young cub grew up to be one of journalism's most respected practitioner," Sargent said.

Mr. Brucker, after working for several daily newspapers, returned to Columbia in 1935 as an associate professor. He became a professor in 1942.

After serving in the Office of War Information from 1942 to 1944, Mr. Brucker arrived at The Courant. He retired 22 years later, but never quite got the ink or ivy out of his veins. He was editor of The Courant's editorial page from 1947 to 1966.

For three years, he ran the University Professional Journalism Fellowship program, through which journalists came to Stanford to study and return to their careers.

In 1975, Gov. Grasso named him one of three members of the Freedom of Information Commission, which had just been created. Mr. Brucker continued pushing for open government and the right of the people to know in his new post. He resigned two weeks ago because of cancer.

The author of four books on journalism, Mr. Brucker's views have inspired thousands of journalism school students and members the working press for several decades. In "Communication is Power," published

in 1973, Mr. Brucker wrote:

'Newspapers must not risk the blasphemy of playing God. They must not seek to lessen or to prevent some Evil by withholding news of what has happened or by playing it down or blowing it up. If they distort the truth, some Evil worse than the one they seek to avoid may follow. The news is not a device to be turned on and off like faucets to achieve some end. It is an end in itself."

Mr. Brucker's book, "Freedom of Information," published in 1949, won him the Kappa Tau Alpha award as the best piece of journalism written that year. It also won him the Connecticut Education Association award two years later as the book "which more than any other work sets forth the fundamental principles and purposes of our

profession."

T. H. Parker former Courant critic and editorial writer, who began his career with Mr. Brucker on the Springfield Union, attributes the following quote to his late colleague, one which sums up what he believed and fought for throughout his life.

'Send not to know whom news suppres-

sion tolls: It tolls for thee."

He leaves his wife, Mrs. Elizabeth Brucker, two sons; Christopher Brucker of Bristol and Thomas Brucker of Mercer Island, Wash.; a daughter, Sydney Sowles of Brookline, Mass.; two stepsons; William Dominick of Richmond, Va., and Anthony Dominick of Starkborough, Vt., and 13 grandchildren.

The memorial service will be Saturday at

p.m. at St John's Episcopal Church, West Hartford. Burial will be at the convenience of the family. There will be no calling hours.

Memorial donations may be made to the American Cancer Society, 670 Prospect Ave., West Hartford 06117. The James T. Pratt Funeral Home, 71 Farmington Ave., has charge of arrangements.

HERBERT BRUCKER

Physical, intellectual and moral courage is not always conterminous in man, but when these attributes are naturally met, we have an individual to be cultivated and cherished. Such an individual was Herbert Brucker.

Mr. Brucker, whose career as editorial page editor of The Courant was the longest of several he pursued, established his intellectual and moral courage during a lifetime of putting both up for public scrutiny and appraisal. His physical courage was never at issue, but its presence was attested by one of his final communications to this newspaper. "It's cancer. Will keep columns coming as I can, and will keep you informed when the full score is in."

We, and here the we includes a wide circle of friends as well as colleagues, have now received the full score. It might seem appropriate to say we have received it with regret, which is true, but in deference to Mr. Bruck-er, whose sights were always set upon the possible to the exclusion of the impossible, will refrain from expressions whose futility

is saved only by sincerity.

The columns to which Mr. Brucker referred were ones frequently printed in recent years in this newspaper and certain others. Their content was the distillation of many years of competent study and keen observation of both history and current events, laid out either on broad canvas or minute detail. Mr. Brucker's liberal views were tempered by reality and an awareness of human dignity, and while his written thought was capable of stirring controversy or dissent, none could charge motivation either selfish or mean.

Mr. Brucker not only authored and left behind books of quality and substance, editorials and weekly columns that usually essayed the most difficult and thus often unpopular subjects. He also leaves the image of a real man. In the words of a Courant writer, writing for a newspaper trade magazine when Mr. Brucker was president of the American Society of Newspaper Editors, here was a six-footer, lean as hickory, with a craggy look, laconic in speech, urbane in manner, whose interests ranged from the Federalist Papers to fast sports cars and fast ski slopes.

Freedom of information and the people's companion right to know were unflaggingly championed by Mr. Brucker. His approach was simple: Let there be no impediment. Then he would devote time and energy combating any move or threat to restrict what he was convinced was basic to a good and enduring government and to the ability of free people to solve common problems in ways befitting the highest concepts of de-

mocracy

Journalism and the ideas and principles impinging upon it are the better for Mr. Brucker having been a part of it. Former journalism professor, editorialist, director of professioal journalism fellowships, author of four books on unfettered communications and first chairman of the state's Freedom of Information Commission, Mr. Brucker's 78 years were steadily and fruitfully employed.

It was natural for him to become an authority on the Federalist papers. Liberty of thought, lives and action was to him paramount. What the previously quoted Courant writer also once said of Mr. Brucker bears repeating now: Where liberty is concerned, for him its bell rings at the end of every typewriter line.

Fortunately for many, what Mr. Brucker has left behind will continue to activate that

bell, long, loud and clear.

SENATOR THURMOND'S OUTSTAND-ING WORK

Mr. HANSEN. Mr. President, while the distinguished senior Senator from South Carolina and I have disagreed on a number of provisions in the new Senate code of conduct, I want to take this oppor-tunity to note that he has done an excellent job as vice chairman of the committee which drafted the code.

STROM THURMOND, as we all know, is a man of impeccable character and the Senate and the Nation owe him a great debt for his outstanding work as vice chairman in drafting the code of ethics for the U.S. Senate.

Senator Thurmond has been a stalwart on this matter and I want to take this means to commend him for his most diligent work on a difficult and complex assignment

I want to thank Senator THURMOND for his efforts in light of the sensitivity of the subject matter and the brief period of time the committee had to work.

Mr. President, at a breakfast meeting this morning, our distinguished friend from South Carolina spoke on the religion of Abraham Lincoln. Members will find Senator Thurmond's comments both inspiring and interesting.

I ask unanimous consent that they may be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD. as follows:

THE RELIGION OF ABRAHAM LINCOLN (Remarks by Senator STROM THURMOND)

One of the greatest blessings we enjoy as American citizens is our rich abundance of national heroes. These men and women, who have adorned every period of American history, provide us with worthy examples of character and achievement. We can look to them for needed guidance in both our public and our private lives.

I am going to say a few words today about one such figure—Abraham Lincoln. Abraham Lincoln is arguably the most admired American of all, and he arguably deserves to be. He had resources of character and intellect that, even in an age of great men, shone forth like the moon among the stars. His service to the nation was unique. To contemporary Americans, looking back upon his life and

career, he seems almost superhuman.
Yet Lincoln himself entertained no such illusions. He knew his limitations. He recognized that he was only a man-frail, fallible, and mortal. Surely, we might think, if any-one ever had within himself the capacity to cope with the problems of life, it was Abraham Lincoln. The truth is very different: Lincoln himself was constantly seeking the same guidance which many now seek in him.

Where he sought this guidance most of you probably know. Authorities on the subject call Lincoln our most religious president. It was faith that supported and consoled him in times of need, particularly dur-

ing the last years of his life.

The subject of Lincoln's religion is as instructive as it is interesting. His religious views were deeply personal—so much so that he never joined any particular church. Moreover, his faith was not static but dynamic, deepening and intensifying as he grew older.

When he was a young man, his interest in religion, while keen, was mainly speculative. He knew his Bible well. It was probably the only book his family owned, and we can imagine him, as a boy, poring over the Old and New Testaments by firelight after a hard day's work. His speeches and writings, and such fragments of his conversation as have been preserved, are loaded with Biblical stories and language. Nevertheless, he seems to have rejected the conventional Christianity of the frontier, and to have adopted the impersonal religion, known as Deism, that was then popular in intellectual circles. He refrained from using the word God, preferring philosophical terms like Supreme Being, Divine Providence, and The Deity.

As the years went by, he got something of reputation for his unorthodoxy. Indeed, during his campaign for Congress in 1846, his opponent, a famous and eloquent preacher, attacked him as an atheist. In defending himself, Lincoln did not assert that he was a Christian, but only denied that he had ever

scoffed at Christianity.

The story is told of how, in the middle of this campaign, his opponent was addressing a religious meeting at which Lincoln was present. The preacher demanded that all of his listeners who wanted to go to heaven, or did not want to go to hell, should stand up. Everyone stood up except Lincoln. Trying to score some political points, the preacher cried out, "Mr. Lincoln, where are you going?

Lincoln answered, "I am going to Con-

This lighthearted remark must have amused more people than it offended, for Lincoln won the election.

As increasing age brought increasing responsibilities, however, Lincoln's religious views became more serious and more substantial. Personal grief contributed significantly to this development. Lincoln's four-year-old son Eddie died in 1850. Thereafter, his wife's health became more and more er-

ratic. Politics brought other concerns, less personal but equally distressing. His election as president prompted the dissolution of the union. Leaving his friends at Springfield in 1861, he spoke poignantly of "Him who can go with me, and remain with you, and be everywhere for good."

Nevertheless, the religious habits of his youth did not die easily. In his First Inaugural Address, the new president made only one reference to religion, mentioning in characteristically vague language "the Al-mighty Ruler of Nations." In this speech, he was arguing against the need for war between the North and the South.

When the war came, in spite of his appeals, Lincoln was horrified by its irrationality and brutality. Many are the accounts of his emotional reactions to unexpected deaths and defeats. Probably never in history has so compassionate a man had to order so many nen to go forth and kill or be killed.

To add to the grief occasioned by the war, in 1862 Lincoln lost another son, Willie, a boy of only twelve years. This even left the president disconsolate, and was probably the critical point in the transformation of his religious views. For a period of several weeks, he secluded himself from the public and even from his closest advisors. Finally, he succeeded in pulling himself together, telling his wife, "Mary, we must live." He was not, however, the same as before.

While he had previously attended church irregularly, and only on Sundays, he now began to steal away from the White House in the middle of the week for prayer meetings. Prayer assumed a new importance for him. He confided to a friendly journalist, "I have been driven many times upon my knees by the overwhelming conviction that I had nowhere else to go." The death of Willie, if it was not the first of these times, was surely one of the foremost.

In 1863, he proclaimed a national day of fasting, chiding the nation for its godless ways. "We have forgotten God," he said in his proclamation. ". . . Intoxicated with un-broken success, we have become too selfsufficient to feel the necessity of redeeming and preserving grace, too proud to pray to the God that made us."

There can be little question that Lincoln was thinking of himself, at least to some extent, when he wrote this denunciation. His earlier attitudes, he was implicitly confessing, were wrong.

His speculative interest in religion, as an academic field like philosophy or law, had now given way to passionate conviction. Religion came to dominate his thinking. On the field of Gettysburg, when urging the nation on toward "a new birth of freedom," he emphasized that this birth should be accomplished "under God." It was in his Second Inaugural Address, though, that his new attitude was most evident.

This speech is not only one of the most important political documents in American history, but a singular and powerful religious statement. The last half of it reads almost like a devotional essay. The contrast with the purely political First Inaugural is striking.

Lincoln had obviously been wrestling with the age-old question of how a merciful and all-powerful God can allow suffering in the world. The terrible carnage of the war made this question inescapable for so acute a mind. Lincoln's answer, as formulated in the Second Inaugural, reflects complete confidence in God, complete acceptance of His

"The Almighty has his own purposes," he said. ". . . Fondly do we hope, fervently do we pray, that this mighty scourage of war may speedily pass away. Nevertheless, even if the war goes on indefinitely, still it must be said, 'the judgments of the Lord are true and righteous altogether."

These words mark the end of Abraham

Lincoln's religious journey, the culmination of a lifetime of hard thinking and varied experience. Through struggle and strife, trial and tragedy, he had found his way to a faith that gave him peace. Scarcely a month later he lay dying of the assassin's bullet.

When his sorely tried heart finally stopped beating, Secretary of War Edwin Stanton is supposed to have remarked, "Now he belongs to the ages." There is, however, another version of the story. According to this version, Stanton's remark was, "Now he belongs to the angels."

On first consideration, it is an odd image the rough, bearded figure of Abraham Lincoln joining the shining heavenly hosts. Appearances aside, though, it seems particularly appropriate. It would be hard to imagine a more angelic character than that of Abraham Lincoln-"with malice toward none, with charity for all, with firmness in the right as God gives us to see the right."

Furthermore, Lincoln gave to the world religious message which clearly entitles him to be included among the spokesmen of God. That message may be stated very simply: a good head, a big heart, and physical strength are not enough in this world. Lincoln had all of these attributes in the highest degree, and while they brought him success, they did not bring him peace. Only faith in God did that.

Only faith in God will do that for us, most of whom would certainly not claim to be superior to Abraham Lincoln. Let the memory of this great man, falling on his knees in prayer, inspire us all to do the same, and frequently. When we, like Lincoln, have where else to go," we should not be bashful or hesitant about going there. With humble and receptive hearts, we may gain the same guidance that he did, the Divine guidance which is essential to a good and happy life.

FINANCIAL HOLDINGS AND INCOME TAX RETURN OF SENATOR WIL-LIAM PROXMIRE

Mr. PROXMIRE. Mr. President, 1963, 1965, 1967, 1970, 1972, 1973, 1974, 1975, and 1976, I submitted for the REC-ORD a history of my financial holdings from the time I was first elected to the Senate in August of 1957 until April 1976. In order to bring the full record up to date, I submit herewith the history of my financial holdings since April of 1976.

The bulk of the securities I hold are now in State and municipal bonds to-

taling \$55,000.

My other assets include ownership of my home and furnishings in Washington, D.C., on which I owe a mortgage to the Perpetual Building Association of Washington, D.C.; ownership of my home and furnishings in Madison, Wis., from which home I received \$350 per month in rent until January of 1977 and receive nothing now; ownership of a 1972 automobile; ownership of one checking account in a Washington bank, one checking account in a Madison, bank and one savings account in a Madison bank. The combined balance as of this date, in these three accounts is \$7,576.01.

I also hold a note on my former residence in Washington at 3220 Ordway in the amount of \$9,252.

Trust custody of stock in my children's names has been turned over to them directly as they are over 21.

I estimate my net worth to be about \$321,000.

To the best of my knowledge, this is an accurate record of my financial holdings and obligations.

In addition, I herewith submit a balance sheet showing my net worth and how it was arrived at, a copy of my 1976 Federal tax return and a list of all honorariums received during 1976-\$23,500.

I paid \$31,685 to the Federal Government in taxes on 1976 income. In addition, I paid \$7,943.96 to the State of Wisconsin on 1976 income.

I ask unanimous consent that the balance sheet, copy of 1976 Federal tax return, and list of all honorariums received in 1976 be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Net worth of Senator William Proxmire as of April 1977

CONSERVATION AND OUR GROW-ING DEPENDENCE ON FOREIGN OIL

Mr. PERCY. Mr. President, a recent New York Times article highlights the dependent relationship which now exists between the economic security of the industrialized Western democracies and their foreign sources of energy.

Western society continues to enjoy a comfortable standard of living; however, it devours more and more energy every day. In so doing, the West has irresponsibly allowed itself to become dependent on a monopolized foreign fuel.

Since the 1973 Arab oil embargo, Western imports of Middle Eastern fossil fuels, especially American imports, have risen steadily. Former Secretary of State Kissinger has predicted a nearly 40-percent rise in Western imports of OPEC oil by 1985. Inexorably Europe and America are becoming beholden to the oil nations, and still the industrialized West has failed to evolve any coherent policy to deal with this situation.

Like a debilitating habit, the West continues to lavishly consume oil without regard for its future interests. Ulf Lantzke, Secretary General of the International Energy Agency, states that:

As the 1973-74 energy crisis recedes from the public memory, there is a tendency to believe the energy crisis is behind us. Nothing could be further from the truth.

He adds that the best source of energy is conservation:

A barrel saved is as useful as a barrel produced-better in many respects.

Energy waste can be brought under control; the NATO allies, working together, can begin to lead the Western states away from the dangerous path of overdependence on foreign oil.

Clyde H. Farnsworth's report is timely and informative; Mr. President, I ask unanimous consent that the New York Times article of January 30, 1977, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Jan. 30, 1977]

FOR THE WEST, ENERGY WARNINGS
PARIS.—"As the 1973-74 energy crisis recedes from the public memory, there is a

tendency to believe the energy crisis is behind us. Nothing could be further from the truth," warns Ulf Lantzke, secretary general of the International Energy Agency, a grouping of 19 Western nations.

"Unless the industrialized democracies implement together a coherent international strategy, we will face another and in the long-term perhaps more serious crisis," added

the West German diplomat.

The world's—especially America's dependence on the Organization of Petroleum Exporting Countries has increased instead of lessened, despite the two-tier price increases announced in December and the quadrupling of prices since 1973. Conservation has not made great strides. Large-scale tapping of alternative energy sources, the experts say, is not for tomorrow.

Former Secretary of State Henry A. Kissinger, for example, has forecast that Western imports of OPEC oil will increase from 27 million barrels a day in 1976 to 37 million by

1985.

Such rising demand suggests that OPEC will retain power to set prices at least until 1980 and probably well after. Still, the present split-price policy may indicate a better situation awaits the consumers than in recent years.

Some predict the two-stage, 15 percent increase imposed by 11 OPEC members for this year may not hold because the Saudis, accounting for most of OPEC's proven reserves and a third of present production, say they will lift output of their cheaper oil. That could force the price rise down to the 5 per

cent level set by Saudi Arabia.

Ian Seymour, news editor of the authoritative Middle East Economic Survey, says that Saudi Arabia and the United Arab Emirates can increase their daily production by more than 3 million barrels to a combined total of 12.5 million barrels daily of light, medium, and heavy crudes, at prices substantially lower than those offered by the other 11 OPEC producers.

"And this at a time when the normal level of demand may be depressed by the precipitate unloading of the stocks amassed by speculators in recent months, to say nothing of a more discreet drawing down of stocks by the major companies," he adds.

The International Energy Agency places the amount of stockpile building at 3 million to 4 million barrels daily, which represents more than 10 percent of OPEC's pro-

duction.

"In this kind of free-for-all situation some OPEC members obviously stand to suffer substantial losses in export volumes," says Mr. Seymour of the Middle East Economic Survey

For Europe and the United States new oil sources may also tend to ease the supply picture. The United States is getting oil from the North Shore of Alaska, although it may be necessary to build expensive pipelines to get it to oil-deficient areas.

Britain's North Sea oil is already reducing oil import needs and by the 1980's should make Britain self-sufficient with a little to

export.

But paying for the oil imports is still a problem, particularly for the poorer coun-

"We're grateful to Saudi Arabia, but the price of oil is so high that any increase at all makes it more difficult to manage the world's economies," said John Fay, chief of the economics department of the Organization for Economic Cooperation and Development.

His department forecasts growth of Western economies next year at nearly 4 percent, not enough to get the unemployed back to work, but ample to keep the world from tilting into a new recession.

Paul A. Volcker, president of the Federal Reserve Bank of New York, has said, "If the oil deficit were spread out evenly and fairly, we could probably keep going for some time." But it isn't. "The deficits are becoming heavily concentrated in some countries and often those least able to bear them," he said, alluding to Britain, France and Italy.

In 1976 the oil consumers' deficit with the OPEC nations ran an estimated \$40 billion, and the figure is expected to rise by \$5 to \$10 billion this year, as a result of the price in-

Many of the consuming nations are having to borrow from private sources—some of which are indicating that there are limits on lending—to finance their oil purchases. Mr. Volcker has suggested instead an "internationally supervised credit" to cover the oil deficit.

The depressing impact of oil prices on other nations' growth and the position within OPEC of Saudi Arabia, which is worried about effects of world economic turmoil on its own political stability are closely related.

political stability, are closely related.

For the moment, therefore, Saudi Arabia sees its interests aligned with the West's and at the December meeting at Doha, Qatar, was willing to give dramatic demonstration of its policy shift by creating the first fissure in OPEC since it was created in 1960.

Western diplomats sense this as a major turning point. The Saudis, however, do seem determined to assert their power politically, as well as economically, by pressing for a permanent settlement in the Middle East and promoting solid achievements in the dialogue between rich and poor countries, which is winding up, at least in a first stage, in Paris this spring.

As long as the tensions remain high in the Middle East, according to diplomats who believe they understand Saudi thinking, economic advancement within Saudi Arabia will be jeopardized, and threats will hang over the political life of the regime.

Among alternative energy sources, nuclear power is continuing to be developed in Western Europe, as well as Japan and North America, despite environmental protests, which have caused some rethinking of sites but have not significantly delayed most programs.

The best alternative source is conservation Says Dr. Lantzke, the head of the agency, "A barrel saved is as useful as a barrel produced—better in many respects."

CLYDE H. FARNSWORTH.

CRUISE MISSILES

Mr. HUMPHREY. Mr. President, in the February issue of Scientific American there appeared a very comprehensive article on cruise missiles, written by Mr. Kosta Tsipis, a physicist at the Massachusetts Institute of Technology.

Since the article is very technical in scope, it will require very careful reading. However, I strongly recommend that my colleagues study the piece carefully, because it makes a significant contribution to a better understanding of the cruise missile and its implications for arms control.

While not going into any great detail, I would like to point to certain aspects of the article. The author notes:

Two central conclusions can be drawn from the foregoing analysis of the technology and the performance characteristics of existing and contemplated cruise missiles. The first is that with one possible exception the development and deployment of strategic cruise missiles at this time is counterproductive for three reasons: they are unnecessary, their deployment would nullify the existing strategic arms limitation agreements and obstruct similar future efforts, and their deployment on nuclear submarines would

increase the vulnerability and probably reduce the operational efficiency of that important deterrent force. The one possible exception is a future version of an airlaunched cruise missile that could be deployed on transport planes in place of longrange bombers. The price of such a system however, must be measured not only in dollars but also in terms of lost arms-control opportunities, the creation of new threats against this country and the abandonment of any numerical ceilings for strategic weapons.

The second conclusion is that negotiable criteria for differentiating between tactical and strategical versions of cruise missiles can and should be devised and incorporated into the design of future cruise missiles. . connaissance satellites can provide the U.S. with information that something may be taking place in the U.S.S.R., but they cannot ensure that something is not taking place. Therefore, although the U.S. can rely on such monitoring systems for early intelligence about cruise-missile developments in the U.S.S.R., the systems do not offer the unambiguous verification capability the U.S. Senate would need in order to ratify a treaty with the U.S.S.R. banning the development of strategic cruise missiles.

The author offered the following recommendation in summarizing his views on the efficacy of cruise missile development and deployment:

... A policy of unilateral restraint in the development and deployment of long-range cruise missiles by the U.S. not only is safe and desirable on economic grounds but also would allow for the orderly development of an effective tactical cruise missile.

Such a policy would of course impose stringent demands on the reconnaissance capabilities of both sides. It is essential for the success of present and future strategic arms limitation efforts to look ahead and define what reconnaissance capabilities will be necessary in order to bring these new weapons under control.

The author discusses the two classifications of cruise missiles—tactical and strategic. The tactical cruise missile is a short-range weapon which can travel a distance of approximately 500 kilometers. The strategic missile, however, can travel a distance of up to 5,000 kilometers. The interesting aspect about both types of missiles is that, outwardly, they look exactly alike. The basic difference is that the tactical cruise missile is furnished with a turbojet engine which exhausts its gases at 1,450° F. The strategic missile is provided with a turbofan engine which exhausts its gases at only 600° F. The difference between the exhaust temperatures of the two types of engines gives them different infrared signatures.

Cruise missiles are also highly flexible weapons. They can be launched from sea, land, or air. Because of the missile's versatility, some military officials believe that the need for manned fighter-bomber penetration of energy airspace might be eliminated eventually. Armed with such missiles the bombers would not have to penetrate the terminal air defenses of an opponent; they could merely penetrate to a given point and launch the long-range missiles toward their targets.

These planes would not have to be equipped with supersonic speed, an elaborate system of electronic countermeasures, or the capability of flying very low and very fast in order to avoid detection and evade attack.

The author explains that submarinelaunched cruise missiles would be a strategic useless weapon nearly Launching a cruise missile from ballistic-missile submarines would increase their vulnerability because the actual launching would reveal the position of the sub for hundreds of kilometers. In addition, it would take 30 minutes to launch 4 cruise missiles, while Poseidon or Trident missiles with 10 warheads each could be launched in less than 5 minutes, making much less underwater noise.

The article is a fascinating study of the cruise missile, its capabilities, its weaknesses, and its implications for future strategic arms limitation agreements. I urge my colleagues to give it every consideration.

Mr. President, I ask unanimous consent the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD. as follows:

[From the Scientific American, February 19771

CRUISE MISSILES

(By Kosta Tsipis)

The partial success achieved by negotiators for the U.S. and the U.S.S.R. in the ongoing effort to limit the deployment of strategic nuclear weapons rests on the mutual recognition that each side has at its disposal the "national technical means" (primarily reconnaissance satellites) to distinguish reliably between strategic, or intercontinental-range, weapons and all the other weapons in the other side's arsenal. The long-range cruise missile, a new type of weapon currently under development in the U.S., may prove to be an exception to that The problem is that there appears to be no observable distinction between longrange cruise missiles (that is, those capable of strategic missions) and short-range cruise missiles (those suitable only for tactical missions). In other words, there is no obvious, unambiguous correlation between the physical appearance of a given cruise missile and its intended target.

According to reports in the daily press, the heralded advent of the long-range cruise missile has already created a major obstacle to the successful conclusion of the second round of strategic-arms-limitation (SALT II) between the U.S. and the U.S.S.R. The immediate issue is whether or not cruise missiles should be included in the total of 2,400 strategic delivery vehicles that the 1974 Vladivostok understanding between President Ford and Secretary Brezhnev had set as an upper limit for both parties. The basic properties of cruise missiles that have led to the present disagreement threaten to similarly impede future strategic-arms-limitation negotiations.

The arms-control dilemma presented by the cruise missile is compounded by the fact that although cruise missiles appear to be operationally inferior to existing strategic weapons in either a deterrent role or a counterforce role, they have the potential of becoming extremely cost-effective tactical weapons. For example, short-range cruise missiles could eventually replace the manned fighter-bomber in many of its missions. thereby substantially reducing the number of costly facilities such as aircraft carriers and foreign bases that such aircraft require.

Accordingly the U.S. has opposed the inclusion of cruise missiles in the numerical quota for strategic delivery vehicles, because-given the visual indistinguishability of the different types of cruise missile-such a provision would prevent the deployment of tactical cruise missiles as well as strategic ones. The U.S.S.R., on the other hand, insists on including all cruise missiles potentially capable of long-range missions in the quota for strategic weapons, precisely be-cause there would be no way to determine whether a given cruise missile deployed by the U.S. is a tactical weapon or a strategic one. Thus the impasse at SALT II continues.

But what is a cruise missile? How does it work? What can it do, and why is it not possible to tell one that has a range of 5,000 kilometers from one that can fly only a tenth of that distance?

I shall attempt to answer those questions here by describing the various types of cruise missile now under development or planned, by examining the strategic and tactical capabilities of the different versions and by discussing their potential military usefulness and their implications for arms-control efforts. I shall also address the difficult problem of relating the intended mission of a cruise missile to its observable characteristics by offering a suggestion for a possible technical basis on which the problem might be solved.

A cruise missile can be defined as a dispensable, pilotless, self-guided, continuously powered. air-breathing warhead-delivery vehicle that flies just like an airplane, supported by aerodynamic surfaces. Unlike a ballistic missile, which is powered and hence usually guided for only a brief initial part of its flight, after which it follows a free-fall trajectory governed only by the local gravita-tional field, a cruise missile requires continuous guidance, since both the velocity and the direction of its flight can be unpredictably altered by local weather conditions or changes in the performance of the propulsion system.

ballistic missile is guided for the first five of the 20 minutes or so it takes to travel 5,000 kilometers; a cruise missile, which usually flies at subsonic speed, would require close to six hours of continuously guided flight to cover the same distance. Hence guidance errors that accumulate with time would be almost 100 times larger for a cruise missile than for a ballistic missile with a comparable range. The cumulative deviation from a preassigned track over a trajectory of thousands of kilometers would be very large in the case of the cruise missile, and therefore its accurate arrival on target could be achieved only with continuguidance that is corrected from time to time by fresh location information. To obtain the necessary location information accurately a long-range cruise missile employs a device that can correlate information obtained by an onboard sensor about the terrain it is flying over with some kind of map stored in the memory of an onboard computer.

Cruise missiles have served as warheaddelivery systems in the past, beginning with the German V-1 "buzz bomb" of World War II and continuing with such weapons as the U.S. Matador. Regulus and Snark missiles and the Russian Shaddock missile, which is still deployed aboard some Russian submarines and surface warships. None of these earlier versions were capable of obtaining location information to correct their guidance system during flight, and as a result they were not very accurate. Further-more, they were powered by inefficient jet engines that in general did not allow ranges in excess of a few hundred kilometers.

The main difference between the older versions of the cruise missile and those now under development in the U.S. is that recent advances in technology have made available two important new components: (1) microelectronic devices that can update the location information of a cruise missile while it is in flight and therefore improve its accuracy by three orders of magnitude and (2) small, efficient jet engines that for every hour of flight consume only about a pound of fuel for every pound of thrust they generate. Both of these technological advances affect primarily the performance of strategic cruise missiles, since at tactical ranges the flight time is measured in minutes and therefore even a moderately accurate guidance sys-tem needs no mid-flight correction. Moreover, a tactical missile can be fitted with homing device, such as radar, that detects the target and guides the missile onto it.

A long-range cruise missile employs an inertial-guidance system, consisting essentially of three or more accelerometers mounted on gyroscope-stabilized platforms, to guide it along a preassigned course. A practical inertial-guidance system suitable for a cruise missile could allow the missile to drift about a kilometer or so off course for every hour of flight. The effects of weather and the imperfections of the jet engine that powers the missile increase the drift. After several hours of flight the missile could be more kilometers away from its intended impact point. If, however, the missile could from time to time "recognize" where it is and compare its actual position with where it should be according to its preassigned trajectory, then the on-board computer could instruct the automatic pilot to make the appropriate maneuvers to bring the missile back to the correct trajectory. Furthermore, the known difference between the actual position and the intended position is used by the computer to calibrate and reset the inertial-guidance system, a process that com-pensates for and reduces the missile's drift by a factor of two or three.

There are several ways in which a cruise missile can determine its actual location while it is in flight. I shall briefly describe three such systems; they are called the terrain-contour-matching technique (Tercom in current military terminology), the areacorrelation technique and the global-positioning-satellite technique.

The terrain-matching technique, first patented in 1958, relies for its operating principle on the simple fact that the altitude of the ground above sea level varies as a function of location. If one were to make a rectangular map of an area two kilometers wide and 10 kilometers long, divide the map into squares perhaps 100 meters on a side and record in each square the average elevation of the ground in it, one would obtain a digital map consisting of 2,000 numbers, each number corresponding to the elevation of a point of known coordinates on the ground. A set of such maps, which can be made much larger and can have squares with smaller sides if required, is stored in the memory of the computer aboard the missile.

The missile is also provided with a downlooking radar altimeter capable of resolving objects on the ground smaller than the map squares from a height of several kilometers. As the missile approaches the region for which the computer memory has a map, the altimeter starts providing a stream of ground-elevation data. The computer, by comparing these data with the elevation data it has in its memory, can determine the actual location of the missile with an accuracy comparble to the size of the map cell. It then instructs the autopilot to take any corrective steps necessary to return the missile to its intended trajectory. As many as 20 such maps can be stored in the memory of the computer to enable the missile to update its location information and correct its trajectory frequently during its overland

The area-correlation method, which is still in the research stage, is based on a similar mapping principle. Instead of ground alti-

tude above sea level, however, it measures the microwave reflectivity of the ground as a function of location. Instead of a radar altimeter the missile has a detector that can sense the differences in the microwave reflectivity of the terrain it is flying over. Advanced area-correlation schemes missiles with on-board systems that incorporate terrain maps made at one part of the electromagnetic spectrum and detectors that operate at a different wavelength. For example, such a system might be able to match signals from a microwave radiometer or an infrared detector with data from a map made in the visible part of the spectrum. This approach is possible because features such as lakes, rivers, roads, railroads and other man-made structures offer sharp "contrast edges" over a large portion of the spectrum. The area-correlation technique can be applied to determine the location of the missile over all kinds of terrain, whereas the terrain-matching technique works well only over rough, hilly ground. Neither system works over water.

The third way to locate the position of a cruise missile is the global-positioning-satellite system, which is also under development in the U.S. The projected system will consist of 24 satellites in polar orbits positioned in such a manner that any place on the earth's surface will have at least four of the satellites in sight at all times. Every few thousandths of a second the satellites will broadcast exactly synchronous coded signals that can be received by passive equipment on the cruise missile.

By determining the difference in the arrival times of four such signals the missile's computer can calculate the distance of the missile from each satellite. In addition the satellites will broadcast information describing their orbits around the earth. With this information and the four different arrival times of the signals the missile's computer can determine the true position of the missile to within 10 meters in three dimensions without any other external data. From that information it can in turn deduce its velocity at any instant.

its velocity at any instant.

Of the three techniques I have described only the satellite system promises to be inexpensive enough to be practical for short-range cruise missiles. Because of their brief flight time such missiles do not require position-updating information. Instead they need to recognize and home on their target. For mobile targets radar homing is preferred where it is possible, but for fixed targets beyond the line of sight the global-position-satellite system can be used to maneuver the missile onto the known location of the target.

Advances in the technology of small jet engines have been equally important in the development of both tactical and strategic missiles. Small turbofan engines cruise weighing less than 130 pounds and yet capable of generating as much as 600 pounds of thrust are now available. Engines of this type consume less fuel than turbojets of equivalent size: they are complex systems, however, and hence they cost much more. Accordingly turbofan engines are considered suitable for cruise missiles with a range of more than 500 kilometers that carry expensive payloads such as nuclear warheads, whereas turbojets are cost-effective for cruise missiles with a range of less than 500 kilometers that carry conventional highexplosive warheads.

The difference in the efficiency of the two types of jet engine is related in part to the difference in the temperature of the exhaust gases produced by the engines. Although the turbine-inlet temperature for small engines of both types is limited to about 1,850 degrees Fahrenheit, a turbojet engine exhausts its gases at 1,450 degrees, whereas

a turbofan engine, because of turbulent mixing at the outlet, exhausts them at 600 degrees. Obviously the latter engine makes more efficient use of the heat energy of its fuel. The difference between the exhaust temperatures of the two types of engine gives them different infrared "signatures." As a result it should in principle be possible to determine from a distance whether a given missile is powered by a turbofan engine or a turbojet engine.

The rate of progress in microelectronics has been spectacular, but the development of small jet engines is laborious. It takes many years to develop a new engine or to improve the efficiency of an existing one by a few percent. It is therefore rasonable to expect that the power plants for cruise missiles will not change substantially in the next decade or so. Small improvements in efficiency, and hence in range for a fixed volume of fuel, can be expected as new composite materials are adopted for turbine blades, but basically the fuel-consumption rate and the thrust of the small engines are not subject to a technological breakthrough. One can conclude that the aerodynamic performance of cruise missiles will not change greatly in the near future.

The technological advances I have described have been applied in the devlopment of several types of U.S. cruise missile. Of these I shall discuss only two: the Harpoon antishipping missile, which is now entering production and is strictly a tactical cruise missile, and the sea-launched cruise missile (SLCM), which is still under development and which has both a strategic version and a tactical one. These two major types of missile have been chosen because in combination they illustrate the special advantages and disadvantages of cruise missiles.

The Harpoon missile is quite small, meas uring 34 centimeters in diameter and 3.84 meters in length. Its total volume is only .3 cubic meter. Without its booster rocket it weighs 1,114 pounds. It can be launched against a ship from a submarine, a surface vessel or an airplane. A ground-based version is also possible. The Harpoon is powered by a turbojet engine that has a thrust of 660 pounds and a fuel-consumption rate of about 1.5 pounds of fuel per pound of thrust per hour of flight. That gives the Harpoon a maximum range of about 100 Kilometers at a speed of Mach .85 (85 percent of the speed of sound). Since the engine is expected to work only for a short time it has many cast parts instead of machined ones. Hence it can operate satisfactorily for only a short period but costs substantially less than a turbofan engine of the same size designed to operate for many hours.

The guidance system of the Harpoon missile consists of a radar altimeter that keeps it flying a few meters above the surface of the sea, a mid-course guidance unit that keeps it on a steady course and a sophisticated active radar scanner that can detect a target as small as a patrol boat in all weather conditions at about half its maximum range and a target as large as a destroyer at much greater distances. The missile can distinguish betwen two targets if they are well separated and will head for the larger one. It carries a 500-pound warhead that penetrates the deck of the target ship and explodes inside by means of a deceleration fuse. In 32 launches from a variety of sea and air platforms the Harpoon has found its target 29 times at operational ranges

Both the tactical and the strategic versions of the sea-launched cruise missile are 53 centimeters in diameter and 6.24 meters long and have a volume of 1.37 cubic meters without their booster rocket. Without the protective capsule in which they are carried and launched they both weigh about 3,200 pounds. Both versions can be launched from

the torpedo tubes of a submarine or from a surface ship, an airplane or a ground platform. The exact ranges of the two versions are classified, but the aerodynamic properties of the missile indicate that the strategic version is capable of a range of 2,000 kilometers at low altitude and perhaps 50 percent more if the first 1,500 kilometers are flown at higher altitude and the rest at treetop level. The strategic version is powered by a turbofan engine with a thrust of 600 pounds and an average fuel-consumption rate at sea level of about a pound of fuel per pound of thrust per hour of flight. At sea level the missile has a cruising speed of Mach .7 and a maximum speed of Mach .85. A much lower fuelconsumption rate is possible at higher altitudes with a lower net thrust. Since the missile cannot fly at speeds lower than Mach .44, a booster rocket is used that ignites on launching and propels the missile for 12 seconds. At a height of 400 meters (assuming an ascent angle of 55 degrees) and a speed of Mach .55 the turbofan engine takes over. The booster is not necessary for missiles launched from aircraft.

The guidance package of the strategic sea-launched cruise missile consists of an inertial-guidance system with an intrinsic drift of about 900 meters per hour of flight, augmented by a terrain-matching system. The radar altimeter of the terrain-matching system enables the missile to fly as low as 20 meters over water, 50 meters over moderately hilly terrain and 100 meters over mountains. This capability makes the missile difficult to detect with ground-based radar. The gyroscopes of the inertial-guidance platform require 25 minutes to align after the missile has been loaded into the torpedo tube of a submarine, a task that in turn requires five minutes. Therefore the strategic SLCM can be launched from a submarine in salvos of two or four (depending on the number of torpedo tubes) at best only once every 30 minutes. The ignition of the booster rocket under water generates a large amount of acoustical energy that can be detected at great distances. In addition the booster creates copious bubbles that are visible on the surface of the water for more than five minutes after the launch, and the exhaust plume of the booster is visible over an area 80 kilometers in radius as the missile climbs to 400 meters. Accordingly the position of the submarine can be determined by a variety of means after it has launched one or more of its missiles under water.

The terrain-matching system of the strategic sea-launched cruise missile is provided with a dozen or more maps, on which the terrain is digitized at intervals of less than 100 meters and the elevations are recorded with an accuracy of better than three meters. Since the missile is expected to fly initially over water, where the updating of location information is impossible, the first land map is made wide enough (perhaps as wide as 10 kilometers) for the missile not to miss the intended landfall. The radar altimeter starts taking readings before the missile is expected to fly over a given map area and stops taking them at an equal distance after it has left that area. The computer uses a simple minimum-absolute-deviance algorithm to match the readings of the altimeter with the points on the map. There is such large redundancy in the altimeter data that synchronization errors or even attempts to jam the altimeter from the ground will not degrade the performance of the system.

The accuracy with which this missile can be guided to its target is at best equal to the size of a map square; in practice it is probably about half that good. Since map squares can be made quite small, say 10 meters on a side, it is possible in principle to have comparable missile accuracy. A number of factors contribute to the degradation of this level of accuracy, however, and so it is expected that

the strategic sea-launched cruise missile will have an accuracy of some 100 meters. The biggest errors are expected to come from human errors in mapping, from the injudicious choice of terrain to map and from the absence of suitable terrain for terrain-match-

ing guidance near some targets.

The tactical version of the sea-launched cruise missile is powered by a turbojet engine that gives it a range of about 500 kilometers. It is guided by a system very similar to the one in the Harpoon missile, consisting of a mid-course guidance unit that keeps the missile flying in a straight line but does not adjust for its being blown off course by the wind. In addition the missile has a radar scanner with a comparatively short range, probably no more than 50 kilometers, which is designed to guide it onto the target. The mid-course guidance unit has a drift of about .2 radian per hour of flight. Hence errors as large as 40 kilometers will result at the end 500-kilometer flight. Therefore once the missile is in flight it needs some external source of information on the exact position of its intended target.

The line of sight over water does not extend beyond 50 kilometers, so that the necessary information cannot be provided by the launching platform; it has to be obtained by another vehicle, a spotter aircraft or a heli-copter, which must be suitably equipped to identify the target and communicate the information to the launching platform or to the cruise missile itself. If the launching platform is a submarine, the tactical version of the sea-launched cruise missile becomes even more troublesome: not only will its launch reveal the position of the submarine but also problems of target acquisition and "friend/foe" identification become extremely complex. The range of the submarine's sonar is considerably shorter than 500 kilometers, and while the vessel is submerged it cannot communicate either with the cruise missile or with an observation platform such as an aircraft. The mismatch of the cruise missile's range to the submarine's target-acquisition range makes the tactical version of the sealaunched cruise missile a weapon of dubious

Cruise-missile technology offers such flexibility in range, basing and types of warhead that and almost unlimited variety of alternative designs is possible. Here I have chosen to speculate on the military characteristics and arms control implications of three possible types of missile because of the particularly challenging policy questions they raise. The first type is a very accurate long-range strategic cruise missile with a conventional high-explosive warhead; the second, which is already under development, is an airborne strategic cruise missile with a nucelar warhead; the third is a short-range land-based or ship-based tactical missile with a conventional markets.

ventional warhead.

There is little doubt that guidance techniques either in existence or under development can endow a strategic cruise missile with pinpoint accuracy at the end of a 5,000kilometer flight. This high degree of accuracy makes it feasible to use conventional war heads instead of nuclear ones against certain strategic targets such as large radar installations, industrial plants, petroleum refineries and so forth. It has been proposed that the U.S. develop a cruise missile that could carry a large conventional high-explosive warhead over intercontiental distances with an accuracy of better than 10 meters. This weapon would have to be about two cubic meters in volume (somewhat larger than the current sea-launched cruise missile), and it would have to be carried by either a surface ship or an aircraft of the cargo type; alternatively it could be landbased. If it were built in sufficiently large numbers, its pro-ponents argue, it could provide the option of a non-nuclear response to some hypothetical coercive actions of an opponent such as the U.S.S.R. Thus it could raise the threshold of nuclear retaliation by enabling the U.S. to destroy specific targets with minimal collateral damage and without the onerous political burdens of a nuclear attack.

The second type of cruise missile that is under serious consideration in the U.S. is the air-launched cruise missile (ALCM). The current version of the air-launched missile is expected to have about half the range of the strategic sea-launched one. It is designed to be carried by either the B-52 intercontinental bomber or the new supersonic B-1 bomber. Armed with such missiles, the bombers would not have to penetrate the terminal air defenses of an opponent; they could merely penetrate to a given point and launch the long-range missiles toward their targets. Proponents of the air-launched cruise missile point out that since such a "standoff" carrier plane would not have to penetrate the air defenses of an opponent, the plane would not have to have supersonic speed, an elaborate system of electronic countermeasures or the capability of flying very low and very fast in order to avoid detection and evade attack; in other words, it would not have to be a combat aircraft at all. As a matter of fact, it is argued, a commercial wide-bodied jet transport such as the Boeing 747 or the McDonnell Douglas DC-10 could serve to carry as many as 100 cruise missiles. Commercial planes of this type have a longer range without refueling than either the B-52 or the B-1 does. If they were armed with airlaunched cruise missiles, they would be able to replace the B-52 bomber in the U.S. arsenal at considerably less cost than the proposed B-1 could.

The third possible incarnation of the cruise-missile concept would be a tactical missile with a maximum range of 500 kilometers and a high-explosive warhead of between 400 and 500 pounds. This missile, its advocates say, could be guided exactly to its target either with the aid of the global-positioning-satellite system or by one of the pattern-recognition techniques; it could even be provided with the means to send back by way of a relaying aircraft or satellite a television outline of the terrain it files over as it approaches its target so that it could be guided remotely by a human operator.

Such a small missile (less than half a cubic meter in volume) could be equipped with an inexpensive turbojet engine and could be programmed to avoid air defenses, fly at a constant altitude and operate in all weather conditions. It could, its proponents maintain, replace the manned fighter-bomber in many of its missions. If it were built in large quantities, it could cost as little as \$50,000 per missile. Manned tactical aircraft, in contrast, currently cost more than \$10 million and require a large aircraft-carrier task force to be carried within range of their targets.

A typical task force can deploy only 36 attack alrcraft, each capable of delivering about a ton of bombs per sortie to the target with less accuracy than that possible with cruise missiles. The entire multibillion-dollar task force could be replaced by a naval force capable of launching 180 tactical cruise missiles per day and consisting of a variety of ships less vulnerable and much less expensive than aircraft carriers. Ultimately, the advocates of this version of the cruise missile point out, such a missile could replace all the tactical nuclear weapons stationed by the U.S. in Europe.

tioned by the U.S. in Europe.

In combination with short-range precision-guided missiles on the ground and remotely piloted vehicles carrying out the observation mission of manned aircraft, the tactical cruise missile armed with a chemical-explosive warhead may completely displace manned fighter-bombers and their long and costly logistical "tail" from the U.S. arsenal.

Such a development would constitute a profound change in the entire military posture of the U.S., since it implies the abandonment of high-cost, low-attrition manned aircraft and their replacement with low-cost, dispensable cruise missiles. This prospect raises a host of technical, military and arms-control questions that have so far remained largely unexamined.

Because of the small size, great accuracy and low cost of cruise missiles, it would seem that they would be inherently superior to ballistic missiles as delivery vehicles for ranges greater than 10 kilometers and less than 5,000 kilometers. The long flight times of strategic cruise missiles and the subsonic speed with which they approach their target, however, make them quite vulernable to hostile countermeasures. A ballistic missile, in the absence of an anti-ballisticmissile system, cannot be prevented from reaching its target once it is launched. Whereas the outcome of a strategic attack with ballistic missiles is comparatively certain and controlled, the outcome of a cruisemissile attack is uncertain, since it depends largely on the air-defense capabilities of the attacked country. As a result, although the accuracy and range of cruise missiles would suggest that they could serve successfully in a deterrent role, their relatively low speed makes them less suitable than ballistic missiles for that particular strategic mission. In order to be sure that cruise missiles would penetrate to their targets one would have to launch many of them against each target to saturate the air defenses. That would require the deployment of many thousands of cruise missiles, in clear violation of the numerical quota for strategic delivery vehicles established by the Vladivostok agreement.

No matter how many cruise missiles are deployed in a country, however, it would be impossible to verify their number by non-intrusive inspection, since they do not require identifiable launch facilities, such as silos, submarine launch tubes or airfields. Thus it is technically impossible to subject cruise missiles to the kind of numerical limits achieved in SALT II for ballistic missiles. The entire problem of limiting cruise missiles is further complicated by the fact that even during the testing of the weapon it would be possible to deduce from satellite data only maximum range compatible visible characteristics of the missile, not its actual range. Therefore it is not possible at present to tell whether a given sea-launched cruise missile, say, is intended for a strategic mission or a tactical one.

All these considerations may lead one to conclude that the U.S. would have no choice but either to abandon any further efforts at controlling the proliferation of nuclear arms and go ahead with the deployment of cruise missiles or, in order to safeguard the achievements of SALT and the opportunity for fur-ther strategic-arms limitation, to forgo the deployment of cruise missiles altogether. Such a conclusion, however, seems unwarranted. A careful examination of the tactical and strategic missions that current and future cruise missiles could perform, and of the required launching platforms in each case, reveals that those applications of this delivery vehicle that make military sense are not incompatible with arms-limitation goals in general and the numerical reduction of strategic delivery vehicles in particular. Furthermore, it appears that the specific cruise missiles that threaten the SALT negotiations are either unnecessary for the security of the U.S. or are hasty and unexamined applications of the new technologies that do not make military sense.

Consider the strategic sea-launched cruise missile now in the advanced development stage. This system can not perform any new missions or outperform in any of the existing

strategic missions the U.S. "triad" of landintercontinental ballistic missiles (ICBM's), submarine-launched ballistic missiles (SLBM's) and intercontinental bombers. Furthermore, launching a cruise missile of this type from ballistic-missile submarines would increase the submarines' vulnerability, first because they would have to abandon their present secure stations and approach the territorial waters of the U.S.S.R. and second because launching a cruise missile would reveal the position of the submarine for hundreds of kilometers. It would be foolhardy to lessen the invulnerability of our securest deterrent weapons system so that it could launch at most four cruise missiles of uncertain fate every 30 minutes, since the same submarine can stay in safe waters and launch 16 Poseidon or Trident I missiles with 10 warheads each in less than five minutes, making much less underwater noise.

The deployment of a limited number of long-range cruise missiles on "hunterkiller" submarines may appear militarily cost-effective, since it would force an opponent to treat every U.S. nuclear submarine as a strategic nuclear delivery system, thereby increasing the opponent's antisubmarine-warfare requirements. Such a policy is not, however, without serious drawbacks. First, to impose a strategic role on hunterkiller submarines would seriously complicate their command-and-control procedures and thereby impair their operational capabilities. Second, and perhaps more significant, the deployment of strategic nuclear missiles on tactical hunter-killer submarines could reduce the security of the U.S. deterrent fleet of Polaris/Poseidon submarines not only by forcing a rapid growth Russian antisubmarine-warfare bilities but also by eliminating the distinction between tactical and strategic submarines and thereby removing the current tacit inhibition against attacks on strategic submarines. In short, the deployment of the strategic sea-launched cruise missile seems on balance to be both unnecessary and unwise.

hypothetical long-range The missile with a chemical-explosive warhead suffers from a different set of fundamental disadvantages. This missile could in principle enlarge the spectrum of strategic options available to the U.S., since it would make possible the precise destruction of selected industrial or military targets without the use of nuclear explosives. Actually, however, such targets in the U.S.S.R. would probably be defended by in the active or passive air defenses a subsonic cruise missile could not penetrate easily: such terminal defenses would add to the vulnerability of these weapons and therefore make the outcome of an attack with them quite uncertain. Weapons with un-certain results cannot have a deterrent effect against even the mildest provocation, since they are not capable of the assured destruction of their intended targets. Just as the existence of an effective anti-ballisticmissile system could have denied the deterrent role of ballistic missiles, so could a future sophisticated air-defense system deny such a role to cruise missiles, par-ticularly those with chemical-explosive war-

Finally, a long-range cruise missile with a chemical-explosive warhead would completely confuse the distinction between strategic weapons, which are now assumed to be nuclear, and tactical weapons, which are usually non-nuclear. Such a development would make strategic-arms-limitation negotiations particularly complex by coupling them to efforts to reduce tactical armaments and by blurring the distinction between nuclear and chemical explosives.

The long-range air-launched cruise missile

could in principle have a practical military role. The version of this weapon now under development is burdened with artificial limitations on size and fuel that severely curtail its range to about half that of the sealaunched cruise missile, making it unsuitable as a standoff weapon. A future version capable of longer ranges and carried by large transport planes could, however, replace the B-52 bomber in the 1990's and obviate the deployment of the costly B-1 bomber. The deployment of such a cruise missile would create difficult arms-control problems, since again it would not be possible to ascertain the number of missiles deployed. A possible solution is to agree on the number of deployed carrier aircraft that could transport them and count each aircraft against an agreed number of existing ballistic missiles outfitted with multiple independently targetable reentry vehicles (MIRV's). As a matter of fact, if all land-based MIRVed ballistic missiles were replaced by an equivalent number of transport planes carrying air-launched cruise missiles, the end result could be a more stable strategic balance between the U.S. and the U.S.S.R. for two reasons. First, the long flight time of cruise missiles and their vulnerability to point defenses preclude their use as first-strike weapons: second their basing, if properly designed, could make them considerably less vulnerable to a surprise attack than land-based ballistic missiles are now.

In spite of the stabilizing effect that such proposal implies the deployment of the long-range air-launched cruise missile raises some serious verification questions. For example, if cruise missiles were deployed on jumbo jets such as the 747 or the DC-10. how could one determine without intrusive inspection which of these planes is a civilian transport and which carries strategic cruise missiles with nuclear warheads? Moreover, once the development and testing of such missiles is allowed how could another nation ascertain the number of missiles ultimately manufactured in the U.S. or their intended mode of deployment? The U.S.S.R., for example, could fear that in addition to whatever agreed number of air-launched cruise missiles was allowed, the U.S. could secretly deploy large numbers of booster-assisted cruise missiles based on ships or on land in allied countries within easy reach of the Russian interior. Thus it does not seem possible to deploy long-range cruise missiles without upsetting future strategic-armslimitation efforts.

There are additional disadvantages to such deployment, even if a formula for the verification of the number of platforms for air-launched cruise missiles and the basing of such missiles could be successfully negotiated. If past experience can be taken as a guide for future behavior, it is almost certain that a U.S. deployment of strategic cruise missiles would induce a Russian counterdeployment. Worse, U.S. development of such a weapons system would serve to validate the cruise-missile concept for other nations desiring a cheap, accurate delivery vehicle and might well convince them to develop a similar missile capable of reaching the U.S. Then it would be necessary for this country to erect a costly air-defense system not only against Russian cruise missiles but also against the cruise missiles of other countries. Such a system has been considered unnecessary until now because of the absence of a credible threat from the U.S.S.R. or any other country. It should not be for-gotten that the deployment of an anti-ballistic-missile system in this country was justified on similar grounds: as a defense against Chinese ballistic missiles rather than

Tactical cruise missiles, unlike their strategic counterparts, offer considerable military advantages without creating such serious

arms-control problems. As the Harpoon missile has demonstrated, it is possible to develop a small cruise missile powered by an inexpensive turbolet engine that has both the range and the accuracy needed for practical battlefield situations. On the other hand the tactical sea-launched cruise missile is mismatched to the operational conditions of a naval encounter and appears to be grossly inaccurate; its inaccurate; moreover, its conspicuous launching jeopardizes the safety of the launching submarine by revealing its position. The tactical SLCM is the perfect example of the misapplication of cruise-missile technology: it creates serious arms-control problems, since it is externally indistinguishable from the strategic SLCM, without incorporating substantive any advantages.

The proposed tactical cruise missile with a chemical-explosive warhead is perhaps the most sensible current application of the new technological advances that have made cruise missiles feasible. With a volume of half a cubic meter and a turbojet engine, it can be identified by statellite as an unambiguously tactical missile. Although such identification may not be possible with current systems except over water, the technology exists to support the development of a reconnaissance satellite that could be programmed to detect. track and identify infrared signatures in the atmosphere and thereby distinguish a strategic cruise missile from a tactical one during testing.

The operation of such a monitoring system could be impeded by cloud cover, and therefore it could not verify with absolute certainty another country's faithful adherence to a treaty forbidding the development of long-range cruise missiles. Since no country would have any reason to take advantage of cloud cover to hide the development of a short-range cruise missile, however, it would be possible to develop and deploy those tactical weapons that seem capable of replacing the manned fighter-bomber, without fear of their being mistaken for long-range missiles by the U.S.S.R. and therefore without threatening the efforts to limit strategic nuclear weapons.

Two central conclusions can be drawn from the foregoing analysis of the technology and the performance characteristics of existing and contemplated cruise missiles. The first is that with one exception the development and deployment of strategic cruise missiles at this time is counterproductive for three reasons: they are unnecessary. their deployment would nullify the existing strategic-arms-limitation agreements and obstruct similar future efforts, and their deployment on nuclear submarines would increase the vulnerability and probably reduce the operational efficiency of that important deterrent force. The one possible exception is a future version of an air-launched cruise missile that could be deployed on transport planes in place of long-range bombers. The price of such a system, however, must be measured not only in dollars but also in terms of lost arms-control opportunities, the creation of new threats against this country and the abandonment of any numerical ceilings for strategic weapons.

The second conclusion is that negotiable criteria for differentiating between tactical and strategic versions of cruise missiles can and should be devised and incorporated into the design of future cruise missiles. The limiting criteria must be based on observable physical variables such as the volume of a cruise missile or the type of engine it is equipped with rather than on unverifiable variables such as the missile's range or the type of warhead it carries. For example, it is possible to differentiate between tactical and strategic cruise missiles by defining as tactical any missile that (1) has a volume of less than half a cubic meter, (2) is powered by a turbojet engine and (3) has a thrust of

less than 600 pounds. A strategic missile on the other hand, would be one that has a volume exceeding half a cubic meter and a tur-

bofan engine.

The physical characteristics outlined above can be detected from orbiting reconnaissance satellites, and they do not impose (for the U.S. at least) any practical restrictions on the design of a cruise missile, since in each case the values of the relevant physical variables would be chosen within the proposed limiting criteria for economic and technical reasons. Reconnaissance satellites can provide the U.S. with information that something may be taking place in the U.S.S.R., cannot ensure that something is not taking place. Therefore although the U.S. can rely on such monitoring systems for early intelligence about cruise-missile developments in the U.S.S.R. the systems do not offer the unambiguous verifications capability the U.S. Senate would need in order to ratify a treaty with the U.S.S.R. banning the development of strategic cruise missiles. What such monitoring systems do allow the U.S. to do is to exercise unilateral restraint in the development and deployment of longcruise missiles while inviting U.S.S.R. to agree to a similar restraint. The U.S. can be certain that monitoring systems with the capabilities outlined here can detect the development of long-range cruise missiles at an early stage and so enable this country to abandon the unilateral restraint in plenty of time, if it chooses to do so.

The position of unilateral restraint is feasible for two reasons. First, no urgent response is necessary in case the U.S.S.R. is found to be developing long-range cruise missiles, because according to official accounts the U.S. is at least 10 years ahead in the technologies relevant to cruise-missile development. Second, the stability of the strategic balance between the two countries, in view of the many thousands of deliverable nuclear warheads available to both, cannot be upset unless one of the two deploys many thousands of longrange cruise missiles armed with nuclear warheads. Such a deployment, however, would take several years to complete and would be detected at a very early stage by the other side's monitoring satellites. A policy of unilateral restraint in the development and deployment of long-range cruise missiles by the U.S. not only is safe and desirable on economic grounds but also would allow for the orderly development of an effec-

tive tactical cruise missile. Such a policy would of course impose stringent demands on the reconnaissance capabilities of both sides. It is essential for the success of present and future strategic arms-limitation efforts to look ahead and define what reconnaissance capabilities will be necessary in order to bring these new weapons under control. The new technology that has made cruise missiles possible can also be applied to the development of monitoring systems with the resolution necessary to ensure compliance with the terms of agreements based on the criteria I have outlined. What has been lacking so far is political leadership with the will and the wisdom to exploit technology for the control of nuclear weapons rather than for their proliferation.

SACCHARIN BAN

Mr. McCLURE. Mr. President, while I believe it is the intention of each one of us in this body to legislate for the benefit of the general public and for the good of the American people, we perhaps often lose sight of the eventual realities of our action.

Too many times the legitimate complaints we receive from constituents are caused by all encompassing legislation which originated right here in the Con-

Such a case may be exemplified by the so-called Delany clause. While this provision of the Federal Food, Drug and Cosmetic Act is noble in its purpose—that is to prohibit the use of materials which are suspected of causing cancer-its application might even prove to be more harmful to the American people. In all that we do, there must be a good and a bad, a benefit and a loss, or in other words, there must be an effort to strike a proper balance. In the current controversy over the possible ban of the artificial sweetener, saccharin, we might well determine that the benefits of this substance far outweigh any small degree of harm.

This is being expressed by the American people across the land. I recently had occasion to read an editorial in the Bannock County News in my home State of Idaho. In all fairness to Mr. Rod Clifford, the editor of the Bannock County News, I doubt his singular editorial will have a large national impact, but it should. Mr. Clifford's words point out brilliantly the absurdity of this all-encompassing legislation which would ban the use of a substance without applying that all important test of balance.

Mr. Clifford's editorial of March 17 should be brought to the attention of the United States Senate, and, therefore, I ask unanimous consent that it be printed in the RECORD. I urge my colleagues to heed its advice.

There being no objection, the editorial was ordered to be printed in the RECORD. as follows:

CLOWN ACT IN GOVERNMENT CIRCUS ISN'T FUNNY ANY MORE

If ever we had been tempted to relax our rather severe opinion of bureaucrats and the mentality that must be a requirement for high-level civil service employment, several acts this week in the federal circus are sure to reconfirm that we have been correct all

We refer to the proposed ban on artificial sweeteners, saccharin specifically, following the release of a study done in Canada on the cancer-causing potential of the substance in rats. Now, we appreciate the fact that our benevolent bureaucracy is firmly dedicated to protecting us from anything that can do us in prematurely. And cancer is certainly one of those things we want to avoid—it's very unhealthy.

But to seriously consider a total ban on a particular product on the basis of one study at one university is either naivity to the point of stupidity, or it is bureaucratic protectiveness to the point of suffocation.

We're convinced that no citizen is going to drink 800 soft drinks every day for the next seven years, but that's exactly what would have to be consumed to compare with the dosages administered to the rats in the experiment. That kind of dosage in the tests should automatically nullify the research results, but not according to the bureaucrats

who have the power to ban at will.

The same thing happened several years ago with the chemical DES, a cattle feed supplement used to stimulate faster weight gains. With an equally small bit of so-called evidence, the FDA and USDA banned the use of the chemical, despite the fact that humans would have to eat several thousand pounds of meat every year for a number of years to equal the dose used in tests on laboratory

And we're still trying to understand how one federal agency can justify banning artificial sweeteners in the same week that a congressional panel urged the relaxing of penalties for the possession and use of mari-uana. That just has to be the ultimate bureaucratic contradiction. Are they really telling us pot is dandy, but Diet Pepsi can kill

And if Washington is so determined to protect us from harm by taking away our saccharin, how come cigarettes and alcohol are still on the market? Maybe its because the tobacco and booze lobbies in Washington are bigger than the artificial sweetener lobby.

Cigarettes and booze aside, we believe the best solution for whatever airhead dreamed up the sweetener ban is one suggested this week by a member of Congress, who said we ought to just require labels on diet drinks and similar products which would carry the message "Warning! This product has been found by one university to be hazardous to your rat's health."

And maybe every chair in Washington should carry a label warning "Occupant may be hazardous to the sanity of his/her fellow

citizens."

PEACE PLAN FOR THE MIDDLE EAST

Mr. HASKELL, Mr. President, during my tour of the Middle East last year, I was given repeated assurances by the Arab nations I visited that they wished to settle the Middle East conflict. Similarly, I was told that elements in the Palestine Liberation Organization were willing to alter their stance on Israel and seek meaningful negotiations. On the basis of these assurances, I proposed the broad outlines of a peace plan for the Middle East. I called for the recognition of Israel by the Arab nations. I also indicated my feeling that the Palestine Liberation Organization should be included in negotiations.

It is with severe disappointment, then, that I note the results of the recent PLO meeting in Cairo. There was no renunciation of terrorism or repudiation of the destruction of Israel. There were no constructive or conciliatory gestures. There was, instead, only renewed verbal invective and threats of escalating hostilities. As a consequence of the PLO actions at Cairo, it is clear that the PLO cannot be accepted as a bargaining entity at a reconvened Geneva conference.

I am not unaware of the hardships which Palestinians displaced by war have endured. But the politics of terror have no place in promoting a secure and prosperous future for Arab and Israeli alike. The futile irredentism and savage violence of the PLO have not and cannot solve the Palestinian problem. The existence and security of Israel are not and will not be negotiable.

Despite the absence of a Palestinian leadership willing to pursue negotiations. I hope the President, having completed his discussions with Arab and Israeli leaders, will persuade Israel and the Arab nations aligned against her to reconvene the Geneva conference. The basic objectives of such a conference remain, I believe:

First. Public announcement by the Arab States of Israel's right to exist within secure borders.

Second. The establishment of peace in

the full sense of the word, including freedom of passage and commerce across borders and through international waterways, and the full normalization of relations.

Third. Withdrawal by Israel from territories occupied since the 1967 war to agreed-upon borders which are secure and defensible.

Fourth. The provision for a homeland for the Palestinian refugees, the political status of which must be negotiated to the satisfaction of all the states convened at Geneva whether confederated with Jordan or otherwise.

The nature of a Palestinian homeland will present a major challenge to all the negotiators. Israel cannot accept a West Bank ministate dominated by a leadership committed to her destruction. Nor, judging by the Syrian action in Lebanon, would such a state hold much appeal for Jordan, Syria, or Egypt. Even the most vocal Arab proponents of the PLO have on occasion found themselves in armed conflict with elements of the PLO. At a time when the major participants in past Middle East conflicts have expressed their interest in a settlement, I am hopeful that a Palestinian leadership will emerge which is committed to playing an active and constructive role in the search for peace.

On the basis of these principles, the parties could, it is hoped, work out the details of a permanent settlement.

The United States has a real interest in a permanent settlement in the Middle East. Turmoil in that area can only redound to Russia's benefit. Obviously, it is to the immediate and long-term advantage of all Mideast states to exchange endless preparations for war for a just and lasting peace. President Carter has the best wishes of Congress and the American people in his efforts to reconvene the Geneva Conference. In working toward an Arab-Israel peace, the cornerstone of U.S. policy must be the maintenance of the security and survival of the State of Israel, thus demonstrating continuing support for a reliable democracy and an investment in the cause of peace in the region.

THE INAUGURATION OF DR. JOHN E. JOHNS AS PRESIDENT OF FUR-MAN UNIVERSITY

Mr. THURMOND. Mr. President, on April 22, 1977, Dr. John Edwin Johns will be inaugurated as the ninth president of Furman University located near Greenville, S.C.

Furman University was founded in 1826 at Edgefield, S.C., as an academy and theological institute to train Baptist ministers. The school was chartered as a full-fledged university in 1850 and moved to Greenville. During its history, Furman has achieved recognition as one of the outstanding 4-year, liberal arts colleges in this Nation. It is the oldest college established by southern Baptists and gave "birth" to the Southern Baptist Theological Seminary, which later moved to Louisville, Ky. Graduates of Furman University have become outstanding ministers, teachers, doctors, lawyers, businessmen, political leaders, and citizens.

Mr. President, as Furman grew into a distinguished university, the nature of the presidency followed this growth. Today, the president of Furman University is a leader, educator, wielder of power; he is also an officeholder, caretaker, inheritor, consensus seeker, and persuader. Dr. Johns will have the task of satisfying the desires of over 2,000 students for self-fulfillment in a community which challenges them to do their best, intellectually, creatively, and in terms of service to others. Assisting him is a dedicated staff, outstanding faculty, and devoted alumni.

Mr. President, I believe Dr. Johns will be an excellent president of Furman University. He can draw upon a wealth of knowledge and experience that he has obtained while in the field of higher education. Following his graduation from Furman, Dr. Johns embarked upon an outstanding career as teacher, scholar, and administrator. Prior to returning to Furman, Dr. Johns served as president of Stetson University in Florida. I believe he will continue to develop and enhance Furman's tradition of leadership and academic excellence while developing individual excellence and Christian char-

MEDICARE REIMBURSEMENTS

Mr. PELL, Mr. President, the Department of Health, Education, and Welfare recently issued a list of doctors who, according to the Department, received more than \$100,000 in medicare reimbursements in 1975. Among the physicians on that list was a Rhode Islander, Dr. Milton Hamolsky, who is the physician-in-chief at Rhode Island Hospital, the largest hospital in our State. The Department listed Dr. Hamolsky's billings to medicare at over \$307,000.

The fact of the matter is that Dr. Hamolsky is a full-time salaried physician, whose medicare billings for 1975 were, in fact, only \$625. Furthermore, HEW had been notified of the inaccuracy of their list in this regard several days before the list was released, yet they made no effort to correct this gross inaccuracy.

As a result, the name of this highly respected and hard-working physician was printed in newspapers across the country and across Rhode Island. One possible implication of the list was that an impropriety was involved, and that perhaps the doctors in question were running what we now refer to as "medicare mills," providing services which are not necessary and defrauding the taxpayers by excess billings.

Dr. Hamolsky's fine reputation spoke for itself in Rhode Island, and eventually most people realized that a mistake had been made. But the lesson here is that, even in an area like antifraud control, which is so important and which we all support so strongly, real care must be exercised so that the wheels of Government bureaucracy do not run over individual citizens. I recently wrote to Seccretary Califano on this matter and

would hope that we can really get a handle on medicare and medicaid fraud, using the new Office of Inspector General at HEW, while at the same time we carefully protect the rights and reputations of the vast majority of physicians, whose primary concern is the health of their patients.

TOWARD A NATIONAL ENERGY POLICY

Mr. HEINZ. Mr. President, President Carter's proposal to formulate a national energy policy has precipitated an outpouring of letters from all over the country offering suggestions for our future energy program.

Many Pennsylvanians have written the President and sent me copies of their correspondence. It is clear from their letters that many varied—and in some cases contradictory-views exist. These same divisions have existed in the past within the Congress and between the Congress and the President. The end result is that we have no cohesive energy policy. It is my hope that we can now surmount these differences and assume the task of insuring our energy future with some degree of consensus.

From the letters I have received, two

fundamental points stand out.

First. The future development of all forms of energy is a necessity. Each source-oil, gas, coal, nuclear power, solar, geothermal, and other exotic formshas its particular liabilities and limitations. No single energy alternative stand out as "the answer" to our problems and none, therefore, should be closed off from our future.

Second. Conservation must be a major component of any new energy policy and mandatory measures may well be necessary. Clearly, incentives are preferable to penalties, but the severity of the crisis demands that we be prepared to take strong action to insure reductions in energy use. Among those actions, I reject any substantial increase in the tax on gasoline. Such a gas tax increase would be both ineffective and unfair to millions of lower income and rural Americans who have no transportation alternatives.

Of the many letters I have received. I would like to share one with my colleagues today which shows originality and imagination. Paul Elson, of Holland, Pa., discusses some important energy concepts in his letter. The use of solar energy is among them and his thoughts reflect a sophisticated awareness of its potential as well as a knowledge of its current limitations. As I indicated earlier no single energy source, including solar, is the answer to all of our energy problems. We should recognize, however, that solar is a component of our energy solution, particularly with respect to heating and cooling and that it deserves our attention for the part of our energy needs that it can provide. Mr. Elson makes that case cogently, and I commend his letter to my colleagues' attention, and ask unanimous consent that it be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

HOLLAND, PA., March 17, 1977.

ENERGY,

Washington, D.C.

GENTLEMEN: Following are some of my opinions and suggestions regarding our de-

veloping national energy policies.

I feel strongly that we as a nation have been very lax in formulating a comprehensive plan regarding conservation and production of energy. I heartily support many of the suggestions already made on conservation and feel we should place even greater emphasis on development of public transportation, increased gasoline mileage in our cars and greater use of insulation in all of our buildings, old as well as new. Unfortunately, strictly voluntary efforts along these lines are usually too little and too late and persuasion, in the form of legislation, seems to be our best recourse. Conservation efforts also have great appeal to me from the standpoint of the effects on our environment as I am very sympathetic to the concerns of the environmentalists.

On the question of the production of energy we should be putting much more effort into the use of solar energy. Many people do not realize its potential benefits and consider it an "exotic" form of energy and impractical. However I consider this to be an avenue which must be pursued vigorously and the Federal government should be lead-

ing the way by setting the example.

Specifically, I propose the government begin as soon as possible to use available technology to install solar heating on existing representative buildings. Although in many cases the savings in fuel cannot fully justify today's installation costs certainly a large portion of the expense can, if necessary, be justified as design and development cost. The mere fact that the Federal government is aggressively into solar energy development should stimulate parallel activity in the private sector. Without doubt this added activity will provide the stimulus for development of more efficient solar power systems at lower cost through larger volume production.

As an example, in Northeast Philadelphia the Navy Aviation Supply Office where I am employed has 5-6000 employees on its compound. Building #1 on the compound is a 3 story building with a flat roof covering approximately 1.8 acres. Other similar buildings would bring the total compound roof area

to about 20 acres.

In the November 1972 issue of the National Geographic magazine was an excellent article on "The Search for Tomorrow's Power". In this article under Solar Power was a description of a system (copy enclosed) designed by a professor at the University of Arizona which looks very practical and which could easily be installed on the roofs of the buildings at the Aviation Supply Office to provide most of the heating, cooling and perhaps electrical energy needs at this installation. The existing gas/fuel oil heating system could be retained as a back up system. The location in Philadelphia also has great merit from the viewpoint that this area has a large proportion of sunny weather and is also in a high population region with a large deficit of locally produced energy. I propose that a project of this type at this location be seriously considered.

In addition to the economic aspects I am concerned about the effects of procrastination in developing an energy program on our national defense capability.

Solar power is probably our greatest renewable energy source and we must vigorously begin some realistic projects such as I have described above. The time is now.

Sincerely yours,

PAUL ELSON.

NOTICE OF THE DETERMINATION AND WAIVER UNDER RULE XLIII BY THE SENATE COMMITTEE ON ETHICS

Mr. STEVENSON. Mr. President, it is required by paragraph 4 of rule XLIII that I place in the Congressional Record this notice of a Member who proposes to participate in a program, the principal objective of which is educational, sponsored by a foreign government or a foreign education or charitable organization involving travel to a foreign country paid for by that foreign government or organization.

On application of Senator Barry Goldwater, the Select Committee on Ethics, on April 6, 1977, finds, on the basis of facts stated in his letter to the committee on April 5, that his participation in an educational program at the Tamkang College of Arts and Sciences in Taipei, Republic of China, is in the interest of the Senate and the United States. The itinerary involves direct air flight to Taipei on April 6, 1977, and direct return on or about April 14, 1977.

The committee stated in replying to Senator Goldwater's letter that the committee's letter is "without any precedential value, because rule XLIII only recently was adopted and the committee has had no opportunity to study all its

implications."

STATEMENT OF COMMISSIONER ABBOTT WASHBURN BEFORE NATIONAL ASSOCIATION OF BROADCASTERS

Mr. STEVENS. Mr. President, the National Association of Broadcasters held its annual convention last week. The gathering was a great success, I understand, as over 6,000 broadcasters came here to Washington for the meetings and workshops. One of the highlights of the convention was a panel discussion on the applicability of the first amendment to broadcasting. This panel was comprised of FCC Commissioner Abbott Washburn; former Commissioners Nicholas Johnson. Lee Loevinger, and Kenneth Cox: and our beloved former colleague and chairman of the Communications Subcommittee for many years, John Pas-

Mr. President, I would like to call to the attention of my colleagues the opening statement of Commissioner Washburn. Commissioner Washburn has studied the issue of the first amendment applicability for broadcasting very carefully and is well-known for his strong opinion with regard to the operation of the fairness doctrine. I ask unanimous consent that Commissioner Washburn's opening statement be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

THE STATEMENT OF COMMISSIONER ABBOTT WASHBURN

After two and a half years on the Commission observing the Fairness Doctrine in

operation, I am more convinced than ever that, without imposing an undue burden, the Doctrine provides useful guidelines for broadcasters in carrying out their public trust. Rather than inhibiting freedom of speech, the Doctrine ensures that more views, and opposing views, are given to the public over the air. To speak of this as "tyranny" and "censorship" is palpable nonsense.

The first Amendment protects the public's right to receive information—just as it protects the licensee's right to broadcast information. The Supreme Court has laid heavy emphasis on that first right, the public's right. In Red Lion the Court scrutinized the Doctrine and held that it enhances rather than abridges the freedoms of speech and press protected by the First Amendment.

press protected by the First Amendment.

The Court stated: "It is the right of the viewers and listeners, not the right of the broadcasters which is paramount... It is the purpose of the First Amendment to preserve an uninhibited marketplace of ideas in which truth will ultimately prevail, rather than to countenance monopolization of that market, whether it be by the Government itself or by a private licensee."

Congress, likewise, recognizes that the Fairness Doctrine is an appropriate implementation of policy embodied in the Communications Act. We see this in Congress' repeated refusal to adopt proposals which would amend or abolish the Doctrine.

The fact is it's a mild rule. It leaves the choice of issues largely up to the broadcaster. Opposing views need not be included on the same program but merely somewhere in his overall programming. No precise equal balance of time need be given to opposing positions. The choice of spokespersons and the format of presentation are also left to the reasonable, good-faith judgment of the licensee.

And the Doctrine is working. The Commission receives several thousand Fairness complaints each year. The fact that only a very small number of them are found to have merit is a credit to the industry. The rule, from the beginning, has been administered by the Commission with proper restraint.

A Texas broadcaster whom I have known

A Texas broadcaster whom I have known for many years came in recently to talk about VHF Drop-ins. Afterwards I asked him whether the Fairness Doctrine had ever had a "chilling effect" or had in any way inhibited him and his colleagues from editoralizing or discussing controversial issues over the air.

"Never," he replied. "For two decades we have had a policy of vigorous coverage of controversial issues on our stations. And we have always tried our best to provide a balance of viewpoints."

I said I believed this was the attitude of most broadcasters around the country.

"You are right," he said, "but there are certain timid broadcasters who won't get into issues. But it's not because of the Fairness Doctrine."

I knew what he meant. There are some broadcasters who don't editoralize and who prefer to avoid all issues more controversial than canoe safety. Is it the Fairness Doctrine that is chilling them? Not on your carbon microphone. It's a don't-rock-the-boat attitude of not offending local advertisers. If the station comes out for or against abortions for the poor, for or against hand-gun control, for or against ERA, for or against nuclear power plants—it is going to draw some flak from the community and, sometimes, from important advertisers. So it's easier to stick to canoe-safety and seat-belt fastening. Sometimes, as an alibi for not airing a controversial subject, they argue that qualified opposing voices are hard to find, or that, once located, can't be persuaded to

come down to the station. Such excuses are unconvincing. If it is a hotly debated issue in the community, qualified spokespersons are eager to be heard and will be more than appreciative of the opportunity extended to them by the broadcaster.

These timid ones are, in actuality, chilled by quite different winds than the Fairness

rule.

Meantime at the Commission we are pressured by various public action groups to set up strict standards and requirements for news and public affairs—to require a certain number of public service announcements every two hours-to call upon broadcasters to make certain amounts of time available for "freedom of speech" messages, to assist organizations in the production of such messages, etc., etc.

Let me say to you, candidly, that your best defense against this type of intrusion is to operate in the public interest under the Fairness Doctrine. It calls for two simple

actions:

1. Cover controversial issues of public im-

portance in your community;
2. Let opposing sides of these issues be heard.

Both of these are things which most licensees are trying hard to do anyway.

So long as you function under these reasonable guidelines, the Commission can rightly find that requiring "free speech messages" and all the rest is not necessary. Frankly, if I were a broadcaster I would look upon the Fairness Doctrine as a help and a bulwark. And I would feel that I and my National Association had more important things to talk to the Congress about.

Regardless of what the networks may say (for reasons of their own), it is not in the interest of the individual broadcaster to try to erode the Fairness rule. Nor will there ever be more than a shadow of a chance, in my opinion, to abolish it so long as the Government is in the business of granting exclusiveuse rights to a scarce public resource. Technology may, in the future, give us an abundance of channels and thus eliminate the need for licensing. But until that time comes, the Doctrine is sensible and useful, both for the public and the broadcaster.

A fair balance is what the framers of the Constitution were after-and that is what

the Doctrine ensures.

A poll of approximately 1,000 ballots at the National Association of Television Program Executives convention in Miami last month revealed that on the question of including the Fairness Doctrine in any rewrite of the Communications Act, 55% voted to include the Fairness Doctrine and 44.6% were against including it. This is strong evidence that the Fairness Doctrine is not an issue with most executives who are responsible for programming. They see the Doctrine as a useful set of guidelines that helps them. Here we have 55% of them voting to retain Fairness Doctrine language in the Act.

The first general statement of the Fairness principle was set forth by the Commission in 1949. It was given statutory status by Congress in 1959; upheld by the Supreme Court in Red Lion in 1969; and reasserted by the Court in the BEM case in 1973. In 1974, after a 3-year review of the Doctrine, the Commission issued unanimously a lengthy report reconfirming its soundness and usefulness. So there is close to a 30-year history behind the Doctrine. Many good minds in all three Branches of Government and in the broadcasting industry have focused on the subject during that period—and what has evolved works well, both for the industry and the public. My grandfather, in Minnesota, used to tell us: "Never tinker with a machine that's running well."

CONSERVATION ENERGY

Mr. PERCY. Mr. President, the need to promote energy conservation is a pressing national priority, one we can no longer afford to neglect. The events of this past winter-the school closings, unemployment, and astronomical heating bills-should have made this lesson crystal clear. Yet we continue to use energy in inefficient and wasteful ways, as though supplies were limitless.

Since 1950, the national demand for energy has been growing at an annual rate of nearly 4 percent. If demand continues to increase at this rate, the cost of constructing the powerplants and other facilities needed to meet this demand will consume around one-half to two-thirds of the investment capital available for all purposes in this country, including the transportation, medical, and industrial sectors so vital to our national well-being.

Permitting energy demand to grow at this rate will also increase our dependence on foreign suppliers of crude oil. We should have learned the peril of this course from the 1973 oil embargo. Yet our reliance on foreign oil continues to increase. This February, for the first time ever, the United States imported more than half of all crude oil consumed domestically.

To protect our national security, to cut down on the environmental degradation associated with energy production and consumption, and to make unnecessary the distasteful choice between increasing our reliance on foreign crude and constructing more nuclear reactors, I believe we need to make a concerted national effort to encourage the conservation of

To this end, the distinguished Senator from Minnesota (Mr. HUMPHREY) and I have launched the Alliance to Save Energy, a private, nonprofit, nonpartisan organization dedicated to the promotion of energy conservation in every sector of our society.

One of the major goals of the Alliance is to increase the amount of investment in more energy-efficient buildings, transportation facilities, and industrial processes. The conservation efforts of Northern Illinois Gas Co.-NIGAS, the fifth largest gas supplier in the country and the largest in Illinois, exemplify the sort

of effort we seek to encourage.

Since 1974, NIGAS has promoted the installation of ceiling insulation in private homes through a special financing plan. The homeowners participating in this program have reported savings on their heating bills averaging 17 percent. NIGAS also offers heating efficiency audits to their commercial customers, and participants report savings of 15 to 30 percent in their heating expenses. To facilitate the spread of energy-saving technology, the company periodically organizes energy conservation expositions, bringing together large-scale gas users, architects, engineers, and manufacturers of energy conservation equipment. The conservation programs of Northern Illinois Gas present a model of progressive and enlightened business management which more companies should follow. I commend NIGAS for its efforts.

Many people are less than enthusiastic about a thoroughgoing conservation effort because they fear that conservation necessarily entails slower economic growth. In fact, rapidly increasing energy consumption is not a prerequisite

to economic expansion. I would like to call attention to a study which persuasively refutes the notion that the alternative to spiraling rates of energy consumption is economic stagnation. The results of this study, conducted by Dr. Eric Hirst of the Oak Ridge National Laboratory, were published in the December 17, 1976, issue of Science under the title, "Residential Energy Use Alternatives: 1976 to 2000." According to Dr. Hirst, a vigorous conservation program, of the type envisioned by myself and the other members of the Alliance, could reduce energy use growth to almost zero between now and the year 2000. The technical nature of the article and the many charts and graphs accompanying it make it inappropriate for publication in the RECORD. Instead, I will briefly summarize its major conclusions and and findings, as follows:

During the 25 years prior to 1975, energy consumption in the United States grew at a yearly rate of 3.6 percent, approximately double the rate of household formation. This unusually high rate was due to the growth in ownership of energy-intensive household equipment such as food freezers and air conditioners, shifts from small energy-efficient devices to larger, less efficient units, and increasing household use of equipment, such as increased use of long, hot

showers.

Even in the absence of a strong effort to curb energy use, Dr. Hirst predicts that consumption rates will decline due to a slowdown in the formation of households and in population growth rates, increases in fuel prices, a saturation of equipment ownership for major residential energy uses, and a change in housing choices away from single family units.

However, if programs are implemented to raise energy prices even further, to increase the efficiency of household appliances, and to improve the thermal integrity of household units, Mr. Hirst predicts an energy use growth rate of only four-tenths percent yearly for the next 25 years. If we move toward greater use of solar power, the growth rate would be even lower.

Dr. Hirst's prediction is an encouraging one, but it is no cause for complacency. To move toward near-zero energy growth, we must make every effort to cut out inefficient modes of production and wasteful forms of consumption.

At a recent meeting of the Lake Michigan Federation, I gave a speech presenting my views on this subject in greater detail. Another interesting document on the subject of energy savings is a statement by Northern Illinois Gas describ-

ing their energy conservation programs.

Mr. President, I ask unanimous con-

sent that these statements be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ADDRESS BY SENATOR CHARLES H. PERCY

Dick Robbins, Kathy Schuck, Lois Mc-Clure, Helen Bieker, James Alter, members of the Board of Directors and distinguished members of the Federation:

It is a pleasure to participate in this meeting. I know the Federation has already launched an energy conservation program and I commend you for your foresight, initiative and ambition.

For years, we seemed to do our best to ignore the need for a national energy policy. Some wondered if the costs and benefits of a comprehensive energy program could be fairly distributed throughout our society; only a handful knew that we were squandering enormous amounts of energy. And many assumed that conservation meant slower economic growth.

Record cold temperatures this winter, which caused fuel shortages, astronomical utility bills and increased unemployment, awakened the whole nation to the urgency of the energy crisis. The Administration, Congress and leaders in every sector of society are at last beginning to realize that we cannot achieve our basic goals as a nation without facing up to the energy problem.

To achieve steady economic growth with full employment and low inflation, our first priority should be energy conservation. Nearly half the energy we consume is wasted . . . produces absolutely nothing. That means we, as a nation, burn the equivalent of about 18 million barrels of oil a day, at a cost of nearly \$250 million, and receive in return—nothing. The largest and cheapest source of new energy for economic growth is "conservation energy"—the energy "produced" by cutting energy waste.

Last November, at the National Press Club, I called upon the Administration to set a target of zero growth in primary energy consumption over the next decade. I repeat that call today. For the past 25 years, energy demand has been growing at about four per cent a year, close to the same rate as our economy. Economic growth and energy growth do not need to proceed in lockstep.

We do not know just how rapidly this country or this planet may be running out of fossil fuels. But we do know for certain that it is becoming more and more difficult to pay the mounting costs of meeting huge increases in demand for new energy.

Three main questions dominate the de-

Three main questions dominate the debate about energy conservation. How much difference will it make if we launch an all out effort to cut waste and use the energy we have more efficiently? How can we begin this huge task? What advantages can we as a nation and as individuals expect to gain through conservation?

In the decade ending in 1974, demand for new energy led to an investment cost of more than \$300 billion. For the decade ending in 1985, the Federal Energy Administration estimates that demand will rise less rapidly, mainly because of higher energy prices.

But it is still the conventional wisdom that demand in this period will increase—and by as much as two or three per cent in a year.

This would mean a very large increase in energy consumption from the present level. The investment cost of meeting this demand with new electric power plants and other facilities has been estimated in the range of \$650 billion to \$1 trillion. That is about half to two-thirds of all the investment capital we are likely to have available in the next decade.

This fact alone should tell us that something is terribly wrong with our plans to meet future energy needs. Putting that much money into producing new energy would mean starving other key sectors of the economy that compete for scarce capital, such as health, education, housing and transportation. And by using up finite energy sources at a breakneck pace, we will exhaust raw materials needed for non-energy uses. This process has been mockingly called "strength through exhaustion."

A well planned conservation program will have as one of its prime goals the creation of more jobs. In almost every sector of our society, using less energy or using it more efficiently means putting people back to work.

Conservation will also help limit the environmental damage that results from oil spills, strip-mining and disposing of large quantities of nuclear waste.

Efforts to increase employment by encouraging energy thrift can also help fight inflation. The more we draw on reserves of nonrenewable fuels, the more difficult it will be to prevent fuel prices from rising. If free market conditions set the prices, the scarcity or inaccessibility of reserves will tend to drive prices up. If producer or distributor cartels set prices, they will often find it in their interest to charge more. Even if the Federal government exercises control over the prices of all the energy consumed, in the national interest the President might decide to raise prices to reflect real energy costs.

Catering to a two to three per cent annual energy demand growth will also increase our dependence on foreign sources. In January, for the first time in our history, we imported more than half of the oil we consumed. The Federal Energy Administration's Draft 1977 National Energy Outlook projects further increases in our dependence on foreign oil over the next decade. In the past three years, home heating bills have increased considerably because of the four-fold increase in the price of OPEC oil. Reducing our total demand for OPEC oil would be a real move toward less dependency.

Protecting our access to foreign energy supplies is one of the central aims of our foreign policy. This severely limits our political and military choices in a growing number of situations. Nothing would strengthen our world position more than to reduce our dependence on imported oil.

Nothing would improve our relations more, with rich and poor nations alike, than correcting our extraordinarily wasteful habits. With only six per cent of the world's population, we consume 30 per cent of its energy resources. Many nations believe that we are taking more than our share of the world's patrimony, thus hastening the end of the age of fossil fuels before other energy sources can be developed to meet world needs.

By catering to endless demands for energy here at home, we risk destroying the essential resilience of our social and economic system. Resilience is the quality that allows a nation to recover rapidly from economic setbacks by correcting past errors and taking advantage of new technology.

Many of us take for granted the resilience of our economy, including the energy-producing sector. We grumble about higher fuel bills, but we tend to think of America as a leading producer of energy with virtually limitless reserves. If shortages occur, as they have this winter, many suspect they are caused by big producers holding back supplies. Some producers might be purposely withholding supplies. But that is not the root of the problem. Even the Arab oil embargo, the gas lines, and the power failures and brownouts in some of our cities failed to put across the message.

So let's say it loud and clear. We don't have the resilience we need when our response to the OPEC embargo has been to steadily increase our dependence on foreign oil. We don't have the resilience we need when cold weather means factories and schools must close for lack of oil or natural gas. We don't have the resilience we need

when we lock ourselves into highly expensive, centralized and inflexible power systems that take a decade or more to build.

The Atomic Industrial Forum forecasts that we will triple the number of nuclear power plants over the next decade. The average capacity of each new reactor will be 1,000 megawatts. I have already indicated the enormous scope for conservation—which makes it highly questionable that we need this new capacity. Moreover, we are still a long way from solving the basic problem of radioactive waste disposal and providing adequate safeguards against nuclear accidents, sabotage and proliferation. Therefore, it will not increase our resilience as a nation to add all of these new reactors.

Our long-range planning has been based too much on past trends. Planning must result in forecasting future problems and requirements. We have concentrated on building large and complex systems that are vulnerable to a wide range of unforeseen circumstances. Business, industry, and consumers are paying more for less reliable service. They are at the mercy of vast regulatory bureaucracies that have insufficient awareness of public needs. Replacing this rigidity with resilience and self-reliance is one of the greatest needs for the entire nation and individual citizens.

The need for a national effort to save energy is so compelling that we all must do our part. Last month Senator Hubert Humphrey and I launched a private, non-profit, non-partisan organization called the Alliance to Save Energy. Its purpose is to develop a broadly-based constituency and to set quantitative goals for energy conservation in every sector of our society, including building construction, transportation, electrical power generation and industrial processes.

A number of groups and institutions such as your own federation are working in the area of energy conservation, but the Alliance to Save Energy is the first organization created solely for this purpose. It will not compete with existing groups, but will seek to supplement and strengthen the efforts of such groups as Illinois' Center for Alternative Energy.

President Carter has strongly endorsed the goals of the Alliance. Former President Ford and Vice President Mondale are Honorary Chairmen of the organization.

Alliance activities will be determined by a Board of Directors in consultation with an Advisory Board made up of individuals from all sectors of American life. ASE will generally operate by consensus with directors, advisors and members reserving the right to dissent from the organization's position and to express individual opinions. The Alliance will be funded by contributions from diverse sectors.

I am very pleased that Dick Robbins, your Executive Director, has agreed to serve on the Advisory Committee for the Illinois Conference on Energy Conservation to be held at the University of Illinois. This conference will help increase public awareness about the need to make energy conservation the centerpiece of our national energy program.

We will welcome suggestions from all of you about the types of activities this umbrella organization should emphasize. The following facts suggest the kinds of activities the Alliance can usefully pursue.

The American Institute of Architects esti-

The American Institute of Architects estimates that a national commitment to upgrading the energy efficiency of buildings would, by 1990, save the equivalent of 12.5 million barrels of oil per day.

By adopting technologies now widely em-

By adopting technologies now widely employed in other countries, the steel industry can reduce its huge fuel demands by about 50 per cent by 1995, according to a 1974 Ford Foundation study.

Foundation study.

Recycled scrap aluminum requires only five per cent as much energy as aluminum refined from virgin ore.

Eric Hirst, a research engineer at the Oak Ridge National Laboratory, reported in the

December 1976 issue of Science magazine that a vigorous conservation program in the residential sector could reduce energy use growth to almost zero by the year 2000no change in life-style and even with no

increased use of solar energy.

Forty-five per cent of all industrial fuel, or about 20 per cent of the nation's fuel consumption, is used to generate process steam. If this steam were first used to generate electricity and then used as process steam, more electricity would be produced than the entire industrial sector now buys from utilities. This process, known as "congeneration," produces much cheaper electricity than centralized power plants.

-The transportation sector is one of the most rapidly growing areas of our society, yet there is tremendous scope for reducing energy consumption. Former Secretary of Transportation William Coleman, concluded, be-fore he left office, that more efficient use of energy would actually reduce the total requirement for energy in transportation over

the next decade.

Conservation is crucial to achieving our broad economic goals as a nation. "Conservation energy" is the cheapest, cleanest and most abundant source of new energy for economic growth. It is anti-inflationary. And investing in conservation is one of the best ways to tackle the unemployment problems while investing in new power plants is one of the least effective ways to create new jobs.

The appeal of conservation is non-partisan and non-ideological. Conservatives and liberals, oil companies and environmentalists, Israelis and Arab OPEC countries, are at-tracted equally by the prospect of stronger economic growth and energy self-reliance for America. By the same token, few Americans are attracted by the prospect of having our foreign policy mortgaged to foreign suppliers and our domestic life controlled by vast regulatory bureaucracies.

The concept of conservation is not revolutionary. It makes no radical or unfair demands on any sector of our society. It is not a prescription for a "no-growth" economy.

I believe we can all work together to solve our national energy problem. I am confident that the new Administration and Congress will face the energy crisis and act. But, the implementation and success of this effort to save depends on every American. With your cooperation we can get this important message to the people. Conservation means doing better, not doing without.

STATEMENT OF A. R. JOHNSEN

Northern Illinois Gas (NI-Gas) distributes natural gas in 35 counties covering 17,100 square miles in the northern third of the State of Illinois. The Company had a total gas sendout of over 535 billion cubic feet in 1976. That one block of energy represented 48% of the natural gas or some 37% of the total gas and electric utility energy distributed in the entire State of Illinois. NI-Gas has experienced some of the same supply problems as other gas companies; however, due to our investment in underground storage facilities, supplemental nat-ural gas and the overall conservation effect, it has been able, through an approved controlled attachment plan, to continue serving the needs of existing customers and most of the needs of its new customers.

NI-Gas has been very active in promoting energy conservation programs to its 1,300,000 residential, industrial and commercial customers. The Division of Energy's Feasibility Report identifies a number of these pro-

grams in its recommendation.

NI-Gas has been actively promoting ceiling insulation for single family homes through local contractors since 1974. Included in this program is a financing plan which approximately 40% of NI-Gas' ation customers utilize. We feel that celling reinsulation is one of the most feasible methods of conserving fuel in the residential market. We have just completed a sampling of customers who installed additional insulation in 1976 and find that the average savings of gas for heating was 17%. The Company plans to continue this program in 1977.

One of the most successful programs that NI-Gas has undertaken is our commercial/ industrial conservation survey program. NI-Gas energy consultants visit customers' plants and provide advice and assistance in conducting efficiency audits on heating and process equipment. This program was started in 1972 and some 5,000 plant audits have been made to date. NI-Gas personnel also recommend other energy conservation steps such as insulation and heat recovery. Gas energy savings of 15% to 30% or more have been achieved by our customers through this program.

To recognize commercial and industrial customers who have responded to the need tor energy conservation in their operations, NI-Gas has established an "Energy Conservation Award". This award is given to our customers who have committed themselves to energy conservation, have been surveyed by our energy consultants and have acted upon our energy conservation recommendations. The award consists of a certificate

and lapel pins.

For the past three years, NI-Gas has pre-sented ENERCONEXPO's, Energy Coserva-tion Expositions. They have brought together large volume users of gas energy, involved architects and engineers and other selected people, and manufacturers of energy conservation material and equipment in an intensive one-day seminar and exposition, where in addition, experts in the energy conservation field gave talks on this most timely subject. Almost 1,500 energy decision makers have attended these highly successful meet-

The Company has produced collateral material and conducted advertising campaigns directed at educating the general public and students, suggesting ways to conserve energy and emphasizing why conservation of energy is so important for the future. Through these educational programs we feel we have succeeded in establishing a high level of awareness relative to conservation among our customers. This high level of awareness is demonstrated by the fact that in a recent survey of NI-Gas customers, 92% reported that they had taken steps to implement a conservation program in their own home.

NI-Gas has hosted two programs for the Division of Energy to educate students and high school teachers as part of the Energy Conservation and Youth Leadership Training Program. Six Illinois seminars will be held throughout the State in 1977. We intend to continue to cooperate in this program.

Energy surveys have been conducted in over 1,000 schools assisting school building operators in their conservation efforts. number of school districts and individual schools have been presented with NI-Gas' Energy Conservation Achievement Award for implementation of the improvements suggested in these on-site surveys. Some area schools have reduced gas consumption by 15% or more.

NI-Gas has also been encouraging the home building industry to upgrade the conservation standards in new homes. Over 500 Energy Conservation Awards have been presented to projects that include ceiling and wall insulation which meets or exceeds current FHA standards and storm or insulating type windows and doors.

Obviously, NI-Gas has, since 1972, implemented a wide range of programs to assist the State of Illinois in accomplishing its conservation objectives. We would not, however, be equipped to participate in the proposed Energy Conservation Audit as outlined in the proposal. The communities should, and are beginning to, establish standards of their own in local building codes for construction requirements. This is where the responsibility should be placed.

Often services are run to homes when still in the foundation stage, much too early to determine if energy conservation standards will be met. Building officials and the home building industry are cooperating to establish such standards. NI-Gas is helping by providing information and consulta-

NI-Gas does not promote nor encourage gas burning for decorative lighting purpose It must be recognized, however, that many existing gas lights are the only form of se-

curity lighting available to homeowners.
We endorse the elimination of standing pilots on new appliances and heating equipment but have serious reservations about refitting existing appliances to eliminate standing pilots. The gas appliance industry is well on the way toward its goal of im-proving efficiency of its products by 20% or more. As this new generation of ap-pliances replace older, less efficient equipment, we will begin to see substantial gains in conservation.

NI-Gas has not suffered as severely as other utilities during this cold winter. This is due primarily to our underground storage system which is the largest in the industry. We plan to design our systems to provide enough gas for two extreme winters in a row. We are having one right now. Our Supplemental Natural Gas plant provides additional customer supplies and we are an active participant in the Illinois coal gasi-fication group, which is attempting to get a coal gasification program underway. We are planning for the future and feel that natural gas will remain as a primary energy source in the State of Illinois. With les restrictive legislation and new technology, supplies will be available for many years.

There seems to be a strong belief by some government agencies that the all-electric economy is the answer for the future of energy. Before encouragement is given to the all-electric economy, a longer look is warranted into the relative source efficiency of the various fuels for residential and commercial and industrial applications. additional studies suggested in the Division of Energy proposal relative to the potential fuel switching from gas and petroleum to electric are vitally necessary before decisions on the best energy mix for Illinois can be properly made.

THE ROAD TO RECOVERY

Mr. CURTIS. Mr. President, Mr. Yale Brozen of the University of Chicago has written a very informative article entitled "The Road to Recovery". It is truly a lesson in history. I believe that it merits the attention of every reader of the Congressional Record, especially in these times of continued inflation and unemployment.

I ask unanimous consent to have Mr. Brozen's article printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the National Review, March 4, 1977]

THE ROAD TO RECOVERY

(By Yale Brozen)

Lord Tweedsmuir's widely quoted statement, "Those who do not know history are condemned to relive old mistakes," not be more apt than now. We are reliving some old mistakes—and these mistakes are impeding recovery. We can learn which of our current economic policies are mistaken by an examination of history. In particular, we can learn that current federal spending and the resultant deficit, which are supposed to be aiding recovery, are actually impeding it. We can learn from history that fiscal stimulus and deficit spending are not the

road to prosperity.

Take the experience of 1948-49, for example. There is no doubt that deficit spending failed to produce the expected consequences in 1949. It failed to produce the runaway boom that was predicted by the fiscal ideologues and it failed to prevent a recession. Despite a marked increase in fiscal stimulus in 1948 and 1949, recession occurred in 1949. In 1948, there was a \$12billion swing in the federal budget in the direction labeled "stimulus" by the fiscal ideologues, a result of a 1948 tax cut and increased spending. Those who believe increases in spending relative to tax collections stimulate the economy were so worried that a runaway boom and inflation were going to follow this \$12-billion swing in the federal budget (equivalent to a \$75-billion increase in today's budget) that they persuaded President Truman to veto the tax cut. Congress overrode Truman's veto.

The believers in the influence of fiscal policy continued to worry about the economy becoming overheated by runaway inflation and persuaded Truman to call a special session of Congress, in August 1948, to impose price controls. Congress refused to do so. In spite of the predictions that fiscal stimulus would produce a runaway inflation, consumer prices fell by 5 per cent and whole-sale prices by 10 per cent in the following 16 months. Instead of booming, the country slid into a recession in late 1948. Prices peaked in August 1948—the very time that Congress was called into special session.

The believers in the notion that fiscal policy can turn the economy around should have known better than to make their 1948 predictions-predictions which turned out to be the exact opposite of what materialized. They had failed just as miserably in pre-dicting what was going to happen in 1946 after the most enormous shift in fiscal policy which has every ocurred in our history. If ever there was a test of the fiscal ideology, 1946 was it, and fiscal ideology flunked. If federal spending makes the economy go, someone forgot to tell the economy it was

supposed to stop in 1946.

In 1945, believers in the federal-spending theory of prosperity predicted that 1946 would see us suffering from eight to twelve million unemployed because of the great cut in government spending following the end of World War II. Federal outlays were sliced by \$60 billion in 1946 (equivalent to a \$400 billion reduction in federal spending today). The drop in government spending-which was supposed to be followed by a depression of 1933 proportions-was actually followed by such a rapid employment rise in industries producing civilian goods that, despite the release of people from the armed forces and the armament industries, there were complaints about shortages of labor in 1946. Fewer than three million were unemployednot the 12 million predicted-and many of the unemployed were members of the 52-20 club (released veterans entitled to collect \$20 per week as long as they remained unemployed up to 52 weeks) who were unwilling to lose their membership by taking a job. Evidently, it is not government spending which keeps the economy going.

Currently, the Federal Government is running a near record-breaking deficit, over \$50 billion annually, yet the unemployment rate has been rising—from 7.3 per cent in May to 7.9 per cent in December. If large deficits could do the job of restoring full employment, the recovery from the 1974 recession should have been completed by now. But it hasn't been. Deficits as a nostrum for unemployment have failed repeatedly, and are currently not effecting a cure. Yet more

of the same is being urged.

We are being told that this past recession

and the current recovery are like no other cyclical episode in U.S. history. Whoever saw double-digit inflation during a period of falling economic activity and unemployment as we did in 1974? Whoever saw declining interest rates during a recovery such as we have seen during the past 18 months? Interest rates are supposed to slide during a recession and recover during an upturn. Interest rates did slide during the downturn, although they did not begin their slide until eight months after the recession began. The prime rate dropped from 12 per cent in July 1974 to 8.25 per cent by April 1975, when the recovery began. But the prime rate has continued to drop, from 8.25 per cent in 1975 to 6.25 per cent currently. The Fed Funds rate has dropped even more sharply, from its 13 per cent peak in July 1974 to 4.6 per cent currently, 18 months after recovery began.

The interest rate slide has been in the face of a recovery which has seen civilian employment rise from 84 million in March 1975 to 88.1 million currently. So here we are with a record number of jobs and a record increase in number of jobs for any 18-month period, yet with a high unemployment rate, with declining interest rates, and with depressionfighting measures being urged in the midst of a recovery that is already well under way.

Is this faltering recovery something which requires special measures to keep it going? Should we apply the New Deal measures which failed in the 1930s to meet the employment problems of the 1970s? Should we enact a Humphrey-Hawkins bill as the Democrats urge? Should we enact more public works programs to re-employ the 15 per cent of construction workers who are unemployed as George Meany urges? Should we prepare to clamp on price controls as Jimmy Carter's advisors believe may be necessary (but which Carter himself is backing away from)?

Of more immediate concern, should we be following the advice of Professor Larry Klein, one of Mr. Carter's economic advisors? He is urging the Federal Reserve to reduce interest rates by pumping more money into the economy. He thinks the current recovery is being throttled by high interest rates. He wants to spur the economy by reducing interest rates. But will Dr. Klein's proposed money policy reduce interest rates-or will it raise them?

Here is where a little history can help us avoid a great mistake in policy which is being urged on Mr. Carter. If we follow Dr. Klein's advice, we will end up with higher interest rates-not lower rates-and we will re-ignite a more rapid inflation after paying a very high price to reduce the rate of inflation from its 12 per cent annual rate two years ago to its current 4.8 per cent rate. To throw away a victory half-won at this point is the height of folly and irresponsibility.

What can history tell us about the effect on interest rates of a step-up in money growth. The first effect is that predicted by Dr. Klein-what we can call a liquidity effect. Unexpected increases in cash flows do cause a decrease in short-term interest rates for five to eight months.

Dr. Klein would say, Fine. That is exactly what we want. With lower interest rates, business will borrow more to carry inventory, to buy more machinery, and to put up more plant. Developers will borrow to erect houses and apartments. The rise in autonomous spending will generate a multiplier effect which will increase GNP by a multiple of the increased investment spending. That will increase tax collections and the federal deficit will be eliminated by the rise in tax collections.

This may be good theology, but it is lousy economics and it is contradicted by historical experience.

Experience tells us that usually within eight months after money growth is unex-pectedly increased, interest rates will turn up. In another five to eight months, they go back to the level prevailing before the increased money growth began. After that, they exceed the earlier level. The rise, after initial fall, is a consequence of two effects of increased money growth. One can be called the income effect. Three to five months after an increase in money growth rates, nominal incomes start rising, increasing the demand for goods. Rising sales lead business to start borrowing more to increase production. The rise in business borrowing then causes interest rates to start rising.

In addition to the income effect, there will also be an inflation effect. The increased demand for goods starts prices rising. Historically, every extra 1 per cent added to the rate of inflation adds, with a lag if there has been a long period of price stability, one percentage point of interest rates. In the current situation, which follows a long period of inflation, the lag in the inflation effect on interest rates will not be long-a bit less than two years.

Dr. Klein's prescription for producing lowe. interest rates, then, will produce higher interest rates-exactly the opposite of what we want. The use of his prescription in 1971 and again in 1972 pushed our interest rates to astronomic levels in 1974 and 1975. That is why they are still at extraordinarily high

levels by historic standards.

Dr. Klein's medicine is even worse than what I have already described. He wants to prescribe not only higher money growth to lower interest rates but also larger deficits to lower employment. If the government borrows more, however, then interest rates will move to higher levels—not lower—levels. (If the Federal Government were not borrowing so much, interest rates would not be as high as they are.) The way to get lower interest rates is to reduce government spending. By cutting federal outlays for public works, for example, the money the rates is to reduce government is now borrowing would be available for residential and commercial construction. The volume of private construction is as low as it is because private builders are being crowded out of the money market by government borrowing (and construction is also being depressed by the constant increase in minimum wage determinations for federal construction being made under the Davis-Bacon Act).

Some of this crowding-out is a direct effect of government leaving so little money in the financial markets. Some of it is an indirect effect produced by reducing the net worth of stockholders. One of our studies at the University of Chicago shows that the value of common stocks held by individuals has a direct impact on the demand for residential construction. When the stock market drops, this reduces the net worth of individand the proportion of their portfolios held in common stocks. The drop in net worth reduces their demand for owned housing and for rental housing as a part of their investment portfolios. Whatever amount the government adds to its construction budget will be offset by a decline in private construction and private spending on other capital goods below what they would otherwise be as a consequence of direct and indirect effects of crowding-out.

Now we are in the midst of a slowing in the rate of recovery that worries everyone. The standard remedies will not cure us. So what is to be done to speed the recovery?

Let us look at both sides of the coin to get at this problem: (1) Why the current slowing in the recovery rate—the drop from 9 per cent real growth in the first quarter of 1976 to approximately 3 per cent cur-rently? (2) What does the answer to this question imply about the appropriate measures to end the slowing and speed the continuation of the climb out of recession?

Source: Federal Reserve Bulletin, December 1974 and February 1976; Federal Reserve Bank of St. Louis, "Monetary Trends," various issues.

There are two aspects to the current pause—monetary policy and wage-rate behavior. Looking at the behavior of money growth rates (see Table 1), you will notice that the six-month money growth rate peaked in August 1975 at 8.2 percent (on a one month basis, it peaked in June 1975 at 15.1 percent). It then slid month after month to 2.6 percent in December 1975 (on a one month basis, the annual rate of growth in December was minus 3.2 percent) and bottomed at 2.2 percent in January 1976. That was five months of a declining rate of money growth. Now what is important about that?

A crude forecasting rule works fairly well: Any time money growth rates decline persistently month after month, expect economic growth to start slowing six to nine months later. If the money growth rate decline continues for 12 to 14 months, you can expect a downturn in the economy 12 to 15 months after the decline in money growth rate began. Currently, that would mean that if the decline in money growth rates which started in August of 1975 had continued up to now, we would be in the midst of a downturn in the economy.

The recession that began at the end of 1973 was preceded by a slide in money growth rates from a peak in December 1972. The money growth rate slide did not bottom until February 1975. The economy hit bottom only two months later and began an upturn within three months. The point here is that the recession was predictable and its depth is ascribable to the long continuation of the slide in money growth rates.

The 1970 recession was preceded by 13 months of declining money growth rates. The 1960 recession was also preceded by 13 months of declining money growth rates. This story can be repeated for every recession where we have data on monthly changes in the stock of money in the period preceding the recession.

The recent showing of growth also has historical analogues. We had a similar pause in 1955 when we were on our way out of the 1953-54 recession. That pause was preceded by a nine-month decline in money growth rates that began 10 months earlier. Remember the economic pause in 1962 that became known as "the pause that didn't refresh"? It was preceded by an eight month decline

in money growth rates. And there is the mini-recession of 1967 when we actually had a dip in real GNP for a few months that didn't last long enough to be officially labeled a recession. That, too, was preceded by an eight-month slide in money growth rates.

If the money growth rate slide, which started from an August 1975 peak, had continued up to now, we would not be slipping into recession. But it didn't continue. It bottomed last January. The slowing of the economy's rate of rise is about to end. The latter part of the last quarter of 1976 saw a resumption of a higher rate of recovery with short-term interest rates bottoming. Long-term rates will remain soft provided the rate of inflation continues to move down. With the recent rate of money growth, however, it is not likely that the rate of inflation will fall any further for the next six months.

What I have described is an empirical observation drawn from history. If there are no causal relationships underlying this correlation, then it is no better than a sun-spot theory of business cycles. Ad hoc correlations have a way of breaking down soon after they are observed.

There is a theoretical, empirically verified underpinning for this historical empirical regularity. When the money growth rate slows, expectations take about a year to adapt to the new circumstances. As a consequence, prices and wage rates continue to rise at rates which cannot be supported by the forthcoming growth of demand. In 1973, the demand for goods rose by 11.1 per cent (fourth quarter of 1972 to fourth quarter of 1973). Of this 11.1 per cent rise in outlays to purchase goods, 8.6 percentage points were absorbed by a rise in hourly compensation. Businesses bid for scarce labor to meet the rising demand, and wage rates rose. Despite the large wage rise, 2.5 percentage points of the growth in demand went to employ more labor, absorbing the additions to the work force.

In 1974, the slower rise in money meant a slower rise in spending and a slower rise in the demand for goods. The demand for goods rose by 6.9 per cent (fourth quarter of 1973 to fourth quarter of 1974.) If nominal wage rates had not gone up, there would have been a 6.9 per cent rise in employment. If wage-rate increases had been restrained to 6.9 per cent, employment would have been maintained at its old level and real wage rates would have gone up instead of declining. But expectations of accelerating inflation (price controls ended in April) led to employers raising wage rates and agreeing in union bargaining to wage increases amounting to 10.8 per cent. That outran the rise in demand for goods and for labor by nearly 4 percentage points. And that, in turn, caused unemployment to rise from a normal 5 per cent to nearly 9 per cent (see Table 2).

TABLE 2.—CHANGES IN KEY VARIABLES BEFORE, DURING AND AFTER RECESSION OF NOVEMBER 1973 TO APRIL 1975 AND OF NOVEMBER 1969 TO NOVEMBER 1970

[Annual rates of change in percent]

Period	Hourly com- pensa- tion	De- mand for goods	Net em- ploy- ment effect	Em- ploy- ment 1	Unem- ploy- ment rate at end of period
1972 IV-1973 IV- 1973 IV-1975 I- 1975 1-1976 II- 1968 III-1969 III- 1969 III-1970 IV- 1970 IV-1972 I-	8.6 11.2 7.7 7.5 7.5 6.9	11. 1 5. 3 12. 4 7. 6 4. 1 9. 5	2. 5 -5. 9 4. 7 -3. 4 2. 6	3. 4 -1. 7 3. 2 2. 8 1 2. 6	4. 8 8. 9 7. 3 3. 5 6. 1 5. 8

I Unadjusted for changes in work week.

This wage rise outrunning the rise in demand continued into the first quarter

of 1975. Employment continued to fall right into March as a consequence. Hourly compensation rose at a staggering 13 per cent annual rate in the first quarter of 1975. The 1974–1975 recession can be directly blamed on an overly rapid rise in nominal wage rates. People were priced out of the labor market and that caused a two-million decline in number of jobs.

The relationship of wage increases and

The relationship of wage increases and demand increases reversed in the second quarter of 1975. The rate of wage rise slowed to 7 per cent. The demand for goods rose by 10.4 per cent. The result of the slower rise in wage rates meant that 3.4 percentage points of the increase in demand went to employing people more hours per week and

to employing more people.

From the first quarter of 1975 to the first quarter of 1976, we had a 13.1 per cent rise in the demand for goods. If the wage-rate rise had been restrained to only 5 per cent, full employment would have been restored by the first quarter of 1976—that is, the unemployment rate would have dipped to 5 per cent and men and women would have been working full workweeks. But the wage rise was not restrained. Hourly compensation rose by 7.8 per cent, leaving only 5.3 percentage points of the rise in demand to employ more people and to employ them more fully.

Restoring full employment requires a more moderate rate of wage increase. Mr. Meany and his union officials should be providing the leadership to convince their membership that wage restraint will do more toward restoring employment for their out-of-work members than any government can do.

Our unemployment problem cannot be solved by government. It is up to employers to avoid giving large wage increases that are inconsistent with restoration of full employment. It is up to employers to resist union demands for unwarranted rises. It is up to union leaders to make their membership understand that unwarranted wage increases cost their fellow workers long spells of unemployment. And it is up to all of us workers to recognize that while we all merit bigger wage increases than we are getting, bigger ones cannot be granted without creating tragedies for fellow workers. As a matter of fact, if our nominal wage rates were to rise more slowly, our real wage rates would rise more rapidly, paradoxical though this may seem.

If we want our real compensation to rise more rapidly, and if we want to restore full employment, let us inform Mr. Carter that we want government spending reduced. We must reduce government spending in order to stop the drain of capital going into financing deficits—That would otherwise go to providing more jobs, increasing productivity, and raising output.

ESCALATING COSTS OF MASS TRANSPORTATION SYSTEM

Mr. HARRY F. BYRD, JR. Mr. President, to those who are concerned with the escalating costs of building a mass transportation system for the Washington metropolitan area, I invite attention to a letter Virginia's Governor, Mills E. Godwin, Jr., has written the Secretary of Labor.

Governor Godwin protested a Labor Department regulation that would require the State to pay unskilled labor \$9 an hour. With a standard work week of 40 hours over a 50-week period, the annual wage would be \$18,000.

For skilled labor, the rate is set at \$11.45 an hour, or an annual wage of \$23,000.

¹This was a direct result of Federal Reserve action taken in June and July 1975. The Fed, quite correctly, became alarmed over the very rapid rise in the quantity of money in May and June (at annual rates of 12 percent and 15 percent). It took money out of the economy (by the sale of T-bills) in July (forcing the Fed fund rates from 5.15 percent to 6.35 percent), but it overdid its job. This overreaction is usual Fed behavior as a consequence of focusing on what it is doing to interest rates and belatedly paying attention to subsequent money growth rates.

The Department of Labor ruling requires Virginia to construct Interstate 66 from the Washington Beltway into the Rosslyn area of Arlington County with differing wage rates for the same labor.

Under the Department of Labor edict. an unskilled laborer working on highway roadbed grading would be paid \$4.50 an hour, but those doing the same type of work in the I-66 center strip along which Metrorail would go, will be paid more than \$9 an hour.

Skilled labor working on I-66 would be paid \$6.50 an hour while those doing identical grading work-and side by side—for the Metrorail system would be paid \$11.45 an hour.

As Governor Godwin states:

The inequity is obvious. Such a plan most certainly will invite first the ridicule and then the wrath of workers and taxpayers alike. Moreover, on a large and complex construction project such as that involved here, separate wage rates would be virtually impossible to administer.

He states further that "inescapably. such exceedingly high wage rates will fan the fires of inflation and will discourage serious efforts to provide jobs with reasonable wages for those who now have none at all."

I agree, and I would hope that Labor Department will reconsider their decision beginning today with a meeting they are holding with Virginia Highway Department officials.

I ask unanimous consent that the letter from Governor Godwin be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD. as follows:

COMMONWEALTH OF VIRGINIA.

OFFICE OF THE GOVERNOR, Richmond, April 1, 1977.

Hon. F. RAY MARSHALL,

Secretary of Labor, Department of Labor, Washington, D.C.

DEAR MR. SECRETARY: I must express to you my alarm at two incredible decisions received by the Commonwealth of Virginia within the past week regarding wages to be required by the United States Department of Labor in construction of Interstate 66.

There is no rational basis for these decisions by your department's Wage and Hour division, and I have directed our Department of Highways and Transportation and the office of the Attorney General of this Commenwealth to protest in the strongest possible terms to the Acting Administrator of the Wage and Hour Division.

Because of the patent absurdity of the decisions, I respectfully ask that you intervene in this matter, and by doing so demonstrate that the administration in Washington is in fact serious about relieving the awesome burden of inflation and unemployment afflicting this nation's economy.

Let me illustrate something of the effects

of these two decisions.

The first, Decision No. 77-VA-235, dated March 25, 1977, requires wages on the average 82 per cent higher than those planned in this Commonwealth's recent invitation to contractors to bid on the first of these I-66 projects, and in some instances requires wages 125 per cent higher than previously established.

Under the provisions of this decision, for example, wages for laborers would be increased from \$4.50 to more than \$9.00 an hour.

The second decision, No. 77-VA-242, dated March 29, 1977, would apply these sharply higher rates only to work performed in the I-66 right-of-way for the Metrorail system. Under this approach, as an example, equipment operators grading the normal roadway would be paid \$6.50 an hour, while those doing identical grading work in the median, requiring no greater skill or accuracy, would be paid \$11.45 an hour.

The inequity is obvious. Such a plan most certainly will invite first the ridicule and then the wrath of workers and taxpayers alike. Moreover, on a large and complex construction project such as that involved here. separate wage rates would be virtually im-

possible to administer.

It is well established that wage rates must be based on the type of construction being accomplished. To establish a rate solely on the basis that Metrorail may eventually occupy part of this right-of-way is an unconstitutional discrimination.

For some months now, the American people have been listening hopefully as spokesmen for the Administration promised to do battle with inflation and unemployment. The inflationary spiral, which unquestionis influenced substantially by governmental policies, is the number one concern of the citizens of Virginia and, I believe, of other states as well.

I earnestly trust that these two decisions of the Wage and Hour Division are not illustrative of the manner in which the Federal government intends to combat inflation and unemployment. If so, our people might just as well unfurl the white flag of surrender and prepare to suffer the disastrous consequences certain to follow.

For, inescapably, such exceedingly high wage rates will fan the fires of inflation and will discourage serious efforts to provide jobs with reasonable wages for those who now

have none at all.

I would point out that the Commonwealth of Virginia invited contractors' bids early in March, to be opened on Tuesday of next week, based on prevailing wage rates which had been developed specifically for this project by your department's Wage and Hour

It appears deliberately disruptive for the Division now to arbitrarily change those rates when it was fully aware that bids had requested and were to be opened

The proposed rates will in the course of construction of I-66 cost the taxpayers millions of dollars more than they should reasonably be expected to pay for this purpose. On this first project alone, the rate change could increase the cost two to three million

An additional factor not to be overlooked is that these decisions are indicative of the actions which have caused the cost of Metrorail to become so excessive that no one now knows what it ultimately will be. And it is for this reason that the Governor of this Commonwealth and many of our citizens question the philosophy of full-speed-ahead development of Metrorail without knowing its long-term cost implications.

In the name of economic sanity, I urge that these two decisions of the Wage and Hour Division be reconsidered and rescinded immediately, so that this Commonwealth and the United States Department of Transportation may proceed with construction of this highway which already has been too long delayed.

Sincerely,

MILLS E. GODWIN. Jr.

GAO FINDS MISMANAGEMENT IN FEDERAL RESEARCH AND DEVEL-OPMENT CONTRACTING PRIVATE FIRMS

Mr. PERCY. Mr. President, I am releasing today a General Accounting Office study, completed at my request, examining for the first time practices surrounding the \$9.1 billion in Federal research and development-R. & D.-contracts awarded in fiscal year 1975 to private, profitmaking research firms.

According to GAO, these firms received 48 percent of all Federal R. & D. contracts in fiscal year 1975, a figure expected to rise to 50 percent in fiscal year 1976, and 52 percent in fiscal year 1977.

The study focused on contracting practices among six Federal agencies: the Federal Maritime Administration, the Environmental Protection Agency, the Federal Aviation Administration, the National Highway Traffic Safety Administration, the Federal Railroad Administration, and the Office of the Secretary of Transportation. R. & D. contracts of more than \$100,000 were examined, for a total of 111 contracts.

Among the problem areas uncovered by GAO were the following:

END OF YEAR CONTRACT AWARDS

In fiscal year 1975, a full 65 percent of all R. & D. contracts awarded by the six Federal agencies to private firms were awarded in the final month of the fiscal year. One agency, the Federal Maritime Administration, awarded 42 percent of its contracts in the final 2 days of fiscal vear 1975.

GAO noted:

"Agency officials believe that they are expected to obligate R. & D. funds in the fiscal year in which they are appropriated, even if the funds remain available for obligation in the following year," noted GAO, "otherwise they will be vulnerable to criticism and congressional action reducing funding in subsequent years if appropriations are carried over to the next fiscal year." (Emphasis added.)

GAO cited a number of problems arising from this end-of-year rush to contract, including:

Inadequate review of proposals, Awarding of unnecessary contracts, Lower quality proposals, and

Increased government cost due to overtime in the procurement office.

CONTRACT MODIFICATIONS

Contract modifications were found to be common and significant. Of the 111 contracts examined by GAO, 69—or 62 percent—were modified upward prior to completion. Contracts with dollar modifications averaged cost increases of 72 percent. Those with time modifications averaged delays of 9 months in completing the final research product. One agency, the Federal Railroad Administration, modified 100 percent of its contracts during the GAO study period, with average dollar increases of 111 percent and average time delays of 17 months.

"* * * modifications were sometimes used to remedy poor agency planning in the initial stages of the contract," said GAO. Lessened competition, outdated research and less funds for other planned projects were cited as problems arising from contract modifications.

EVALUATION OF END PRODUCTS

Though GAO was unable to make an extensive inquiry into the end use of the research by the agencies due to the small number of projects actually completed during the study period—13 out of 111 contracts examined—GAO noted that four of the six agencies studied—Maritime Administration, National Highway Traffic Safety Administration, Federal Railroad Administration, and Office of the Secretary of Transportation—had no formal procedures for evaluating the usefulness of these millions of dollars of research.

INACCURATE REPORTING

The National Science Foundation—NSF—is charged with maintaining current statistical information on Federal R. & D. expenditures throughout the Government. These NSF figures are used by Congress, agencies of the Federal Government, and others in overseeing the Federal R. & D. effort and by outside groups to make planning decisions based on the direction of Federal spending. However, NSF must rely on the agencies themselves in obtaining this information.

GAO reported numerous instances of inaccurate or misleading agency reports to NSF on R. & D. expenditures. For example, GAO pointed to agencies reporting only specific "R. & D. appropriations" to NSF, excluding often sizeable R. & D. projects funded through other sources within the agency. For example, EPA omitted \$22 million "identified at the agency's procurement office as obligations for R. & D. activities financed from other appropriations." Similarly, 'a major portion" of a \$43 million NHTSA divisional budget which "should have been reported" was omitted for the same reason. Therefore, it may be that reported Federal research and development expenditures are greatly understated.

I feel that there are major problems in Federal research and development contracts.

Federal agencies are either guilty of haphazard planning in awarding contracts or deliberately wasting money at the end of the year so they will not have their funds reduced by Congress the following year.

The extensive pattern of contract modifications implies cozy relationships between agencies and contractors, and certainly prevents others from bidding on the modified awards.

The entire basis upon which the Federal Government and the private sector plan based on NSF research and development figures may be faulty based on inaccurate information which NSF compiles. The authoritativeness of NSF figures is seriously in doubt.

It is clear to me from the information uncovered by GAO in this report that there is ample room for constructive legislation to correct the serious problems in the contracting out of research and development work by Federal agencies. Considering the very large amounts of money at stake, I would like to see GAO continue its investigations into this area.

Discussions between my staff and GAO have been proceeding on a continuing basis as to the future direction of the investigation.

OCCUPATIONAL ALCOHOLISM PRE-VENTION AND TREATMENT ACT OF 1977

Mr. WILLIAMS. Mr. President, I am happy to join with the Senator from Maine (Mr. Hathaway) in sponsoring the Occupational Alcoholism Prevention and Treatment Act of 1977.

This bill will provide Federal assistance to employers, labor organizations, and other groups, to establish and operate occupational alcoholism programs, and is similar in intent to the amendment to the Tax Reform Act which the Senator from Maine and I proposed last year and which passed the Senate by unanimous vote.

Mr. President, this bill will give additional emphasis to one provision of an act which I coauthored 7 years ago with former Senator Harold E. Hughes, the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970. That act called for appropriate prevention, treatment, and rehabilitation programs and services for alcohol abuse and alcoholism among Federal civilian employees and for the fostering of similar programs and services in State and local governments and in private industry.

The National Institute on Alcohol Abuse and Alcoholism—NIAAA—created by that act, has given emphasis to the development of occupational programs. The occupational alcoholism branch, within the Institute, was created to encourage employers—both public and private—to develop programs to identify for treatment those employees whose job performance was impaired as a result of alcohol abuse. Grants have been made available to each State for two trained occupational consultants. Training has been provided for these consultants, and experts on the staff of NIAAA provide guidance and technical assistance.

Mr. President, no effort on behalf of the Federal Government is more important to the health and well being of our citizens than this effort to identify and treat alcoholic persons in the work force.

As of January 1977, 86,850,000 Americans were in the Nation's work force. If one were to multiply that number by the lowest alcoholism prevalence rate commonly used by occupational program people—4 percent—some 3.5 million of the estimated 9 to 10 million Americans with alcohol problems are currently holding jobs. The annual cost to the Nation's economy of the effects of their drinking has been placed at over \$30 billion. The personal suffering of problem drinkers, their families, and their friends is even more devastating, but cannot be measured in dollars.

The work setting has been found to be one of the most effective places to identify people with drinking problems and to do something about them. For one thing, problem drinkers find it harder to alibi convincingly about their excessive drinking on the job because their behavior is judged objectively against standards of acceptable work performance. And more importantly, the problem drinker's job itself—with all that it means financially, personally, and so-cially—can be used as leverage if other means are not successful in getting a worker to seek help. Although much of the evaluation data on the effectiveness of occupational programs is "soft"based on the personal experiences of staff and clients—there is little reason to doubt their conviction that occupational programing is one of the most promising mechanisms through which alcohol problems can be identified and managed. An educational institute-Rochester Institute of Technology-recently reported they spent \$450 in direct costs to implement a program. In year, 51 employees were assisted, saving the institution \$362,526. Actual savings were accrued in employee turnover saving and benefits including medical claims, workmen's compensation, absenteeism, and life insurance death benefits. Quite a savings, Mr. President, on a \$450 expenditure.

Occupational programs experienced little expansion between the early 1940's, when pioneers such as Dupont and Eastman Kodak began programs, and 1960. when there were about 60 identifiable programs in the country. By 1973, how-ever, there were about 600 occupational programs, and half of these had been started since 1971. The latest estimates put the number of occupational programs in existence today at roughly 1,000. But there are about 13 million different establishments in the United States where people are employed. Consequently, even though occupational been programing has the fastest growth sector in the alcohol treatment field, further expansion is urgent in the light of the monumental needs still unaddressed

Mr. President, NIAAA is demonstrating the relative effectiveness of alternative systems or models designed to identify for treatment the employee whose work is adversely affected by alcoholism or alcohol abuse. Even if they develop the "perfect" system, the one which would produce the greatest results, there will still be a tremendous marketing job to be done to motivate public and private employers to realize the advantage of such programs in the saving of both money and human lives.

The network of trained occupational consultants which exists around the United States has encountered much initial resistance in motivating employers to initiate programs. The legislation which the Senator from Maine and I are sponsoring would quickly increase that network, placing particular emphasis on labor unions as effective agents in stimulating program development within the Nation's work force. An added

incentive would be the provision of a financial incentive to progressive companies seeking to take advantage of re-

cent program developments.

Mr. President, it is also important to remember that the part of the work force which is organized and oriented to the health and welfare of their fellow workers, that is the labor unions, can exert the interest and concern elicited in this bill. Can you imagine the progress which could be made, if each State and community labor union structure had the trained manpower to assist locals in dealing with management for joint labor-management programs. This bill emphasizes the importance of a dual approach-a financial incentive to management and the capability of organized labor to use its power to accelerate development of alcoholism programs for improvement of the health and welfare of fellow workers.

As I also pointed out in this Chamber last year, Mr. President, I think it imperative that we remember the Federal Government is the Nation's largest employer. The Senator from Maine graciously consented to include public as well as private employees in the pro-

grams authorized by this bill.

Title II of the comprehensive alcoholism legislation of 1970 required the Civil Service Commission to develop and maintain prevention, treatment and rehabilitation programs and services for Federal civilian employees. No special funds were authorized for the Civil Service Commission to carry out its responsibilities under title II. As in private industry, where there has been understanding and interest on the part of top management, adequate resources have been provided and good programs have resulted. Unfortunately, as a recent study by the General Accounting Office indicates, in a majority of Federal agencies such has not been the case.

On June 25, 1976, in a statement to the Subcommittee on Manpower and Housing of the House Committee on Government Operations, Gregory J. Ahart, Director of the Human Resources Division of GAO, said that 42 of 74 coordinators interviewed by his staff advised that they spent 5 percent or less of their time on alcoholism program activities. Only two coordinators spent 100 percent of their time on alcohol related matters, while seven others were full time administrators of "troubled"

employee" programs.

On the other hand, GAO cited two installations as examples of effective programs. One, a western Army installation with a force of 2,800 civilians had budgeted \$43,200 for its program during fiscal year 1975 and utilized a full-time counselor, and a secretary and chaplain on a part-time basis. The other, the Government Printing Office in Washington—with 8,000 full-time and 600 part-time employees—has a full-time administrator with extensive prior experience in the alcoholism field with an annual budget of \$36,000.

In both of these installations, resources were forthcoming because of top management support. Other sections of the GAO report indicate that in many

other installations an extensive job of training and education is necessary before any similar degree of support will be evidenced.

In view of the failure to properly implement title II, I recommend that a specific portion of the funds authorized under the Occupational Alcoholism Prevention and Treatment Act of 1977 be allocated for programs for Federal and other public employees. Such funds could be used for consultation and training and for support of local installation programs and for pilot consortia to serve

small agencies.

Mr. President, I also pointed out in this Chamber last year that I would hope funds authorized by this legislation could be used to identify and reach the employed woman alcoholic. I am deeply concerned that there has been virtually no research conducted on alcoholism in women nor any significant effort to reach alcoholic employees in women-intensive professions such as nursing. Yet it is becoming apparent that alcoholism in women is much higher than previously assumed. Edith S. Gomberg, Ph. D., University of Michigan, in a paper she delivered before the National Council on Alcoholism's forum in Milwaukee in 1975, deplored the lack of research on the employed female alcoholic. She indicated that one survey of an occupational alcoholism program in an automobile industry indicates that women constitute both 8 percent of the work force and 8 percent of those referred to the company programs for problem drinking—a 1-to-1 ratio. Dr. Gomberg said the same survey suggests that the problem could be even larger: "when a woman begins to progress into alcoholism she usually 'voluntarily retires' from the work force and goes home to become a 'better' wife and mother-she becomes the hidden drinker."

I am also hopeful that NIAAA will encourage various professional organizations to create programs for reaching and treating the alcoholics among their membership. It has long been recognized by experts that the incidence of alcoholism among the medical and legal professions, for example, is extremely high. Organizations to help such professionals have sprung up, including "International Doctors in AA" and "International Doctors in AB" and "Inte

national Lawyers in AA."

In some States professional associations have taken action to help their alcoholic members. For example, the State Bar of California estimates that, of its approximately 51,000 members, 4,000 to 8.000 judges and lawyers are alcoholics or serious alcohol abusers. The State bar is self-governing, which means the attorney is subject to disciplinary action, including disbarment. As Don Godwin of NIAAA's occupational branch has pointed out, "this gives the State bar a similar capability as that of the employer in motivating the employee-in this case, the attorney-to accept meaningful treatment. In approximately half of the States, the legal profession is regulated in a manner similar to that of California. This means that an alcoholism program would be feasible in these States, due to the 'constructive coercion' of the State bar association

Similarly, last June, the medical profession in the State of Georgia created an occupational program financed and supported by the Medical Association of Georgia. Dr. Douglas Talbott, director of both De Kalb County's and the State's programs to rehabilitate doctors "disabled" by drugs and alcohol, supported by the Medical Association of Georgia, has stated:

Most doctors don't know where to turn when they have a problem with alcohol. Although alcohol and drug problems are considered an "occupational hazard" for doctors because of stress and availability of the drugs, even fellow physicians don't fully comprehend the problem, which affects one out of 10 doctors.

Mr. President, this bill authorizes the Secretary of Health, Education, and Welfare, acting through the National Institute on Alcohol Abuse and Alcoholism. to make grants to pay up to one-half of the cost of these occupational alcoholism programs. To fund the program, the bill authorizes the appropriation of an amount equal to 2.5 percent of the total Federal alcohol taxes collected on beer. wine and liquor, for the fiscal years 1979 through 1982, or an estimated \$100 million to \$120 million. In view of the approximately \$5.43 billion the Federal Government receives from this source, an allocation of \$120 million is hardly excessive to treat the millions of alcoholic citizens in our work force.

Mr. President, I commend the Senator from Maine (Mr. Hathaway) for his continued efforts on behalf of the millions of Americans who suffer from the disease of alcoholism and am happy to join with him in sponsoring this legis-

lation.

(This concludes additional statements submitted today.)

ORDER FOR RECESS UNTIL 2 P.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 2 p.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ALEX HALEY

Mr. BAKER. Mr. President, on March 14 of this year, the Senate adopted, by unanimous vote, Senate Resolution 112, which was a tribute to a great Tennessean, Mr. Alex Haley. A few days ago I indicated on the floor of the Senate that I intended to invite my colleagues to share in other comments about Mr. Haley as a part of the celebration of Alex Haley Day by the State of Tennessee.

Mr. President, yesterday in Nashville, ceremonies were held to honor a most distinguished Tennessean, Mr. Alex Haley, author of "Roots." Since Tuesday's session of the Senate prevented me from attending the festivities in Nashville, I wanted to today express my admiration and respect for Mr. Haley and his unique accomplishments.

Roots is the result of 12 years of research by Mr. Haley into the history of his family in America and its long struggle-through slavery, separation, war and emanicipation—toward freedom. In the telling of his family's history, however, Mr. Haley has also brought into focus the experiences of millions of black Americans who shared a similar African heritage and ordeal in this country. His book has sold hundreds of thousands of copies throughout the United States. The televised versions of "Roots" attracted some 130 million viewers, and the interest which millions have shown in learning more about their own family background is increasing constantly.

The impact of Mr. Haley's work upon race relations in this country is still being analyzed, and I suspect that it will be many years before it can be fully assessed. I believe, however, that "Roots' has kindled a new pride among black Americans in their heritage and a greater understanding in whites of all ages of the evils of slavery and the obstacles which have been confronted by blacks in their

long struggle for racial equality.

Progress in removing these obstacles has been painfully slow during the last hundred years; and there are barriers remaining, both economic and cultural, which must still be confronted. I hope that Mr. Haley's work, by contributing to a better understanding of the past, will make the removal of those remaining barriers easier.

I greatly admire the hard work and dedication which Mr. Haley devoted to his search, and I believe these efforts have resulted in a fine literary work which will have a lasting impact upon Americans of all races. I am proud that Mr. Haley's courageous ancestors decided to make their home in Tennessee, and it is my great pleasure to join my fellow Tennesseans in honoring Mr. Haley and, through him, his family today.

ALEX HALEY

Mr. SASSER. Mr. President, as the State of Tennessee and the U.S. Senate honor Alex Haley today, I would like to express my own sincere appreciation for the contribution that this one man has given to our Nation.

What the television and book forms of "Roots" have done for our political culture stands out as a major milestone in the recent history of racial relations in the United States. Alex Haley has caused large numbers of people to contemplate the injustices of the past and to consider carefully the origin and the very nature of prejudice. He has given all Americans a perspective upon the history of the "peculiar institution" of slavery. which our Founding Fathers argued about and finally, and tragically, failed to end at the constitutional convention in 1787. He has given to Afro-Americans and to every American a greater sense of the cultural heritage which ties every American black family to the great historical cultures of the African continent.

As millions of Americans sat spellbound before their television sets on 8 consecutive nights, they came to grips with historical events with which they had only dealt before in an abstract and intellectual fashion in high school his-

tory courses. "Roots" provided a dramatic and emotional link to a tragic past—a past which still frequently evokes guilt and resentment. Slavery, the Civil War, reconstruction and the long years of neglect that followed were recalled for us in a most potent form.

Mr. President, I believe that even as Alex Haley was bringing us together in front of our television sets a few weeks back, he was helping to bring us together as a people. We are a relatively new country, and we have dedicated ourselves to equality. The lessons of the past will help us to create a better future for our people, and Alex Haley has helped us to gain a better appreciation for that past.

Alex Haley spent 12 years of his life and traveled half a million miles to research his work. He found a griot in Gambia who helped confirm the oral history of Kunta Kinte that had been passed down through the generations. Mr. Haley made a thorough search of genealogical records, including those in the Library of Congress, the National Archives, and the Annapolis, Md., Historical Society.

As Alex Haley once said,

You can never enslave someone who knows

Alex Haley has helped Afro-Americans

to better appreciate who they are.

Alex Haley was raised in Henning, Tenn., which is about 50 miles north of Memphis. His family owned a lumber company there and his mother was a teacher in the local grammar school. It is with particular pride that I pay tribute to this native Tennessean today, and express the gratitude of all Tennesseans for the contribution that he has labored to give our Nation on the occasion of its 200th birthday.

Mr. President, on September 29, 1967, Alex Haley stood on an Annapolis pier and looked toward that continent from which Kunta Kinte came exactly 200 years before. Today, as the U.S. Senate and his native State of Tennessee honor Alex Haley, let us all look toward the future. Let us look toward that day in the future that Martin Luther King, Jr., envisioned, a day when the sons of former slaves and the sons of former slave owners will sit down together in harmony and proclaim their freedom from the errors and injustices of the past. Mr. President, I think that Alex Haley has brought us closer to that day.

A TRIBUTE TO ALEX HALEY

Mr. DOLE. Mr. President, I am pleased to join the distinguished minority leader in paying tribute to Alex Haley for his outstanding contribution to American literature. His book, "Roots," represents the culmination of 12 years of intense research and travel. The authorship of the book is a personal achievement that in itself is noteworthy. But "Roots" is more than just a well-written book. In "Roots." Alex Haley has provided us with an insight into an aspect of American history and America culture that has never before been discussed on such a compre-hensive basis. He has reawakened in each of us an interest in our personal heritage. Mr. Haley's efforts have created a new awareness that will have an influence on how we look upon each other as Americans and how we perceive ourselves.

NEW RESPECT FOR INDIVIDUAL HERITAGE

As Americans, we are a society of immigrants: A country where approximately one-third of our population changes its address in any given year. To a great extent, we are rootless-all of us-lacking traditions and uninformed of our individual heritage.

Alex Haley, in searching for his own roots, has given us all a great gift. He has taught us how to search for selfhe has proven it can be done. He has awakened a nation to the value of its ancestors, to the joy of the stories of living relatives, to the fun of family attics and heirlooms. In fact, he has given us back our family and community, and for this we all owe him the highest praise.

PUBLIC ACCLAIM

The overwhelming popularity of Mr. Haley's book and the television series that depicted it attest to the literary merit of this work. But the overwhelming public reaction signifies more than just the publication of another excellent literary piece. Alex Haley has done more than write an excellent historic biography of an American family. He has captured the mood of the American people who are at last willing to look at the history of black oppression and its impact on the social fabric of this great Nation. Stimulated by Alex Haley's great work, America is saying I want to know more about black history and black oppression. I want to understand.

AMERICAN SPIRIT

But in addition to creating a new awareness, "Roots" has also initiated a feeling of pride in the history and heritage of black Americans. The desire to be free and the will to endure any hardship to gain freedom exhibited by Alex Haley's ancestors represents an excellent example of what we too flippantly refer to as the American spirit. We often talk about it. Few have so often been asked to prove that we really possess it. No black American can be comfortable viewing the oppression his ancestors experienced and feeling the ramifications that history has on his present life. Yet no black American can help but take pride in the spirit exhibited by Alex Haley's ancestors in their quest for freedom.

A PROUD HERITAGE

And this feeling of pride is not limited to black Americans. All Americans can take pride in the spirit, the honor, and the respect for freedom depicted in "Roots." Our Nation is a melting pot. Our people bring together the cultural heritage of races and creeds from around the globe. Each culture becomes a part of the American culture, yet remains unique and distinct. But each still has an enriching impact we can all share. "Roots" opens our eyes to a new aspect of black American culture that touches all our

KANSAS ROOTS

In addition to recognizing Alex Haley's great achievement, I have a special interest, as a Kansas Senator, in speaking out at this time. For a portion of the outstanding Haley family planted its roots in Kansas over two decades ago. George Haley, Alex's brother, has been a friend of mine for a number of years since he became the first black Republican elected to the Kansas Senate. George is an outstanding individual in his own right. And there was a time when they introduced Alex as George's brother; now George is introduced as Alex's brother. The first black graduate of the University of Arkansas School of Law, George served in the Kansas Senate and later as general counsel for the Urban Mass Transit Authority and the U.S. Information Agency.

In 1954, long before anyone really thought about "Roots," Alex Haley was writing, and Alex wrote a moving article in 1954 that was printed in the Reader's Digest about his brother George.

Mr. President, I ask unanimous consent that the article be included in the RECORD at this point as it provides an excellent insight into the outstanding Haley family and Alex Haley to whom we pay tribute today.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE MAN WHO WOULDN'T QUIT
(By Alex Haley)

In low tones the dean was explaining to a prospective law student the conduct expected of him. "We have fixed up a room in the basement for you to stay in between classes. You are not to wander about the campus. Books will be sent down to you from the law library. Bring sandwiches and eat lunch in your room. Always enter and leave the university by the back route I have traced on this map."

The dean felt no hostility toward this young man; along with the majority of the faculty and trustees, he approved the admission of 24-year-old George Haley to the University of Arkansas School of Law. But it was 1949, and this young U.S. Air Force veteran was a Negro. The dean stressed that the key to avoiding violence in this Southern school was maximum isolation.

George was dismayed at the pattern of life laid out for him. He might have entered Harvard Law School, where he would not have had to live the life of a pariah. Yet he had chosen this!

A letter from his father had determined him. During his last semester at Morehouse College in Atlanta he had opened the letter to read: "Segregation won't end until we open beachheads wherever it exists. The governor of Arkansas and educational officials have decided upon a quiet tryout of university integration. You have the needed scholastic record and temperament, and I understand that Arkansas has one of the South's best law schools. I can arrange your admission if you accept this challenge."

George had great love and respect for his father, a college professor and pioneer in Negro education. He accepted the challenge.

The first day of school he went quickly to his basement room, put his sandwich on the table and started upstairs for his class. He found himself moving through wave upon wave of white faces that all mirrored the same emotions—shock, disbelief, then choking, inarticulate rage.

The lecture room was buzzing with conversation, but as he stepped through the door there was silence. He looked for his seat. It was on the side between the other students and the instructor. When the lecture began he tried desperately to concentrate on what the professor was saying, but the hate in that room seeped into his consciousness and obliterated thought.

On the second day he was greeted with

open taunts and threats: "You nigger, what are you doing here?" "Hey, nigger, go back to Africa." He tried not to hear; to walk with an even pace, with dignity.

The students devised new ways to harass him. Mornings when he came to his basement room he found obscene and threatening notes shoved under the door. The trips from the campus back to his rented room in town became a test of nerve. One afternoon, at an intersection, a car full of students slowed down and waved him across. But the moment he stepped in front of the car they gunned the engine, making him scramble back and fall to his hands and knees in the gutter. As the car sped away he heard mocking laughter and the shouted taunt, "Hey, missing link, why don't you walk on your hind legs?"

His basement room was near the editorial offices of the Law Review, a publication written and edited by the 12 top honor men of the senior class. He had heard of their bitterness that he had to share their toilet. One afternoon his door flew open and he whirled to catch in the face a paper bag of urine. After this incident he was offered a key to the faculty toilet; he refused. Instead, he denied himself liquids during the day and used no toilet.

He began to worry that his passive acceptance of degrading treatment might be destroying him, killing something of his manhood. Wouldn't it be better for him to hate back, to fight back? He took his problems to his father and brother in long, agonized letters.

His father answered, "Always remember that they act the way they do out of fear. They are afraid that your presence at the university will somehow hurt it, and thus hurt their own education and chance in life. Be patient with them. Give them a chance to know you and to understand that you are no threat."

The day after this letter arrived, George found a noose dangling from the ceiling in his basement room.

His brother wrote, "I know it is hard, but try to remember that all our people are with you in thought and prayer."

George read this with a wry smile. He wondered what his brother would say if he knew how the town Negroes uneasily avoided him. They knew he walked the thin edge of violence, and they didn't want to be near if an explosion occurred. Only a few gave him encouragement. A church deacon proffered a rumpled dollar bill to help with expenses, saying, "I work nights, son. Walkin' home I see your studyin' light."

Despite his "studyin' light" George barely passed the first-semester exams. His trouble was that in class he couldn't really think; all his nerve endings were alert to the hate that surrounded him. So, the second semester, using a semi-shorthand he had learned in the Air Force, he laboriously recorded every word his professors said. Then at night he blotted out the day's harassments and studied the lectures until he could almost recite them.

By the end of the year George had lost 30 pounds and he went into the examinations exhausted, both physically and emotionally. Somehow he finished them without collapsing, but he had flunked, he thought. He had done his best, and now he could honorably leave. Some other Negro would have to do what he had failed to do, some other man stronger and smarter.

stronger and smarter.

The afternoon the marks were due, heavy with a sense of failure, he went to his basement room, dropped into the chair and put his head on the table. There was a knock on his door and he called, "Come in!" He could hardly believe what he saw. Into the room filed four of his classmates, smiling at him. One said, "The marks were just posted and you made the highest A. We thought

you'd want to know." Then, embarrassed, they backed out of the room.

For a moment he was stunned, but then a turmoil of emotion flooded through him. Mostly he felt relief that he didn't have to report failure to his father and friends.

When George Haley returned for his second year at Arkansas there was a sharp decrease in the hate mail under his door, and there was a grudging respect for his scholastic accomplishments. But still, wherever he went, eyes looked at him as if he were a creature from a zoo.

One day a letter arrived: "We are having a 'Race Relations Sunday' and would enjoy having you join our discussion." It was signed by the secretary of the Westminister Presbyterian Student Foundation.

His first reaction was anger. They wanted to discuss, did they? Where had these dogooders been all the time he'd been going through hell? Bitterly he tore up the invitation and threw it in the wastebasket. But that night he tossed restlessly. At last he got out of bed and wrote an acceptance.

At the church, he was met by a group of young men and women. There were the too-hasty handclasps and the too-bright smiles. At last the chairman stood up to introduce George. He said, "We hope that Mr. Haley will tell us what we can do as a Christian body . . ."

George got to his feet and moved stonily to the podium. Those introductory words released something deep in his maelstrom of emotions. He forgot his carefully prepared speech. "What can you do?" he blurted out. "You can speak to rea!"

"You can speak to me!"
Suddenly, all that had been dammed up came pouring out. He told them what it was like to be treated like an enemy in your own country; what it did to the spirit to be hounded for no crime save that of skin color; what it did to the soul to begin to believe that Christ's teachings had no validity in this world. "I've begun to hate," he confessed. "I've drawn on every spiritual resource I have to fight off this hatred, but I'm falling."

Suddenly his eyes flooded with tears of anger, then of shame. He groped for his chair.

The silence vanished in a roar of applause and cheers. When the chairman's gavel finally restored order, George was unanimously voted a member of the group. Thereafter he spent a part of each weekend at Westminister House, enjoying the simple pleasure of human companionship.

A slight thaw also began to take place at the university. George's classmates gingerly began moments of shoptalk with him, discussing cases. One day he overheard a group discussing a legal point, and one of them said, "Lets' go down and ask Haley in the Noose Room." He knew only a moment of indignation—then he smiled! It was an important change.

Toward the end of his second year a senior asked, with elaborate casualness, why didn't he write more articles for the *Law Review*. It was traditional that only the best students received such invitations, and he felt himself flushing with pride.

It was only after he returned to school for his third and final year that he decided to go to the cafeteria. He didn't really want to go. In this last year he longed to relax, to let down his guard. But he was in this school for more than an education.

He went and stood in the cafeteria line. The other students moved away from him in both directions so that he moved in his own private air space. His tray was almost loaded when three hulking students ahead shouted, "Want to eat with us, nigger?"

They jostled him, knocking his tray to the floor with a clatter of breaking dishes. As George stooped to retrieve it, his eyes blazed up at his tormentors and for the first time

he shouted back. "You're adults!" he said. "Grow up!" They shrank from him in mock terror

Shaking, George replaced the dumped food and made his way to a vacant table. He bent his head over the crockery. Suddenly a balding, angular student stopped beside him with his tray and drawled, "My name is Miller Williams. Mind if I sit here?" George nodded. Now the two of them were the center of all eves. Now the taunts were directed at the white student, the words "nigger lover."

Miller Williams was hardly that. "I was born in Hoxie, Ark.," he said, "and have spent all my life in the South. But what's happening here just isn't right, and I'm tak-

ing my stand with you."

Later that day Williams brought several students to George's room for a bull session, and they laid it on the line. "Don't all you niggers carry knives." George emptied his pockets—no knife. "How often do you bathe?" Every day, George told him. "Don't most of you lust after white girls?" George showed him snapshots of a pretty Negro girl he was dating in his hometown.

Following this session he wrote his brother, "Improving race relations is at least 50 percent a matter of simple communication. Now that I'm able to talk to a few whites I realize what terrible beliefs cause their prejudice. I can see the emotional struggle they are going through just to see me as an

equal human being."

Increasingly the last year became a time of triumph, not only for George but for the white students who were able to discard their own preconceptions. When a student sidled up to him and said, "I wrote you a letter I'm sorry for," George stuck out his hand and the student shook it. When another silently offered him a cigarette, George, who didn't smoke, puffed away, knowing it was far more than a gesture.

He was named to the Law Review staff, and his writing won an award from the Arkansas Law Review Corp. His winning paper represented the university in a national competition. The faculty chose him as a moot court defense attorney, and his Law Review col-leagues picked him as comments editor—the man entrusted with the selection of articles

to print.

School was drawing to a close and he felt deep satisfaction in having accomplished most of his goals. But then the old specter rose again. Each year distinguished alumni returned for a faculty banquet to salute the Law Review staff. With a sinking feeling George dreaded what would happen. And that evening when he entered the hotel banquet hall the reaction was just what he had feared. The moment the alumni saw him, a pall fell on the room.

George felt sick. The food passed his lips untasted. It came time for speeches. The law school dean, Robert A. Leflar, welcomed the alumni and introduced the student editors, one at a time. There seemed an eternity of names and George felt a frozen smile on his

face.

Dean Leflar said, "The next young man demands, and receives, as much if not more respect than any other person in our law

Suddenly 11 chairs scraped back, and 11 men stood up. They were the Law Review editors, and they were looking at George and applauding vigorously. Then the faculty stood up and added cheers to the applause. Finally the old grads got up, the judges and lawyers and politicians from the Deep South, and the ovation became thunderous.

"Speech! Speech!" they shouted.
George Haley pushed himself to his feet.
He could say no word for he was unashamedly crying. But that was a kind of speech too.

Today, ten years later, George is a respected lawyer in Kansas City, Kan. He has been deputy city attorney since 1955. He is a

steward in his church, has helped found a number of Negro business firms and is vice president of the state Young Republicans.

Dozens of his old schoolmates are now George's close friends, but perhaps the most touching acceptance of him as a man came a few years ago when he received a telephone call from Miller Williams, who had sat with him in the cafeteria. Miller, now an instructor of English at Louisiana State University, called to announce the birth of a daughter. "Lucy and I were wondering," he said, "whether you'd care to be her godfather?" he said.

This simple request made forever real the love and respect between two people. George knew that the long struggle and pain had been worthwhile. He knew, too, that his father had been right in saying, "Be patient with them. Give them a chance to know

I know it, too. For I am George's brother.

QUORUM CALL

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. HUMPHREY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT OF THE FOREIGN ASSISTANCE ACT

Mr. HUMPHREY. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on S. 489.

The PRESIDING OFFICER laid before the Senate the amendments of the House of Representatives to the bill (S. 489) to amend the Foreign Assistance Act of 1961, as follows:

Strike out all after the enacting clause and insert: That section 504(a)(1) of the Foreign Assistance Act of 1961 is amended by inserting at the end of the table of countries and amounts-

30,000,000".

Amend the title so as to read: "An Act to authorize supplemental military assistance to Portugal for the fiscal year 1977, and for other purposes."

Mr. HUMPHREY. Mr. President, the difference between the House bill and the Senate bill is in the sum. The sum in the Senate bill was \$34.5 million; the House bill was \$30 million. It is my personal judgment that the Senate bill was much more desirable.

The amendment to the Senate bill was offered by the distinguished Senator

from Massachusetts (Mr. Brooke).
I consulted with Mr. Brooke, and while he is not happy with this particular limited sum of \$30 million, I have assured him that when we take up the supporting assistance legislation for fiscal 1978, which is now before the Committee on Foreign Relations, we will review the situation relating to our assistance to Portugal and make whatever adjustments are necessary in light of the evidence and testimony that we receive.

We felt the evidence we had in the

Senate to justify our \$34.5 million was conclusive, but our friends in the other body did not see it that way.

It is important that we get this legislation passed as quickly as possible and. therefore, with the-

Mr. BROOKE. Mr. President, will the Senator yield?

Mr. HUMPHREY. Yes.

Mr. BROOKE. I would just like to say that as much as I am disappointed with the House action, I quite agree with my distinguished colleague, the chairman of the subcommittee, that this assistance for Portugal is essential. I am hopeful that we will be able to put it into the foreign assistance bill when the Committee on Foreign Relations marks it up, and to hold it in Appropriations when we go to conference with the House the next time around.

Mr. HUMPHREY. I thank the distinguished Senator from Massachusetts. Mr. BROOKE. I thank my colleague.

Mr. HUMPHREY. He is a member of the Appropriations Committee, and I know he will see to it that the full amount is made available because it is desperately needed, may I say, very desperately needed.

Mr. President, I move that the Senate concur in the House amendments.

The motion was agreed to.

Mr. HUMPHREY. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. BROOKE. I move to lay that mo-

tion on the table.

The motion to lay on the table was agreed to. (Later the following occurred:)

ORDER VITIATING PRIOR ACTION ON S. 489 AND SUBSTITUTION THEREOF

Mr. ROBERT C. BYRD. Mr. President, on behalf of Mr. HUMPHREY, I ask unanimous consent that the action of the Senate earlier today on the House amendments to S. 489 be vitiated and that the Senate concur in the amendments of the House with an amendment in the nature of a substitute for the House amendment to the text of the bill, as follows:

UP AMENDMENT NO. 154

In lieu of the matter proposed to be inserted by the House amendment, insert the following:

That section 504(a)(1) of the Foreign Assistance Act of 1961 is amended-

(1) by striking out "\$177,300,000" in the first sentence and inserting in lieu thereof "\$179,550,000"; and
(2) by inserting the following at the end

of the table in the second sentence:

"Portugal _____ \$32, 250, 000". The PRESIDING OFFICER. Is there

objection?

Without objection, it is so ordered. (This concludes proceedings which occurred later.)

AUTHORIZATION FOR CERTAIN ACTION DURING RECESS

Mr. ROBERT C. BYRD. Mr. President, lest I should forget it on tomorrow, I shall make the following request today. I ask unanimous consent that during the recess of the Senate, following the close

of business tomorrow, over until 12 noon on April 18, the Secretary of the Senate be authorized to receive messages from the President of the United States and the House of Representatives and that such messages be appropriately referred.

The PRESIDING OFFICER. Without

objection, it is so ordered.

Mr. ROBERT C. BYRD, Mr. President. I ask unanimous consent that during the recess of the Senate through the nonlegislative period over until 12 o'clock Monday, April 18, the Vice President, the President pro tempore, the Acting President pro tempore, and the Deputy President pro tempore be authorized to sign duly enrolled bills and joint resolutions.

The PRESIDING OFFICER. Without

objection, it is so ordered.

AUTHORIZATION FOR COMMITTEES TO FILE REPORTS UNTIL MID-NIGHT TOMORROW AND UNTIL 3 P.M. ON APRIL 12 AND APRIL 14

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that during that same period committees may be authorized to file reports, first of all. until midnight tomorrow, and that committees may be authorized to file reports until 3 p.m. on April 12 and on April 14.

The PRESIDING OFFICER. Without

objection, it is so ordered.

Mr. SCHMITT. Mr. President, I sug-

gest the absence of a quorum.

The PRESIDING OFFICER METZENBAUM). The clerk will call the roll.

The assistant legislative clerk pro-

ceeded to call the roll.

Mr. SCHMITT, Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without

objection, it is so ordered.

NATIONAL ENERGY POLICY—SEN-ATE JOINT RESOLUTION 45

Mr. SCHMITT. Mr. President, as all of us are well aware, we are about to begin another major debate on what directions this Nation should take with respect to national energy policy and what types of legislation should be enacted or not enacted in order to implement such a policy.

Over the last several years, as I have been an observer and a participant in this national debate in various capacities, it has seemed to me that one major deficiency existed and that is Congress has been unable—possibly unwilling—to adopt general guidelines by which we move from a time of deficiency of energy supply to a time somewhere in the future where we are in balance between our use of energy and its availability from

inexhaustible sources.

Basically that is what a national energy policy should be-not packages of legislation which in their own right may be good or bad, but which should be viewed as the mechanism for implementing a national energy policy. Unfortunately, because of the enactment of legislation or the lack of legislation we have a de facto energy policy that I think most observers would agree is leading us in entirely the wrong direction.

Mr. President, I shall introduce today a joint resolution which would, I believe, establish general guidelines by which we may get from our present situation into a secure future. This resolution defines some broad goals, but more importantly, some specific objectives by which in time these goals can be achieved.

It is my suggestion to Congress that we adopt such a resolution much as we adopted the Budget and Impoundment Act, to serve as the basis for evaluating legislation that is proposed by Republicans, by Democrats, by the administration, or from any other direction, by people who believe they have honest and sincere solutions for portions of our en-

ergy difficulty.

I hope this resolution, when enacted will provide the discipline for the Congress by which we can decide whether specific pieces of legislation will in fact reach generally agreed-to objectives, and the discipline by which we can conduct oversight as to whether the implementation of that legislation by the administration has in fact moved us closer to reaching those objectives.

This resolution certainly is the kind of thing, much like our concurrent resolutions with respect to the budget, which should be revised on an annual basis, with help from the administration so that as time goes by we are steadily moving toward real solutions to our energy

problems.

Mr. President, the United States and the free world must reach and maintain a capability for energy independenceenergy independence in those essential defense and economic areas where we must be secure as rapidly as possible. Until we achieve this, a most serious threat to our collective futures will remain—the threat of a permanent oil embargo. Unfortunately, Congress is largely responsible for the energy crisis that is presently upon us, largely because of its refusal to develop a viable energy development and conservation strategy by which we can move from this point into the 21st century.

The resolution which I am introducing today calls for, in general, the developing and maintaining of essential energy independence, determining an acceptable rate of growth of energy consumption, creating and sustaining a balance between the use of energy, the protection of the environment and the availability of energy from exhaustible sources, and, perhaps most importantly, creating a balance between the free enterprise economic system and Government action.

The resolution also dictates long-term efforts that would prepare the technological, economic, and environmental growth for a gradual transition from an energy economy based largely on fossil fuel to one based on those energy sources which are inexhaustible, whether they be solar, nuclear fusion, broad scale conservation, or some presently unknown or at least unrealized energy source.

Mr. President, I urge Congress to consider very carefully this resolution and the goals and objectives contained therein, and to adopt an energy policy upon which this country can rely and with which the country can grow with confidence into the future. Such policy must provide direction into the next century, but still be flexible enough to allow the imagination and the initiative of the American people to hold sway.

If Congress will accept its responsibility and have faith in the American people and their ability for action and sacrifice when they understand that action and sacrifice are required, we can con-

quer the energy crisis.

Mr. President, I ask unanimous consent that the resolution be printed in the RECORD at the conclusion of my remarks, followed by a section-by-section analysis of the resolution.

There being no objection, the resolution and the analysis were ordered to be printed in the RECORD, as follows:

S.J. RES. 45

Whereas, the security of the United States and other nations of the Free World is being threatened as a direct consequence of the vulnerability of our economies, industrial capacities and military defenses to limitations on energy supplies;

Whereas, the increasing dependence of the United States and other nations of the Free World on foreign sources for their domestic energy requirements weakens our collective position in world affairs and poses a major

threat to international peace;

Whereas, the long-term future of civilization on Earth requires the conservation of those energy resources that are being rapidly depleted with associated, potentially damaging environmental changes;

Whereas, the future needs of both the advanced industrial nations and the developing countries will exert increasingly heavy pressures on the Earth's limited fossil and uranium energy reserves;

Whereas, the United States' concern and new capabilities for protection of the environment must be coupled with its needs to increase domestic energy availability; Whereas, the United States' consumers of

energy must gradually pay a price that includes the full future replacement cost of comparable units of energy;

Whereas, consumers in the United States who have become dependent on energy priced below the free marked value, must have adequate time and financial resources to adjust higher-priced or alternative sources;

Whereas, the United States must work diligently toward a balance between energy use and energy availability for future generations:

Whereas, vastly accelerated efforts and sacrifices must be undertaken by Federal State and local governments, business and labor enterprises and ordinary citizens, acting individually and in concert, to solve the

Nation's energy problem; Whereas, the citizens of the United States require economical technologies and awareness of these technologies if they are to conserve energy now and make transitions to appropriate alternative energy sources in the future without unnecessary federal regulations; and

Whereas, the United States has demonstrated during two centuries of political independence, through the imagination and wisdom of its people and the inherent resilience of its free enterprise economic system, that it has the capacity and initiative to solve its energy problems: Now, therefore, be it Resolved by the Senate and House of Rep-

resentatives of the United States of America in Congress assembled, That (a) this resolu-tion may be cited as the "National Energy Policy Resolution of 1977".

(b) The Congress hereby declares that a national energy policy shall be established by the Congress of the United States and that such policy shall guide the search for technical, economic and societal solutions of current and future problems of energy supply and environmental protection. The goals of such national energy policy shall be:

(1) to achieve and maintain essential enindependence for the United States that includes a balanced use of foreign and

domestic energy supplies;

(2) to determine an acceptable rate of increase in our per capita energy consumption;

(3) to create and sustain a balance among the use of energy, the available sources of basic energy and the protection of the environment:

(4) to preserve and strengthen the free enterprise system of energy supply including a balancing of the roles of consumers in regulating demand, of business in providing capital, of labor in providing productivity, of research in creating new technology and of government in insuring fair competition in and between all facets of the system;

(5) to develop and implement, in accordance with this resolution, a near-term energy and environmental program which will rapidly eliminate the dependence of the United States on uncertain foreign sources

of essential energy supplies;

- (6) to develop and implement, in accordance with this resolution, an intermediateterm energy and environmental program which will provide for the transition from a near-term energy economy largely based on oil and natural gas to a long-term energy economy based on inexhaustible energy sources; and
- (7) to develop and implement, in accordance with this resolution, a long-term energy and environmental program which will provide an ultimate balance between our use of energy and its availability from inexhaustible sources.

TITLE I-NEAR-TERM ENERGY AND ENVIRONMENTAL PROGRAM

SEC. 101. (a) The near-term energy and environmental program shall include the

following objectives:

(1) By July 1, 1978, Presidential approval of a National Energy Emergency Preparedness Plan which provides for the continuous availability of essential energy supplies in the event of an interruption of foreign supplies or of an unusually high domestic need.

- (2) By January 1, 1983, an aggregate per capita decrease in the consumption of energy in the categories of commercial and resi-dential space heating and cooling, commercial and residential water heating, vehicular transportation and industrial processes (adjusted for factors related to productivity) by at least 15 percent over the consumption rates for 1976.
- (3) By January 1, 1983, assurance of a capability for (A) domestic crude oil production and refining capacity at rates that will, to the extent possible, substitute for essential crude and refined crude oil imports, and (B) maintenance of those rate capabilities until alternatives to crude oil as an energy source are available in amounts suffito allow progressive reductions.

(4) By January 1, 1983, assurance of a capability for (A) domestic natural gas production and distribution at rates that will, to the extent possible, meet essential demand and (B) maintenance of those rates until alternatives to natural gas are available in amounts sufficient to allow progressive reductions.

(5) By January 1, 1983, assurance that by 1985 the production of domestic uranium. the engineering and economics of nuclear power and fuel reprocessing plants, and the capability for the safe disposal of nuclear wastes is sufficient to support environmentally sound nuclear power generation of at least 15 percent of the Nation's total electrical demand.

(6) By January 1, 1983, assurance that by 1985 the production and distribution of domestic coal and the engineering and economics of coal-fueled electrical powerplants are sufficient to support environmentally sound coal-fueled electrical power generation of at least 60 percent of the Nation's total electrical demand.

(7) By January 1, 1982, assurance that the aggregate capacity factor for base-load central station electrical power generation is at least 65 percent.

(8) By January 1, 1978, assurance that by 1980 no newly committed central station powerplants will produce tricity by the combustion of natural gas.

- By January 1, 1983, assurance that by 1985 all newly committed plant capacity that produces electrical power, synthetic fuels, or refined petroleum products does so with minimum use of water resources where such resources are limited, and without deterioration of the local environment to the extent that such deterioration is demonstrated to be of greater societal benefit than the production of energy-related commodities.
- (10) By January 1, 1983, assurance that 1985 all energy consumed in the United States is priced no lower than its full free market value.
- (11) By January 1, 1980, assurance that by 1982 consumers of energy who in 1976 were dependent on energy priced below full free market value and have limited financial resources have transitioned to alternative energy sources and/or have financial assistance provide for necessary cost differentials.

(12) By January 1, 1979, the complete codification and enactment into law of energy-

related statutes and regulations.

(13) By January 1, 1980, assurance that by 1982 there is continuous surveillance and control of ground vehicles transporting nuclear fuels and radioactive wastes as cargo, and of ships and aircraft transporting any potentially hazardous energy-related cargo within or above the United States or within 200 miles of its coastline.

(14) By July 1, 1978, as complete as possible assessment of means of controlling the international use and spread of nuclear terials and, by January 1, 1980, the establishment of an international agreement for an effective world-wide system for the accountability and control of nuclear materials.

(15) By January 1, 1986, the formalization cooperative technical assistance agreements between United States institutions, and those developing nations which are major energy suppliers for the Free World Nations.

Assurance that the annual rate of capital formation and investment for new energy plant and production capacity is sufficient to support the above objectives.

(b) The Energy Research and Development Administration, the Federal Energy Administration, the Department of the Interior, the Department of Transportation, the Department of Commerce, and the Department of State shall evaluate the objectives of subsection (a) of this section, and report recommended amendments or additions to the President and to the Congress by October 1, 1978, and by October 1 of each succeeding year.

SEC. 102. The President shall present to the Congress, simultaneously with submission of the Fiscal Year 1979 Budget, and each annual budget thereafter, a coordinated plan, cluding requests for appropriations, for reaching the objectives of section 101(a) of this resolution. The plan shall be compatible with other plans required by this resolution and shall include a status report on progress toward reaching each such objective set forth in section 101(a) of this resolution.

TITLE II-INTERMEDIATE-TERM ENERGY AND ENVIRONMENTAL PROGRAM

Sec. 201 (a) The intermediate-term energy and environmental program shall include, but not be limited to, the following objectives:

(1) By January 1, 1988, an aggregate per capita decrease in the consumption of energy in the categories of commercial and residential space heating and cooling, commercial and residential water heating, vehicular transportation and industrial processes (adjusted for factors related to productivity) by at least 25 percent over the consumption rates for 1976.

(2) By January 1, 1985, assurance that by 1987 no newly committed base-load central station electrical power plants will produce electricity by the combustion of crude oil

products.

(3) By January 1, 1987, assurance that by 1990 the production, distribution and utilization of domestic coal is sufficient to supenvironmentally and economically sound, coal-fueled electrical power generation of at least 70 percent of the Nation's total electrical demand.

(4) By January 1, 1985, assurance that the aggregate capacity factor for base load central station electrical power generation is

at least 70 percent.

(5) By January 1, 1980, and again by January 1, 1985, as complete as possible assessment as to where and to what total capacity the generation of electrical energy by nuclear fission systems (including uranium and thorium breeder systems) will be technically. environmentally and economically competitive with other energy systems.
(6) By January 1, 1980, and again by Janu-

ary 1, 1985, as complete as possible assess-ment as to where and to what total capacity the generation of electrical energy or space heating and cooling energy by solar and geothermal systems will be technically, environmentally and economically competitive with

other energy systems.

(7) By January 1, 1980, and again by January 1, 1985, as complete as possible assessof the technical, environmental and economical competitiveness of coal gasification, coal liquefaction shale oil and natural tars as sources of energy.

(8) By January 1, 1980, and again by January 1, 1985, as complete as possible assess-ment of intermediate and long term alternatives to natural petrochemicals for agricultural purposes, portable fuels and organic polymers.

(9) Assurance that the annual rate of capital formation and investment for new energy plant and production capacity is sufficient to support the above objectives.

(b) The Energy Research and Development Administration, the Federal Energy Administration, the Department of the Interior, the Department of Transportation, the Department of Commerce and the Department of State shall evaluate the objectives of subsection (a) of this section and report recommended amendments or additions to the President and to the Congress.

SEC. 202. The President shall present to the Congress, simultaneously with submission of the fiscal year 1979 budget, and each annual budget thereafter, a coordinated plan, including requests for appropriations, for reaching the objectives of section 201(a) of this resolution. The plan shall be compatible with other plans required by this resolution, and shall include a status report on progress toward reaching each objective set forth in section 201(a) of this resolution.

TITLE III-LONG-TERM ENERGY AND ENVIRONMENTAL PROGRAM

Sec. 301. (a) The long-term energy and environmental program shall include, but not be limited to, the following objectives:
(1) By January 1, 1980, and again by January ary 1, 1985, as complete as possible assessment of the environmental and economic feasibility of solar and nuclear fusion power systems, in conjunction with improvements in electrical power generation, transmission and end-use efficiency, as means of providing essentially inexhaustible energy sources early in the 21st century.

(2) By January 1, 1987, the establishment

(2) By January 1, 1987, the establishment of specific objectives for the economical, time-phased conversion from the use of fossil and fission fuels to essentially inexhaustible energy sources in all major cate-

gories of energy use.

(b) The Energy Research and Development Administration, the Federal Energy Administration, the Department of the Interior, the Department of Transportation, the Department of Commerce and the Department of State shall evaluate the objectives of subsection (a) of this section and report recommended amendments or additions to the President and to the Congress by October 1, 1978, and by October 1 of each succeeding year.

SEC. 302. The President shall present to the Congress, simultaneously with submission of the fiscal year 1979 budget, and each annual budget thereafter, a coordinated plan, including requests for appropriations, for reaching the objectives of section 301 of this resolution. The plan shall be compatible with other plans required by this resolution, and shall include a status report on progress toward reaching each objective set forth in section 301(a) of this resolution.

TITLE IV-MISCELLANEOUS

SEC. 401. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this resolution.

TITLE V-DEFINITIONS

Sec. 501. For the purposes of this resolution the following definitions apply:

(a) Base-load—an adjective referring to electric generating stations intended to operate at or near maximum rated power output; generally referring to generating stations with greater than 200 MWe rated full power.

(b) Capacity factor—total gross generated energy in MW-hr, divided by the product of 365 days and the average daily maximum dependable capacity, the quantity times 100.

NATIONAL ENERGY POLICY RESOLUTION OF 1977 PURPOSE OF THE RESOLUTION

A national energy policy must consist of a set of guidelines that establish the direction by which we move from a time of energy crisis to a time of energy stability. In the Congress, this policy should be a set of goals and the sequence of objectives in time necessary to meet those goals. In this manner, we can measure out progress as we move to implement appropriate energy legislation. Without defining our goals and objectives, and the time-frame for meeting them, it is impossible to determine what is "appropriate energy legislation."

In principle this Joint Resolution seeks to clearly establish a truly national energy policy. "National" in this case means all the sectors of the Nation, both public and private. The Federal Government's role, as always, should be to do only those things necessary to enable the private sector to solve the Nation's energy problems, rather than the role of an omnipotent regulator, vainly hoping that the bureaucracy will always do the right thing at the right time. Our faith must be in the people and their capacity for action and sacrifice and in the inherent wisdom of

our market-oriented economic system.

To date, with generally good intentions, we have passed or not passed legislation without the benefit of broadly accepted goals and objectives. The result has been a de facto national energy policy that is leading us in many directions, some of which are obviously wrong. Imports of foreign oil are climbing

rapidly, not falling; national gas supplies are decreasing, not increasing; coal leasing and transport development are practically at a stand-still: ground transportation nology is still rooted to the traditions of the not to the need of the future, much less the present; commitments to new electrical power generation technologies are not perceived to be economical, whether nuclear, fuel-cell or solar in character; a coherent fusion energy program is non-existent; the rapidly accelerating cost of energy is hurting most those who can afford it least; inflation and other economic factors continue to make an adequate supply of capital uncertain; promising new environmental technologies go unused; and the list goes on.

The seven goals of this proposed national

energy policy are as follows:

to achieve and maintain essential energy independence for the United States that includes a balanced use of foreign and domestic energy supplies:

(2) to determine an acceptable rate of increase in our per capita energy consumption;

(3) to create and sustain a balance among the use of energy, the available sources of basic energy and the protection of the environment:

(4) to preserve and strengthen the free enterprise system of energy supply including a balancing of the roles of consumers in regulating demand, of business in providing capital, of labor in providing productivity, of research in creating new technology and of government in insuring fair competition in and between all facets of the system;

(5) to develop and implement, in accordance with this resolution, a near-term energy and environmental program which will rapidly eliminate the dependence of the United States on uncertain foreign sources of

essential energy supplies;

(6) to develop and implement, in accordance with this resolution, an intermediate-term energy and environmental program which will provide for the transition from a near-term energy economy largely based on oil and natural gas to a long-term energy economy based on inexhaustible energy sources; and

(7) to develop and implement, in accordance with this resolution, a long-term energy and environmental program which will provide an ultimate balance between our use of energy and its availability from inex-

haustible sources.

First, we and the Free World must reach and maintain the capability for essential energy independence as rapidly as possible, including a balanced use of foreign and domestic supply. Until we do this, the most serious threat to our collective futures will remain the threat of a permanent oil embargo. Essential energy independence, however, means only that, through sacrifice, we can still assure our political freedom if subjected to the economic attack of an embargo.

Second, we must come to grips in a realistic manner with those factors which influence and will be influenced by our rate of per capita energy consumption. For example, extreme conservation without increased production will increase unemployment; energy consumption will rise as we invest in materials necessary for future conservation; major compulsory changes in lift-style represent a long-term danger to our individual free-dom upon which is based our political freedom; and we have hardly begun to implement reasonable conservation, environmental and production habits and technologies, all of which will profoundly influence energy consumption over the next decade. However, our goal must be to determine gradually an acceptable and balanced rate of increase in per capita energy consumption and use this rate as one of the major guidelines for future energy policy formulation.

Third, for the sake of future generations, we must move with great dedication toward

a time when there is balance between three competing activities: the use of energy, the availability of energy from inexhaustible sources, and the protection of the earth's environment. The technological revolution in which we find ourselves offers the certainty that this balance can be attained and that our growth as a civilization need not stagnate as a consequence.

Fourth, we must recognize that the free enterprise economic system is the strongest and most efficient economic system in the world today. It provides our people with the quality of life that is envied by all the world and permits the strength that preserves freedom in that world. Our national energy policy should take advantage of that system and the people who comprise it and impose federal actions and controls only when absolutely necessary. We must recall that government's primary role is to assure that the system operates fairly for all.

The fifth, sixth and seventh goals set the time perspective for a national energy policy. We must achieve essential energy independence in the near-term while preparing the technological, economic and environmental ground for a gradual transition from an energy based largely on fossil fuels to one based on inexhaustible energy sources.

TITLE I-NEAR-TERM ENERGY AND ENVIRON-MENTAL PROGRAMS

Section 101(a)

The success of the Near-term Energy and Environmental Program will be measured by the rate at which we decrease our dependence on foreign suppliers of petroleum for essential energy needs. The key elements will be planning for emergencies, guaranteeing increased conservation, accelerating the availability of domestic energy supply through production, assuring the protection of the environment through technology and conservation, laying the groundwork for increased international cooperation and assuring an adequate supply of capital.

Section 101(a)(1)

By July 1, 1978, Presidential approval of a National Energy Emergency Preparedness Plan which provides for the continuous availability of essential energy supplies in the event of an interruption of foreign supplies or of an unusually high domestic need.

Our most immediate concern in energy policy should be survival in the event of another oil embargo. This concern will be a reality if there is another Mid-East war or any other event that disrupts our relations in that region. Obviously, we are much more dependent now on uncertain imports of crude oil and crude oil products than we were in 1973 at the time of the first embargo. High priority legislation must be aimed at insuring our economic and political survival if imports were permanently curtailed.

With proper analysis, planning and public education in conservation, standby storage and productive capability and standby allocation procedures, we could stretch our capacity to resist an embargo until a crash program of energy production could bear fruit. Such a National Energy Emergency Preparedness Plan would be the foundation of certainty upon which to stand as we reach for new means of energy conservation and production.

Section 101(a)(2)

By January 1, 1983, an aggregate per capita decrease in the consumption of energy in the categories of commercial and residential space heating and cooling, commercial and residential water heating, vehicular transportation and industrial processes (adjusted for factors related to productivity) by at least 15 percent over the consumption rates for 1976.

It is clear that our most easily available energy source is that energy saved through conservation or through increases in productivity in the use of energy. The experiences of the last several years show that in the major categories of the end-use of energy, large savings are possible without large capi tal investment. Most homes, institutions, businesses, industries and means of transportation can save 20 to 30% of their energy consumption merely by using better operating procedures. Education about cost savings and the techniques of conservation is our most rapid means of bringing this about and is still consistent with individual freedom of choice. In addition, the accomplishment of this objective will require research, systems analysis and technology transfer to and within the private sector.

Small capital investments in energy conservation, possibly encouraged by tax incentives, are extremely cost effective and should be encouraged. In addition, near-term research and development can have great payoffs if it is concentrated on reducing the manufacturing costs of known conservation technologies such as solar heating, fuel-efficient internal combustion engines, waste heat utilization, utility load leveling devices and the like. It should be remembered, however, that the manufacturing of conservation materials will result in an increase in national energy consumption until the demand for such materials falls off. For this reason, better operating procedures that conserve energy should be emphasized.

Section 101(a)(3)

By January 1, 1983, assurance of a capability for (A) domestic crude oil production and refining capacity at rates that will, to the extent possible, substitute for essential crude and refined crude oil imports, and (B) maintenance of those rate capabilities until alternatives to crude oil as an energy source are available in amounts sufficient to allow progressive reductions.

The full required capacity for domestic crude oil production can only be determined after other conservation and production objectives have been set. However, it is clear that with an import level of 9-10 MMBD capacity can be increased vigorously without fear of oversupplying the market.

The resource base of crude oil with current production techniques may be as large as 300 billion barrels. This estimate will be true if there is as much oil in offshore and Alaskan rocks as there is in similar rocks and volumes of rocks in the contiguous United States. Price, tax and environmental regulation incentives must be provided if exploration and development of oil in these frontier areas is to occur in the nearterm. Three or four more "Purdoe Bay" type discoveries, each capable of delivering on the order of 2 MMBD, would have a tremendous impact on our energy security situation and on stabilizing world crude oil prices.

At the same time as we increase production, all feasible new environmental technology must be applied to protect frontier conditions. It should be acknowledged by all parties, however, that occasionally some change in environmental quality may result if we are to obtain a reasonably secure energy supply. All practicable environmental technologies should be applied so that the cost in quality is both bearable and economically reasonable.

The primary means of implementing this objective should be through research to define the resource base and to develop production technologies and the gradual reestablishment of market incentives for discovery, drilling and production by the private sector.

Section 101(a) (4)

By January 1, 1983, assurance of a capability for (A) domestic natural gas production and distribution at rates that will, to the extent possible, meet essential demand and (B) maintenance of those rates until alter-

natives to natural gas are available in amounts sufficient to allow progressive reductions.

Natural gas, as well as oil, is a much too important and unique natural chemical to continue using it as a base load energy source any longer than is absolutely necessary. However, the artificially low prices of regulated natural gas have encouraged increased consumption and has discouraged discovery of new gas for almost 25 years. Until conservation and the transition to other energy sources eliminates natural gas as a necessary energy source, much more must be made available. As with crude oil, our needs for increased natural gas are so great in the nearterm that we do not need to worry about finding too much new productive capacity.

The resource base for natural gas also may be very large for the same reasons as given for crude oil. Similar incentives to the private sector must be provided if new gas supplies are to be made available through discovery, drilling and production in frontier areas.

Section 101(a) (5)

By January 1, 1983, assurance that by 1985 the production of domestic uranium, the engineering and economics of nuclear power and fuel reprocessing plants, and the capability for the safe disposal of nuclear wastes is sufficient to support environmentally sound nuclear power generation of at least 15 percent of the Nation's total electrical demand.

There are numerous technical, regulatory, resource, waste disposal, emotional and policy questions which are combining in the public mind to make light water nuclear fission reactors less and less viable as alternatives to fossil fuels. This impression is a serious and dangerous misconception because it focuses attention away from our most easily boosted source of electrical energy. However, there are real problems which must be considered. Unnecessary regulatory delays must be reduced. Uranium reserves must be expanded. Prototype fuel reprocessing and waste disposal facilities must be created. The emotional fears of radioactivity must be understood and relieved through education and demonstra-tion. A national energy and environmental policy must come into existence that affirms the role fission reactors will play in our fu-

Until the above issues are resolved, private capital investment in nuclear energy technology will stay at low levels. The regulatory hassel and ten to twelve years' delay in receiving a return on the invested dollar is just too long for most investors. On the other hand, acceleration in the construction and start-up of plants already on the books can have an important near-to mid-term effect on reducing our dependence on domestic natural gas and foreign suppliers of natural gas and crude oil.

Section 101(a) (6)

By January 1, 1983, assurance that by 1985 the production and distribution of domestic coal and the engineering and economics of coal-fueled electrical power plants are sufficient to support environmentally sound coal-fueled electrical power generation of at least 60 percent of the Nation's total electrical demand.

The U.S. Coal industry and its associated supporting industries, such as rail transportation and underground mining equipment manufacturing, were decimated by the regulation of natural gas at artificially low prices. Current production has only reached pre-gas regulation levels through improvements in surface mining technology, but at the same time about 70 percent of our coal reserves have been left economically inaccessible because they are underground.

The objective of assuring that 60 percent of our base-load electrical power generation in 1985 is accomplished by coal or coal-derived fuels implies an increase of approximately 80 percent in the rate at which we mine and use coal. The technology of coal plants and coal mine reclamation now permits an expansion of this magnitude, provided sufficient investment capital is available and regulatory delays are minimized. One major factor in assuring future capital for coal development and utilization will be stable and predictable federal regulation.

Section 101(a) (7)

By January 1, 1982, assurance that the aggregate capacity factor for base-load central station electrical power generation is at least 65 percent.

One major factor responsible for increases in the demand for new electrical power plants is the fact that existing plants operate at a lower than achievable capacity factor because of technical and regulatory restrictions. Not only do these low load-factors mean that plants are operating at less than optimum efficiency, but also more plants must be built than would otherwise be needed. The resulting drain on capital and material resources is obvious. Increases in load-factors means that significant reductions are possible in the requirement for new plant capital and in the monthly electric bills charged to consumers.

Section 101(a) (8)

By January 1, 1978, assurance that by 1980 no newly committed central station electrical power plants will produce electricity by the combustion of natural gas.

The objective of assuring that no future base-load plants will use natural gas has been largely accomplished as a consequence of reductions in assured gas supplies. However, there is a little excuse for any new plants to be built that will require this important chemical resource as fuel.

The gradual de-control of the price of natural gas and the resulting rise in price should discourage any new commitments to this fuel, except in extraordinary situations (when no other fuel is available). Increasing demand, and thus the price, for natural gas as a petrochemical feedstock will play an increasingly important role in reducing the use of natural gas as a base-load fuel.

Section 101(a)(9)

By January 1, 1983, assurance that by 1985 all newly committed plant capacity that produces electrical power, synthetic fuels, or refined petroleum products does so with minimum use of water resources where such resources are limited, and without deterioration of the local environment to the extent that such deterioration is demonstrated to be of greater societal benefit than the production of energy-related commodities.

One of the most exciting, but little recognized revolutions that has occured over the last ten years is the rapid advance of environmental technology. Where fossil-fuel plants could not be built without significant deterioration of the environonment, except at prohibitive cost, now they can be built at reasonable cost to the consumer of energy. National policy must take advantage of this fact.

The technologies of high temperature closed-cycle turbines are also advancing to the point where air-cooled power plants can be built in water-poor regions. Further, the use of waste heat for desalinization of saline water is now feasible if pressed vigorously. The integration of energy production with water production will be an important factor in the development of the Western and Southwestern United States.

Section 101(a) (10)

By January 1, 1983, assurance that by 1985 all energy consumed in the United States is priced no lower than its full free market value.

In order to prevent the recurrence of artificial pricing mechanisms for energy supply, we must work toward allowing price structures based on the demands of the market place which will account for the true, future replacement cost of equivalent units of energy. Although replacement cost per BTU, for example, will not be the only cost reflected in future energy prices, it will be one of the major determining factors that will lead to a true stabilization of energy supply.

A portion of the cost of energy must be made up of the cost of environmental protection or reclamation. Unless such costs are set realistically, it will be impossible to effectively evaluate alternative energy supply possibilities. An example, of course, is that the true replacement cost of nuclear energy must include all costs currently borne by the taxpayer and future costs of fuel reprocessing and waste disposal. Another example is that natural gas prices on the interstate market have not included replacement costs and that it is therefore not being replaced by increased discovery and development of new gas.

Sec. 101(a)(11)

By January 1, 1980, assurance that by 1982 consumers of energy who in 1976 were dependent on energy priced below full free market value and have limited financial resources have transitioned to alternative energy sources and/or have financial assistance to provide for necessary cost differentials.

It is clear that we must gradually allow and assure that the market place determines the price of energy. As we eliminate the artificially low domestic prices and develop viable alternatives to imported crude oil, the market prices of energy will increase significantly. As higher prices for the production of energy result in increased energy supply, a long term reduction in the real cost of energy will occur. However, until this reduction in real cost appears, we must provide financial assistance for individuals and industries that have correctly followed regulatory incentives and have become dependent on artificially cheap energy, particularly natural gas. The objective of such assistance should be to ease the eventual transition to alternative energy sources.

Sec. 101(a) (12)

By January 1, 1979, the complete codification and enactment into law of energy-related statutes and regulations.

Federal statutes and regulations that relate to energy are many, complex, and everchanging. Codification in an organized, cross-referenced and simplified manner including identification or redundant, overlapping, inconsistent, unnecessary and inhibiting statutes and regulations would greatly assist the activities of the private sector and the government itself in providing increased energy supply. Risk of inadvertent violation of statutes and regulations also would be greatly reduced.

The process of codification would provide the Congress with information on those actions that are required to eliminate various unnecessary statutory or regulatory limitations on the conservation and production of energy. Efforts toward general regulatory reform also would be aided greatly by analysis in this vital area.

Sec. 101(a) (13)

By January 1, 1980, assurance that by 1982 there is continuous surveilance and control of ground vehicles transporting irratiated or readily fissionable nuclear fuels and radioactive wastes as cargo, and of ships and aircraft transporting any potentially hazardous energy-related cargo within or above the United States or within 200 miles of its coast-line.

Most energy transport is hazardous by its nature, whether fossil, nuclear, electrical or synthetic hydrogen. Coal is the only common, relatively benign energy source during transport. Modern communications and surveillance technology, both ground-based and space-based, offer the opportunity to greatly expand our capability to monitor energy-related transportation and, by so doing, provide much greater insurance against loss of accountability, accidents, or terrorist activity.

Sec. 101(a) (14)

By July 1, 1978, as complete as possible assessment of means of controlling the international use and spread of nuclear materials and, by January 1, 1980, the establishment of an international agreement for an effective wor.d-wide system for the accountability and control of nuclear materials.

The rapid spread of nuclear technology and materias throughout the world is one of mankind's most serious challenges. This nation has a unique responsibility to the world in unilaterally taking steps to control that spread in so far as we can and to work diligently and with great urgency to establish an effective world-wide system of accountability and control.

sec. 101(a) (15)

By January 1, 1986, the formalization of cooperative technical assistance agreements between United States institutions, and those developing nations which are major energy suppliers for the rree World Nations.

The major exporters of fossil energy to the

The major exporters of fossil energy to the ree world are otherwise underdeveloped actions. The great hope of the people of these nations is to advance in their internal devolepment until they, too, participate in the wonders of the 20th Century. Our bargaining chips in this game come largely from our base of technology, which they recognize as being unique if viewed in relation to all other industrial nations. The development of mutual interdependence with mutual benefits will go a long way toward stabilizing our near-term energy future.

The areas of non-military technology of most interest to the oil and gas-rich developing nations are agriculture, civil engineering, resource engineering, communications, health maintenance and, most of all, education. In most cases, we can market the benefits of high technology systems in the form of services while marketing low to intermediate technology products and services needed for development.

It is important to recognize the close relationship between rate of return and the investment of capital—if investment is insufficient to meet national requirements, then it becomes necessary to increase the rate of return or decrease the risk for investment in energy-related projects.

Sec. 101(a) (16)

Assurance that the annual rate of capital formation and investment for new energy plant and production capacity is sufficient to support the above objectives.

One of the most critical energy problems that of capital supply. Over the next few decades, over a trillion dollars in capital investment will be required for energy alone, not to mention other new plant capacity we will require. The fact that each new baseload electrical power plant or synthetic fuel plant will cost an average of over one billion dollars, and that we will probably need as many as 500 of such plants by the end of the century illustrates the problem.

Overall federal activity must be aimed at stabilizing the nation's economy at low or zero inflation rates and at reducing federal competition for investment dollars resulting from high taxes and deficit financing. In the short term, the use of loan guarantees may be a non-inflationary means of ecouraging investment of private capital in economically risky, but necessary technologies. It also may be necessary to temporarily protect

new energy production industries against capricious reductions in the price of imported energy just as it was necessary to temporarily protect consumers during the early days of the OPEC cartel.

The primary, short-term and long-term incentives for the private sector to invest capital is a fair market price. Gradual deregulation of energy prices and confidence in stable government energy and environmental policy will do much to create a stable and productive energy market place.

Sec. 101(b)

The objectives of Sec. 101(a) are formulated as targets for action and are the best estimates at present of what is not only necessary but feasible and practical as well. It will be necessary to periodically review these objectives and modify them as required in accordance with new knowledge and the changing national and international situation.

Sec. 102

It is critical that the Administration prepare a coordinated plan for reaching the goals and objectives of this Act as well as periodic status reports to aid the Congress in exercising its oversight responsibilities. This plan also must be coordinated with the budget process for its implementation to be effective.

TITLE II—INTERMEDIATE-TERM ENERGY AND ENVIRONMENTAL PROGRAM

Sec. 201(a)

The primary purpose of the Intermediate-Term Energy and Environmental Program is to provide the necessary economic, technical and societal foundations for the transition from a time of dependence on fossils fuels to a time of inexhaustible energy sources. This transition will take at least fifty years as present and near-term oil, natural gas, coal and nuclear fission power plants are amortized and as space heating and cooling systems and transportation systems are developed which use electricity, direct solar radiation or new portable fuels such as hydrogen.

The essential components of this program are continued increase in conservation and efficiency, assessment of solar and nuclear fission systems, development of alternatives to natural petrochemicals and the continued assurance of an adequate capital supply.

Sec. 201(a)(1)

By January 1, 1988, an aggregate per capital decrease in the consumption of energy in the categories of commercial and residential space heating and cooling, commercial and residential water heating, vehicular transportation and industrial processes (adjusted for factors related to productivity) by at least 25 percent over the consumption rates for 1976.

Intermediate and long-term conservation must concentrate on the gradual introduction of energy conservation materials and technologies rather than relying on operational procedures. Included in such technologies, of course, are those related to the inexhaustible energy sources, such as use of the several forms of solar energy for the heating and cooling of buildings and water, and in industrial and agricultural processes. The productive use of waste heat also must expand greatly in this time frame.

Transportation systems will probably transition to higher efficiency combustion systems, such as gas turbines, and to battery powered commuter automobiles. Mass transportation will play a major role in conservation only if the enjoyment and convenience of its use offsets the loss of the personal freedom of an automobile.

A major factor in reducing the demand for energy for transportation will be the advancement in personalized telecommunications. Video-phones, electronic fund transfer, and in-home business communications are concepts with great potential for reducing demands for transportation energy.

Sec. 201(a)(2)

By January 1, 1985, assurance that by 1987 no newly committed base-load central station electrical power plants will produce electricity by the combustion of crude oil products.

Our ability to assure that newly committed power plants will not require crude oil will be largely a function of our ability to mine, transport and use coal and uranium fuels for this purpose. In the longer term, solar electric power also may be a major factor. The attainment of earlier conservation and pricing objectives will play an important role. Ultimately, however, excessively high price, because of decreased resources and increased petrochemical demand, will probably result in a steady decrease in the use of crude oil as a fuel.

Sec. 201 (a) (3)

By January 1, 1987, assurance that by 1990 the production, distribution and utilization of domestic coal is sufficient to support environmentally and economically sound, coalfueled electrical power generation of at least 70 percent of the Nation's total electrical demand.

The U.S. coal industry and its associated supporting industries, such as rail transportation and underground mining equipment manufacturing, were decimated by the regulation of natural gas at artificially low prices. Current production has only reached pre-gas regulation levels through improvements in surface mining technology, but at the same time about 70% of our coal reserves have been left economically inassessable because they are underground.

While we will rely heavily on both coal and uranium for the remainder of this century, it should be recognized that the immense volume of coal wastes and combustion products, and the bulk of mining equipment and coal carrying containers will cause coal to place a far greater demand on the industrial sector of our economy and on our environmental technology than does nuclear

technology.

Attaining 70% of our base-load electrical power generation in 1985 from coal or coalderived fuels implies a 110% increase in the rate at which we mined and used coal in 1976. The technology of coal plants and coal mine reclamation now permits an expansion of this magnitude provided sufficient investment capital is available. One major factor in assuring future capital for coal development and utilization will be stable and predictable federal regulations.

Sec. 201 (a) (4)

By January 1, 1985, assurance that the aggregate capacity factor for base load central station eletrical power generation is at least 70 percent.

As selected competitive pressures are applied to the utility industry, the incentive to increase plant capacity factor is made that much stronger. These pressures will also tend to speed the replacement of older less efficient generating stations with new more efficient plants utilizing the most modern environmental technology.

Sec. 201 (a) (5)

By January 1, 1980, and again by January 1, 1985, as complete as possible assessment as to where and to what total capacity the generation of electrical energy by nuclear fission systems (including uranium and thorium breeder systems) will be technically, environmentally and economically competitive with other energy systems.

tive with other energy systems.

It is critically important that we reach a national consensus as rapidly as possible on the use of nuclear fission power, including that which might be possible through the use of breeder reactors. This consensus has

not been reached due to incomplete information, lack of technical understanding, real and perceived problems of personal and environmental danger, economic uncertainty, and unanswered philosophical questions never before posed to mankind, much less a nation. A rational assessment base on research and development and the needs of society, as well as detailed planning and analysis, must be carried out with the entire citizenry as informed participants.

Sec. 201 (a) (6)

By January 1, 1980, and again by January 1, 1985, as complete as possible assessment as to where and to what total capacity the generation of electrical energy or space heating and cooling energy by solar and geothermal systems will be technically, environmentally and economically competitive with other energy systems.

Solar and geothermal energy systems will have regionally constrained utility for the next decade or two. Economical solar energy systems should appear in areas of abundant sunshine or wind, whereas geothermal systems are largely limited to specific geological environments. Within these limits, however, solar and geothermal systems offer great potential to reduce regional, and therefore, national demands on fossil energy.

The assessment called for by this objective will require combining the results of research and development, systems analysis, resource inventories, comparative economic analysis, and, most importantly, the trends developed in the market place as a consequence of various incentives and technological advancements. This assessment will allow definitions of areas of promising activity for private and governmental action.

Sec. 201 (a) (7)

By January 1, 1980, and again by January 1, 1985, as complete as possible assessment of the technical, environmental and economical competitiveness of coal gasification, coal liquefaction, shale oil and natural tars as sources of energy

tars as sources of energy.

The transition to portable fuels based on materials other than fossil fuels (see Sec. 201 (a) (9)) probably will take many decades. In the meantime, it will be necessary to supplement if not replace crude oil and natural gas as sources for portable fuel. The assessment called for by this objective will provide the basis for any federal action required to assure the availability of "synthetic fuels" until new portable fuels are available at reasonable prices.

Sec. 201 (a) (8)

By January 1, 1980, and again by January 1, 1985, as complete as possible assessment of intermediate and long term alternatives to natural petrochemicals for agricultural purposes, portable fuels and organic polymers.

Natural petrochemicals have played a unique role in the development of modern agriculture, transportation and the organic polymer industry. One of the major reasons that it is imperative that we find alternatives to our use of crude oil and natural gas as boiler and heating fuels is that they are required more urgently in these three areas.

The assessment called for by this objective should be based on research into new technologies that will provide appropriate energy and chemicals for future use in agriculture, transportation and the organic chemical industry. One of the most important areas for research is in the economical production of large quantities of hydrogen for use as both a fuel and as a chemical. In addition, we must examine the viability of biomass as a source of large quantities of chemical feed-stock. Other areas will grow in importance as we begin to recognize our dependence on fossil "chemicals" rather than fossil "fuels".

Sec. 201(a) (9)

Assurance that the annual rate of capital formation and investment for new energy plant and production capacity is sufficient to support the above objectives.

See analysis Sec. 101(a) 16.

Sec. 201(b)

See analysis for Sec. 101(b).

Sec. 202

See analysis for Section 102.

TITLE III-LONG-TERM ENERGY AND ENVIRON-

MENTAL PROGRAM

Sec. 301(a)

(1) By January 1, 1980, and again by January 1, 1985, as complete as possible assessment of the environmental and economic feasibility of solar and nuclear fusion power systems, in conjunction with improvements in electrical power generation, transmission, and end-use efficiency, as means of providing essentially inexhaustible energy sources carly in the 21st century.

early in the 21st century.

(2) By January 1, 1987, the establishment of specific objectives for the economical, time-phased conversion from the use of fossil and fission fuels to essentially inexhaustible energy sources in all major categories of energy use.

The long-term Energy and Environmental Program, the third step in our movement toward energy security, is aimed primarily at providing the basic research and development information so that ten years from now we can establish a new national energy policy which will guide our way into the next century. The main research and development thrusts should be in solar and nuclear fusion systems and in advanced technologies for more efficient energy conversion, transmission and end-use.

The assessment of solar energy should include all aspects of terrestrial, ocean and space-based use of solar energy and should include the results of specific research and development programs which push the state-of-the-art beyond the near-term commercial possibilities.

Fusion energy research requires a strongly coordinated but still multifaced program if a realistic assessment is to be made. It is possible that neither fusion nor solar energy is the ultimate answer. Therefore, basic research into physical and chemical theory must continue to form the foundation of our energy future. However, failure to invest in the construction of facilities will prevent the critical step which takes us from the scientists' genius to the engineering which provides a practical power supply.

Other advanced technologies that can increase the efficiency and utility of electrical power generation, transmission and end-use should be investigated both through basic research programs in materials and processes and through technological research in application of research discoveries.

Upon the completion of the required assessments, major revisions of this policy should be made that will establish the specific goals and objectives for the gradual conversion to appropriate inexhaustible energy sources as we enter the next century.

Sec. 301(b)

See analysis for Section 101(b).

Sec. 302

See analysis for Section 102.

NATIONAL DAM SAFETY PRO-GRAM—S. 1253 AND S. 1254

Mr. McCLURE. Mr. President, I am today introducing two versions of legislation to establish a national dam safety program. I am hopeful that both will be considered expeditiously and that they will be addressed by witnesses during the important water policy hearings, which the Committee on Environment and Public Works will be conducting this April

My colleagues are aware of the catastrophe that poured forth when Teton Dam collapsed. That disaster demonstrated clearly the need for an effective national effort to improve monitoring and design of dams. To that end, these bills would establish a cooperative, Federal-local responsibility that is intended to assure the safety and integrity of the Nation's 50,000 dams.

The first bill, which I am introducing by request, was transmitted to the Congress last fall by the Assistant Secretary of the Army for Civil Works. It takes the recommendations of the Chief of Engineers as a result of the National Dam Inspection Act (Public Law 92-367) and develops them into a national dam safety program. This bill authorizes the Federal Government to regulate dams, from a safety standpoint, and requires the Corps of Engineers to issue guidelines for safety inspection and investigation.

Frankly, Mr. President, although I am pleased to introduce the bill, I am not convinced that its approach is adequate or in the best interest of the respective States. It places too much authority on the Federal Government, excluding State governments from participation in a program to assure the safety of private dams built on Federal land. The States have focused on this legitimate concern, particularly in my part of the Nation where vast portions of the land is federally owned.

Therefore, the second bill that I am introducing includes modifications that were developed by the Western States Water Council to resolve such issues.

I hope that my colleagues will give careful attention to both of these pro-posals, because we need, in this Congress, to develop a more effective dam safety program to assure that the Teton disaster is never repeated.

Mr. President, I ask unanimous consent that each of these bills be printed at this point in the RECORD, together with the transmittal letter from the administration, a section-by-section analysis of the first bill, a copy of testimony by the Western States Water Council explaining their redrafted version, and a recent newspaper article that identifies the problem confronting many areas of the Nation.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1253

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

Congress declares that the protection of human life and property from potential hazards created by public and private dams and the water such dams impound is an important national interest which should be addressed by the Federal or State agencies having the primary jurisdiction over and responsibility for such dams. Therefore, this

Act establishes a National Dam Safety Program to be administered in accordance with the provisions of this Act.

SEC. 2. Congress, having found that the failure of dams adversely affects interstate commerce and adversely affects Federal property, directs that each Federal agency shall regulate for safety purposes any dams and the water areas they impound that conforms to the height and capacity criteria of the Act of August 8, 1972 (Public Law 92-367) and that

(a) are owned and/or operated by the United States and that the Federal agency concerned is primarily responsible to operate,

(b) are located on lands owned by the United States that the Federal agency concerned is primarily responsible for.

A Federal agency may, as to those dams which are owned and operated by a non-Federal entity and over which the Federal agency has jurisdiction under the provisions this Act, enter into a mutual written agreement with the State wherein such dams and water areas are located that the Federal agency will forego the exercise of its regulation activities established by this Act in deference to a State program which is substantially in accordance with the provisions of this Act and is to be administered and enforced under State law at the State level of government. The provisions of this Act shall not apply to those dams and water areas which are subject to such mutual agreement, during the term of that agreement.

SEC. 3. (a) Each Federal agency, with regard to the dams and the water areas they impound over which it has primary jurisdiction and responsibility in accordance with section 2 of this Act, shall initially and periodically examine the circumstances of each such dam to determine and classify those which are of a character and located such that their failure would result in loss of life or appreciable economic loss.

(b) Each Federal agency, with regard to each of the dams and the water areas they impound over which it has primary jurisdiction and responsibility in accordance with section 2 of this Act, which have been classified as those which are of a character and located such that their failure would result in loss of life or appreciable economic loss, or which the agency has determined otherwise warrants specific attention, shall:

(1) initially and periodically inspect each, least once every five years, and evaluate the hydrologic capabilities, structural stability, and operational adequacy, in order to determine the existence of any conditions which may adversely affect the safety of

(2) perform or require to be performed additional investigation and inspecsuch tions as it deems advisable; and

(3) perform or require to be performed, maintenance or remedial work, revised operating proedures, or other actions such as breaching of the dam when necessary and in the instance of a dam owned by a non-Federal interest which creates an emergency, have the required work performed by the agency or its designate if the owner of the dam fails to so perform.

(c) Any expenses which are occasioned to the United States for inspections and any other work or activities performed pursuant to subsections (b) (1), (b) (2), (b) (3), or (e) of this section on any dam owned by a non-Federal interest shall be reimbursed to the

United States by the owner of the dam.

(d) Federal costs for investigations and work carried out under subsections (a) and (b) of this section shall be treated as an operation and maintenance expense of the Federal projects concerned to be allocated between the Federal government and af-

fected non-Federal interests in accordance with existing requirements of general law and specific project authorizations.

(e) Each Federal agency shall perform, but need not be limited to performing, the following functions concerning the safety of each dam and the water area it impounds which is proposed for construction, modifi-cation, removal, or abandonment by Federal or non-Federal action and over which the Federal agency has primary jurisdiction and responsibility in accordance with the provisions of section 2 of this Act:

(1) review and approve the plans and specifications for such work:

(2) perform periodic inspections during such work for the purpose of insuring compliance with the approved plans and speci-

(3) require and retain the "as-built" drawings and other construction records of such completed work such as foundation data and geological features, properties of embank-ment and foundation materials, concrete properties and construction history; and

(4) issue a certificate of approval for such work after review of the necessary records

and approval of the data they contain and the adequacy of the work. SEC. 4. The Secretary of the Army, acting through the Chief of Engineers, shall, within 120 days of enactment of this Act, issue final recommended guidelines for safety inspection and investigations of dams. The heads of Federal agencies affected by this Act shall thereafter, substantially in accordance with the Secretary of the Army guidelines, issue such regulations as are reasonably necessary to accomplish the purposes and requirements this Act which relate to their agency's respective responsibilities under this Act. Federal agency heads or their authorized representatives, upon presentation of their credentials and at reasonable times, shall have a right of entry to, upon, or through any premises and shall have access to and a right to a copy of any records when such access to premises or records is necessary to accomplish their respective responsibilities under this Act.

Sec. 5. Compliance with the provisions of this Act and the applicable regulations is-sued in pursuance of this Act shall be a requirement for the construction and operation of dams and the water areas they impound which are specified to be subject to Federal regulation in accordance with this Act. Whenever, on the basis of any information available to him, a Federal agency head finds that any person is acting in violation of this Act or its implementing regulations in an area over which the Federal agency head has the responsibility for administering this Act, he shall notify the person of the alleged violation and issue an order requiring the person to cease his violation. If, immediately after such notification in an emergency circumstance or after 30 days of such notification in a nonemergency circumstance, appropriate action is not being taken to cease the violation, the Federal agency head who made the notification may request the Attorney General to institute a civil action for appropriate relief, including a permanent or temporary injunction. Any action under this subsection may be brought in the district court of the United States for the district in which the defendant is located or resides or is doing business, and such court shall have jurisdiction to restrain any violation of this Act and to require compliance.

Sec. 6. Nothing in this Act limits or alters the authority of the Federal Government to permit, regulate or otherwise to exercise jurisdictional control over any privately or publicly owned dams in accordance statutory authorities other than the authority of this Act. Such authorities include,

without limitation, the Federal Water Power Act (Act of June 10, 1929, 41 Stat. 1063, as amended, 16 U.S.C. 791a-825r); Section 9 of the Act of March 3, 1899 (30 Stat. 1151, 33 U.S.C. 401); Section 404 of the Federal Water Pollution Control Act (86 Stat. 816, 33 U.S.C. 1344); the Federal Metal and Nonmetallic Mine Safety Act (Public Law 89-577 80 Stat. 772, as amended, 30 U.S.C. 721-740) the Federal Coal Mine Health and Safety Act of 1969 (Public Law 91-173, 83 Stat. 742, as amended, 15 U.S.C. 633 636; and 30 U.S.C. 801-804, 811-821, 841-846, 861-878, 901-902, 921-924, 931-936, 951-960); and Section 26a of the Tennessee Valley Authority Act of 1933, as amended (49 Stat. 1079, 16 U.S.C. 831y-1). Nothing contained in this Act is intended nor should be construed to amend or limit any exisitng statutory or administrative requirements which have the effect of being additional to or more stringent than the requirements contained in this Act to assure the safety of dams and the water areas they impound, or which otherwise affect the construction and operation of dams.

SEC. 7. The Secretary of the Army, acting through the Chief of Engineers; the Secretary of the Interior, acting through the Commissioner of the Bureau of Reclamation; and the Secretary of Agriculture, acting through the Administrator of the Soil Conservation Service are individually authorized to furnish technical assistance and advice to any State, upon request of the Governor of the State or his delegate, concerning State establishment and implementation of dam

safety programs.

SEC. 8. The requirement that the Secretary of the Army, acting through the Chief of Engineers, carry out a national program of inspection of dams pursuant to the Act of August 8, 1972 (Public Law 92-367) is hereby terminated. The Secretary of the Army, acting through the Chief of Engineers, is authorized to maintain current the National Dam Inventory prepared pursuant to Public Law 92-367, and this maintenance shall include reclassification of dams as to hazard potential when the public agency having primary jurisdiction and responsibility over the dams determines that reclassification is advisable. The updated inventory shall be periodically published at such times and in such manner as the Chief of Engineers determines will be beneficial to affected Federal, State and local interests.

SEC. 9. Nothing contained in this Act and no action or failure to act under this Act shall be construed (1) to create any liability in the United States or its officers or employees for the recovery of damages caused by such action or failure to act; (2) to relieve an owner or operator of a dam of the legal duties, obligations, or liabilities incident to the ownership or operation of the dam.

S. 1254

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress declares that the protection of human life and property from potential hazards created by public and private dams and the water such dams impound is an important national interest which should be addressed by the Federal or State agencies having the primary jurisdiction over and responsibility for such dams. Therefore, this Act establishes a National Dam Safety Program to be administered in accordance with the provisions of this Act.

Sec. 2. (a) Congress, having found that the failure of dams adversely affects interstate commerce and adversely affects federal property, directs that each Federal agency shall regulate for safety purposes any dams that conform to the height and capacity criteria of the Act of August 8, 1972 (Public Law 92–367) and that are owned and/or operated

by the United States and the federal agency concerned is primarily responsible to operate.

(b) The states shall regulate for safety purposes any dams and water areas they impound that conform to the height and capacity criteria of the Act of August 8, 1972 (Public Law 92–367) and that (a) are not owned by the United States, provided that the Governor of a state may submit a written request to the Secretary of the Army that federal jurisdiction under this Act be extended to dams which are owned and operated by a non-federal entity and which are located on federal lands in such State. The Secretary of the Army shall approve each such request and shall notify the federal agency or agencies concerned that jurisdiction under this Act is to be assumed by said agency or agencies.

(c) Any written request submitted pursuant to the provisions of this section may later be revoked in whole or in part, by the

Governor of the State.

SEC. 3. (a) Each Federal agency, with regard to the dams over which it has primary jurisdiction and responsibility in accordance with section 2 of this Act, shall initially and periodically examine the circumstances of each such dam to determine and classify those which are of a character and located such that their failure would result in loss of life or appreciable economic loss.

(b) Each Federal agency, with regard to each of the dams over which it has primary jurisdiction and responsibility in accordance with section 2 of this Act, which have been classified as those which are of a character and located such that their failure would result in loss of life or appreciable economic loss, or which the agency has determined otherwise warrants specific attention, shall:

(1) initially and periodically inspect each, at least once every five years, and evaluate the hydrologic capabilities, structural stability, and operational adequacy, in order to determine the existence of any conditions which may adversely affect the safety of each;

(2) perform or require to be performed such additional investigation and inspec-

tions as it deems advisable; and

(3) perform or require to be performed, maintenance or remedial work, revised operating procedures, or other actions such as breaching of the dam when necessary.

(c) Any expenses which are occasioned to the United States for inspections and any other work or activities made at the request of a Governor of a State pursuant to Section 2 (b) and (e) of this section on any dam owned by a non-Federal interest shall be reimbursed to the United States by the owner of the dam.

(d) Federal costs for investigations and work carried out under subsections (a) and (b) of this section shall be treated as an operation and maintenance expense of the Federal projects concerned to be allocated between the Federal government and affected non-Federal interests in accordance with existing requirements of general law and specific project authorizations.

(e) In accordance with the provisions of Section 2 of this Act each Federal agency shall perform, but need not be limited to performing, the following functions concerning the safety of each dam which is proposed for construction, modification, removal, or abandonment and over which the Federal agency has jurisdiction and responsibility,

(1) review and approve the plans and specifications for such work;

(2) perform periodic inspections during such work for the purpose of insuring compliance with the approved plans and specifications:

(3) require and retain the "as-built" drawings and other construction records of such completed work such as foundation data and geological features, properties of embankment and foundation materials, concrete properties and construction history; and

(4) issue a certificate of approval for such work after review of the necessary records and approval of the data they contain and

the adequacy of the work.

SEC. 4. The Secretary of the Army, acting through the Chief of Engineers, shall, within 120 days of enactment of this Act, issue final recommended guidelines for safety inspection and investigations of dams. The heads of Federal agencies affected by this Act shall thereafter, substantially in accordance with the Secretary of the Army guidelines, issue such regulations as are reasonably necessary to accomplish the purposes and requirements of this Act which relate to their agency's respective responsibilities under this Act. Federal agency upon presentation of their credentials and heads or their authorized representatives, at reasonable times, shall have a right of entry to, upon, or through any premises and shall have access to and a right to a copy of any records when such access to premises or records is necessary to accomplish their respective responsibilities under this Act.

Sec. 5. Compliance with the provisions of this Act and the applicable regulations issued in pursuance of this Act shall be a requirement for the construction and operation of dams which are specified to be subject to Federal regulation in accordance with this Act. Whenever, on the basis of any information available to him, a Federal agency head finds that any person is acting in violation of this Act or its implementing regulations in an area over which the Federal agency head has the responsibility for administering this Act, he shall notify the person of the alleged violation and issue an order requiring the person to cease his violation. If, immediately after such notification in an emergency circumstance or after 30 days of such notification in a nonemergency circumstance, appropriate action is not being taken to cease the violation, the Federal agency head who made the notification may request the Attorney General to institute a civil action for appropriate relief, including a permanent or temporary injunction. Any action under this subsection may be brought in the district court of the United States for the district in which the defendant is located or resides or is doing business, and such court shall have jurisdiction to restrain any violation of this Act and to require compliance.

Sec. 6. Nothing in this Act limits or alters the authority of the Federal Government to

permit, regulate or otherwise to exercise jurisdictional control over any privately or publicly owned dams in accordance with statutory authorities other than the authority of the Asia Such authorities of the control of the Asia Such authorities of

ity of this Act. Such authorities include, without limitation, the Federal Water Power Act (Act of June 10, 1929, 41 Stat. 1063, as amended, 16 U.S.C. 791a-825r); Section 9 of the Act of March 3, 1899 (30 Stat. 1151, 33 U.S.C. 401); Section 404 of the Federal Water Pollution Control Act (86 Stat. 816, 33 U.S.C. 1344); the Federal Metal and Nonmetallic

Mine Safety Act (Public Law 89-577, 80 Stat. 772, as amended, 30 U.S.C. 721-740); the Federal Coal Mine Health and Safety Act of 1969 (Public Law 91-173, 83 Stat. 742, as amended, 15 U.S.C. 633, 636; and 30 U.S.C. 801-804, 811-821, 841-846, 861-878, 901-902, 921-924, 931-936, 951-960); and Section 26a

921-924, 931-936, 951-960); and Section 26a of the Tennessee Valley Authority Act of 1933, as amended, (49 Stat. 1079, 16 U.S.C. 831y-1). Notwithstanding the above, nothing con-

tained in Section 404 of the Federal Water Pollution Control Act (86 Stat. 816, 33 U.S.C. 1344) or the Act of March 3, 1899 (30 Stat. 1151, 33 U.S.C. 401) shall be construed as providing authority to exercise jurisdiction for purposes of regulating dam safety. SEC. 7. The Secretary of the Army, acting

SEC. 7. The Secretary of the Army, acting through the Chief of Engineers; the Secretary of the Interior, acting through the Commissioner of the Bureau of Reclamation; and the Secretary of Agriculture, acting through the Administrator of the Soil Conservation Service shall, upon request of the Governor of the State or his delegate, (1) furnish technical assistance and advice to any State concerning State establishment and implementation of dam safety programs, and (2) permit any state to inspect and review the safety of any federally owned dam in said state.

SEC. 8. The requirement that the Secretary of the Army, acting through the Chief of Engineers, carry out a national program of inspection of dams pursuant to the Act of August 8, 1972 (Public Law 92-367) is hereby terminated. In those states in which it is requested by the Governor of the state, the Secretary of the Army, acting through the Chief of Engineers, is authorized to maintain a dam inventory prepared pursuant to Public Law 92-367, and this maintenance shall include reclassification of dams as to hazard potential when the public agency having primary jurisdiction and responsibility over the dams determines that reclassification is advisable.

SEC. 9. Nothing contained in this Act and no action or failure to act under this Act shall be construed (1) to create any liability in the United States or its officers or employees for the recovery of damages caused by such action or failure to act; or (2) to relieve an owner or operator of a dam of the legal duties, obligations, or liabilities incident to the ownership or operation of the

SEC. 10. Nothing contained in this Act is intended nor should be construed to amend or limit any state statutory or administrative requirements to assure the safety of dams and the water areas they impound, or which otherwise affect the construction and operation of dams.

SECTIONAL ANALYSIS OF A BILL, INTRODUCED BY REQUEST, "TO ESTABLISH A NATIONAL DAM SAFETY PROGRAM"

Section 1 constitutes a congressional declaration that the protection of human life and property from the potential hazards created by public and private dams and the water they impound is an important national interest and that this Act creates a National Dam Safety Program.

Section 2 provides for Federal agency regulation for safety purposes of certain dams and the water areas they impound.

Those dams and the water areas they impound which are subject to Federal agency regulation pursuant to the provisions of this Act are those which conform to the height and capacity criteria of the Act of August 8, 1972 (Public Law 92–367) and which, in addition, are owned or operated by the United States or located on lands owned by the United States.

We would recommend that all other dams and the water areas they impound which conform to the height and capacity provisions of the Act of August 8, 1972 (Public Law 92-367) be regulated for safety purposes by the State government within whose boundaries they exist.

Also, pursuant to section 2, where a State dam safety program exists which is substantially in accordance with this Act, non-Federally owned dams subject to Federal jurisdiction pursuant to the provisions of this Act may be made subject to such State program and the appropriate Federal agencies may forego their activities established by this Act during the specified period of a requisite mutual written agreement. The provisions of this Act will not apply during the term of the agreement.

Federal authority or legal rights to direct storage or releases of waters at dams not operated by the United States or not situated on lands owned by the United States would not subject such dams and the water areas they impound to Federal regulation for safety purposes under this Act.

Section 3 provides Federal agencies with the authority and direction to regulate, for safety purposes, all dams and the water areas they impound over which they have primary jurisdiction and responsibility in accordance with section 2 of this Act. It indicates those safety regulation activities which are to be performed in connection with these dams.

There are four types of safety regulation activities pertaining to existing dams. Subsection 3(a) provides for the first type of activity and requires the initial and periodic examination and classification of such dams to determine which ones are of such character and located such that their failure would result in loss of life or appreciable economic loss, and thus which ones will be required to have safety inspections performed on them.

Subsection 3(b) provides for the other three types of safety regulation activities for existing dams.

With regard to those dams which are classified as of a character or located such that their failure would result in loss of life or appreciable economic loss pursuant to subsection 3(a), and those dams which the appropriate Federal agency determines otherwise warrant specific attention, subsection 3 (b) (1) provides for initial and periodic safety inspections, at least every five years. The primary purpose of the types of inspection envisioned under subsection 3(b)(1) would to identify expeditiously those dams which may pose hazards to human life or property. This type of inspection is to develop an assessment of the general condition with respect to safety of the dam and the water area it impounds based upon available data and a visual inspection, determine any need for emergency measures and conclude if additional studies, investigation and analyses are necessary and warranted. As such these inspections will be similar to what is termed a Phase I Investigation in the Recommended Guidelines for Safety Inspection of Dams which are found in Appendix D of the recent Report of the Secretary of the Army on a National Program of Inspection of Dams.

Subsection 3(b) (2) provides for additional investigation and inspection activities as are deemed advisable by the appropriate Federal agency, following the inspections performed pursuant to subsection 3(b) (1).

Subsection 3(b) (3) provides the appropriate Federal agency with the authority and responsibility to perform or require to be performed, maintenance or remedial work, revised operating procedures, or other actions found to be necessary following the inspection activities performed pursuant to subsection 3(b)(1) and 3(b)(2). Where a dam is owned by a non-Federal interest, any such required performance is to be accomplished by the non-Federal owner. However, where a dam owned by a non-Federal interest creates an emergency the appropriate Federal agency is authorized to perform the required work or have its designate do so if the owner fails to so perform.

Subsection 3(c) provides that any expenses occasioned to the United States for inspections and any other work or activities performed pursuant to subsections 3(b)(1), 3(b)(2), 3(b)(3) and 3(e) of this Act on any dam owned by a non-Federal interest shall be reimbursed to the United States by the owner of the dam.

Subsection 3(d) provides for allocation of the costs, of activities performed pursuant to subsections 3(a) and 3(b) of this Act with regard to Federal projects, between Federal and non-Federal interests in accordance with existing requirements of general law and specific project authorizations.

Subsection 3(e) provides for safety regulation activities which are to be performed by the appropriate Federal agency whenever a dam and the water area it impounds is proposed for construction, modification, removal or abandonment. The activities to be performed include the review and approval of plans and specifications for the work, periodic inspections during the work, requirement of the retention of the drawings and other construction records, and certification of approval for such work.

Section 4 requires the Secretary of the Army, acting through the Chief of Engineers, to issue final recommended guidelines for safety inspection and investigations of dams within 120 days of the enactment of this Act. Thereafter the heads of appropriate Federal agencies are required to issue regulations, substantially in accordance with the Secretary of the Army guidelines, necessary to accomplish the purposes and requirements of this Act. Such guidelines will outline the principal factors to be weighed in the determination of existing or potential hazards and define the scope of activities to be undertaken in the safety inspection of dams, but they will not establish rigid criteria or standards. They will further provide that condi-tions which do not meet the guideline recommendations are to be evaluated as to the degree of risk involved, in recognition that deviations from the guidelines will not necessarily mean that dam safety has been compromised.

This section also provides the heads of Federal agencies a right of entry to premises and access to and a copy of any records when necessary to accomplish their responsibilities under this Act.

Section 5 provides for enforcement of the provisions of this Act and the regulations issued pursuant to such provisions with regard to dam facilities owned by a non-Federal interest and subject to the primary jurisdiction and responsibility of a Federal agency in accordance with section of this Act, and it makes compliance with these provisions and regulations a requirement for the construction and operation of dams subject to Federal regulation in accordance with this Act.

Section 6 clarifies that nothing in the Act concerning Federal or State regulation of safety of dams is intended to limit or alter the authority of the Federal Government to regulate any privately or publicly owned dams in accordance with existing Federal authorities for safety or other purposes. With regard to safety regulation under existing Federal authority, this section specifies that this Act leaves in full force any additional or more stringent safety requirements, than those provided for by this Act, under existing agency programs such as that administered by the Federal Power Commission.

Section 7 recognizes that certain Federal agencies have technical expertise and capabilities in the field of dam design and construction which may be beneficial to the States with regard to the establishment and implementation of State dam safety programs. This section provides the Secretary of the Army, the Secretary of the Interior and the Secretary of Agriculture with the authority to furnish technical assistance and advice concerning State establishment and implementation of dam safety programs to any State upon request of the Governor of the State.

Since this Act is to create a national program of inspection of dams, section 8 provides for termination of the provisions in Public Law 92-367 which require the Secretary of the Army, acting through the Chief of Engineers, to carry out a national program of inspection of dams. However, this section also provides the authority for the Secretary

of the Army, acting through the Chief of Engineers, to maintain current the National Dam Inventory prepared pursuant to Public

Law 92-367.

Section 9 provides that nothing in this Act and no action or failure to act under this Act shall be construed (1) to create any liability in the United States or its officers or employees for the recovery of damages caused by such action or failure to act; or (2) to relieve an owner or operator of a dam of the legal duties, obligations, or liabilities incident to the ownership or operation of the dam.

> WASHINGTON, D.C. November 16, 1976.

DEAR MR. PRESIDENT: I am transmitting herewith a report of the Chief of Engineers, Department of the Army, together with accompanying papers, on the National Program of Inspection of Dams which was authorized by the National Dam Inspection Act (Public Law 92-367), approved 8 August 1972. I am also transmitting draft legislation to implement the proposed program, together

with a sectional analysis of the legislation.
Briefly, the Chief of Engineers has found that approximately 20,000 of the 49,329 dams of the Nation are so located that failure of the dam or misoperation of the discharge facilities could result in loss of human life and appreciable property damage and that dam safety programs in most States and in some Federal agencies are either nonexistent or inadequate to protect the public from hazards created by dams. The Chief Engineers concludes that although the adequacy and safety of dams are the obligation of the dam owner, governmental in-spection and regulation are necessary to insure the adequacy of design, construction and operation of dams to protect human life and property from the hazards of dam failure or misoperation.

The Chief of Engineers recommends implementation of a comprehensive national dam safety program through the establishment of regulatory authorities to review and approve plans and specifications to construct, enlarge, modify, remove, or abandon a dam; perform construction inspections; issue certificates of approval upon comple tion of construction; perform periodic safety inspections and evaluation throughout the life of the structure; and issue notices for required remedial or maintenance work. His recommendations are contained on page 19

of the report.

The report was furnished for comment to all fifty States and the appropriate Territories and Federal agencies. Their responses, together with replies of the Chief of Engineers, are bound in Volume I of the report. Comments from the Secretary, Department of the Interior, the Commonwealth of Pennsylvania and State of South Carolina and supplementary comments of Tennessee and York were received too late for inclusion in the bound volume of the report and are furnished as inclosures to this letter. The States of Alaska, Arkansas, Colorado, Delaware, Georgia, Kansas, Mississippi, New Jersey, North Carolina, Ohio, Oklahoma, Oregon, South Dakota, Texas and West Virginia, the Virgin Islands and American Samoa have not commented on the report

The States, Territories and Federal agencies commenting on the report generally concur in the conclusions and recommen-dations of the Chief of Engineers. Twentyfour of the thirty-five States responding have expressed concern as to the ability of their State to implement and prosecute the recommended dam safety program without some form of Federal financial assistance The Departments of Agriculture and Interior also question the ability and willingness of States to fully implement the program without Federal financial incentives. However, we question the appropriateness of Federal financial assistance to the States and Territories in this regard as we believe that such regulation and inspection of non-Federal dams should be accomplished by the concerned States and Territories as part of their normal responsibilities. This is not to preclude the use of incentives to encourage the States to fully implement and carry out their responsibilities under the proposed program. The types of incentives envisioned are Federal training of State personnel, providing technical assistance, and providing guidelines and information.

The Department of Agriculture and the States of California, Idaho, New Mexico and Wyoming have disagreed with the Chief of Engineers' recommendation that privately owned dams located on Federal property should be under the jurisdiction of the Federal agency having supervision of the land. I believe that the Federal government has the primary responsibility to insure that Rederal lands are not utilized in a manner detrimental to the public's safety. The legislation we are proposing does, however, provide a means whereby a Federal agency forego the exercise of its regulation activities under this legislation with regard to privately owned and operated dams on Federal lands, in deference to an approved state

California and the Departments of Interior and Agriculture have expressed the view that privately owned dams under existing Federal jurisdiction should be the responsibility of the States. I do not concur if those privately owned dams are located on Federal property for the reason cited above. However, I do concur in those cases that the privately owned dams are not on Federal property. Under Section 404 of PL 92-500, the Federal Water Pollution Control Act, virtually any dam to be constructed in the future will fall under Federal jurisdiction since a Section 404 permit will be required. This would, in effect, mean that all dams to be constructed in the future would be classified as "Federal" under the definition proposed in the report. I believe that the primary responsibility for inspection of privately owned dams should rest with the States unless there are cogent reasons to the contrary. Any necessary involve-ment of the Federal government with such privately owned dams in an inspection program can be exercised through the existing programs of various Federal agencies, and under the jurisdiction defined by present legislation. Therefore, I conclude that "Federal" dams be defined as those dams owned or operated by the Federal government, or located on Federal lands.

Therefore, in lieu of the recommendations of the Chief of Engineers, I recommend that: a. A comprehensive National Dam Safety Program such as outlined in the report by Chief of Engineers should be implemented. State responsibility, under the police powers of the State, to protect the health, safety and welfare of its citizens should be recognized and all States and Territories should be encouraged to prosecute dam safety programs encompasning all dams not owned or operated by the Federal government or located on Federal property

b. Implementation of a National Dam Safety Program should be followed immethe inspection over a reasonable diately by and practicable time period of all existing dams which have a hazard potential of high or significant, as defined in the Inspection Guidelines, Appendix D of the Chief of Engi-

neers report.

c. Those Federal agencies possessing technical expertise and capabilities in the field of dam design and construction should be authorized to furnish technical assistance and guidance to the States, upon request, concerning State establishment and implementation of dam safety programs.

d. Federal agencies owning and operating dams and owning the land on which dams are located should prosecute the recommended dam safety program for the dams under their jurisdiction. e. The Chief of Engineers, U.S. Army

should be provided authority and funds to maintain current the National Dam Inven-

The Office of Management and Budget advises that there is no objection to the submission of the proposed report to the Congress; however, it states that no commitment can be made at this time as to when any estimate of appropriation would be submitted for implementation of the program, if authorized by the Congress, since this would be governed by the President's budgetary objectives as determined by the then prevailing fiscal situation.

After careful review of the report of the Chief of Engineers and the inclosed comments and views of the States, Territories, and Federal agencies, I concur with the conclusions and recommendations of the Chief Engineers, except as noted above, and submit the Chief of Engineers report, related

papers, and the draft legislation. Sincerely.

> VICTOR V. VEYSEY, Assistant Secretary of the Army (Civil Works).

TESTIMONY OF THE WESTERN STATES WATER COUNCIL CONCERNING DAM SAFETY

(Presented at the hearings of the Energy Research and Water Resources Subcommittee of the Interior and Insular Affairs Committee of the U.S. Senate, February 21, 1977, Idaho Falls, Idaho)

The Western States Water Council appreciates this opportunity to appear before this important Senate Subcommittee. I would like to add my personal thanks for the invitation extended

The Western States Water Council has been concerned about dam safety for many years. The subject has been discussed in committees and full council meetings on numerous occasions. Our concerns, therefore, predate the Teton Dam disaster. Council members did recognize at the time of the Teton Dam failure that there would be impacts beyond those catastrophic and tragic events that occurred here in eastern Idaho.

The Council has anticipated that the failure will be the subject of many discussions relating to federal policies with respect to the construction of federal water resource projects. Council members also anticipated that the subject of dam safety would be discussed in state, multi-state and federal forums as the facts are better identified with respect to the causes for the Teton Dam failure.

The Western States Water Council, representing the Governors of 11 Western States, meets quarterly and on occasion, formulates official policies on water resource matters. One requirement of the Council is that 30-day notices be given on external positions to the 11 sovereign states involved in the Council before a vote is taken on external positions. The Western States Water Council met on January 28 and does not plan on meeting again until April 22. Therefore, your invitation of February 14 to participate in these hearings did not give me an opportunity to bring formally to the Council's attention the subject of these hearings and more specifically, the role of state government in inspection of dams.

The Council has, however, taken two pre vious positions concerning dam safety that I think will be of interest to the Subcommittee. Copies of those positions are attached to this statement for your review and consideration (Exhibit A and B). I believe that, either stated or implied, the following conclusions have been reached by the Western States collectively and unanimously:

 In the western states, the inspection and the concern for safety of dams has traditionally been the responsibility of state government.

(2) Any new dam safety legislation or program should seek the greatest possible degree

of state participation.

(3) Dam safety regulations with respect to non-federally owned dams should be the responsibility of the states and not the federal government, except where special conditions exist and the governor of the state requests that federal jurisdiction be extended.

(4) States should be permitted to inspect and review the safety of any federally owned dam within their respective state.

(5) There should be no legislation or program that would preempt any state statutory or administrative requirements to as-

sure the safety of dams.

(6) Neither Section 404 of the Federal Water Pollution Control Act or any Section of the Rivers and Harbors Act should be construed as providing authority to exercise jurisdiction over the regulation of dam safety.

(7) A proposal conveyed to Congress by the Dept. of Army on November 16, 1976 is unacceptable in its present form. Its basic flaw in our judgment is that it falls to establish the proper sharing of responsibilities between the federal and state governments, as reflected in the above principles. The WSWC will be advising all western senators and representatives by formal letter that the Council is opposed to the presently drafted Corps of Engineers suggested dam safety legislation and the Council further is requesting that Western Senators and Congressmen not participate as a sponsor of this proposal.

(8) If the proposed legislation is introduced, then as a minimum step the proposal should be amended as suggested by the Western States in the position that was formally adopted in Portland, Oregon on January 28, 1977 by the WSWC. That position is attached as Exhibit A.

I would like to call your attention to a map that I have brought to illustrate a particular situation that exists in the United States with respect to the location of federal lands. I have placed before you a map prepared by the U.S. Geological Survey and identified as 'Federal Lands, Principal Lands Administered or Held in Trust by Federal Agencies, January 1, 1968." For reference purposes, this map has been given the designation, Sheet You will note from this map that the great preponderance of federally owned and administered lands are in the 11 western states. Many privately owned dams are situated on federal lands. These dams have been traditionally reviewed for safety purposes by Western States. Therefore, you may find that the Western States' concern over the current proposed dam safety legislation by the Corps of Engineers to be different than the position of Eastern States. The question of jurisdiction of private dams on federally owned lands will not be an issue in very many instances in states east of those represented by the Western States Water Council.

It is anticipated that the WSWC and committees and subcommittees of the Council will be reviewing and considering further the subject of dam safety in connection with our mid-April meetings. If this Subcommittee would like the WSWC to address specific questions or issues in connection with dam safety, I am certain that Council members would appreciate an opportunity to examine the issues and respond to the requests.

In closing, let me again express our appreciation for the opportunity of participating in these hearings. We are keenly interested in your deliberations and we would appreciate being advised as the Subcommittee proceeds with examination of the subject.

POSITION STATEMENT OF THE WESTERN STATES
WATER COUNCIL CONCERNING DAM SAFETY
LEGISLATION

(As submitted by U.S. Department of Army on November 16, 1976, to the Congress of the United Staes, Portland, Oreg.)

In response to the National Dam Inspection Act (P.L. 92-367) as approved by Congress, August 8, 1962, the Corps of Engineers transmitted a legislation proposal to the Congress on November 16, 1976. That transmittal, accompanied with supporting reports, was made by the Assistant Secretary of Army, Victor V. Veysey.

The Western States Water Council, meeting in Portland, Oregon on January 28, 1977, found the proposal to be unacceptable to the western states. The Council determined that it would urge western congressmen and western senators not to support the introduction of the legislation. The Council further determined that it was not at the present time supporting any federal legislation, but if the Army proposed legislation were to be introduced, minimum modifications to that legislation would be necessary before the western states could consider supporting the proposal.

Attached is a modified copy of the proposal as prepared by the U.S. Department of Army. The proposed modifications, as identified by the Western States Water Council in the January 28th meeting, are as follows: (1) Language prepared by the Department of Army that the Western States Water Council finds unacceptable has been deleted by a single line running through the original words, (2) New language that the Western States Water Council finds desirable has been added on the attached pages and has been underscored by dotted lines.

WESTERN STATES WATER COUNCIL RESOLUTION, REGARDING DAM SAFETY PROGRAM, OCTO-BER 13, 1972

Whereas, the enactment of H.R. 15951 (PL 92-367) requires the Secretary of the Army, acting through the Chief of Engineers, to carry out a program of safety inspections for dams throughout the United States; and

Whereas, the Secretary of the Army shall, by July 1, 1974, make recommendations to Congress for the inspection and regulation of dams of the nation, and the respective responsibilities which should be assumed by Federal, State, and local governments and by public and private interests; and

Whereas, the President of the United States had stated that, "The safety of non-Federal dams should rest primarily with the States," and that "Some states are already conducting

effective safety programs." and

Whereas, the President has directed the Secretary of the Army to utilize "The experience of those States which have effective dam safety programs" by seeking "the greatest possible degree of State participation under this legislation," and

Whereas, it is the desire of the Western States Water Council that the dam safety inspection programs remain a prime respon-

Now therefore be it resolved that the Corps of Engineers maximize the use of existing State programs and initiative by:

(1) Developing criteria of inspection and programming in harmony with existing State programs and criteria;

(2) Allowing States, where practicable, to perform Safety inspections under contracts with the Secretary of the Army;
(3) Assisting in the enhancement,

(3) Assisting in the enhancement, strengthening, and (where lacking) the formulation and initiation of State dam safety programs.

So that the Secretary of Army may provide Congress and the Governors a meaningful report by July 1, 1974. [From the Los Angeles Times]
Nationwide Danger Found in Old, ILLDESIGNED DAMS

(By Gaylord Shaw)

Fallon, Nev.—Lahontan Dam looks safe. Rising 168 feet above the Carson River, it creates a lake stretching for miles across the quiet expanse of western Nevada. Weekend boaters ply the calm waters. Children fish from the banks. Campers pitch tents in the valley below, where irrigation has turned the desert into an oasis.

But far from this placid scene, documents in the gray filing cabinets of government paint a shockingly different picture: 62year-old Lahontan Dam is not strong enough to hold back severe flood pressure.

A federal report gives this description of what dam failure at Lahontan would mean:

Almost 100 billion gallons of water would suddenly surge downstream. "Hundreds of people in mobile homes and trailers on farms, roads and trails likely would be trapped and overwhelmed by the flood."

The town of Fallon, population 3,500, located 18 miles downstream would be inundated. Homes, businesses, highways, canals, bridges, a power plant would be wrecked. Beyond the human casualties, economic losses would reach \$82 million.

And Lahontan is not alone. From North Carolina to California, Arizona to North Dakota, inadequate, aging and poorly designed dams pose potentially devastating threats to the lives and property of thousands of people. Yet work to make such dams safe is bogged down by politics and lethargy.

Inadequate spillways, unstable embankments, faulty foundations, excessive seepage, severe hydraulic uplift pressures, deteriorating concrete, transverse cracking—technical terms like these are sprinkled throughout internal government documents.

Without exception, officials responsible for federal dams say none of them is in imminent danger of collapse. And there is much evidence that most of the 5,000 federally constructed, owned or licensed dams meet the government's rigid safety standards.

But that is not true of several dozen of the federal dams. And last summer's disastrous collapse of Teton Dam in Idaho—11 deaths, more than \$400 million in damage showed that even the newest, most sophisticated can be fatally flawed.

In the months after the Teton disaster, examinations of government documents and interviews on federal dam safety have uncovered the following:

Of the Bureau of Reclamation's nearly 300 dams, 20 would be unable to cope with floods that updated studies say they need to be able to handle.

Five other bureau dams currently have seepage or leakage problems, some described as severe.

Fifty-four recommendations for emergency remedial work were made by bureau inspectors last year because "the safety or adequate functioning of the facilities are involved..."

There is a backlog of 1,333 other recommendations covering "a wide range of important matters...to prevent or reduce damage or to preclude eventual operational failure" at bureau dams.

Of the 400 dams operated by the Corps of Engineers, 61 were identified by experts as requiring further study because they may not perform as well during extreme floods as intended...."

After the Teton collapse, the corps reviewed 64 of its dams built on "difficult foundations" and found cracking and signs of distress in several.

Some officials and engineers within the federal government's multibillion-dollar, 50,000 employee dam building bureacuracy

are so concerned about potential hazards that they have kept up a drumfire of memos urging faster steps toward safer dams, but they find themselves frustrated by the facts

of political life.

New dams usually have a built-in constituency of individuals and interests that stand to benefit from the projects. Yet in most cases, no such constituency exists for up-grading the safety of existing projects, because such work rarely increases water supplies

Of the corps' \$1.5 billion general construction program this fiscal year, \$27.5 millionor 1.8 per cent—was listed for rehabilitation work. Of the Bureau of Reclamation's \$723 million construction and rehabilitation budget, \$5.6 million—or less than 1 per cent—was listed for rehabilitation.

This imbalance translates into slow progress on safety and other modification work. Lahontan Dam offers one example.

A bureau study in 1965 concluded that the original estimates of the floods Lahontan must be able to withstand were understated and that the runoff from a record rainstorm would be much higher than first expected. Yet today, a recommendation that Lahontan Dam be modified so it can meet the updated flood forecast is still creeping through bureaucratic channels-several months away from reaching Congress, which must authorize the \$4.7 million project.

Concrete in the dam's thin spillways is so severely deteriorated with age that it would disintegrate if the spillways attempted to pass more than 4,000 cubic feet of water per second—less than 20 per cent of the spillways' design capacity, government engineers said

last summer.

Even as the spillways' floors crumbled, their sidewalls would be overtopped by the surging water. The dam's right abutment would become saturated and slide away. Water would begin eroding the dam's inner core. Soon the dam would be breached.

To produce the dam-destroying maximum probable flood would require an extraordinary 17-inch rainstorm somewhere within Lahontan's watershed. "Although the occurrence of the maximum probable flood is extremely unlikely," said a bureau memo written last November, "such a flood could possibly occur in any year .

Because of advance in flood forecasting, and because some of its projects were built more than half a century ago, the Bureau of Reclamation began in 1965 to re-examine the ability of its projects to cope with floods. Twenty dams were listed as "known to have

inadequate capacity."

Yet work to modify potentially hazardous dams proceeds slowly.

One reason is that the division which recommends safety work must call upon other division to design the modifications.

Officials who set priorities seem unconvinced that immediate action is required. "We don't consider any of these dams in imminent danger," said Assistant Reclamation Commissioner Ed Sullivan. "The prob-ability of failure is quite remote," said Ben Prichard, the safety program's chief.

Another cause for delay is the cumber-some financial arrangement to pay for the modifications. Congress requires the bureau to negotiate a cost-sharing agreement with the irrigators who benefit from the projects.

a process that can take years.

Mr. McCLURE. Mr. President, I yield the floor.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President,

I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS SUBJECT TO CALL OF THE CHAIR

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate stand in recess subject to the call of the Chair.

There being no objection, at 3:21 p.m., the Senate took a recess, subject to the call of the Chair.

The Senate reassembled at 3:45 p.m. when called to order by the Presiding Officer (Mr. METZENBAUM).

ORDER FOR TRANSACTION OF ROU-TINE MORNING BUSINESS TO-MORROW

Mr. ROBERT C. BYRD. Mr. President, the Senate will convene at 2 p.m. tomorrow. I ask unanimous consent that after the two leaders or their designees have been recognized under the standing order, there be a period for the transaction of routine morning business, with no resolutions to come over under the rule, and that there be a limitation on statements of 15 minutes each.

The PRESIDING OFFICER. Without

objection, it is so ordered.

QUORUM CALL

Mr. ROBERT C. BYRD. Mr. President. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, the Senate will convene at 2 p.m. tomorrow. After the two leaders or their designees have been recognized under the standing order, there will be a period for the transaction of routine morning business with statements limited therein to 15 minutes each.

It is possible that a rollcall vote or rollcall votes could occur tomorrow on conference reports or on other matters that may have been cleared for action

by that time

It is possible that the sick pay measure, which has been acted upon today, will not meet with any difficulty in the other body, but it is also possible that the other body may have some problems with regard to one of the amendments, in which case the matter could come

back to this body on tomorrow. Committees will hopefully take advantage of the day tomorrow, to conduct meetings, and inasmuch as the Senate does not come in until 2 p.m., they are almost assured of no interruptions throughout the day, but certainly not before 2:30 or 3 p.m., if at all.

Consent has already been given for all committees to meet during the session of the Senate tomorrow, so it does present a good opportunity for committees to have a long day for meetings before the nonlegislative day period Consent has already been begins. granted for committees to have until midnight tonight to file committee reports.

In addition, consent has already been granted for committees to file reports during the nonlegislative day period until 3 p.m. on each of 2 days-Tuesday and Thursday of next week, April 12 and

14, respectively.

Consent has been granted for the Secretary of the Senate to receive messages from the President of the United States and the other body during the nonlegislative period, and for appropriate referral of such messages.

Consent has already been given for the Vice President of the United States, the President pro tempore of the Senate, the Acting President pro tempore of the Senate, and the Deputy President pro tempore of the Senate to sign all duly enrolled bills and joint resolutions during the nonlegislative period.

I hope that committees will take advantage, also, of that nonlegislative day period to conduct hearings and other business sessions, some of which may occur in Washington, some of which may occur outside Washington.

Tomorrow, I will insert in the RECORD a memorandum which will relate to the legislative measures that have been adopted, the business transacted, and the number of nominations that have been confirmed up to this time, for the scrutiny and study and digestion of Members of this body and the public.

I think the Senate has done very well thus far. I wish to take this momentwhich I could just as well do tomorrowto express my gratitude to the distinguished minority leader and to the Members on his side of the aisle and the Members on my side of the aisle for the excellent cooperation and spirit of accommodation that have been accorded to the joint leadership in the effort to expedite the flow of business in the interests of the people.

Mr. BAKER. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. I yield.

Mr. BAKER. Mr. President, I agree, once again, with virtually every statement made by the majority leader.

As I said earlier today, I sometimes have the feeling that this forum is used to communicate not only among ourselves, but also, as the majority leader pointed out, to the public and even on occasion to the White House.

I agree with the majority leader. I think Congress has done extremely well in the matter of moving the appointments that have been commended to us by the President; and I, in turn, commend the majority leader for a clean slate. There is nothing-or virtually nothing-on the executive calendar or in the Senate, I cannot remember a time when legislation and appointments have the legislative calendar. In my 101/2 years been moved as expeditiously as they have been under the good and diligent leadership of the majority leader; and it is my pleasure to work with him.

Mr. ROBERT C. BYRD. Mr President. Plato thanked the gods for having permitted him to live in the age of Socrates. I thank the benign hand of destiny for permitting me to live and serve in the Senate at a time and during an era when I can enjoy not only the friendship—the inimitable friendship—but also the solicitude and the cooperation that exist between myself and my true friend from the great State of Tennessee. There are no better States than the State of Tennessee and the State of West Virginia—and the State of North Carolina, the motto of which is "To be, rather than to seem."

Mr. HELMS. That is right.

Mr. President, if the Senator will yield, I do not want to stand between these two men while they are engaging in such a delightful colloquy.

Mr. BAKER. I think the Senator from North Carolina is well advised. [Laughter.]

I was about to express my thanks and gratitude to the majority leader for his remarks and to respectfully suggest that if we do not adjourn soon, our solicitude and felicitude may be so great that not even we could stand it. [Laughter.]

Mr. ROBERT C. BYRD. Mr. President-

The roses red upon my neighbor's vine Are owned by him, but they are also mine. His was the cost, and his the labor, too, But mine as well as his the joy, their loveliness to view.

They bloom for me and are for me as fair As for the man who gives them all his care. Thus I am rich, because a good man grew A rose-clad vine for all his neighbors' view. I know from this that others plant for me, And what they own, my joy may also be. So why be selfish, when so much that's fine Is grown for me, upon my Tennessee neighbor's vine.

[Laughter.]

RECESS UNTIL 2 P.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, if there be no further business-and no further comments from my Tennessee neighbor

Mr. BAKER. I would not dare. Mr. ROBERT C. BYRD. I move, in accordance with the previous order, that the Senate stand in recess until 2 p.m. tomorrow afternoon.

The motion was agreed to; and at 3:56 p.m. the Senate recessed until tomorrow, Thursday, April 7, 1977, at 2 p.m.

NOMINATIONS

Executive nominations received by the Senate April 6, 1977:

IN THE AIR FORCE

The following officer under the provisions of title 10, United States Code, section 8066, to be assigned to a position of importance and responsibility designated by the Presi-dent under subsection (a) of section 8066, in grade as follows:

IN THE COAST GUARD

Coast Guard nominations beginning John B. Mahon, to be captain, and ending Richard T. Nelson, to be lieutenant (j.g.), which nominations were received by the Senate and appeared in the Congressional Record on March 29, 1977.

HOUSE OF REPRESENTATIVES—Wednesday, April 6, 1977

The House met at 12 o'clock noon.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

Let not your heart be troubled: believe in God.-John 14: 1.

Eternal God, we pause with bowed heads and contrite spirits in the midst of the duties of this day to lift our souls unto Thee. We acknowledge the mistakes we have made and the sins we have committed by thought, word, and deed. We do earnestly repent and are heartily sorry for our misdoings. Have mercy upon us. O God, forgive us all that is past, and grant that hereafter we may serve and please Thee in newness of life.

Forgive our sins as a nation and help us with repentant hearts and receptive minds to listen to Thy still, small voice, which calls us to walk the ways of justice, truth, and love. Lead us out of the depths of fear and frustration into a new day when Earth's wilderness shall blossom as a rose and our people shall learn to live together in peace with good will in every heart: to the glory of Thy holy name and for the good of our human family. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Is there objection to the approval of the Journal?

Mr. BAUMAN. Mr. Speaker, I object. The SPEAKER. Objection is heard.

Mr. WRIGHT. Mr. Speaker, I move the approval of the Journal.

The SPEAKER. The question is on the motion offered by the gentleman from Texas (Mr. WRIGHT).

The question was taken: and the Speaker announced that the ayes ap-

peared to have it.

Mr. BAUMAN, Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is

not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were-yeas 373, nays 8, not voting 51, as follows

[Roll No. 130] **YEAS-373** Crane D'Amours Howard Hubbard Abdnor Addabbo Akaka Alexander Daniel, Dan Daniel, R. W. Mr. HANSEN changed his vote from "nay" to "yea."

So the motion was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a concurrent resolution of the House of the following title:

H. Con. Res. 186. Concurrent resolution providing for an adjournment of the House from April 6 to April 18, 1977, and a recess of the Senate from April 7 to April 18, 1977.

The message also announced that the Senate had passed with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 3843. An act to authorize additional funds for housing assistance for lower income Americans in fiscal year 1977, to extend the Federal riot reinsurance and crime insurance programs, and for other purposes.

THE HONORABLE WYCHE FOWLER, JR.

Mr. FLYNT. Mr. Speaker, I ask unanimous consent that the gentleman from Georgia, Mr. Wyche Fowler, Jr., be permitted to take the oath of office today. His certificate of election has not arrived, but there is no contest, and no question has been raised with regard to his election.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. FOWLER appeared at the bar of the House and took the oath of office.

CONSUMER PROTECTION LEGISLA-TION INTRODUCED

(Mr. BROOKS asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. BROOKS. Mr. Speaker, today I am introducing a bill to establish an Agency for Consumer Protection.

This is essentially the same bill passed by the House in the 94th Congress. It creates an independent agency with the power to intervene in the proceedings of other Federal agencies that substantially affect consumer interests.

Congressman BEN ROSENTHAL, chairman of the Commerce, Consumer, and Monetary Affairs Subcommittee of the Government Operations Committee, and FRANK HORTON, the ranking minority member of the committee, are joining me as cosponsors of the legislation.

The message today from President Carter endorsing this bill is encouraging. With Congress and the administration working together, this should finally be the year for the enactment of this longoverdue legislation.

Mr. Speaker, I take this occasion to announce that hearings on the consumer protection bill will be held April 20 and 21 by the Legislation and National Security Subcommittee of the Government Operations Committee.

CONFERENCE REPORT ON H.R. 4877, MAKING SUPPLEMENTAL APPRO-PRIATIONS FOR FISCAL YEAR ENDING SEPTEMBER 30, 1977

Mr. MAHON submitted the following conference report and statement on the bill (H.R. 4877) making supplemental appropriations for the fiscal year ending September 30, 1977, and for purposes:

CONFERENCE REPORT (H. REPT. No. 95-166)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4877) "making supplemental appropriations for the fiscal year ending September 30, 1977, and for other purposes," having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 27, 28, 30, 31, 38, 39, 46, 56, 57, 65, 66, 67, 75, 76, 77, 78, 80, 88, 89, 139, 145, 146, 147, 148, 150, 156, 162, 165, 166, 174, 175, 177, 179, 192, 193, 225, 234, 235, 236, and 237.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 5, 6, 16, 18, 24, 25, 26, 29, 40, 47, 48, 49, 54, 58, 62, 64, 70, 71, 73, 74, 79, 81, 84, 85, 86, 92, 94, 96, 97, 100, 135, 136, 137, 152, 153, 157, 158, 159, 160, 163, 164, 169, 170, 171, 172, 180, 181, 182, 183, 185, 188, 194, 195, 203, 204, 205, 207, 212, 213, 215, 217, 218, 219, 220, 221, 222, 223, 224, 226, 227, 228, 229, 230, 231, 232, and 233, and agree to the same.

Amendment numbered 2: That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "\$6,162,000"; and the Senate agree to the same.

Amendment numbered 15: That the House recede from its disagreement to the amendment of the Senate numbered 15, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "\$2,913,000"; and the Senate agree to the same.

Amendment numbered 22: That the House recede from its disagreement to the amendment of the Senate numbered 22, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "\$17,250,000"; and the Senate agree to the same.

Amendment numbered 23: That the House recede from its disagreement to the amendment of the Senate numbered 23, and agree to the same with an amendment, as follows: Restore the matter stricken by said amendment, amended to read as follows:

INDEPENDENT AGENCY

ACTION-INTERNATIONAL PROGRAMS

Peace Corps

The first proviso under this heading of the Foreign Assistance and Related Programs Appropriations Act, 1977, Public Law 94–441, is amended by striking out "\$49,563,000" and substituting in lieu thereof "\$48,907,000".

And the Senate agree to the same.
Amendment numbered 33: That the House recede from its disagreement to the amendment of the Senate numbered 33, and agree to the same with an amendment, as follows: In lieu of the sum named by said amendment insert "\$100,000,000"; and the Senate agree

to the same.

Amendment numbered 36: That the House recede from its disagreement to the amendment of the Senate numbered 36, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "\$1,000,000,000"; and the Senate agree to the same.

Amendment numbered 41: That the House recede from its disagreement to the amendment of the Senate numbered 41, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "\$44,495,000"; and the Senate agree to the same.

Amendment numbered 42: That the House recede from its disagreement to the amendment of the Senate numbered 42, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "\$3,500,000"; and the Senate agree to the same.

Amendment numbered 51: That the House recede from its disagreement to the amendment of the Senate numbered 51, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "\$10,000,000"; and the Senate agree to the same.

Amendment numbered 55: That the House recede from its disagreement to the amendment of the Senate numbered 55, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amend-

ment insert "\$10,800,000"; and the Senate agree to the same.

Amendment numbered 68: That the House recede from its disagreement to the amendment of the Senate numbered 68, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "\$58,301,000"; and the Senate agree to the same.

Amendment numbered 69: That the House recede from its disagreement to the amendment of the Senate numbered 69, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "\$39,500,000"; and the Senate agree to the same.

Amendment numbered 82: That the House recede from its disagreement to the amendment of the Senate numbered 82, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "\$10,600,000"; and the Senate agree to the same.

Amendment numbered 87: That the House recede from its disagreement to the amendment of the Senate numbered 87, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "\$414,846,000"; and the Senate agree to the same.

Amendment numbered 95: That the House recede from its disagreement to the amendment of the Senate numbered 95, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "\$23,475,000"; and the Senate agree to the same.

Amendment numbered 98: That the House recede from its disagreement to the amendment of the Senate numbered 98, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "\$3,040,000"; and the Senate agree to the same.

Amendment numbered 99: That the House recede from its disagreement to the amendment of the Senate numbered 99, and agree to the same with an amendment, as follows. In lieu of the sum proposed by said amendment insert "\$2,000,000"; and the Senate agree to the same.

Amendment numbered 149: That the House recede from its disagreement to the amendment of the Senate numbered 149, and agree to the same with an amendment, as follows: Restore the matter stricken by said amendment, amended to read as follows:

FAMILY HOUSING, DEFENSE

For an additional amount for Family housing, Defense, \$60,000,000 (and an increase of \$35,000,000 in the limitation on Department of Defense, operation, maintenance; an increase of \$15,000,000 in the limitation on Construction, Army; an increase of \$5,000,000 in the limitation on Construction, Navy and Marines Corps; and an increase of \$10,000,000 in the limitation on Construction, Air Force): Provided, That none of the funds appropriated herein shall be obligated until authorization for this appropriation is enacted.

And the Senate agree to the same.

Amendment numbered 161: That the House recede from its disagreement to the amendment of the Senate numbered 161, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "\$4,959,000"; and the Senate agree to the same.

Amendment numbered 167: That the House recede from its disagreement to the amendment of the Senate numbered 167, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "\$1,680,000"; and the Senate agree to the same.

Amendment numbered 168: That the

House recede from its disagreement to the amendment of the Senate numbered 168, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "\$19,595,000"; and the Senate agree to the same.

Amendment numbered 178: That the House recede from its disagreement to the amendment of the Senate numbered 178, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "\$2,000,000"; and the Senate agree to the same.

Amendment numbered 189: That the House recede from its disagreement to the amendment of the Senate numbered 189, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "\$20,000,000"; and the Senate agree to the same.

Amendment numbered 191: That the House recede from its disagreement to the amendment of the Senate numbered 191, and agree to the same with an amendment, as follows: Restore the matter stricken by said amendment, amended to read as follows:

DEFENSE CIVIL PREPAREDNESS AGENCY

Operation and Maintenance

For an additional amount for "Operation and maintenance", \$2,000,000, which shall be available for allocation under section 205 of the Federal Civil Defense Act of 1950, as amended.

And the Senate agree to the same.

Amendment numbered 206: That the House recede from its disagreement to the amendment of the Senate numbered 206, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "\$300,494,000"; and the Senate agree to the same.

Amendment numbered 208: That the House recede from its disagreement to the amendment of the Senate numbered 208, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "\$215,036,000"; and the Senate agree to the same.

Amendment numbered 209: That the House recede from its disagreement to the amendment of the Senate numbered 209, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert "\$9,850,000"; and the Senate agree to the same.

Amendment numbered 210: That the House recede from its disagreement to the amendment of the Senate numbered 210, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "\$8,750,000"; and the Senate agree to the same.

Amendment numbered 214: That the House recede from its disagreement to the amendment of the Senate numbered 214, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "\$123,584,000"; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 3, 4, 7, 8, 9, 10, 11, 12, 13, 14, 17, 19, 20, 21, 32, 34, 35, 37, 43, 44, 45, 50, 52, 53, 59, 60, 61, 63, 72, 83, 90, 91, 93, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 138, 140, 141, 142, 143, 144, 151, 154, 155, 173, 176, 184, 186, 187, 190, 196, 197, 198, 199, 200, 201, 202, 211, and 216.

WEICKER, Jr., Managers on the Part of the Senate.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4877) making supplemental appropriations for the fiscal year ending September 30, 1977, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

Chapter I

Department of Agriculture Federal Grain Inspection Service Inspection and Weighing Services

The Department is directed to forego the charging or collection of fees from official inspection or weighing agencies for supervision costs for the entire fiscal year 1977 since funds are provided for these purposes.

Agricultural Research Service

Amendment No. 1: Appropriates \$1,320,000 for the Agricultural Research Service as proposed by the Senate instead of \$1,020,000 as proposed by the House. The conference agreement provides \$1,020,000 for the Pesticide Impact Assessment Program and \$300,000 for research on pseudorables.

Animal and Plant Health Inspection Service

Amendment No. 2: Appropriates \$6,162,000 for the Animal and Plant Health Inspection Service instead of \$5,141,000 as proposed by the House and \$7,682,000 as proposed by the Senate.

A total of \$1,080,000 is provided for the citrus blackfly control program for work in Florida and Texas, an increase of \$521,000 over the amount recommended by the House.

A total of \$500,000 is provided for range caterpillar control and research. The conferees are aware that this pest has generated deep concern within the affected area and would require a large Federal outlay to control on an on-going basis.

The conferees reserve judgment on such a program and are in agreement that thorough hearings should be held prior to initiating such a full cooperative control program.

The funds provided herein will allow treatment of Federally controlled land and costshare assistance for treatment of state, local and private land in the most critically infested areas. Additionally, high priority research and methods development will be undertaken with these funds at the Federal and State level.

The conferees will expect the Department to advise the appropriate Committees of Congress as to the extent and severity of range caterpillar infestation and submit a report on the control program. The conferees have been advised that the Department expended approximately \$385,000 on range caterpillar control during the transition quarter without the approval of Congress. In the future, the Department will be expected to follow established procedures.

The conference agreement recognizes that \$1,700,000 has already been appropriated for a trial boll weevil eradication program to be available upon certification to appropriate Congressional committees that a substantial and sufficient scientific breakthrough has been achieved and that the States involved have met their responsibilities under the program. The conferees also note that Dimilin has not yet been registered for use.

The following language in the FY 1977

House report still prevails:

"The requested \$1.7 million for boll weevil eradication shall be made available for such program only when the Director of boll weevil research at the Boll Weevil Laboratory certifies to appropriate Congressional committees that a substantial and sufficient scientific breakthrough has been achieved, and that he recommends the program be initiated; and, that each of the three States to be involved has passed and implemented the necessary legislation and has demonstrated to appropriate Congressional committees that they are legally and financially prepared to fulfill their responsibilities under the program. The Administrator of APHIS shall submit on a quarterly basis to appropriate Congressional committees a complete and current report on the status of implementing the program and on the results being achieved. It is the intent of this that pending the meeting Committee these provisions the funds provided shall be available to continue efforts to achieve meaningful breakthroughs in boll weevil eradication and other aspects of boll weevil

Federal Crop Insurance Corporation Subscription to Capital Stock

Amendments No. 3 and 4: Reported in technical disagreement. The managers on the part of the House will move to concur in the Senate amendment which provides \$60,000,000 to enable the Secretary of the Treasury to subscribe and pay for capital stock of the Federal Crop Insurance Corporation instead of \$10,000,000 as proposed by the House. The Senate amendment also provides that \$50,000,000 of the total shall be available only upon enactment into law of the authorizing legislation.

Farmers Home Administration Agricultural Credit Insurance Fund

Water Development, Use, and Conservation Loans

The conferees agree that an additional \$20,000,000 should be provided for irriga-

tion, drainage, and other soil and water conservation measures under the Consolidated Farm and Rural Development Act.

This increase is necessary to cover additional applications and additional needs occasioned by the continuing drought in some sections of the country.

Rural Water and Waste Disposal Grants

Amendment No. 5: Appropriates an additional \$75,000,000 for rural water and waste disposal grants as proposed by the Senate.

Rural Development Insurance Fund

Amendment No. 6: Provides an additional \$150,000,000 for rural water and waste disposal loans as proposed by the Senate.

Agricultural Stabilization and Conservation

Service

Agricultural Conservation Program

Amendment No. 7: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede in the amendment of the Senate with an amendment which reads as follows:

Agricultural Stabilization and Conservation Service

Agricultural Conservation Program

For an additional amount to carry out the Agricultural Conservation Program, \$100,-000,000 to incur obligations for the period ending September 30, 1977, and to liquidate such obligations for soil and water conserving practices in major drought or flood damaged areas as designated by the President or the Secretary of Agriculture: Provided, That not to exceed five per centum of the amount herein may be withheld with the approval of the State committee and allotted to the Soil Conservation Service for services of its technicians in the designated drought or flood damaged areas.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The amendment provides \$100,000,000 for cost sharing payments in major drought or flood damaged areas. The Senate amendment would have provided funds only for designated drought areas. The amendment also provides for a transfer of not to exceed 5 percent of the funds to the Soil Conservation Service for services of its technicians with the approval of the State ASCS Committee. The Senate amendment had provided for a transfer of one percent. The amendment also deletes a Senate proviso that assistance be made available in accordance with standards and criteria as developed and approved by the Secretary of Agriculture, since that proviso would be legislation.

The conferees are in agreement that the funds shall be distributed based on need and not by formula. In addition to the 1970 practices, all former practices are authorized based on the need. Payments to any participant shall not exceed \$2,500; however, two or more farms or ranches may consolidate their payments into a single project.

Chapter II Military Personnel

'Amendment No. 8: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate language adding a heading—"Military Personnel" to this chapter

Military Personnel, Army

Amendment No. 9: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment to appropriate \$1,167,000.

The conferees agree to provide funding to be available to the end of fiscal year 1978 for the Uniformed Services University of the Health Sciences. The Administration amendments to the FY 1978 budget estimates deleted funding in FY 1978 for the University. The House had provided no funding in the FY 1977 supplemental bill for this purpose and the Senate proposed to make these funds available at this time to eliminate uncertainty over the future of the medical university.

Military Personnel, Navy

Amendment No. 10: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment to appropriate \$888,000.

The conferees agree to provide funding to be available to the end of fiscal 1978 for the Uniformed Services University of the Health Sciences. The Administration amendments to the FY 1978 budget estimates deleted funding in FY 1978 for the University. The House had provided no funding in the FY 1977 supplemental bill for this purpose and the Senate proposed to make these funds available at this time to eliminate uncertainty over the future of the medical university.

Military Personnel, Air Force

Amendment No. 11: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment to appropriate \$910,000.

The conferees agree to provide funding to be available to the end of fiscal 1978 for the Uniformed Services University of the Health Sciences. The Administration amendments to the FY 1978 budget estimates deleted funding in FY 1978 for the University. The House had provided no funding in the FY 1977 supplemental bill for this purpose and the Senate proposed to make these funds available at this time to eliminate uncertainty over the future of the medical university.

Operation and Maintenance, Defense Agencies

Amendment No. 12: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment to appropriate \$10,700,000 instead of \$1,200,000 as proposed by the House. The Senate included an additional \$9,500,000 to be made available for the operation of the Uniformed Services University of the Health Sciences through September 30, 1978.

Amendment No. 13: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate. The Senate included a provision in its bill to make \$9,500,000 of the FY 1977 supplemental funding for O&M, Defense Agencies available only for the Uniformed Services University of the Health Sciences through the end of FY 1978.

The conferees, in agreeing to provide funding for the medical university in this Act, also agreed to this provision, making operation and maintenance funds available only for the University through September 30, 1978.

Legislative Liaison Activities

Amendment No. 14: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate increasing the limitation on the use of funds for legislative liaison activities of the Department of Defense from \$5,000,000 to \$7,400,000.

The conferees agreed that Section 728 of the Department of Defense Appropriation Act for fiscal year 1977 should be amended to increase by \$2,400,000 the amount allowable for legislative liaison activities because of changes in the criteria for allocating operations and personnel to this activity. The new criteria were agreed to in the conference on the Defense Appropriation Act for fiscal year 1977. (See page 46 of House Report No. 94-1475.)

Related Agencies

Intelligence Community Oversight

Amendment No. 15: Appropriates \$2,913,-000 for Intelligence Community Oversight instead of \$2,499,000 as proposed by the House and \$3,589,000 as proposed by the Senate.

The amounts approved by the conferees will provide for 170 positions for the Intelligence Community Staff instead of 160 positions as proposed by the House and 196 positions as proposed by the Senate. In agreeing to this compromise, the House conferees do not condone the fact that prior to the approval of this supplemental the Intelligence Community Staff hired in excess of the 141 positions approved in the 1977 appropriation. The amounts approved include \$250,000 for a requirements management system.

Amendment No. 16: Deletes language added by the House which would have required that after August 1, 1977, the funds in the supplemental could not be used to finance in excess of 128 contract employees or employees on detail to the Intelligence Community Staff from other agencies.

The effect of the House language was to assure that at least 20% of the employees of the Intelligence Community Staff would be full-time permanent employees. The House believed this was necessary to assure sufficient independence, since employees on detail may maintain loyalty to their parent agency. The Senate agreed with the need for a permanent cadre, but felt the House language unnecessarily inflexible. In agreeing to delete the House language, the conferees agreed that they would expect the Intelligence Community Staff to establish a permanent cadre as soon as practicable.

The conferees further agreed that by May 1, 1977, the Director of Central Intelligence shall submit to the House and Senate Committees on Appropriations a detailed organizational plan for the 170 positions approved in this supplemental. The plan should indicate which positions will be permanent and which positions will be contract employees or employees on detail from other agencies. The plan should further indicate the amounts required in 1978 to maintain on a full-year basis a staffing and contractual level of effort comparable to the level of effort approved in the 1977 supplemental. The Committees' actions on the 1978 budget will be dependent upon the timeliness, and responsiveness of this proposed plan.

Chapter III

Temporary Commission on Financial Oversight of the District of Columbia

Salaries and Expenses

Amendment No. 17: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate inserting language as follows: ": Provided, That all expenditures shall be approved by the Chairman of the Commission".

District of Columbia

Federal Funds

Federal Payment to the District of Columbia

Amendment No. 18: Appropriates \$16,202,-600 for the general fund of the District of Columbia as proposed by the Senate instead of \$18,202,600 as proposed by the House.

District of Columbia Funds

Transportation

Amendment No. 19: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate appropriating \$846,000 for the Washington Metropolitan Area Transit Authority for the District of Columbia share of the Metrorall operating def-

lcit for the period January 1, 1977 to June 30, 1977 with language prohibiting the obligation of the funds until commitments have been made for the total operating deficit associated with the Phase I segment.

Administrative Provisions

Amendment No. 20: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate providing the city government with the necessary authorization to make payments, not to exceed the amount of \$855,000, retroactively to day care providers from previously appropriated funds. The conferees direct that the city make the payments to the day care providers immediately on enactment of this bill into law from funds remaining available for this purpose in the "Opening Cash Balance" for fiscal year 1977.

Chapter IV

Foreign Operations

Funds Appropriated to the President

Economic Assistance

International Organizations and Programs

Amendment No. 21: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which earmarks \$28,000,000 for a contribution to the United Nations Relief and Works Agency.

Military Assistance

Amendment No. 22: Appropriates \$17,250,-000 for military assistance to Portugal instead of \$15,000,000 as proposed by the House and \$19,500,000 as proposed by the Senate.

Independent Agency Action—International Programs Peace Corps

Amendment No. 23: Restores the language proposed by the House and stricken by the Senate amended to reduce the limitation on the direct support of volunteers by \$656,000 to \$48,907,000 instead of to \$47,486,000 as originally proposed by the House.

Department of State

Migration and Refugee Assistance

Amendment No. 24: Appropriates \$18,725,-000 as proposed by the Senate instead of \$11,325,000 as proposed by the House.

Amendment Nos. 25 and 26: Delete language proposed by the House which would have specified that the earmarked funds were to be used for assistance to refugees from the Soviet Union and other Eastern European countries in the United States and for the movement of baggage.

United States Emergency Refugee and Migration Assistance Fund

Amendment No. 27: Appropriates \$3,660,000 as proposed by the House instead of \$6,360,000 as proposed by the Senate.

Romania Relief and Rehabilitation

Amendment No. 28: Deletes language proposed by the Senate which would have appropriated \$10,000,000 for relief and rehabilitation of Romanian earthquake victims.

Funds Appropriated to the President

International Financial Institutions

Investment in Asian Development Bank

Amendment No. 29: Appropriates \$25,000,-000 as proposed by the Senate instead of \$15,000,000 as proposed by the House. Investment in Inter-American Development

Bank

Amendment Nos. 30 and 31: Appropriate \$316,000,000 as proposed by the House instead of \$326,000,000 as proposed by the Senate. The additional \$10,000,000 proposed by the Senate was to be allocated for paid-in capital stock.

The managers agree that the United States

should subscribe to the ordinary callable capital increase only to the extent that specific appropriations are received in advance and in no case should the subscription to ordinary callable capital exceed the appropriation made available by Congress in each particular instance.

Operating Expenses of the Agency for International Development

Amendment No. 32: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provides that none of the funds available for operating expenses in fiscal year 1977 shall be available for leasing, purchasing, renovating or furnishing of housing or office space in Cairo, Egypt, except through the Foreign Building Operations of the State Department.

Chapter V

Department of Housing and Urban Development

Housing Programs

Amendment No. 33: Increases the limitation on the aggregate loans that may be made for Housing for the Elderly or Handicapped by \$100,000,000 instead of \$150,000,000 as proposed by the Senate.

Amendment No. 34: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate to provide \$1,000,000 for the Emergency Homeowners' Relief Fund.

Funds Appropriated to the President Federal Disaster Assistance Administration

Amendment No. 35: Reported in disagreement. The managers on the part of the House will offer a motion to insist on its disagreement to the amendment of the Senate that would provide \$20,000,000 to reimburse certain States and local governments for snow removal costs.

Independent Agencies

Environmental Protection Agency

Amendment No. 36: Appropriates \$1,000,000,000 for Construction Grants instead of \$500,000,000 as proposed by the House and \$4,500,000,000 as proposed by the Senate.

Amendment No. 37: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate that the funds shall be allotted in accordance with the table on page 16 of Senate Report Number 95–38 adjusted proportionally in accordance with the above appropriation.

National Commission on Neighborhoods

Amendment No. 38: Deletes language proposed by the Senate to appropriate \$1,000,000 for the National Commission on Neigborhoods. The managers recognize the importance of this proposed commission and will consider an appropriation for this purpose when the commission has been authorized.

National Institute of Building Sciences

Amendment No. 39: Deletes language proposed by the Senate to appropriate \$500,000 to the National Institute of Building Sciences.

Veterans Administration

Amendment No. 40: Inserts language proposed by the Senate appropriating \$10,045,000 for Assistance for Health Manpower Training Institutions.

Chapter VI

Department of the Interior Bureau of Land Management

Amendment No. 41: Appropriates \$44.495,-000 for management of lands and resources instead of \$45.255,000 as proposed by the House and \$43.895,000 as proposed by the Senate. The increase above the amount proposed by the Senate consists of the following increases for drought assistance on public lands: \$150,000 for watershed rehabilitation; \$250,000 for range supervision; and \$200,000 for wild horse and burro management.

Amendment No. 42: Earmarks \$3,500,000 of the appropriation for management of lands and resources for range betterment activities instead of \$4,000,000 as proposed by the House and \$2,900,000 as proposed by the

Amendment No. 43: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment appropriating \$600,000 for construction and maintenance instead of \$900,000 as proposed by the Senate.

The text of the amendment is as follows: "CONSTRUCTION AND MAINTENANCE

"For an additional amount for 'Construction and maintenance', \$600,000, to remain available until expended."

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 44: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate providing that administrative expenses and other costs related to processing application documents for use and disposal of public lands may be collected from prospective users and expended by the Bureau of Land Management.

Bureau of Outdoor Recreation

Amendment No. 45: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment appropriating \$800,000 for salaries and expenses instead of \$1,000,000 as proposed by the House and \$5,800,000 as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the House to the amendment of the Senate. The decrease below the amount proposed by the House includes a reduction of \$200,000 for the urban recreation study. The managers are in agreement that of the amount provided for the urban recreation study, \$100,000 shall be used to conduct a study of the proposed Bartram Trail in the Southeastern States.

Amendment No. 46: Deletes language proposed by the Senate providing \$5,000,000 for conversion of certain railroad rights-of-way to recreation and conservation uses.

Amendment No. 47: Earmarks \$108,693,000 of the appropriation for the Land and Water Conservation Fund for the National Park Service as proposed by the Senate instead of \$127,493,000 as proposed by the House. The managers are in agreement with the Senate proposal that provides \$1,417,000 for Fort Smith NHS, but have deleted \$2,000,000 for Fire Island NS since funds will not be required until FY 1978 as proposed in the pending budget request.

Amendment No. 48: Earmarks \$18,800,000 of the appropriation for the Land and Water Conservation Fund for the Forest Service as proposed by the Senate. The Forest Service program is as follows: \$2,500,000 for the national trails system; \$11,000,000 for recreation composites; and \$5,300,000 for inholdings

United States Fish and Wildlife Service

Amendment No. 49: Appropriates \$15,475,-000 for resource management as proposed by the Senate instead of \$21,025,000 as proposed by the House. The managers are in agreement that not less than one maintenance position be provided at the J. N. "Ding" Darling NWR.

Amendment No. 50: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and

concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following: , of which \$4,025,000 shall remain available until September 30, 1978

The managers are in agreement that of the amount provided for construction and anadromous fish, \$20,000 shall be for planning and design of a wildlife interpretive center at Cuba Landing, Tennessee NWR, and \$75,000 for restoration and rehabilitation at the J. N. "Ding" Darling NWR.

The managers are in agreement with the

The managers are in agreement with the concern expressed by the House managers that construction of visitor centers not be done at the expense of ongoing operations and maintenance of wildlife refuges.

National Park Service

Amendment No. 51: Appropriates \$10,000,000 for operation of the national park system instead of \$13,730,000 as proposed by the House and \$7,510,000 as proposed by the Senate. The allowance includes the following: \$3,500,000 for staffing (965 positions); \$1,-280,000 for the Valley Forge NHP; \$225,000 for the Klondike Goldrush NHP; \$925,000 for the Golden Gate NRA; \$800,000 for forest fire suppression; \$50,000 for support of public concerts at the Gateway Arch; \$730,000 for Park Police pay raise; and \$2,490,000 for maintenance and repair.

The managers are in agreement that support for the St. Louis Symphony Orchestra at Gateway Arch beyond FY 1977 should be provided by the National Endowment for the Arts or other sources.

Amendment No. 52: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment appropriating \$90,855,000 for planning and construction instead of \$92,-263,000 as proposed by the House and \$93,-001,000 as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate. The net decrease below the amount proposed by the House includes decreases of \$2,933,000 and increases of \$1,525,000.

The following amounts were deferred pending better justification of planning and construction estimates: Fort Donelson NMP, \$165,000; Lake Mead NRA road and visitor facilities, \$679,000; Pecos NM visitor center, between and reads \$2,000,000

housing and roads, \$2,089,000.

Increases were for Harpers Ferry NHP, renovation of historical buildings 8 and 9, \$1,000,000; Franklin Delano Roosevelt Memorial design, \$336,000; Indiana Dunes NL, rehabilitation of Bailly administrative center, \$161,000; Theodore Roosevelt NM visitor center, \$28,000.

The managers are in agreement on the following reductions resulting from deferrals proposed by the House: Cape Cod National Seashore, bicycle path, \$400,000; Cape Hatteras NS, visitor center, \$19,000; Carlsbad Caverns NP, auditorium for visitor center, \$22,000; Fort Clatsop National Monument, visitor center improvement, \$7,000; Gateway National Recreation Area, visitor facilities, Sandy Hook, \$42,000; Guadalupe Mountains National Park, visitor contact station and parking area, \$313,000; Gulf Islands NS, visitor facilities and utilities, \$2,146,000; National Capital Parks East, Oxen Cove golf clubhouse, \$5,000; Pea Ridge National Monument Park, visitor center expansion, \$1,000; Rock Creek Park, bike trail, \$51,000; Wolf Trap Farm Park, visitor orientation complex, \$703,000.

Amendment No. 53: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates \$4,500,000 for the John F. Kennedy Center for the Performing Arts for roof repairs and reconstruction.

Mining Enforcement and Safety Administration

Amendment No. 54: Appropriates \$2,388,000 for salaries and expenses as proposed by the Senate instead of \$1,304,000 as proposed by the House. The managers are in agreement that of the amount provided for the State grant program, support may be provided for the operation of a simulated mine operators school in Pennsylvania.

Bureau of Mines

Amendment No. 55: Appropriates \$10,800,000 for mines and minerals instead of \$10,-050,000 as proposed by the House and \$13,-978,000 as proposed by the Senate. The increase above the amount proposed by the House includes \$600,000 for mineral resource surveys in Alaska and \$150,000 for ocean mining policy and data studies.

The managers are in agreement that the

ginia, \$2,000,000.

Amendment No. 56: Deletes language proposed by the Senate that \$5,128,000 be provided for the purchase and renovation of a building to serve as a replacement for the Salt Lake City Metallurgy Research Center presently located on the campus of the University of Utah.

Amendment No. 57: Appropriates \$9,-259,000 for construction of a metallurgy research center as proposed by the House.

Bureau of Indian Affairs

Amendment No. 58: Appropriates \$10,-140,000 for operation of Indian programs as proposed by the Senate instead of \$10.-040,000 as proposed by the House. The increase above the amount proposed by the House includes \$100,000 for the Blackbird Bend land claims case.

Territorial Affairs

Amendment No. 59: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the sum proposed by said amend-

ment, insert the following:

\$34,200,000, of which \$15,000,000 shall be available only upon enactment of authorizing legislation

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 60: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the sum proposed by said amendment, insert the following: \$25,700,000, of which \$15,000,000 shall be available only

upon enactment of authorizing legislation
The managers on the part of the Senate
will move to concur in the amendment of
the House to the amendment of the Senate.

Amendment No. 61: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment appropriating \$22,-460,000 for the Trust Territory of the Pacific Islands instead of \$10,904,000 as proposed by the House and \$22,132,000 as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate. The increase above the amount proposed by the House consists of the following: increases of \$10,000,000 to offset losses of airport construction grants from the Federal Aviation Administration, and \$4,000,000 for rehabilitation on Enewetak Atoll; and a decrease of \$2,444,000 in purchasing power inflation formula to provide a total of \$5,-400.000.

The managers are in agreement that a required reprogramming proposal to carry out the improved construction program of the Trust Territory of the Pacific Islands should be promptly submitted for approval of the House and Senate Appropriations Commit-

Amendment No. 62: Earmarks not to exceed \$10,000,000 to offset federal grants-inaid losses, as proposed by the Senate.

Amendment No. 63: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which earmarks \$4,000,000 for rehabilitation of Enewetak Atoll subject to enactment into law of authorizing legislation.

Office of the Secretary

Amendment No. 64: Deletes language providing \$58,000 for ocean mining data studies, as proposed by the Senate.

Department of Agriculture-Forest Service

Amendment No. 65: Appropriates \$233,-005,000 for forest protection and utilization as proposed by the House instead of \$223,-805,000 as proposed by the Senate. The managers are in agreement that \$147,000 of the amount approved shall be used for management and wilderness studies in the Hells Canvon National Recreation Area.

Amendment No. 66: Appropriates \$33,800,-000 for forest roads as proposed by the House instead of \$16,900,000 as proposed by the Senate.

Amendment No. 67: Appropriates \$6,000,-000 for forest roads and trails as proposed by the House.

Federal Energy Administration

Amendment No. 68: Appropriates \$58,301,-000 for salaries and expenses instead of \$32,002,000 as proposed by the House and \$90,889,000 as proposed by the Senate.

The net increase of \$26,299,000 above the House allowance includes the following increases and decreases: Increases of \$27,500 .-000 and 15 positions for State grants for weatherization assistance to low-income homeowners; \$750,000 for solar energy commercialization study; \$100,000 and 15 positions for private grievances and redress; decreases of \$314,000 for energy information and analysis; \$795,000 and 63 positions for regulatory programs; \$856,000 for appliance labeling; and \$86,000 for utilities rate demonstrations.

The managers are in agreement that \$12,174,000 and 12 positions for state con-servation grants shall be for supplemental grants as proposed by the House.

The total number of additional positions approved in the supplemental bill is 363.

Amendment No. 69: Earmarks \$39,500,000 to remain available for obligation until December 31, 1977, instead of \$12,000,000 as proposed by the House and \$67,000,000 as proposed by the Senate.

Department of Health, Education, and Welfare-Health Services Administration

Amendment No. 70: Inserts heading as proposed by the Senate.

Amendment No. 71: Appropriates \$1,000,-000 for Indian health services as proposed by the Senate.

Amendment No. 72: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates \$75,000,000 for Indian health facilities.

Institute of Museum Services

Amendment No. 73: Provides language as proposed by the Senate that none of the funds available shall be used for compensation of executive level V or higher positions.

National Foundation on the Arts and the Humanities

Amendment No. 74: Appropriates \$203,-000 for salaries and expenses as proposed by the Senate instead of \$425,000 as proposed by the House.

Amendment No. 75: Appropriates \$18,000,-000 for matching grants as proposed by the House instead of \$21,250,000 as proposed by

Amendment No. 76: Earmarks \$9,000,000 to the National Endowment for the Arts for the challenge grants program as proposed by the House instead of \$12,000,000 as proposed by the Senate.

Amendment No. 77: Earmarks \$9,000,000 to the National Endowment for the Humanities for the challenge grants program as proposed by the House instead of \$6,750,000

as proposed by the Senate.

Amendment No. 78: Deletes language proposed by the Senate which would appropriate \$2,500,000 for planning and design grants for railroad facility restoration.

Advisory Council on Historic Preservation

Amendment No. 79: Provides language as proposed by the Senate that none of the funds available shall be used for compensation of executive level V or higher positions.

Joint Federal-State Land Use Planning Commission for Alaska

Amendment No. 80: Deletes language proposed by the Senate providing \$1,100,000 for an economic and environmental study of Southeastern Alaska.

Chapter VII

Department of Health, Education, and Welfare

> Center for Disease Control Preventive Health Services (Transfer of Funds)

Amendment No. 81: Appropriates \$12,000,-000 as proposed by the Senate, instead of \$11,000,000, as proposed by the House.

National Institutes of Health

National Institute of Arthritis, Metabolism, and Digestive Diseases

Amendment No. 82: Appropriates \$10,600,-000, instead of \$7,500,000 as proposed by the House, and \$13,700,000 as proposed by the Senate.

Alcohol, Drug Abuse and Mental Health Administration

Alcohol, Drug Abuse and Mental Health

Amendment No. 83: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate, amended to read as follows: \$120,949,000, Provided, That allotments to each State under section 302 of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treat-ment, and Rehabilitation Act shall not be less than the allotments made to such States in fiscal year 1976

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement will appropriate \$120,949,000 instead of \$115,049,000 as proposed by the House, and \$133,022,000, as proposed by the Senate. The increase over the amount proposed by the House includes \$4,-600,000 for project grants and contracts for community programs for the prevention, treatment, and control of alcoholism, and \$1,300,000 for formula grants to States for alcoholism programs. In addition the con-ferees have agreed to bill language which will insure that each State's formula grant for fiscal year 1977 is at least as much as it received in fiscal year 1976.

Health Resources Administration Health Resources

Amendment Nos. 84, 85, and 86: Adjust legal citations, as proposed by the Senate. Amendment No. 87: Appropriates \$414,-846,000 instead of \$404,826,000 as proposed by the House and \$416,746,000 as proposed by the Senate. The increase over the amount proposed by the House includes \$1,000,000 for National Health Service Corps Scholarships, \$500,000 for financial distress grants, \$2.520,000 for assistance to schools of public health, \$5,000,000 for State health planning and development agencies, and \$1,000,000 for construction assistance for the School of Veterinary Medicine at the Tuskegee Institute, Tuskegee, Alabama.

Amendment No. 88: Deletes separate appropriation of \$1,000,000 proposed by the Senate for Tuskegee Institute, Tuskegee, Alabama since this amount has been included under amendment No. 87.

Education Division Office of Education

Elementary and Secondary Education

Amendment No. 89: Appropriates \$18,-500,000 as proposed by the House, instead of \$16,000,000 as proposed by the Senate.

Emergency School Aid

Amendment No. 90: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate, amended to read as follows:

EMERGENCY SCHOOL AID

For an additional amount for "Emergency School Aid", \$17,500,000 of which \$7,500,000 shall be for carrying out section 707(a) (13) through 707(a) (15) of the Emergency School Aid Act and \$10,000,000 shall be for activities under section 708(a) of said Act, notwithstanding any other provision of said Act, to provide assistance to school districts for which section 706(a) funding is insufficient to meet their needs and which are imple-menting voluntary plans to eliminate or reduce minority group isolation.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Higher Education

Amendment No. 91: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment with an amendment which will appropriate \$3,187,-168,000, instead of \$3,206,418,000 as proposed by the House and \$3,212,518,000 as proposed by the Senate. The managers on the part by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate. The change from the amount proposed by the House includes a reduction of \$40,000,000 for college work-study, a reduction of \$6,100,000 for grants for con-struction of graduate facilities, and increases of \$10,000,000 for supplemental educational opportunity grants, \$10,500,000 for direct student loans, \$1,350,000 for language training and area studies, \$2,000,000 for university community services, \$1,500,000 for cooperative education, and \$1,500,000 for mining fellowships.

Amendment No. 92: Deletes language proposed by the House which would have ear-marked \$6,100,000 for section 721(a)(2) of the Higher Education Act.

Amendment No. 93: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment, provides that funds contained in Public Law 94-94 under this head for work-study grants shall remain available through September 30, 1978.

Library Resources

Amendment No. 94: Inserts legal citation,

as proposed by the Senate.

Amendment No. 95: Appropriates \$23,475 000 instead of \$19,475,000, as proposed by the House, and \$24,475,000, as proposed by the Senate. The increase over the amount proposed by the House includes \$1,000,000 for library career training and \$3,000,000 for State leadership activities to strengthen guidance, counseling, and testing programs.

Assistant Secretary for Human Development

Human Development

Amendment No. 96: Appropriates \$9,750, \$9,500,000 as proposed by the Senate, instead of \$9,500,000 as proposed by the House.

Amendment No. 97: Earmarks \$250,000 for section 301 of the Rehabilitation Act, as

proposed by the Senate.

Departmental Management

General Departmental Management

Amendment No. 98: Appropriates \$3,040,-000 instead of \$2,390,000 as proposed by the House, and \$3,940,000 as proposed by the Senate.

Amendment No. 99: Earmarks \$2,000,000 to remain available for obligation through September 30, 1978, instead of \$1,350,000 as proposed by the House, and \$2,900,000 as proposed by the Senate.

Occupational Safety and Health Review Commission

Salaries and Expenses

Amendment No. 100: Appropriates \$177,-000, as proposed by the Senate. This item was not considered by the House.

Railroad Retirement Board

Regional Rail Transportation Protective Account

Amendment No. 101: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate, which appropriates \$25,000,000 for the payment of benefits under section 509 of the Regional Rail Reorganization Act of 1973. The House did not consider this item.

Chapter VIII Legislative Branch Senate

Amendment Nos. 102 through 134: Reported in technical disagreement. Inasmuch as these amendments related solely to the Senate and in accordance with long practice, under which each body determines its own housekeeping requirements, and the other concurs without intervention, the managers on the part of the House will offer motions to recede and concur in the Senate amendments Nos. 102 through 134.

Joint Items

Joint Economic Committee

Amendment No. 135: Appropriates \$11,500 as proposed by the Senate.

Joint Committee on Atomic Energy

Amendment No. 136: Appropriates \$14,100 as proposed by the Senate.

Joint Committee on Printing

Amendment No. 137: Appropriates \$6,000 as proposed by the Senate.

Office of Technology Assessment

Amendment No. 138: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate authorizing the rental of space in the District

Amendment No. 139: Appropriates \$569,050 for "Salaries and expenses" as proposed by the House instead of \$729,000 as proposed by the Senate.

Architect of the Capitol Office of the Architect of the Capitol

Amendment No. 140: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate inserting headings and appropriating \$90,000 for "Contingent expenses

General Provisions

Amendment Nos. 141 through 144: Reported in technical disagreement. The managers on the part of the House will offer motions to recede and concur in the amendments of the Senate inserting heading and language (1) permitting the Secretary of the Senate to accept moneys from the Department of the Treasury as reimbursement of salaries of U.S. Capitol Police serving as instructors at the Federal Law Enforcement Training Center in Glynco, Georgia; (2) de-leting the provisions of section 1824 of the Revised Statutes as amended (40 U.S.C. 210), which limits to \$20 per man the amount of money to be spent for the purchase of a weapon for the Capitol Police; and (3) authorizing the Chairman of the Capitol Police Board to assign one of the police vehicles, now available, to the Capitol Police liaison officer at the Federal Law Enforcement Training Center at Glynco, Georgia, for specific duty-related usage, as is the case with other agency personnel so assigned.

Chapter IX

Military Construction

Amendment No. 145: Restores the chapter number and heading for Military construc-tion as proposed by the House.

Amendment No. 146: Appropriates \$16,796,-000 for Military construction, Army, as proposed by the House.

Amendment No. 147: Appropriates \$20,330,-000 for Military construction, Navy, as proposed by the House.

Amendment No. 148: Appropriates \$20,000,-000 for Military construction, Air Force, as proposed by the House.

Amendment No. 149: Appropriates \$60,000,-000 for Family housing, Defense, instead of \$65,000,000 as proposed by the House. Also provides an increase of \$35,000,000 in the limitation on Department of Defense, operation, maintenance; an increase of \$15,000,-000 in the limitation on construction, Army; an increase of \$5,000,000 in the limitation on construction, Navy and Marine Corps; and an increase of \$10,000,000 in the limitation on construction, Air Force, all as proposed by the House. This procedure will allow the military services to apply savings from fiscal year 1977 and prior-year family housing construction to finance deficiencies in family housing operation and maintenance up to \$5,000,000 above the amount of new budget authority provided in this Act. The conferees feel that it is desirable to provide this flexibility in lieu of new appropriations in this amount.

The conferees are in agreement as to the urgency of the pollution abatement, energy conservation, and family housing upkeep and necessary improvements provided herein. They, further, note that considerable progress is being made in providing authorization for these projects in a prompt manner. Accordingly, the conferees are in agreement in recommending these appropriations for mili-tary construction and family housing at this

Chapter X

Amendment No. 150: Restores chapter number.

Department of the Interior Bureau of Reclamation

Drought Emergency Assistance

Amendment No. 151: Reported in technical disagreement. The Managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates \$100,000,000 for Drought Emergency Assistance for activities to mitigate the impact of the 1976-1977 drought in the western states.

Southwestern Power Administration Operation and Maintenance

Amendment No. 152: Appropriates \$13,-800,000 as proposed by the Senate for the

Southwestern Power Administration, Operation and Maintenance.

Administrative Provisions

Amendment No. 153: Adds title "Administrative Provisions" as proposed by the Senate.

Amendment No. 154: Reported in technical disagreement. The Managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which reads as follows:

"Appropriations made to the Bureau of Reclamation for fiscal year 1977 shall be available for services as authorized by 5 U.S.C. 3109, when authorized by the Secretary, in total amount not to exceed \$75,000."

Amendment No. 155: Reported in technical disagreement. The Managers on the part of the House will offer a motion to recede and concur in the amendment of the

Senate which reads as follows:

"Appropriations made to the Bureau of Reclamation, Southeastern Power Administration, Southwestern Power Administration, and Alaska Power Administration for fiscal year 1977 shall be available for hire, maintenance, and operation of aircraft; hire of passenger motor vehicles; purchase of reprints; payment for telephone services in private residences in the field, when authorized under regulations approved by the Secretary; and the payment of dues, when authorized by the Secretary, for library membership in societies or associations which issue publications to members only or at a price to members lower than to subscribers who are not members."

Department of Defense—Civil
Department of the Army
Corps of Engineers
Construction, General

The conferees agree with the Senate Report language relating to the Chief Joseph Dam Additional Power Units project, Washington.

Chapter XI

Amendment No. 156: Restores chapter number.

Department of State

International Organizations and Conferences Contributions to International Organizations

Amendment No. 157: Appropriates \$48,-297,749 as proposed by the Senate instead of \$44,337,709 as proposed by the House

\$44,337,709 as proposed by the House.

Amendment No. 158: Provides that \$43,115,039 as proposed by the Senate, instead of
\$39,154,999 as proposed by the House, shall be
available only upon enactment of authorizing legislation.

Eighth Pan American Games

Amendment No. 159: Appropriates \$10,-000,000 as proposed by the Senate instead of \$6,000,000 as proposed by the House. The conferees are agreed that any additional funds needed to support the Eighth Pan American Games should be derived from television rights or other non-Federal

Department of Justice General Administration Working Capital Fund

Amendment No. 160: Appropriates \$2,238,-000 as proposed by the Senate instead of \$2,975,000 as proposed by the House.

Legal Activities

Salaries and Expenses, General Legal Activities

Amendment No. 161: Appropriates \$4,959,-000 instead of \$3,099,000 as proposed by the House and \$7,977,000 as proposed by the Senate. The increase of \$1,860,000 over the House amount is for the payment of private counsel fees required for suits that have already begun.

Amendment No. 162: Deletes bill language proposed by the Senate regarding the use of funds for suits commenced after enactment of this Act. However, the conferees are agreed

that none of the funds available to the Department shall be obligated or expended by the Department for the representation of any defendants in suits commenced after the effective date of this Act, until the appropriate committees of the Senate and the House of Representatives have reviewed the policy statement embodied in the Attorney General's Order No. 687-77 dated January 19, 1977.

Federal Prison System

Support of United States Prisoners Amendment No. 163: Appropriates \$10,-000,000 as proposed by the Senate.

Department of Commerce General Administration Salaries and Expenses

Amendment No. 164: Appropriates \$100,000 as proposed by the Senate.

Bureau of the Census Salaries and Expenses

Amendment No. 165: Deletes proposal of the Senate to appropriate \$309,000 for a monthly chartbook program.

Economic Development Assistance Drought Assistance Program

Amendment No. 166: Deletes proposal of the Senate to appropriate \$225,000,000 for a drought assistance program. While the conferees are not opposed in any way to the provision of such assistance, they are agreed that an appropriation to carry out such a program should await the enactment of necessary authorizing legislation.

National Oceanic and Atmospheric Administration

Operations, Research, and Facilities

Amendment No. 167: Appropriates \$1,680,000 instead of \$1,000,000 as proposed by the House and \$2,880,000 as proposed by the Senate. The amount includes \$1,000,000 for a tuna-porpoise observer program; \$430,000 for a study on weather modification; and \$250,000 to begin a program of long range weather analysis and climate research.

Coastal Zone Management

Amendment No. 168: Appropriates \$19,-595,000 instead of \$17,329,000 as proposed by the House and \$26,353,000 as proposed by the Senate. The \$2,266,000 above the amount in the House bill will provide for up to 80% Federal share of planning grants as well as additional planning requirements.

Coastal Energy Impact Fund

Amendments Nos. 169 through 172: Appropriate \$115,000,000 as proposed by the Senate instead of \$110,000,000 as proposed by the House. The \$5,000,000 above the amount in the House bill will provide for planning and environmental grants, authorized by the Coastal Zone Management Act Amendments of 1976.

Related Agencies

Office of Special Representative for Trade Negotiations

Salaries and Expenses

Amendment No. 173: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate amended to read as follows:

Office of Special Representative for Trade Negotiations

Salaries and Expenses

For an additional amount for "Salaries and expenses," \$266,000: "Provided, That not to exceed \$3,800 shall be available for official reception and representation expenses."

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Small Business Administration Disaster Loan Fund

Amendment No. 174: Deletes proposal of the Senate to appropriate \$50,000,000 for an emergency drought disaster loan program, which is not yet authorized. While the conferees are not opposed to drought assistance loans, they are agreed that an appropriation to carry out such a program should await the enactment of necessary authorizing legislation.

Chapter XII

Amendment No. 175: Restores chapter number.

Department of Transportation
National Highway Traffic Safety
Administration

Amendment No. 176: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate to appropriate \$3,000,000 for traffic and highway safety.

Federal Railroad Administration

Amendment No. 177: Appropriates \$25,-000,000 for grants to the National Railroad Passenger Corporation as proposed by the House instead of \$47,000,000 as proposed by the Senate.

The Conferees understand that the contractual commitments of Amtrak under the purchase agreement with the Consolidated Rail Corporation must be met and believe that the \$25,000,000 provided in this bill should enable Amtrak to meet such commitments for the balance of fiscal year 1977. The Conferees are disturbed by the lackadaiscal approach of Amtrak in its dealings with the Congress regarding its budget needs and in other matters.

Related Agencies

National Transportation Policy Study Commission

Amendment No. 178: Appropriates \$2,000,-000 for salaries and expenses instead of \$1,-000,000 as proposed by the Senate and \$3,000,-000 as proposed by the House.

The Conferees agree that the total funding over the life span of the Commission should not exceed \$5,000,000. In order to ensure that the work of the National Transportation Policy Study Commission will have maximum impact upon the development of national transportation policy, the Conferees recommend that the Authorizing Committees, in cooperation with the Department of Transportation, give early consideration to methods of reconstituting the makeup of the Commission to guarantee that certain interests which presently are not adequately represented shall have an equal voice on the Commission.

Chapter XIII

Amendment No. 179: Restores chapter number.

Department of the Treasury Federal Law Enforcement Training Center

Amendment No. 180: Appropriates \$1,000,-000 for salaries and expenses as proposed by the Senate.

Bureau of Government Financial Operations Amendment No. 181: Deletes \$6,750,000 for salaries and expenses as proposed by the

Bureau of the Public Debt

Senate.

Amendment No. 182: Deletes \$4,700,000 for administering the public debt as proposed by the Senate.

Internal Revenue Service

Amendment No. 183: Appropriates \$28,804,-000 for accounts, collection and taxpayer service as proposed by the Senate instead of \$26,804,000 as proposed by the House.

Executive Office of the President

Official Residence of the Vice President

Amendment No. 184: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate appropriating \$30,000 for operating expenses for the Official Residence of the Vice President.

These funds are for official entertainment expenses of the Vice President. There is no legislative authority for this appropriation.

Council of Economic Advisers

Amendment No. 185: Appropriates \$155,000 for salaries and expenses as proposed by the Senate instead of \$167,000 as proposed by the House.

Council on Wage and Price Stability

Amendment No. 186: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate appropriating \$241,000 for salaries and expenses instead of \$100,000 as proposed by the House. This recommended appropriation exceeds the level authorized for fiscal year 1977.

Office of Management and Budget

Amendment No. 187: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate. This amendment inserts language for salaries and expenses authorizing the Director of the Office of Management and Budget to place five positions in grades GS 16, 17, and 18.

Independent Agencies Civil Service Commission

Amendment No. 188: Appropriates \$775,000 for salaries and expenses as proposed by the Senate instead of \$1,207,000 as proposed by the House.

General Services Administration Federal Telecommunications Fund

Amendment No. 189: Appropriates \$20,000,000 for the Federal Telecommunications Fund instead of \$16,000,000 as proposed by the House and \$25,000,000 as proposed by the Senate.

The Conferees direct that the General Services Administration study the operation and financing of this fund and develop proposed legislation, if necessary, to insure that the rates charged users of the system will be adequate in the future to provide all capital necessary for the operation of the fund.

National Commission on Electronic Fund Transfers

Amendment No. 190: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate inserting language which increases the funding available for travel expenses by \$12,000.

Defense Civil Preparedness Agency

Amendment No. 191: Appropriates \$2,000,000 for operation and maintenance instead of \$8,000,000 as proposed by the House.

Amendment No. 192: Appropriates \$2,000,-000 for research, shelter survey and marking as proposed by the House.

Chapter XIV

Amendment No. 193: Restores chapter number.

Claims and Judgments

Amendment Nos. 194 and 195: Insert House document number and appropriate \$40,817,081 as proposed by the Senate.

TITLE II—INCREASED PAY COSTS FOR THE FISCAL YEAR 1977

Senate

Amendment Nos. 196 through 202: Reported in technical disagreement. The managers on the part of the House will offer motions to recede and concur in the amendments of the Senate appropriating \$5,395,800 for "Salaries, officers and employees", \$30,600 for "Office of the Legislative Counsel of the Senate", \$85,600 for "Senate policy committees", \$924,300 for "Inquiries and investigations", \$4,500 for "Folding documents", and \$4,000 for "Miscellaneous items".

Architect of the Capitol

Amendment Nos. 203 and 204: Appropriate \$445,400 for "Senate office buildings" and \$10,300 for "Senate garage" as proposed by the Senate.

Funds Appropriated to the President Agency for International Development

Operating Expenses

Amendment No. 205: Appropriates \$3,055,-000 for the pay increase as proposed by the Senate instead of \$3,400,000 as proposed by

Department of Defense Military Personnel, Army

Amendment No. 206: Appropriates \$300,-494,000 instead of \$297,294,000 as proposed by the House and \$303,694,000 as proposed by the Senate.

Military Personnel, Navy

Amendment No. 207: Appropriates \$138,-474,000 as proposed by the Senate, instead of \$153,474,000 as proposed by the House.

Military Personnel, Air Force

Amendment No. 208: Appropriates \$215,-036,000 instead of \$212,636,000 as proposed by the House and \$217,436,000 as proposed by the Senate.

Reserve Personnel, Army

Amendment No. 209: Appropriates \$9,850,-000 instead of \$7,350,000 as proposed by the House and \$12,350,000 as proposed by the Senate

National Guard Personnel, Army

Amendment No. 210: Appropriates \$8,750,-000 instead of \$7,600,000 as proposed by the House and \$9,900,000 as proposed by the Senate.

Operation and Maintenance, Army

Amendment No. 211: Reported in technical disagreement. The managers on the part of the House will offer a motion to appropriate \$167,680,000 instead of \$173,030,000 as proposed by the House and \$174,430,000 as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees agreed to Senate reductions of \$3,100,000 based upon the recently announced 75 percent limitation on the number of vacant positions that can be filled and \$9,000,000 made available from a reprogramming action which was subsequently adjusted downward. The conferees agreed to direct the Army to collect at least one-half of the funds lost through fallure to charge adequate amounts for the transportation of items sold to foreign governments in the Foreign Military Sales (FMS) program.

Operation and Maintenance, Navy

Amendment No. 212: Appropriates \$100,-638,000 as proposed by the Senate instead of \$102,838,000 as proposed by the House.

Operation and Maintenance, Marine Corps Amendment No. 213: Appropriates \$16,-937,000 as proposed by the Senate, instead

of \$17,237,000 as proposed by the House.

Operation and Maintenance, Air Force

Amendment No. 214: Appropriates \$123,-584,000, instead of \$123,434,000 as proposed by the House and \$125,334,000 as proposed by the Senate.

The conferees agreed to a reduction of \$1,600,000 made by the Senate based upon the recently announced 75 percent limitation on the number of vacant positions that can be filled. The conferees also agreed to direct the Air Force to collect at least one-half of the funds lost through failure to charge adequate amounts for the transportation of items sold to foreign governments in the FMS program.

Operation and Maintenance, Defense Agencies

Amendment No. 215: Appropriates \$74,-400,000 as proposed by the Senate instead of \$88,700,000 as proposed by the House.

Amendment No. 216: Reported in tech-

Amendment No. 216: Reported in technical disagreement. The managers on the part of the House will offer an amendment to recede and concur in the Senate amendment to make available \$15,000,000 from the

Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) to fund pay raises. The Department of Defense informed the Senate that these funds are not needed for the CHAMPUS program in FY 1977.

Operation and Maintenance, Army Reserve

Amendment No. 217: Appropriates \$6,689,-000 as proposed by the Senate instead of \$6,889,000 as proposed by the House.

Operation and Maintenance, Navy Reserve

Amendment No. 218: Appropriates \$1,800,-000 as proposed by the Senate instead of \$1,900,000 as proposed by the House.

Operation and Maintenance, Air Force Reserve

Amendment No. 219: Appropriates \$4,825,-000 as proposed by the Senate instead of \$5,125,000 as proposed by the House.

Operation and Maintenance, Army National Guard

Amendment No. 220: Appropriates \$17,866,000 as proposed by the Senate instead of \$18,366,000 as proposed by the House.

Amendment No. 221: Appropriates \$17,400,-000 as proposed by the Senate instead of \$18,000,000 as proposed by the House.

Department of State

Other

Amendment No. 222: Appropriates \$30,000 for the pay increase for "Migration and refugee assistance" as proposed by the Senate instead of \$31,000 as proposed by the House.

Department of Transportation

St. Lawrence Seaway Development Corporation

Amendment No. 223: Increases limitation on administrative expenses by \$46,000 as proposed by the Senate instead of \$36,000 as proposed by the House.

Department of the Treasury Internal Revenue Service

Amendment No. 224: Makes typographical change.

Other Independent Agencies
Action

Amendment No. 225: Deletes language proposed by the Senate which would have appropriated \$656,000 for pay increases for the Peace Corps.

Civil Aeronautics Board

Amendment No. 226: Appropriates \$1,196,-000 for salaries and expenses as proposed by the Senate instead of \$950,000 as proposed by the House.

> Intergovernmental Agencies Appalachian Regional Commission Salaries and Expenses

Amendment No. 227: Appropriates \$28,000 for the Appalachian Regional Commission, salaries and expenses as proposed by the Senate instead of \$13,000 as proposed by the House.

Delaware River Basin Commission Salaries and Expenses

Amendment No. 228: Appropriates \$8,000 for the Delaware River Basin Commission, salaries and expenses as proposed by the Senate instead of \$3,000 as proposed by the House.

Susquehanna River Basin Commission Salaries and Expenses

Amendment No. 229: Appropriates \$8,000 for the Susquehanna River Basin Commission, salaries and expenses as proposed by the Senate instead of \$3,000 as proposed by the House.

Interstate Commerce Commission

Amendment No. 230: Appropriates \$2,650,000 for salaries and expenses as proposed by the Senate instead of \$2,250,000 as proposed by the House.

Amendment No. 231: Provides that \$1,400,-000 of the appropriation for salaries and expenses is to be derived by transfer as proposed by the Senate instead of \$1,000,000 as proposed by the House.

Temporary Study Commissions

Amendment No. 232: Deletes \$10,000 for the National Study Commission on Records and Documents of Federal Officials, as proposed by the Senate.

Amendment No. 233: Makes typographical

change.

Amendment No. 234: Restores language proposed by the House and stricken by the Senate which provides that: "None of the funds appropriated or otherwise made available in this Act shall be obligated or ex-pended for the termination or deferral of any project, activity, or weapons system approved by Congress, except specific projects, activities, or weapons systems for which, and to the extent, budget authority has been rescinded or deferred as provided by law." The conferees agree that this provision

does not in any way change current or future rescission and deferral procedures under the Impoundment Control Act of 1974 (Title X of Public Law 93-344). Preparation and submission of rescissions and deferrals by the Executive Branch, and consideration thereof by the Congress, can continue under the Impoundment Control Act, that is, "as pro-

vided by law'

Section 304 would require, and the conferees direct, that rescissions and deferrals be promptly submitted under the Impoundment Control Act when termination or deferral is proposed for any project, activity, or weapons system which involves funds appropriated in this Act. It is intended that the provision be applicable only to those projects, activities or weapons systems that are clearly approved by Congress. It is not intended that the provision modify or affect the application of the Impoundment Control Act in any way.

Amendment Nos. 235 through 237: Restore

section numbers.

REPORT ON RESOLUTION PROVID-ING FOR CONSIDERATION OF H.R.

Mr. MURPHY of Illinois, from the Committee on Rules, submitted a privileged report (Rept. No. 95-166) on the resolution (H. Res. 481) providing for the consideration of the bill (H.R. 5101) to authorize appropriations for activities of the Environmental Protection Agency, and for other purposes, which was re-ferred to the House Calendar and ordered to be printed.

RESOLUTION DIRECTING CERTAIN COMMITTEES OF THE HOUSE TO CONDUCT REVIEW OF U.S. AS-SISTANCE

(Mr. DODD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DODD. Mr. Speaker, I am introducing today a resolution directing the Committee on Banking, Finance and Urban Affairs, the Committee on Appropriations, and the Committee on International Relations, to conduct a full review of all U.S. assistance which is not currently subject to prior congressional review on a country-by-country basis, in order to find ways of increasing congressional control over such assistance. In a time when many of our constituents are expressing serious reservations about our overseas assistance, and when many of us in this House feel that our role in the foreign policy decisionmaking process is still not what it should be, I believe that it is our responsibility to work together to increase our oversight of the totality of U.S. foreign aid.

As you know, this form of indirect, multilateral assistance to developing countries constitutes each year a larger type of aid-giving, while in many respects desirable, unfortunately excludes Congress from decisions concerning the nature of the assistance these institutions

are supporting, the projects themselves. as well as their recipients. Authorizations and appropriations of these moneys are made without the concerned congressional committees' full knowledge of the projected activities of these institutions on a country-by-country basis. It seems to me that the legislature of the country which bears a considerable share of the financial burden of these multilateral efforts, is entitled to a full accounting of the banks' operations before they take place. Access to such information, in a cooperative framework with bank officials, has not been forthcoming despite the determined efforts of several congressional committees

HEARINGS SHOULD BE HELD ON BENEFITS PASS-VETERANS' THROUGH BILL

(Mr. FORD of Tennessee asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FORD of Tennessee. Mr. Speaker, I rise today to inform my colleagues of the progress of H.R. 904, the veterans' benefits passthrough bill which I first in-troduced on January 4. This bill would help those people receiving Veterans' pension benefits and social security benefits at the same time. Currently, an increase in social security benefits is seen as additional income by the Veterans' Administration, causing the VA to cut this person's veterans benefits. Since so many people drawing these two benefits rely on them as their sole source of income, they have no protection against

Mr. CONTE and I have managed to get 167 Members as cosponsors. However, there are about 60 similar bills pending which have a total of 218 individual Members as sponsors or cosponsors.

This fact tells us that it is the will of the House that this bill be scheduled for hearings. We have circulated a letter to the chairman of the Veterans' Affairs Committee urging him to schedule hearings on these bills, and already have over 50 Members as cosigners. I urge my colleagues to join with us on this measure by calling my office to cosign the letter.

PERMISSION FOR COMMITTEE ON MERCHANT MARINE AND FISH-ERIES TO HAVE UNTIL MIDNIGHT FRIDAY, APRIL 8, 1977, TO FILE REPORT ON H.R. 5638

Mr. MURPHY of New York. Mr. Speaker, I ask unanimous consent that the Committee on Merchant Marine and Fisheries may have until midnight Friday, April 8, to file its report on H.R. 5638, to amend the Fishery Conservation Zone Transistion Act in order to give effect during 1977 to the reciprocal fisheries agreement between the United States and Canada.

The SPEAKER. Is there objection to the request of the gentleman from New

There was no objection.

PERMISSION FOR COMMITTEE ON INTERNATIONAL RELATIONS TO FILE REPORT ON H.R. 5840, EX-PORT ADMINISTRATION ACT EX-TENSION

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that the Committee on International Relations may have until midnight tonight to file a report on H.R. 5840, a bill to extend the Export Administration Act.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

HUMAN RIGHTS

(Mr. PEASE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEASE. Mr. Speaker, I am today reintroducing a concurrent resolution calling for an evenhanded global approach to defending human rights. Sixtyfive of my colleagues in the House have cosponsored this resolution. Clearly, there is substantial congressional support for President Carter's pronouncements on human rights. This resolution also shows there is growing interest within Congress in pursuing our commitment to human rights with our allies as well as with our potential adversaries. I am hopeful that this resolution will bolster the administration's confidence in congressional support for a vigorous human rights policy. Similarly, I hope that it will spur the administration to develop a systematic approach to weaving respect for human rights into the fabric of U.S. foreign policy.

There has been much speculation that President Carter's human rights pronouncements prompted the Soviets to reject the latest U.S. proposal in the SALT talks. I do not believe our renewed national commitment to human rights is a major stumbling block to a new SALT agreement. However, in the court of world opinion, the Soviets may perceive that the Carter administration's human rights campaign is primarily directed at them. It might be constructive for the Congress to express a national commitment to defend human rights throughout the World, not just in the Soviet Union. My resolution calls for just this kind of an evenhanded, consistent global approach to pursuing human rights. It voices congressional support for a determined and coherent American commitment to defending human rights within the international community.

FREE FOOD STAMPS SEEN AS MORE COSTLY

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, the administration came up yesterday with its plan for food stamp reform and the heart of this so-called reform eliminates the purchase requirement so that all future

food stamp recipients would simply get their stamps for free.

It is my understanding that President Carter said he did not want to see any increase in the net cost of the program. Well, according to Congressional Budget Office estimates last year, the free food stamp idea is going to cost around \$2 billion more.

You cannot give away free food stamps and keep the cost at its present level unless you screen out at least as many as you take into the program. Can you imagine this Congress taking food stamps away from anyone currently eligible to receive them? Well, of course not. And therein lies the dilemma for the administration. If we are going to provide more people with more food stamps, that is fine, but let us be honest with the taxpayers about how much its going to cost them. If we are going to make the food stamp program more effective at the same cost, that is fine too, but let us be honest about what it is going to take to accomplish it.

We have been in the forefront of this food stamp reform movement for the last several years. We suggested 41 changes in the law during the last Congress and when we return from the Easter recess we will have our refined proposals in new bill form. In view of the disastrous consequences, that would come by way of the administration's proposal, I would warn Members to take a careful look before committing themselves on this one. I further suggest that Members hang loose until they see our refined alternative.

URGING CANADIAN GOVERNMENT TO REASSESS ITS POLICY PER-MITTING KILLING OF NEWBORN HARP SEALS

Mr. RYAN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the concurrent resolution (H. Con. Res. 142), a concurrent resolution urging the Canadian Government to reassess its policy of permitting the killing of newborn Harp seals, with Senate amendments and concur in the Senate amendments.

The Clerk read the title of the concurrent resolution.

The Clerk read the Senate amendments, as follows:

AMENDMENTS

Page 2, line 3, after "waters" insert: "is considered by many citizens of the United States to be cruel, and if continued".

Page 2, line 3, strike out "is a cruel practice which" and insert: "at the current high level"

Amend the preamble as follows: Page 1, line 4, strike out "Canadian Gov-

ernment".
Page 1, line 4, strike out "has increased

the".
Page 1, line 5, strike out "by one-third"

and insert: "has increased from one hundred and twenty-seven thousand". Page 1, lines 7 and 8, strike out "up to 90

per centum" and insert: "a high percentage".

Page 1, strike out lines 9 and 10. Page 1, strike out lines 11, 12, and 13.

Page 1, after line, 13, insert:
"Whereas there is enough conflicting sci-

entific data available indicating that the 1977 quotas may be unsound from a conservation point of view; and"

Page 2, second unnumbered line, after "preserve" insert: "animals which are or may become".

Page 2, second unnumbered line, strike out "of animals".

The SPEAKER. Is there objection to the request of the gentleman from California?

Mr. BAUMAN. Mr. Speaker, reserving the right to object, would the gentleman from California assure us that all of the amendments adopted in the Senate to the concurrent resolution are germane to the concurrent resolution?

Mr. RYAN. They are.

Mr. BAUMAN. Mr. Speaker, I thank the gentleman and withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

A motion to reconsider was laid on the table.

INTERNATIONAL FINANCIAL INSTITUTIONS

Mr. MURPHY of Illinois. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 473 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES 473

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 5262) to provide for increased participation by the United States in the International Bank for Reconstruction and Development, the International Development Association, the International Finance Corporation, the Asian Development Bank and the Asian Development Fund, and for other purposes. After general which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Banking, Finance and Urban Affairs, the bill shall be read for amendment under the five-minute rule by titles instead of by sections. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER. The gentleman from Illinois (Mr. Murphy) is recognized for 1 hour.

Mr. MURPHY of Illinois. Mr. Speaker, I yield the usual 30 minutes to the distinguished gentleman from Illinois (Mr. Anderson), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 473 provides for the consideration of H.R. 5262, international financial institutions. This resolution provides for an open rule with 1 hour of general debate. House Resolution 473 further provides that H.R. 5262 be read for amendment by titles instead of by sections.

H.R. 5262 provides for increased U.S.

CXXIII-677-Part 9

participation in several international development lending institutions. This bill authorizes a total of \$5.2 billion for fiscal year 1978 through fiscal year 1981, of which \$3 billion constitutes direct outlays, the remaining \$2.2 billion being in callable capital.

Title I of the bill provides for an increase in the U.S. capital contribution to the International Bank for reconstruction and development. \$1.6 billion is authorized of which only 10 percent or \$157 million will result in budget out-

lays.

Title II of the bill authorizes \$111 million as the U.S. share of new capital for the International Finance Corporation.

Title III of the bill authorizes \$2.4 billion as the U.S. share to the International Development Association, the soft loan window of the World Bank.

Title IV of the bill authorizes \$814 million in capital for the Asian Development Bank of which only 10 percent or \$81 million will result in budget outlays. This title also authorizes \$180 million as a new U.S. contribution to the Asian Development Fund, the soft loan agency of the Asian Development Bank.

Title V of the bill authorizes an additional U.S. contribution of \$150 million for the African Development Fund.

Title VI encourages U.S. officials in these lending institutions to direct assistance to countries that respect basic human rights instead of to those countries which consistently abuse those rights.

Title VII establishes a U.S. policy of encouraging the development of light capital technology as a form of assistance which is more appropriate to the economy and lifestyle of developing nations.

International financial institutions allow a more equitable sharing of the costs of assistance to developing nations.

Mr. Speaker, I urge the adoption of House Resolution 473 in order that H.R. 5262 may be considered.

Mr. ANDERSON of Illinois. Mr. Speaker, I yield myself such time as I may consume

Mr. Speaker, this is a straight, 1-hour open rule making in order House consideration of H.R. 5262 which authorizes funds for several international lending institutions. No opposition was expressed to this rule during our Rules Committee consideration of the matter Tuesday morning, though it was clear that amendments will be offered to this bill on the human rights and African Development Fund issues.

H.R. 5262 authorizes a total of \$5.2 billion over 3 and 4 fiscal years, depending on the fund involved. These totals break down as follows: \$1.57 billion for the International Bank for Reconstruction and Development; \$111.5 million for the International Finance Corporation; \$2.4 billion for the International Development Association; \$814.3 million for the Asian Development Bank; \$180 million for the Asian Development Fund; and \$150 million for the African Development Fund.

As I mentioned earlier, the two main points of controversy in this bill are the human rights and African Development Fund issues. It is my understanding

that an amendment will be offered under this open rule to replace the so-called Reuss-Carter provision on human rights with the tougher Harkin amendment which already applies to the Interamerican Development Bank and African Development Fund. Another amendment will be offered to reduce the authorization for the African Development Fund because of the hasty manner in which it was inserted in the bill without hearings or an administration request. These amendments are in order under this rule and I urge the rule's adoption.

I. AFRICAN DEVELOPMENT FUND

Section 501 of the bill (page 5) strikes the previous authorization of \$25 million in three annual installments of \$9 million, \$8 million, and \$8 million, and replaces it with a \$175 million authorization for the African Development Fund—a \$150 million increase. committee report contains no justification for this additional authorization in the section discussing the African Development Fund (pages 28-33). Instead, it discusses poverty in Africa, the importance of Africa to the United States, background information on the Fund, the U.S. share compared to others; for example, 7 percent of total subscriptions, \$25 million, compared to 22 per-cent for Canada, the largest donor, \$75 million, the difference between the African Development Fund and the African Development Bank, the Fund's lending terms, and "Administration support for the AFDF contribution." This latter sec-

In his letter, Secretary Blumenthal notes that the fund is currently committing funds from contributions received as part of the first replenishment, covering the period 1976–78, and negotiations for a second replenishment of the fund to finance lending from 1979–81, are expected to begin later this year.

tion consists of a letter from Secretary

To quote from the letter:

of the Treasury Blumenthal.

The administration had intended to submit a request for authorizing legislation to cover U.S. participation in the second replenishment of Fund resources after completion of these international negotiations. Consequently, I will not request appropriation for these funds until fiscal year 1979. While the amendment may be premature, it is consistent with this Administration's intent to participate in a replenishment of the Fund. Therefore we can support the Subcommittee's authorizing action.

The minority views, signed by Representatives Stanton, Brown, WYLIE, ROUSSELOT. HANSEN HYDE KELLY. GRASSLEY, LEACH, and Evans-pages 48-51-express strong opposition to the \$150 million increase for AfDF because there had been no replenishment negotiations and no administration request. lukewarm Treasury support was only offered after the fact, and no other country was prepared to offer contributions of its own at this time. They go on to point out that the United States cannot hope to have any leverage in the upcoming replenishment negotiations when it has already announced its contribution. And finally, the manner in which this was adopted violates the "a standard series of procedures" Congress and the Executive have chosen to follow in authorization measures for international development banks. These procedures include consultation between the Executive and Congress prior to replenishment negotiations, negotiation of donor shares at a formal replenishment conference, a recommendation and report from the National Advisory Council and an initiative from the President. To quote from the minority views:

None of these procedures was followed in this case, and yet, a majority of the committee present at the vote—18 of 47 members—felt compelled to ignore normal procedures.

While the minority state that-

Most of us do not oppose a U.S. contribution to the African Development Fund (page 51).

It should be noted that 7 of the 10 Republicans signing the minority views voted against reporting the bill in full committee—the exceptions being Stanton, Leach, and Evans. Republicans joining the latter three in voting to report the bill—but not signing the minority views—were McKinney, Fenwick, Steers, and Caputo.

One final note not referred to in the report: A CBO budget issue paper entitled, "International Financial Institutions: Background and Budget Options for Fiscal Year 1978," issued in March 1977, and contained in your folder, offers four budget options (page 52 et seq.). The first, which is the administration request, and is the most costly-\$2.6 billion/fiscal year 1978—calls for increased replenishments for both conventional and concessional funds with the expectation that "other donors will presumably also fulfill their negotiated obligations." This option, like the others, calls for \$10 million in U.S. contributions to the African Development Fund-already authorized in 1976. The CBO report contains the following paragraph on AfDF:

A \$10 million contribution to the African Development Fund would complete all authorized payments to that soft-loan facility. The African Fund is a case of authorizations exceeding requests. A total of \$15 million-which has been paid—was originally requested when the United States joined the fund in 1976. The Congress chose, however, to authorize \$25 million, leaving \$10 million in excess of budget authority. (Emphasis added.)

RECOMMENDATION

I tend to agree with Blumenthal that the additional \$150 million for AfDF is "premature" and with the minority views that this would destroy any bargaining leverage for the United States in the upcoming replenishment negotiations. Moreover, I agree with the minority that this violates all the accepted procedures worked out between the Executive and Congress for approaching the question of U.S. contributions to these international lending institutions.

Mr. Speaker, I have no further request for time and I reserve the balance of my

time

Mr. MURPHY of Illinois. Mr. Speaker, I have no further request for time and I move the previous question on the resolution.

The SPEAKER. Without objection, the previous question is ordered.

There was no objection.

The SPEAKER. The question is on the resolution.

The question was taken; and the Speaker announced that the ayes ap-

peared to have it.

Mr. DERWINSKI. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not pres-

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were-yeas 366, nays 15, not voting 52, as follows:

of Florida.

Mrs. Collins of Illinois with Mr. Flowers.

Mr. Ford of Michigan with Mr. Hillis.

Mr. Ichord with Mr. Holland.

Mr. Metcalfe with Mr. Long of Louisiana.

Mr. Pepper with Mr. Shipley. Mr. Patten with Mr. Wydler.

Mr. Charles H. Wilson of California with Mr. Perkins.

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table

Mr. GONZALEZ. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 5262) to provide for increased participation by the United States in the International Bank for Reconstruction and Development, the International Development Association, the International Finance Corporation, the Asian Development Bank and the Asian Development Fund, and for other purposes.

The SPEAKER pro tempore (Mr. NATCHER). The question is on the motion offered by the gentleman from Texas (Mr. Gonzalez). The motion was agreed

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 5262), with Mr. DUNCAN of Oregon in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Texas (Mr. Gonzalez) will be recognized for 30 minutes, and the gentleman from Ohio (Mr. STANTON) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Texas (Mr. Gonzalez).

Mr. GONZALEZ. Mr. Chairman, at this point I would like to yield time to the very distinguished chairman of the full committee, the gentleman from Wisconsin (Mr. Reuss), who is a long-recognized authority, who is very knowledgeable in this area of legislation, and who, I think the record ought to reflect, served as the chairman of the Subcommittee on International Financial Institutions, as it was known for many years and is now, of course, the full chairman of the Committee on Banking, Finance, and Urban Affairs. I am honored to yield such time as he may consume to the distinguished gentleman from Wisconsin (Mr. REUSS).

Mr. REUSS. Mr. Chairman, I thank the distinguished chairman of the subcommittee, the gentleman from Texas (Mr. GONZALEZ), for yielding this time to me. I wish at this time to compliment the gentleman from Texas on the very able and serviceable management which he has given to the bill and on his efforts in bringing it before us today, both through the extensive hearings held in his subcommittee and by his piloting the bill through the full committee.

Mr. Chairman, I have asked for permission to revise and extend my remarks, and I did so because I do not intend to go into all the arithmetic involved. It is enough to say that we ask here for authorization for the next 3year period of \$5.2 billion-that comes out at about \$3 billion-plus in outlaysto support the World Bank, the International Finance Corporation, IDA, the Inter-American Development Bank, the Asian Development Bank and Fund and the African Development Fund.

Those organizations have served us well in the past. They have the great advantage of bringing in the wealthy donors of the world and thus lightening the burden that this country must share. It is significant that our proportionate share has gone down a good deal in percentage points.

These international agencies also have the advantage that they can impose prudent conditions, better than can a bi-

lateral loan program.

Leaving the financial aspect for a moment, I would comment on two nonfinancial parts of the bill. One is the so-called light capital technology amendment, which is found on page 7 of the bill, H.R. 5262. That embodies the philosophy of E. F. Schumacher of "small is beautiful" fame, and it was particularly crafted for this bill by our colleague, the gentleman from Maryland, Mr. Clarence Long.

In a nutshell, what it says is that instead of relying so much on huge steel mills and on an infrastructure in the developing countries, we ought to think more in small terms, such as a pump for the village well, and a plow that can do a better job than grandma could.

So the light capital technology amendment simply directs the attention of our executive directors to the desirability, wherever possible, of practicing "small

is beautiful."

The remaining matter concerning which I want to devote a moment or two is the human rights language. There for the first time, and on an across-the-board basis—and this makes me particularly happy—and with full administration support, appears a straightforward and useful human rights amendment. I will read it to the Members:

"The United States Government, in connection with its voice and vote in" all of these six international agencies "shall advance the cause of human rights, including by seeking to channel assistance toward countries other than those whose governments engage in a consistent pattern of gross violation of internationally recognized human rights, such as torture or cruel, inhumane or degrading treatment or punishment."

It then requires the Secretaries of State and Treasury to let us know every 6 months exactly what has been going on.

This, as I say, is a meaningful provision. It tells the executive branch that we do not just want them to vote correctly, but we want them to use their voting and their politicking, and we want them to make it a 24-hour-a-day, year-round activity, to the end that human rights are advanced rather than retarded by these international lending agencies.

There is a friendly argument that is going to be focused on the human rights amendment to be offered by the gentleman from New York (Mr. Badillo) with slightly different language, which has been written in conjunction with the distinguished gentleman from Iowa (Mr. HARKIN).

As far as I am concerned, I voted for

this Harkin language last year. There is nothing in it that greatly bothers me. I, however, prefer the committee and the administration-approved language, for certain technical reasons.

One of the troubles with the amendment offered by the gentleman from New York (Mr. Badillo) in my judgment, and maybe I am wrong, is that it permits these loans to be made to the torturing dictators, and others of that stripe, if only they can show that the aid is going to meet the basic human needs of the citizens of their country. Well, Mr. Chairman, what shall it profit the poorer citizens of those countries to have their basic human needs met after they have first been tortured by the fellow who is going to distribute the aid? This has bothered me and it has occurred in several cases. One of which was in the case of the loan to Chile. All that the torturers in Chile had to do was dress their loan up in a form where it would help the peasants, and the United States voted for

There is other language that bothers me—the definition of "disregarding human rights," which includes "prolonged detention without charges." This might prove troublesome. After all, our writ of habeas corpus is a fragile child. Not many other countries have it. As one looks at the list of nations, including some with pretensions of civilization, many of them do clap people in jail, without charges, for considerable periods of time.

So, while the talk goes on as to whether it should be the Badillo-Harkin language, or the committee-Carter language, I would hope that the Members would give their attention to these possible defects that I mention.

At any rate, Mr. Chairman, I think we should give thanks that the debate here this afternoon is not going to be about whether we should have regard for human rights in our foreign policy, but about the exact language in the particular amendment. And that, believe me, is a step forward.

Mr. GONZALEZ. Mr. Speaker, I yield myself such time as I may consume.

Mr. Chairman, the bill H.R. 5262 authorizes substantial increases in U.S. commitments to the World Bank Group, the Asian Development Bank and its affiliate, the Asian Development Fund, and to the African Development Fund. This bill also encompasses policy directives to guide U.S. participation in all these institutions, but I will restrict my own comments to the funds authorized, and will yield to the distinguished chairman of the full committee for discussion of the policy directives, since he is the author of one and very well acquainted with the other.

The first three titles of the bill concern new contributions to the World Bank group, to wit, the International Bank for Reconstruction and Development, commonly known as the World Bank, and its affiliates, the International Finance Corporation and the International Development Association. Each of these three agencies plays a distinct role in providing development assistance, each is a separate legal entity, but they

share in common the same management and directors.

Title I authorizes the United States to agree to an increase in the capital of the World Bank, and further authorizes the United States to subscribe a part of that increase. Altogether, the capital of the World Bank would be expended by \$8.4 billion, of which the United States would subscribe to 19 percent, or \$1.57 billion. As in the case of all World Bank capital, 10 percent of the U.S. subscription would be paid in and the bal-ance held in the Treasury as callable capital, to be made available if needed to cover Bank bond obligations. Thus far there has never been a call made against the callable capital of the World Bank, and the administration has estimated that such a call is unlikely to develop.

This bill, in its second title, would also authorize an expansion of the capital of the International Finance Corporation, which has been in business since 1956 and has never had a capital replenishment. Worldwide, the International Finance Corporation is seeking to raise \$540 million in new capital, and the U.S. share would be \$111 million or 23 percent of the total. The International Finance Corporation invests exclusively in private enterprises, mostly in the area of manufacturing. It operates very much like an investment bank, and frequently will take an equity position in a venture it is helping to finance, but it never takes a management position. The International Finance Corporation has recorded a loss record of less than 1 percent, and presently is earning about 9 percent on its equity.

The third branch of the World Bank is the International Development Association, generally referred to as the soft loan window of the World Bank. Whereas the Bank itself raises most of its money in the private capital markets, the International Development Association gets its funds solely from contributions, mostly by governments, but in part from earnings contributed by the Bank. The Bank makes its loans at close to commercial rates, but the International Development Association makes its loans for very long terms, and at less than 1 percent interest cost.

Title III of this bill authorizes the United States to agree to an increase of \$7.6 billion in International Development Association and to agree to make a U.S. contribution of \$2.4 billion toward this, which would be a U.S. share of 31 percent. Over the years, our cumulative share of contributions to the International Development Association has been 38 percent, and our proposed share represents a decreasing percentage.

Title IV of the bill concerns a regional lending institution, the Asian Development Bank and its affiliated soft loan agency, the Asian Development Fund. For the Bank, the bill authorizes a U.S. contribution of \$814 million toward new capital resources totaling \$5 billion, so that our share would amount to 16 percent of the total, the same as our present share of Asian Development Bank capital. As in the case of the World Bank, capital contributions to the Asian De-

velopment Bank are 10 percent paid in and 90 percent callable.

The Asian Development Fund is raising \$809 million in new resources, and the bill authorizes a U.S. contribution of \$180 million, or 22 percent of the total.

Finally, the bill authorizes a new U.S. contribution to the African Development Fund, which is the soft loan affiliate of the African Development Bank. The United States is not a member of the Bank itself, which accepts no outside or nonregional members. We entered the Fund with a \$25 million contribution last September, which this bill would expand by some \$150 million. For the record, I note that there were no hearings on the African Fund contribution, it was not requested by the administration, and probably will not be used, inasmuch as there is no provision for it in the budget. However, the administration does not oppose this part of the bill.

In all cases, our contributions would be paid over a 3-year period, beginning with fiscal year 1978. Altogether the bill authorizes \$5.2 billion in new commitments, and will result in outlays totaling \$3 billion, unless there is a call on the callable capital commitments, which total \$2.1

billion

As I mentioned at the outset of my remarks, this bill includes titles that establish U.S. policy on participation in these lending institutions with respect to human rights and the advocacy of light capital technologies. The distinguished chairman of the full committee is the author of the human rights language, and is expert on the subject of light and intermediate technology.

Mr. Chairman, I yield 3 minutes to the gentleman from Maryland (Mr. MITCH-

ELL).

Mr. MITCHELL of Maryland. Mr. Chairman, I welcome the debate here on the House floor concerning H.R. 5262, the international lending institutions bill which would provide for increased participation by the United States in the International Bank for Reconstruction and Development, the International Development Association, the International Finance Corporation, the Asian Development Bank, the Asian Development Fund, and the African Development Fund, and in particular to address the needs of Africa.

The African Development Fund faces an extremely challenging task because Africa is the world's least developed continent. Over half of the 25 poorest, least developed countries in the world are in Africa; 13 of the world's 18 land-locked developing countries are African; and 22 of 33 of the United Nations' "most seriously affected"—MSA—countries are African: Cameroon, Central African Republic, Chad, Dahomey, Ethiopia, Ghana, Guinea, Ivory Coast, Kenya, Lesotho, Malagasy Republic, Mali, Mauritania, Niger, Senegal, Sierra Leone, Somalia, Sudan, Tanzania, and Upper Volta.

In recent years, severe drought in the Sahelian zone as well as in the East African countries of Ethiopia, Somalia, Kenya, and Tanzania, had a particularly devastating impact. Since the late sixties, prolonged drought conditions have affected approximately 23 million people

in Chad, Mali, Mauritania, Niger, Senegal, and Upper Volta in the Sahel region of Africa. An estimated 8.4 million people have experienced hunger, malnutrition and disease, as well as loss of livelinood. As many as 100,000 persons are estimated to have died of starvation or related causes in these countries. While the spotlight was on the magnitude of human suffering, the effect on the economies of the Sahelian countries has been so devastating it is likely to hold back development in many areas of the region for some time to come.

According to the Fund, in 22 of 41 African nations, food production is failing to keep pace with the population growth. Africa has sufficient land to feed its people but needs additional irrigation, fertilizer, technical assistance

and other input.

Millions of acres of arable land have either remained unused because they are physically inaccessible due to the lack of roads, irrigation, and other infrastructure, or else are underexploited due to the prevalance of disease such as on-chocerciasis and trypanosomiasis.

There is also a need for increasing agricultural credit services to farmers if they are to expand output and adopt new technologies. The Fund estimates that only about 5 percent of African farmers currently receive institutional credit, compared to 15 percent each in Asia and Latin America.

About 75 percent of the African population is engaged in subsistence agriculture, and in half of the countries per capita income is less than \$100 per year.

Africa has some of the highest population growth rates in the world. The average annual rate of population growth in Africa during the period 1970–75 was 2.66 percent, compared with 2.64 percent in South Asia, 1.63 percent in East Asia, 2.73 percent in Latin Amer-

ica and 0.99 in North Africa.

Health care facilities in Africa are among the worst in the world. According to the World Bank, the life expectancy at birth for 1965-70 in Africa was 43.3 years, compared with 52.2 years in East Asia, 48.8 years in South Asia, 60.2 years in Latin America, and 70.4 years in the developed countries. In some African countries the life expectancy is astonishingly low; for example, 34 years in Cameroon, 33 years in the Central African Republic, and 29 years in Chad. Vast regions of Africa are afflicted with debilitating diseases such as river blindness and schistosomiasis. In sub-Sahara Africa, about 270 million people remain exposed to malarial infection without any organized protection. In some areas, the malarial infection rate is 90 to 95 per-

Of particular interest to me regarding this legislation is title V, which provides for a U.S. contribution to the African Development Fund in the amount of \$150 million, to be paid in three annual \$50 million installments. The dollar figure will be amended.

I support this figure because I believe, and will continue to believe, that it best addresses the needs of the developing African countries which draw from the Fund. My trip last year to West Africa confirmed my belief that economic development in the African nation must be greatly accelerated as I witnessed the rampant hunger, poverty, and disease which is so characteristic of developing countries.

I believe that experience has taught us that the smaller institutions, based on a majority of local participation, do a better job of meeting certain requirements than the large worldwide organizations.

As of December 31, 1976, the African Development Fund subscriptions totaled \$340 million including the \$15 million, 4.4 percent, from the United States. Already pledged or projected additional subscriptions through July 1, 1978, include:

 [In millions of dollars]

 Remainder of pledges under first replenishment
 \$71

 Saudi Arabia
 12

 Kuwait
 16

 Abu Dhabi
 10

 Qatar
 5

 United States (fiscal year 1978 appropriations request)
 10

 France
 11

 Total
 135

Under the likely assumption that all these additional subscriptions are paid by July 1, 1978, due date for last payments under the first replenishment, the U.S. contribution would total \$25 million or 5.2 percent of total subscriptions of \$475 million. We would be the sixth in donor rank after Canada, Japan, Germany, United Kingdom, and Sweden and equal to the contribution of Norway.

Neither of the Fund donors nor the Africans can be expected to view this situation to constitute an appropriate role for the United States. The United States plays a leading role in all international financial institutions. We hold executive directorships in all these institutions except the African Development Fund. The political benefits we have already gained from U.S. membership in the African Development Fund will decline if we are unable to obtain an appropriate role within a reasonable length of time. We would also have no assurance of election to an executive directorship in the Fund on the basis of our relative voting power.

If the African Development Fund provision is approved and is implemented by \$50 million in fiscal year 1979 appropriation authority, we could by the end of calendar year 1978 have a \$75 million subscription—14.3 percent of total subscriptions of \$525 million—and be equal in donor rank with Canada as the largest Fund contributor. Election to an executive directorship in the Fund would probably be assured.

A \$50 million contribution on this basis would also have us participate fully in the pattern of donor contributions to the African Development Fund since its inception:

First. Initial contribution (1973).— Each donor country contributed what it considered an appropriate amount. The initial contribution of the United States made in November 1976, was \$15 million and roughly equals the initial contribution of the largest single donor, Canada.

Second. Special general increase (1974–75).—Most donor countries contributed an amount equal to one-half their initial contribution. The U.S. contribution of \$10 million for which appropriation is being sought in fiscal year 1978 would correspond to the contributions by others to this increase.

Third. First general replenishment (began 1976).—Most donor countries are contributing an amount equal to 200 percent of the sum total of their initial contributions and their special general increase.

Canada, for example, made an initial contribution of \$16.7 million, a \$8.3 million contribution to the special general increase, and has pledged a \$50 million contribution to the first general replensishment in three equal annual installments with the last to be made July 1, 1978. By and large, donor countries have accepted this agreed pattern of contribution

Under this approach, the U.S. contribution would look as follows:

Initial contribution: \$15 million—already made.

Special general increase: \$10 million—in fiscal year 1978 appropriation request.
First replenishment: \$50 million—fiscal year 1979 under Mitchell initiative.

Questions have been raised from my colleagues whether the African Development Fund could utilize total subscriptions of \$525 million in the time frame under consideration. Of this total, the Fund has already obligated \$227 million in the first 3 years of its operations (1974–76). The Fund's management estimates that during 1977–79 the Fund will lend \$350 to \$385 million. This is a reasonable estimate since the Fund's pipeline of potential loans currently contains 72 projects, mainly in the agricul-

tural and transport sectors, totaling \$373 million. Thus obligations to date plus the existing pipeline totals \$600 million. Moreover, this total is limited by management's practice to restrict individual loans to a \$5 million ceiling to insure equitable distribution of available resources among African countries. Thus, the pipeline total could be further increased merely by lifting the individual loan ceiling. This evidence clearly suggests that the Fund could use an additional \$50 million U.S. contribution in fiscal year 1979.

Donor negotiations over a second replenishment are now expected to begin at the end of this calendar year. The second replenishment will probably cover a 3-year period beginning July 1, 1979. For this period, we would expect that the Fund will seek new contributions at least equivalent to contributions as of July 1, 1978. The \$100 million authorization authority included in the Mitchell initiative for fiscal years 1980 and 1981 would, therefore, probably provide an appropriate underwriting for U.S. participation in the second replenishment.

Relations with Africa have assumed greater significance, both economically, strategically, and politically. I believe that the significance of these interests will only grow as time passes. A brief cost-benefit analysis will show that the benefits received by the United States far exceeds the contribution of \$150 million, mainly because African countries serve the commercial interests of the United States.

For example, trade with African countries in the first half of 1975 increased at a much more rapid pace than trade with the rest of the world. During this time period, the African Continent supplied 24.5 percent of U.S. coffee imports, 56.7 percent of U.S. cocoa imports, 29.2 percent of U.S. manganese and ferromanganese imports, 35.8 percent of U.S.

platinum imports, and 37.1 percent of U.S. gem diamond imports.

When we consider the natural gas shortage problem we are presently trying to solve, and the not too far gone energy crisis caused by the Arab oil embargo, it becomes significant when we realize that Africa's energy resources are among the most plentiful of the world. The full extent of Africa's petroleum and natural gas resources have yet to be assessed. Currently, petroleum accounts for 72 percent of U.S. imports from Africa which is 33.5 percent of total U.S. crude petroleum imports. Nigeria is the seventh largest producer of crude oil in the world and the second largest supplier of crude oil to the United States.

Another benefit to the U.S. contribution of \$150 million in the African Development Fund is that by helping to build a good basic infrastructure we will enhance our investment possibilities. We cannot search for mineral deposits, which we need as a highly industrialized nation, or produce and deliver goods without roads and a communications

Clearly, it will be in the best interests of the United States to provide a contribution of \$150 million to the African Development Fund. This implementation would permit a fully justified catchup contribution to obtain an appropriate U.S. role in the Fund during fiscal year 1979 and put the United States in a forthcoming position for the upcoming negotiations over a second replenishment.

This U.S. contribution will show the African countries that we are concerned about their development as they are attempting to join the mainstream of global economic activity and better their standards of living. I urge all of my fellow colleagues to lend their full support for this legislation.

I include the following:

AFRICAN DEVELOPMENT FUND-STATEMENT OF SUBSCRIPTIONS, DEC. 31, 1976

[In U.S. dollars]

Mr. STANTON. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise to speak in support of this measure as a whole but in opposition to title V. This group of multilateral development institutions which are refunded in this bill gathered support for many years from Members on both sides of the aisle. This administration, as the two which preceded it, recognizes the importance of the multilateral approaches to development assistance, and the advantages that approach offers over traditional bilateral aid.

Our action here today follows years of behind-the-scenes negotiations between donor countries to fix their respective donor shares. It follows the assurances from this administration and previous ones that these funds are required and that the U.S. share is in line with those of other countries. Our action follows recommendations from the National Advisory Council on International Monetary and Financial Policies, and the Department of the Treasury. This is true with each institution covered in this legislation—with one very notable exception: The African Development Fund.

Despite the unprecedented levels of funding authorized in this bill, there are many important reasons why this measure should be approved. In each case, the amounts we are authorizing will be appropriated over a 3- or 4-year period. In each case these organizations have shown that they have operated effectively, and have made unquestioned contributions to the development process. In each case, an enlargement of their financial base is required if they are to continue their important tasks. Again the foregoing is true with some respect to each of these multilateral institutions—with that same notable exception: The African Development Fund.

As my colleagues have no doubt deduced, this addition of funds for the African Development Fund puts me in a very difficult position with respect to this legislation. I have always strongly supported the concept of multilateral development finance and have always urged my colleagues to join me in voting funds for these institutions but my support was always based on the knowledge that there was a real need for the funds; that other governments had agreed to contribute their proper share; and that the contribution had the full and unequivocal support of the administration. The African Fund measure has none of these.

No Member knows better that I that a vote in favor of any foreign aid type of legislation is never easy to justify back home. There are very few votes to be gained in supporting this type of legislation, more than likely you lose some. But yet we have always believed strongly enough in the principle of helping less fortunate countries to take those risks. In the past, we could always count on the fact that the proposal had been carefully considered, that the shares given by donor countries had been fairly apportioned, and that the multilateral bank or fund was in need of the funds.

In this case, we obviously cannot assume these conclusions to be correct. By now everyone in the Chamber realizes that the title which contains the funding proposal for the African Development Fund originated not in the Ivory Coast or even in the White House. It was purely the product of a few members of our committee. The real question becomes, how will we justify this contribution. We clearly cannot justify it. The undisputable facts in this case show that a contribution to the Fund is both unwarranted and unsolicited.

The incredible manner in which this contribution was conceived and steam-rolled through our committee—while all the opposition was on the floor—brings into question the future of all these multilateral lending institutions, and the ability of any Member to support them.

I understand the interest of those who feel the need to make a gesture toward Africa. But this House has always defended the principle of not encumbering economic organizations with political amendments. This is a principle that we applied with equal vigor when Dr. Kissinger used to try and stem political problems with economic solutions. The end result is invariably to endanger the independence and effectiveness of the international economic organization. These multilateral banks and funds are an important vehicle for bringing the developing world closer to a sustainable growth rate. But to throw money into the African Fund when they already have more than they can loan, and when there is no replenishment effort underway, is a very ineffective way to attack the really serious economic and political problems of Africa. More importantly, however, it threatens future support for the African Fund and other development institutions-support that may be well justified.

Proponents of this add-on for the African Development Fund justify their support for an authorization by stating that

Congress can always reassert its authority at the appropriations stage. While I am sure that my respected colleague Chairman Mahon appreciates and deserves the vote of confidence, I am somewhat stunned by the implications of the suggestion that authorizing committees should abandon their legislative responsibility and begin rubberstamping requests for money.

There is another problem with this approach, as well. We are really leading the countries of Africa down the garden path again—in effect, promising them \$150 million but fully intending to renege on that commitment if need be when we get to appropriating the money in fiscal year 1979. We are leaving ourselves wide open for charges of "promise without performance." It is an unfortunate fact that few foreign observers appreciate the subtleties of our complicated system, and many governments of Africa will feel betrayed when we appropriate less than they would authorize in this bill.

Mr. Chairman, for these reasons, I feel strongly that we must either vote for recommittal or reject title V.

Mr. GONZALEZ. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from New York (Mr. Badillo).

Mr. BADILLO. Mr. Chairman, I thank the chairman for this time.

I rise in support of this legislation because I believe that the multilateral lending institutions are the best vehicle that we in this country have to assure the development of all the countries throughout the world, and in order to insure that we have a stable world order in the future.

I want to say that although the dollar figure may appear large, the fact is that in real terms we are contributing less than other countries. The fact is that our contribution represents a smaller share of our gross national product than that of other donor countries and that our proportionate share is decreasing, as that of other nations increases. Mr. Chairman, I want to commend the committee for the excellent committee report which outlines this very clearly.

The most important part of this bill, however, is the section that was promoted by the distinguished chairman, the gentleman from Wisconsin (Mr. Reuss), the section that has to do with human rights. I want to commend the gentleman for having brought up the subject in this bill. As the gentleman says, we have a friendly disagreement this afternoon, but it is on an important issue.

The issue is how shall human rights be defined? We are now beginning to debate this because, in fact, there is no international definition that can be agreed upon. The distinguished gentleman who is chairman of the committee has proposed that we set up a standard through which we begin to seek to help countries other than those which engage in torture and violation of human rights, and I support that. In the committee, I sought to improve upon that definition. I want to thank the chairman for the fact that some of these amendments were accepted.

An amendment was accepted that provides that from now on we shall be getting information in semi-annual reports which will indicate exactly how the loans that are made by these institutions are utilized by the recipient countries, in order that we can insure that the loans are used to fulfill basic human needs.

Another amendment was included in the committee and has been accepted, and I thank the chairman for that, which will provide that one of the standards that shall be used to determine whether a country is willing to recognize human rights is the willingness of that country to allow international agencies to inspect the conditions in that country.

Mr. Chairman, I will be introducing another amendment. I hope that the committee will support it and I believe that the chairman of the committee has said that that gentleman will. That amendment will provide for the calling of an international conference in order to establish agreed-upon standards of what constitutes basic human needs so that we can enforce these standards on a multilateral basis.

The only area of disagreement is on the question of repealing existing law. The Harkin amendment, which was agreed upon by the last Congress, provides that our representatives to these institutions—the institutions that were involved in that legislation were the Inter-American Bank and the African Development Fund—be directed to vote against any nation which engages in a consistent pattern of violation of human rights, unless basic needs are being served.

We feel that if we are going to improve upon the definition of human rights, it is a mistake to repeal the existing language; that, while we support the language the gentleman from Wisconsin (Mr. Reuss) has developed and that the committee has approved, we feel that it would be regarded by the world at large as a step backward if we in Congress were now to repeal the existing language from previous legislation.

I will therefore be offering an amendment to include the Harkin amendment in all of the institutions that are covered by this bill.

Mr. TSONGAS. Mr. Chairman, will the gentleman yield?

Mr. BADILLO. I yield to the gentleman from Massachusetts.

Mr. TSONGAS. I just want to clarify one point for the record. The gentleman is not saying that aid to these various development lending institutions is conditional upon the outcome of the human rights bill? Is that correct?

Mr. BADILLO. I support it, I said that at the beginning, and I support the help to the lending institutions. But I think we have a responsibility to see to it that this aid is used by countries which are willing to respect internationally recogized human rights. Fortunately, this afternoon we have the responsibility to begin more precisely to define what we mean.

Mr. TSONGAS. I thank the gentleman.

Mr. STANTON. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from Ohio (Mr. Wylle).

Mr. WYLIE. Mr. Chairman, I wish to take issue with certain statements which are contained in the committee report to H.R. 5262 and which, I think, can well be misleading to Members of the House. On page 41, the report states:

The expenditure of funds authorized by this bill is contained in the President's budget, which has been designed to be non-inflationary. It should be noted that these funds were contained in President Ford's budget as

These statements simply are not true. On pages 77 and 78 of the appendix to 'he fiscal year 1978 budget, there is detailed proposed current expenditures, together with 3 and 4 years projected authorization for the International Bank, International Development Association, International Finance Corporation, Inter-American Development Bank, and Asian Development Bank, but there is absolutely no mention of a \$150 million increase in the U.S. contribution to the African Development Fund as proposed by title V in the committee amendment to this bill.

I think the reasons for this omission are obvious. Neither the Ford budget nor the Carter budget even contemplate adding an authorization for the African Development Fund to the bill. The new title V. \$150 million for African Development Fund, was not authorized in H.R. 5262 as originally introduced. I understand there will be an amendment offered a little later on which will strike out the \$150 million and use the language, "such funds as may be authorized."

I think that is a wise amendment, because the \$150 million figure snatched out of thin air and added as an amendment in the committee after hearings had been concluded on this bill. One can search the 411 pages of hearings and not find one word of testimony on the proposed \$150 million increase in the authorization of the African Development Fund.

The inflationary impact statement on page 41 of the committee report states:

Your committee estimates that enactment of this bill will have no adverse impact on prices in the national economy.

In my opinion, that statement also cannot be true.

On page 40 of the committee report, the Congressional Budget Office estimates the 5-year budget impact of the bill at \$2.1 billion. How can an additional \$2.1 billion of deficit financing, piled on top of our huge deficits, fail to have an adverse inflationary impact on our econ-

There is another matter upon which I wish to comment briefly, and that is the voting arrangement in the African Development Fund. In all the international financial institutions included in this bill, the vote of Members is, roughly, proportionate to their financial partici-

pation.

I refer to the statement of the gentleman from Ohio (Mr. STANTON), who made much of the fact, and the gentleman from Texas (Mr. Gonzalez), who made much of the fact, that our participation in the other funds have been negotiated downward, whereas in this case we are proposing, in effect, to increase our participation six fold.

We are one of the few countries which does not have any voting participation. The African Development Bank, membership in which is only available to African nations, hold 50 percent of the voting power of the African Development Fund. The Articles of the Fund vests 50 percent of its voting power in the African Development Bank. All other donors to the Fund, in the aggregate, have the other 50 percent of the voting power in the Fund. In effect, for them the voting power of the other donor countries is diluted by a factor of one-half of the proportionate financial participation. Moreover, a further provision of the articles of the Fund require 75 percent voting approval for all operational decisions.

The truth is that voting power of the donor countries is not of much real importance at all, frankly. Their bargaining power lies, primarily, in the right to approve or disapprove additional contributions to the Fund and over what period of time. If and when the relative amounts are determined, it should be done, it seems to me, by effective bargaining between the nations and should reflect the amount of participation in the

Fund of the donor nations.

I have an amendment, which I will offer a little later on, which will do that. I submit we should not vote for the \$150 million contribution, and I urge the Members to support the amendment which I will offer.

Mr. Chairman, one of the bad things about the title V amendment is that it would give away in advance our bargaining power at the international conference this fall on replenishment of Fund resources. It would give away now our bargaining power both with respect to the Fund and the other donor countries. We would be the only country committed in advance to an additional contribution in the fixed amount of \$150 million-six times our present commitment and more than the next three largest contributors combined. As far as the law is concerned, there is no scheduled payment period. It all could be paid as soon as it could be appropriated after the authorization became law.

Commonsense tells us that when we are going to be entering into international negotiations on the second replenishment for the Fund this fall, it is foolish for us to give away our complete bargaining power in advance.

Mr. GONZALEZ. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from Massachusetts TSONGAS)

Mr. TSONGAS. Mr. Chairman, let me just address myself to one small section of this debate, and that is the debate regarding the African Development Fund. The problem is that when we speak about these things we tend to lop them all together without really distinguishing between the American commitment to the various sections of the world.

Historically, the United States has put most of its development moneys into Latin America, and that is, as the Members will see, illustrated by the chart. What I attempted to do on this chart was to show the difference between the American commitment in Africa, Asia and Latin America. Latin America is on the bottom. The red indicates the American share to the Inter-American Development Bank, \$6.852 billion.

The middle chart is the Asian Development Bank and the Asian Development Fund put together. The American share is \$728 million. An interesting contrast is our commitment to Africa.

Our current contribution to the combined African Development Bank and African Development Fund, which is hardly discernible on the chart, is the red, barely discernible to the left of the green, which is \$15 million. Even if we add \$150 million, which is a part of the bill, we are still talking about an American contribution of \$165 million, which is one-fifth of what we are committing to Asia and barely one-fortieth of what we are commiting to Latin America.

So, Mr. Chairman, what we are trying to do in the bill is to somehow add some balance to the historic imbalance relative to what the United States has done

in regard to Africa.

Washington, D.C.

In terms of the administration's position. I wish to insert in the RECORD at this point a letter dated April 2, 1977. to the chairman of the full committee. That letter was sent to the committee chairman by the President of the United States, and it expresses the administration's support of the bill as it came out of committee with the language relative to the African Development Fund.

Mr. Chairman, the letter is as follows:

THE WHITE HOUSE, Washington, D.C., April 2, 1977. Hon. HENRY S. REUSS House of Representatives.

DEAR MR. CHAIRMAN: I want to commend you and your Committee for the full support and priority you have given to legislation authorizing increased U.S. participation in the international financial institutions. This legislation is an integral part of my Administration's foreign policy program. It is essential that the reasons why this bill is related to our national interest be clearly and widely understood among the House membership, and indeed the American people, as the bill comes to the floor.

As I said in my foreign assistance message

of March 17, the future of the United States will be affected by the ability of the developing nations to overcome poverty and achieve steady economic and social development. All of our interests-humanitarian, social, economic and political-are bound up with the successful development of these countries.

The international development banks, as major sources of economic assistance to the world's poorer nations, are intimately involved in this effort. They encourage developing countries to pursue sound domestic policies. They remove bilateral political considerations from development efforts. And, in the multilateral institutions, aid funds are pooled: every \$1 of U.S. assistance through the banks is associated with \$3 from other donors. Our share of the funding of these institutions has decreased over the years, reflecting the success of U.S. efforts to reduce our share as other countries have become increasingly able to bear a larger part of the burden.

I applaud your Committee's action in adding a human rights title to this legislation. In the development banks, we want to implement this country's commitment to promoting human rights without adopting an overly rigid approach which would subvert the integrity and effectiveness of the institutions in promoting economic and social development in the poorer countries. I believe that this legislation, strengthened by the expression of concern for human rights outlined in Title IV, deserves the full support of Congress.

I hope that H.R. 5262 will be passed by the House of Representatives as soon as possible.

Sincerely,

JIMMY CARTER.

Mr. MITCHELL of Maryland. Mr. Chairman, will the gentleman yield?

Mr. TSONGAS. I yield to the gentleman from Maryland.

Mr. MITCHELL of Maryland. Mr. Chairman, I thank the gentleman for

vielding.

I only wish to take a few seconds and clarify how the figure of \$150 million was arrived at. I would not want the House to assume that this was some figure that was snatched from the air. There is a process by which we arrived at it, and the process is very simple

The first step is the initial contribution to the Fund. The second step is a general fund increase of one-half of the initial contribution of the nation to the Fund. The third step is a 200-percent increase of the initial contribution. That is the process by which we arrived at \$150,000,000, using a process which every other donor nation has used.

Mr. TSONGAS. Mr. Chairman, I thank

the gentleman.

Mr. GONZALEZ. Mr. Chairman, I yield 2 minutes to the gentleman from

Tennessee (Mr. ALLEN).

Mr. ALLEN. Mr. Chairman, I would remind the chairman of the committee, the gentleman from Wisconsin (Mr. REUSS), that there are many who consider this bill as just another foreign giveaway deal. Will the gentleman tell us what the record of these financial institutions is insofar as the collection of loans and bad debts are concerned?

Will the gentleman also tell us what percentage is termed as bad debts, what percentage has been repaid, and what percentage is considered still solvent?

Mr. REUSS. Mr. Chairman, will the gentleman yield?

Mr. ALLEN. I yield to the chairman of the committee.

Mr. REUSS. Mr. Chairman, I will be

glad to answer the gentleman from Tennessee. The institution which has had the

largest percentage of debts and obligations coming due is the International Finance Corporation. Its record is simply excellent. It has made a profit on its operations. The amount of slow accounts or uncollected accounts in that Corporation has been less than 1 percent. Its record would be a credit to any private operation.

It is also true that at the so-called soft windows the IDA, the Asian Development Fund, and the soft window account of the Inter-American Development Bank, the obligations are largely 50-year loans. Because of that we do not have a record as yet, and those loans are made to the poorest countries. But compared to our own bilateral aid, the record of these multilateral lending agencies is a very solid and supportive one.

Mr. ALLEN. So, Mr. Chairman, the gentleman would not say that our contributions or our subscriptions to stock in these international banks can in any way be regarded as a giveaway program of foreign aid; is that true?

Mr. REUSS. Just the opposite. They are a method, and a very successful one. of getting other donors including the rich countries of OPEC, to pony up with their fair share of the world's obligations to the needy.

Thus it is that in the World Bank we originally had 41 percent of the financial responsibility, and we have now reduced that to 19 percent, to less than half. In IDA our 43 percent responsibility has been reduced to 31 percent. That is mov-

ing in the right direction.

Mr. ALLEN. And that is because of the increased participation of other nations around the world in these funds?

Mr. REUSS. Precisely.

Mr. STANTON. Mr. Chairman, I yield myself such time as I may consume.

Mr. WYLIE, Mr. Chairman, will the gentleman yield?

Mr. STANTON. I yield to the gentleman from Ohio.

Mr. WYLIE. Mr. Chairman, I thank the gentleman for yielding.

I would like to respond to the colloquy that was carried on a little while ago between the gentleman from Tennessee (Mr. ALLEN) and the gentleman from Wisconsin (Mr. Reuss).

I think the statement made by the distinguished chairman of the committee is generally true except for the African Development Fund. In that fund we are being asked to contribute \$150 million, and we only have $2\frac{1}{4}$ percent of the voting strength. And that vote is not even cast by the United States; that is cast by the United Kingdom.

It is a very, very concessional soft loan arrangement whereby the fund loans money 50 years, with 10 years being waived and with no interest. That comes pretty close to being direct foreign aid, it seems to me, especially in view of the fact that the United States does not really have anything to say about such loans.

Mr. REUSS. Mr. Chairman, will the gentleman yield?

Mr. STANTON. I will be glad to yield to the gentleman from Wisconsin.

Mr. REUSS. Mr. Chairman, I think the gentleman from Ohio (Mr. WYLIE) has made an accurate and a good point. It is true, for example, that our voting power reflecting our subscription in the African Development Fund is relatively tiny.

We have put in so far \$15 million. Little Canada has put in \$75 million, five times as much and, hence, holds a proportionately larger voting power. Many very small countries, the Netherlands, Norway, Sweden, actually have put in much more than we.

So that while the gentleman from Ohio is quite right that the African Development Bank is a concessionary institution. our exposure has been very small. There will shortly be offered an amendment which I think will take care of the \$150 million.

Mr. WYLIE. The gentleman has mentioned the fact that little Canada has pledged \$74 million and has put in \$41.7 million and that we have only paid in \$15 million of our \$25 million that we have pledged, leaving the impression that we have not been very generous so far as the African nations are concerned. In reply, Mr. Chairman, I would submit that last year the international institutions mentioned in this bill loaned in the neighborhood of \$1.3 billion to African nations. Nine hundred and one million dollars came from the World Bank; \$379 million came from the International Development Association with U.S. participation. And I supported the increase in U.S. participation in IDA because I have seen some of the good work of the International Development Association. Twentynine million dollars came from the International Finance Corporation.

Up to October 1974 the United States shipped to the Sahel region where the drought was particularly severe, 439,000 metric tons of grain more than 6 times

as much as little Canada.

I might add that the Honorable Andrew Young, who is now our Ambassador to the U.N., complimented the United States for its \$50 million in contributions for emergency food aid.

So I do not want the impression left that the United States is doing less for the African nations than little Canada.

Mr. REUSS. If the gentleman from Ohio will yield still further, I think the gentleman from Ohio (Mr. WYLIE) makes a good point. And I recall the gentleman from Ohio (Mr. WYLIE) joined in the commendation of Andrew Young and others for these humanitarian things.

Mr. WYLIE. If the gentleman will yield further, the real point I want to make here, and I will do so as briefly as I can, is that I do not object to the World Bank, the International Development Association, and some of these funds, where we do have some say as to where the money is spent, but I do object to arrangements where we contribute money and have no effective voting power as to what happens to the money that is loaned from those funds.

Mr. TSONGAS. Mr. Chairman, if the gentleman will yield briefly, I would like to associate myself in the sense that I also agree that when the United States enters into negotiations in the latter part of this year that the U.S. participation and voting power should be one of the elements that we negotiate.

Mr. WYLIE. I have an amendment that will do that, and I hope the gentleman will find it possible to support it.

Mr. LONG of Maryland. Mr. Chairman, I wish to thank Chairman Gonzalez, Chairman Reuss, and Representative Paul Tsongas for inserting in this bill the language on light capital technology as a major emphasis of the multilateral banks' development strategies. It is through light capital technologies that we can stretch the available foreign aid capital to help all, rather than some, of

the world's poor.

It is my desire to see that an increasing proportion of the projects carried out by the international lending institutions go directly, rather than indirectly, to help the poor. One observer of foreign aid programs, Prof. Roy Prosterman of the University of Washington School of Law, has graded 49 recent World Bank "third window" loans and IDA credits and was given these loans a "D+," compared to grades for AID projects for fiscal years 1977, and 1978 of "C+." For the purpose of generating discussion and without endorsing this particular observer's criteria for grading or his overall judgments, I should like to insert Professor Prosterman's comments on these recent projects by one of the international lending institutions we are considering today.

The extent to which the international lending institutions orient their aid toward helping the really poor in the developing world is a principal standard that I shall use, and that I hope others will use, in judging the effectiveness of these

institutions.

FURTHER GRADING OF BUREAUCRATIC COMPLI-ANCE: A BRIEF NOTE ON THE WORLD BANK AND IDA, FISCAL YEAR 1977

As an extension of our grading of the Agency for International Development for compliance with its legislative instruction (see our March 11, 1976 and March 3, 1977 memos entitled "Grading Bureaucratic Compliance"), we have decided to apply similar standards to World Bank "Third Window" loans and IDA credits. For readers not familiar with our methods, we have "graded" each project, as described in its press release, on a standard academic "4 point" scale. To Illustrate the extremes, a "4.0" project should have a direct and measurable effect on the lives of poor people in the recipient country, at a per family cost (\$1,000-\$1,500) that makes replicability possible. By contrast, a "0.0" project would be of the worst "trickle down" sort, unlikely to benefit directly any poor people, and representing, in our judgment, a waste of scarce concessional funds.

An analysis of 49 projects released since June 1976 shows, that on a dollar-weighted basis, the Third Window/IDA "grade point average" is 1.5, or "D+". By comparison, AID's FY 1977 and 1978 grade was a 2.4, or "C+". Specific grades can be found in the Appendix. We stress that we are grading intent, and not execution of the projects.

The principal reasons for poor Third Window/IDA performance appears to be the presence of a number of expensive, classically "trickle down" infrastructure projects: India Thermal Power (\$150 million); Bangladesh Industrial Development (\$50 million); Sudan Domestic Aviation (\$29 million); Haiti Diesel Engine Power (\$16 million); Burma Port Rehabilitation (\$10 million); and Niger Telecommunications (\$5.2 million). All of these projects deserved, and were given grades of 0.0, or "F".

With these projects removed, the Third Window/IDA "GPA" climbed to 2.3, approaching that of AID. The principal problem with the remaining projects is excessive per-family costs, and the extreme example is "Afghanistan Livestock Production", at \$15,000 per family. The ten projects graded 4.0 or "A", represent truly excellent development planning but these projects represent only \$65 million of spending, whereas the "F" graded infrastructure claimed \$260 million.

Mr. MOORHEAD of Pennsylvania. Mr. Chairman, as a longtime member of the Subcommittee on International Development Institutions and Finance, I rise in strong support of H.R. 5262, a bill to provide for the increased participation of the United States in lending activities of the international development institutions

As we grow older we note with much more urgency the passage of time. Yet it does not seem to me that it was too many years ago that I took the well to urge my colleagues to support legislation authorizing the United States to join the International Development Association, one of the units covered by today's bill.

In fact, it was almost 17 years ago that I made that speech.

I consider it a tribute to our national character and to the Congress that the matters before us today do not pivot around the question of should we join other nations in helping the less developed countries of the world? But instead, what is the best manner to participate, consistent with our national dedication to the cause of human rights

as most recently and forcefully expressed by President Carter?

Let me make a general comment on the activities of the international development institutions and the U.S. role vis-a-vis those units.

The United States has no choice but to face the issue of its relations with the cluster of poorer countries. We should treat their problems sympathetically. But some of their demands are more costly to us-even dangerous-than others. These include such things as price-propping commodity stabilization agreements and debt moratoria. The most sensible way to help the poor nations is by approving a modest increase in the flow of financial resources, primarily through the international financial institutions led by the World Bank. This bill would do that. If the United States does its part in this respect, we will be in a much stronger position to head off the more radical and harmful demands the "third world" countries are making, some of which would have a direct inflationary impact at home

And I believe also that we will be in a much more favorable position to counter the aggressive diplomatic, economic and even military forays, into the poorer countries, by various Communist-bloc nations of the world.

We will hear a great deal today about the Badillo-Harkin amendment on human rights.

I believe that the subcommittee and the full Banking Committee adequately dealt with the issues raised by possible loans to countries which violate the human rights of their citizens.

In fact, the human rights language in title VI of our bill is superior to the language that will be proposed today. The human rights language of the bill before you today is the language supported by the Carter administration. And the Carter administration feels the committee language ably arms it in its campaign to insure the rights of citizens everywhere.

In closing, let me say the administration's human rights proposal, as contained in our bill, requires positive action by U.S. representatives; it requires the United States to continually work to advance the cause of human rights. The Harkin amendment just requires a "no" vote and nothing more; it is a negative approach, not one that requires our representative to continually work to channel assistance to countries which respect human rights.

Title VI, of H.R. 5262, permits consideration of human needs as well as human rights; this is also the case with the human rights amendment on security assistance legislation. The Harkin amendment does not permit any other considerations, such as health, education, et cetera.

The Harkin amendment actually gives the U.S. Government the easy way out. It can vote "no" and be done with it. Under the Harkin amendment, the United States would have no further responsibility beyond voting no; but the administration language in title VI would require that we work to advance human rights, and report to the House and Senate every 6 months on its efforts.

I urge the House to vote for H.R. 5262 and to reject the Harkin-Badillo amend-

ment to title VI.

Mr. CONTE. Mr. Chairman, I rise in support of this bill to provide for increased participation by the United States in the International Bank for Reconstruction and Development, the International Development Association, the International Finance Corporation, the Asian Development Bank, and the Asian Development Fund.

These institutions promote economic progress in developing countries, while fostering cooperation and partnership with the developed nations. As an advocate of multilateral aid and as the leading economic power in the world, the United States has been the largest contributor to most of these institutions. The bill before us continues that tradition, but provides for greater burden sharing by the other developed countries and in particular by countries which have benefited from petroleum revenues over the past several years.

In the last few years, member countries have negotiated with each other to fund the pending replenishment. These additional funds are necessary to cover increased borrowing by the poor nations of the world in the face of oil price hikes since 1973 and the resulting world in-

flation.

Mr. Chairman, I would briefly like to outline the work of some of the institutions covered in this bill.

The World Bank makes loans to developing countries for investments in such things as transportation and electric power capacity, and is now expanding its scope to develop other resources such as increased agricultural and technical assistance. The World Bank is considered an indispensable source of capital for the developing countries, particularly those often referred to as middle income, with per capita income above \$300 per year.

It is important to note that of the \$1.6 billion share of World Bank replenishment funds to be authorized in this bill, only 10 percent is required to be paid in or obligated. The remaining 90 percent is callable capital, which guarantees the holders of World Bank triple-A rated bonds. This callable capital would only be used in the unlikely event of major defaults on World Bank lending.

The remoteness of this happening is indicated by the fact that the World Bank has a perfect repayment recordthere has never been a default on a World Bank loan. This is largely due to the stringent lending criteria used in evaluating loan projects and the professionalism of the staff who make loan

evaluation.

The International Development Association, the concessional lending affiliate of the World Bank, exercised the same professionalism and technical skills as the World Bank itself in its lending policies. The funds provided by IDA go to some of the poorest people in the world-

some 700 million rural people, hungry people who go to bed at night knowing that in the morning they will still be without food, without medication, and without electricity. Last year, 90 percent of IDA credits went to countries with per capita incomes of less than \$200. Through 1976, IDA lending benefited many millions of those rural poor, nearly doubling the income of project participants and substantially increasing food production.

IDA has been effective in increasing the standard of living of the very poorest people in the world, making them active participants in the world's economy, and cutting into the local food deficit which can no longer be covered solely by transfers from North America.

Mr. Chairman, I will not take the time of the House to outline the remaining provisions of this bill. I strongly support this authorization of participation by the United States in the Asian Bank and Fund, and the International Finance Corporation.

The Administration is working with the other donor countries to these institutions to provide for increased cost sharing, the improvement of human rights and lending priorities policies, and the increase of congressional access to records of these banks for better oversight. These banks are integral portions of our foreign assistance program, and portions which merit our increased and continued support.

I strongly urge my colleagues to ap-

prove this measure.

Mr. RANGEL. Mr. Chairman, I rise in enthusiastic support of the bill H.R. 5262. If the United States is to demonstrate to the world our commitment to assisting those who are less fortunate, then the Congress must pass this legislation.

The role that the United States has played in this field so far has lacked direction. If we are to continue to be a major participant in the support of international lending institutions, we must adopt a more direct approach that reflects our active interest in developing countries. The United States has the potential to set standards in the world for concerned involvement in the needs of growing nations. By demonstrating our interest in this area we will also be perpetuating the cause of human rights which such involvement implies.

The needs of developing nations are great and varied. If the United States is to respond effectively to those needs we must concern ourselves with the specific requirements of those nations. This bill will enable us not only to provide more positive forms of assistance but also to demonstrate our awareness of and sensitivity to particular problems of individual nations. It will also follow the precedents set by President Carter in establishing a more positive and progressive relationship with African nations, I urge my colleagues to vote in support of this legislation.

Mr. FRENZEL. Mr. Chairman, I shall support H.R. 5262, now that the extra, unrequested amount for the African Bank is no longer a part of the bill.

I believe that the kind of multilateral assistance which is generated by the International Development Banks is the best kind of foreign assistance. It can be monitored, and supervised, without the taint of colonialism. It is collective assistance for the least fortunate of the world's peoples.

This bill authorizes contributions negotiated over a long period of time by the Ford administration, and ratified by the Carter administration. It is a bipartisan proposal made in the best interest of both our country and the rest of the world. I hope it will receive bi-

partisan support.

Mr. SIKES. Mr. Chairman, I oppose the bill, H.R. 5262, which would provide additional U.S. funds to the World Bank Group.

The United States has participated freely and generously in international lending institutions in past years. Unfortunately, there is no end to the requests to the United States for more funds for such institutions. Granted. they have accomplished good in the past. It is also true that our generosity has been taken advantage of by other nations which expect more from us than they are willing to give in return. We must accept the sad fact that we are enormously in debt, that our budget is far out of balance and there are no real prospects for a change in this situation in the years immediately ahead. We are spending beyond our means. We should look at every new expenditure with care and with caution.

I like to see the United States help our friends, but we have done this time and again. The shoe is never on the other foot. They do not help us. I do not feel that the time is appropriate to pump more American dollars into the international lending institutions. We should not overlook the fact that the World Bank Group is providing funds to many nations, some of whom are not our friends and the Congress has nothing

whatever to say about it.

All too frequently low-interest loans are made to nations which support resolutions hostile to free world objectives and to American hopes for world peace. Loans are made to nations which refuse to consider a code of international conduct which would benefit efforts made to world peace. Loans are made to countries such as Vietnam, which even now is demanding reparations from us because we sought to preserve the freedom of some of the people of South Asia. Vietnam continues to mislead the American people about the fate of our missing-in-action and callously offers, in effect, to sell this information to us. Billions have been funneled to Vietnam by various organizations which use the American taxpayers' money for this purpose.

If aid is to be granted, let it be done directly after due consideration of the request by the Congress. Let us not grant assistance through a third party to see our money being used against us.

Mr. ANNUNZIO. Mr. Chairman, I rise today in support of H.R. 5262, the international financial institutions appropriations bill. In light of the recent emphasis which the President has placed on the issue of human rights on an international basis, this Congress now has an opportunity to incorporate this high sounding philosophy into practical results.

The legislation provides authorization to appropriate additional funds to the International Bank for Reconstruction and Development and five other international funds and associations whose domain ranges from Africa to the Far East. The real importance of the legislation, however, is that it compels the U.S. Government to pursue a policy of advancing the cause of human rights in all its dealings with the International Bank for Reconstruction and Development and the other five international funding agencies.

The bill specifies that it shall be the responsibility of this Government to seek to channel development assistance to projects which address the basic human needs of the people in the developing countries. The Secretary of State and the Secretary of the Treasury will be required to issue a semiannual report to the Congress on the progress being made on the advancement of human rights and addressing basic human needs with U.S. investments.

As this body is aware, this Nation has historically been a strong supporter for the international development institutions since their inception. These institutions serve a vital function in assisting basic economic and social progress within a developing country.

With the passage of this legislation, the Congress will have placed a very high priority on beneficial relations between the United States and the peoples of developing countries. Since the Congress has the responsibility of monitoring the effectiveness of this country's foreign aid programs, it also has the responsibility of insuring the future of these programs by supporting the international development institutions.

Consideration of human rights is an important goal for this Nation to aspire to, but consideration of human needs is an even more urgent target. Freedom from political injustice is important to the citizens of any nation, but freedom from hunger, disease, and poverty can destroy the potential of an individual even more.

We in this country are only beginning to realize the plight of others in this world and the conditions to which they are all subjected to daily. For hundreds of millions of people in dozens of countries around the world, life is at the very margin of subsistence. The statistics are alarming and morally discomforting to any concerned individual, whether he is a voter or a legislator.

In the poorest of nations, more than 70 percent of the population subsist on the most primitive forms of agriculture, and fewer than 15 percent of these people are capable of reading or writing. The survival rates are shocking. Between 150 and 200 of every 1,000 children born in these countries will die in infancy. Physicians are practically nonexistent. This is hard for us to understand in a land of door-to-door medical

specialists. In Upper Volta in Africa, there is an average of 1 doctor for every 100,000 residents.

In our Nation where 9 percent unemployment is considered unacceptable, the productivity of labor in these countries is so low that unemployment rate averages between 20 and 30 percent.

Yesterday's Washington Post newspaper carried an article which graphically described the extremes of existence of people in absolute poverty. The article was titled "Life in Jakarta: Hovels, Upward Striving, Mercedes-Benz" was written by Washington Post foreign correspondent Lewis M. Simons, and it offered a shocking story of one family's life on the streets of one of Indonesia's largest cities.

According to the article:

Musa Syed, his wife and their two children live in a bamboo box on a narrow embankment between a railroad yard and a storm canal. The box is tall enough for their children, who are 18 months and 5 years old to stand; the adults must stoop. The Syeds have lived in this box and dozens of others like it since they came to Jakarta from their hometown in western Sumatra 15 years ago. More than 265,000 people, 5 percent of the capital's population live this way.

Nowhere else in Southeast Asia do so many people live in such obviously miserable conditions. The nearest cities in which comparable squalor can be found are Calcutta, and Dacca, the capital of Bangledesh.

The article goes on to state that every month the police will come by and knock over the box in which the Syeds live and tell them to leave the city. The family waits for the commotion to end and once again they set up their box.

The section of the article which hit me the most was the reporter's question to the family when he asked the father, at the age of 35, what did he hope for in life. The reporter asked him if he ever thought he would have a regular job and live in a proper house in a village. After staring wide eyed for a moment at the reporter, both he and his neighbors who had gathered for the interview burst into laughter. "Who can think of such things?" he finally replied with sympathetic forgiveness for the silly question by the stranger. "I hope that the police will leave us alone, to have more children, to live in peace," he told the reporter.

According to statistics from the National Research Ministry in Jakarta, nearly half of the capital's 5.3 million residents earn less than \$48 a year.

Obviously the people of a city like Jakarta would have little in common in a discussion on human rights with a people who would spend \$48 on a pet, a hobby, or an automobile in less than a minute.

If this body is really concerned about human rights for the individual, we will admit our responsibility to recognize basic human needs with this legislation before us today. The appropriations contained within will achieve real results through effective international development organizations. We will also achieve real results in the furthering of an awareness for basic human rights and dignity.

Human rights is more than a political issue for drawing room discussions. Human rights is a recognition of our common predicament as well as our common dignity. If the fundamental catalyst for human growth is denied—freedom—whether because of communism, political prosecution, or starvation and disease, then there is no human rights. Freedom from prosecution is a human right, but freedom from hunger and misery is the very basis of all human needs. Let not this body ever forget the true value of the individual, nor our ordained responsibility to him.

Mr. WYLIE. Mr. Chairman, I have no

further requests for time.

Mr. GONZALEZ. Mr. Chairman, I yield back the remainder of my time,

'The CHAIRMAN. Pursuant to the rule, the Clerk will now read the bill by title. The Clerk read as follows:

H.R. 5262

Be it encted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—INTERNATIONAL BANK FOR RE-CONSTRUCTION AND DEVELOPMENT

SEC. 101. The Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is further amended by adding at the end thereof the following new section:

"Sec. 27. (a) The United States Governor of the Bank is authorized (1) to vote for an increase of seventy thousand shares in the authorized capital stock of the Bank and (2) if such increase becomes effective, to subscribe on behalf of the United States to thirteen thousand and five additional shares of the capital stock of the Bank: Provided, however, That any subscription to additional shares shall be made only after the amount required for such subscription has been appropriated.

"(b) In order to pay for the increase in the United States subscription to the Bank provided for in this section there is hereby authorized to be appropriated, without fiscal year limitation, \$1,568,856,318 for payment by the Secretary of the Treasury.".

Mr. GONZALEZ (during the reading). Mr. Chairman, I ask unanimous consent that title I be considered as read, printed in the Record, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from

Texas?

There was no objection.

The CHAIRMAN. Are there amendments to title I? If not, the Clerk will read.

The Clerk read as follows:
TITLE II—INTERNATIONAL FINANCE
CORPORATION

SEC. 201. The International Finance Corporation Act (22 U.S.C. 282 et seq.) is further amended by adding at the end thereof the following new section:

"Sec. 11. (a) The United States Governor of the Corporation is authorized (1) to vote for an increase of five hundred and forty thousand shares in the authorized capital stock of the Corporation, and (2) if such increase becomes effective, to subscribe on behalf of the United States to one hundred and eleven thousand four hundred and ninety-three additional shares of the capital stock of the Corporation: Provided, however, That any commitment to make payment for such additional subscriptions shall be made subject to obtaining the necessary appropriations.

"(b) In order to pay for the increase in the United States subscription to the Corporation provided for in this section, there authorized to be appropriated, without fiscal year limitation, \$111,493,000 for payment by the Secretary of the Treasury.".

Mr. GONZALEZ (during the reading). Mr. Chairman, I ask unanimous consent that title II be considered as read, printed in the RECORD, and open to

amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from

Texas?

There was no objection.

The CHAIRMAN. Are there amend-ments to title II? If not, the Clerk will read.

The Clerk read as follows:

TITLE III—INTERNATIONAL DEVELOP-MENT ASSOCIATION

SEC. 301. The International Development Association Act, as amended (22 U.S.C. 284 et seq.), is further amended by adding at the end thereof the following new section:
"SEC. 16. (a) The United States Govern-

ment is hereby authorized to agree on behalf of the United States to pay to the Associa-tion \$2,400,000,000 as the United States contribution to the fifth replenishment of Resources of the Association: Provided, however, That any commitment to make such contributions shall be made subject to obtaining the necessary appropriations.

"(b) In order to pay for the United States contribution provided for in this section, there is hereby authorized to be appro-priated, without fiscal year limitation, \$2,-400,000,000 for payment by the Secretary of the Treasury.".

Mr. GONZALEZ (during the reading). Mr. Chairman, I ask unanimous consent that title III be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

The CHAIRMAN. Are there amendments to title III? If not, the Clerk will read.

The Clerk read as follows:

TITLE IV-ASIAN DEVELOPMENT BANK AND ASIAN DEVELOPMENT FUND

SEC. 401. That the Asian Development Bank Act, as amended (22 U.S.C. 285-285r), is further amended by adding at the end thereof

the following new sections:

'SEC. 22. (a) The United States Governor of the Bank is authorized to subscribe on behalf of the United States to sixty-seven thousand and five hundred additional shares of the capital stock of the Bank: Provided, however, That any subscription to additional shares shall be made only after the amount required for such subscription has been appropriated.

"(b) In order to pay for the increase in the United States subscription to the Bank provided for in this section, there is hereby authorized to be appropriated without fiscal year limitation \$814,286,250 for payment by

the Secretary of the Treasury.

"SEC. 23. (a) The United States Governor of the Bank is hereby authorized to contribute on behalf of the United States \$180,-000,000 to the Asian Development Fund, a special fund of the Bank: Provided, however, That any commitment to make such contribution shall be made subject to obtaining the necessary appropriations.

"(b) In order to pay for the United States contribution to the Asian Development Fund provided for it this section, there is hereby

authorized to be appropriated without fiscal year limitation \$180,000,000 for payment by the Secretary of the Treasury."

Mr. GONZALEZ (during the reading). Mr. Chairman, I ask unanimous consent that title IV be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from

Texas?

There was no objection.

COMMITTEE AMENDMENTS

The CHAIRMAN. The Clerk will read the first committee amendment.

The Clerk read as follows:

Committee amendment: Page 5, immediately after line 5, insert the following new title:

TITLE V-AFRICAN DEVELOPMENT FUND

SEC. 501. Section 206(a) of the African Development Fund Act (22 U.S.C. 290g-4(a)) is amended by striking out "\$25,000,-000" and inserting in lieu thereof "\$175,000,-000" and by striking out "in three annual installments of \$9,000,000, \$8,000,000, and \$8,000,000".

AMENDMENT OFFERED BY MR. TSONGAS TO THE COMMITTEE AMENDMENT

Mr. TSONGAS. Mr. Chairman, I offer an amendment to the committee amendment.

The Clerk read as follows:

Amendment offered by Mr. TSONGAS to the committee amendment: Strike out all after "section 501" and insert "section 206 of the African Development Fund Act (22 U.S.C. 290g-4(a)) is further amended by adding the following at the end thereof: "In addition there is hereby authorized to appropriate such sums as may be necessary, consistent with, and after consultation with, the other nations involved."

Mr. TSONGAS. Mr. Chairman, what we have attempted to do with this amendment, after consultation with the various parties, is to have an amendment that accomplishes two purposes: First, it establishes the American commitment to the African Development Fund and the American commitment to be involved with the problems and concerns of Africa; and second, to have a situation rather than the language which was in the committee amendment which allows flexibility to the administration in terms of their negotiations both with other donor countries and with the African Development Fund and Bank in partic-

We hope to accomplish both things in one amendment and that it will be satisfactory to all parties.

Mr. STANTON. Mr. Chairman, I rise

in support of the amendment.

Mr. Chairman, earlier this week the distinguished gentleman from Illinois (Mr. Hype) and I sent a "dear colleague" letter to all of our colleagues asking them to support striking title V. We had added in the subcommittee a definite amount of \$150 million in title We explained in that letter to our colleagues that the principle we objected to most strongly in this title was that we were preceding without negotiations by either the President of the United States or the Assistant Secretary for Monetary Affairs, or in consultations with other

countries involved in the African Development fund. We strongly felt that the pinning down of this amount of money preceded and concluded any further negotiations that we could propose to have to accomplish what the gentleman from Massachusetts was talking about before. the possibility of participating in this fund, not in dollar amounts but in actual voting power.

So, after consultation with the author of this amendment, I want to make it clear that I do strongly support this amendment. I ask those who would have joined me in striking this amendment, not to do so now for the simple reason that we have knocked out from the authorization this definite amount of

money.

The argument may be given that this is an open-ended authorization, and I can simply and strongly state, for those who will read it, that the guiding language in this amendment is that it is to be "consistent with, and after consultation with, the other nations involved." This means for the purpose of legislative history the President of the United States after receiving the advice of the International Council on Monetary Affairs, can come back to this House. This is to be in no way open-ended authorization.

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. STANTON. I yield to the gentleman from Ohio (Mr. WYLIE).

Mr. WYLIE. Mr. Chairman, I would like to address a question to the author of the amendment. As the gentleman from Ohio stated, the amendment says "there is hereby authorized to be appropriated such sums as may be necessary," which is obviously open-ended language. Could our contribution go above \$150 million "after consultation with the other nations involved?"

Is it contemplated by the author of the amendment, the gentleman from Massachusetts (Mr. Tsongas), that if the President's emissary consults with the other nations involved and they agree on a percentage participation by the United States, that the President will not ask for any more than that amount and that Congress will not be asked to appropriate any more than the amount which is negotiated by the participants?

Mr. TSONGAS, Mr. Chairman, will the gentleman yield?

Mr. STANTON. I yield to the gentleman from Massachusetts.

Mr. TSONGAS, Mr. Chairman, I would make two points, if I understand the gentleman's question. First, whatever amounts would be given to the African Development Fund would have to be appropriated, so we do have that safety valve, whatever the negotiations dictate. Second, the gentleman's question asked whether the Congress would authorize more money than was negotiated. Was that it?

Mr. WYLIE. Mr. Chairman, if the gentleman will yield further, no, not quite. Sums are provided after consultation with other nations involved, and the consultation will take place through an emissary from the United States sent there by the President, of course. Is it the intention of this amendment that the President could not pledge more funds than could otherwise be appropriated?

Mr. STANTON. Mr. Chairman, my understanding is that it puts it on the same level as any other of our international lending institutions. It means they go and consult, and it goes before the International Council on Monetary Affairs, and they arrive at a figure, the same as any other organization, and it comes back to us. It does not stop Congress or any group in Congress from changing the amount. We could have raised the amount of money requested for IDA or any other fund. We can always do that, in answer to the gentleman.

Mr. TSONGAS. Mr. Chairman, will

the gentleman yield?

Mr. STANTON. I yield to the gentle-

man from Massachusetts.

Mr. TSONGAS. Mr. Chairman, I would say to the gentleman from Ohio, it is difficult enough to get in the amount of money the administration wants with-

out going above the request.

Mr. WYLIE. If the gentleman will vield. I understand what the gentleman is saying but I do not want the impression left here that the President can through an emissary make an agreement to pledge an amount in excess of \$150 million. We still do have to appropriate the money, but we do not want to be put in a bind by having someone say to us that the President of the United States has agreed on this amount, which the administration did in the case of IDA. We do not want them to come to the Congress and say that we have to appropriate a higher amount because a higher commitment was made by your President.

Mr. TSONGAS. Mr. Chairman, if the gentleman will yield, as an emissary, he would have to understand the difference between authorization and appropriation.

Mr. WYLIE. Mr. Chairman, I thank the gentleman for making the distinction.

Mr. LaFALCE, Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I do want to commend the gentleman from Maryland (Mr. Mitchell), who was the prime mover of the amendment in the subcommittee via the gentleman from Massachusetts (Mr. Tsongas), for being so reasonable in compromising. I do know the gentleman's goals and our goals are identical, which is greater participation in the African Development Fund by the United States, and greater concern for continental Africa by using the African Development Fund as an instrument of our foreign policy.

Mr. Chairman, I favor this amendment, along with the committee amendment, but I do have a concern. I do not want to bypass the authorization process. I do not want the executive branch to negotiate an amount specific and then have it immediately go to the Committee on Appropriations. I do not think the gentleman considers his amendment as bypassing the Authorization Subcommit-

tee. It would be necessary, would it not, for the executive branch of the administration to come to the subcommittee and to prove what they had negotiated was consistent with what other nations were doing within the African Development Fund; is that correct?

Mr. TSONGAS. Well, if the gentleman will yield, that is not correct. The situation is that we would have oversight responsibilities to make sure the negotiations were consistent with that; but the oversight in terms of actual dollars would be done through the appropria-

tion process.

Mr. LaFALCE. I am disturbed with that. I will still support the amendment and the committee amendment, with grave reservations, but I do not think it would be good policy in the future to offer amendments of this type and then rely on the oversight process. I do not want this to be a precedent; but in the spirit of compromise, I will concur with the amendment. However, it is, in effect, bypassing the Authorization Subcommittee, and I do not think this is good policy on our part and I trust this will not be used as a precedent for similar future action.

Mr. WYLIE. Mr. Chairman, I offer an amendment to the amendment offered by the gentleman from Massachusetts

(Mr. Tsongas).

The CHAIRMAN. The gentleman from Ohio is out of order, this being an amendment in the third degree. An amendment to the amendment offered by the gentleman from Massachusetts (Mr. Tsongas) to the committee amendment is out of order.

ment is out of order.

Mr. SIMON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, my concern is almost the opposite of my colleague, the gentleman from Ohio (Mr. WYLIE). I am not opposed to the amendment, but I think we ought to say for the record that there are, at least, some Members here concerned that we do not diminish that amount or reduce that amount excessively from the \$150 million figure. One of the reasons for some of the problems in Africa today-I am not saying it is the sole reason-but one of the reasons is that over the decades we have neglected the needs of Africa. I would hope that the administration as they look at this discussion in the RECORD would not go much below that amount of \$150 million.

Mr. Chairman, I yield to my colleague, the gentleman from Maryland (Mr. MITCHELL)

Mr. MITCHELL of Maryland. Mr. Chairman, I think the gentleman's point is well taken. In conversation with the Director of the Office of Management and Budget this morning, Mr. Lance, and in conversation with other members of the administration this morning, this Member has been given reasonable assurance that we will follow the normal pattern that has been followed by other nations in making their contributions. If we follow that normal pattern, based upon our original donor contribution of \$25 million, then, indeed, through two steps we would move to \$150 million.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, I appreciate my colleague yielding.

My understanding of the Tsongas-Wylie amendment is much different than my colleague, Mr. MITCHELL.

The gentleman from Massachusetts (Mr. Tsongas) has a phrase at the very end of his amendment which says:

Consistent with and after consultation with other nations involved.

Most other nations are intending to contribute far less than the United States and as a matter of fact the replenishment conference negotiations have not even taken place yet.

So that, we will not exceed what other participating nations are in the process of contributing, it is my judgment that the \$150 million is an excessive amount. The gentleman from Illinois (Mr. Simon) may want to commit our Treasury to \$150 million; I do not. It is my understanding that our neighbor to the north, Canada, has agreed to contribute \$74 million. I do not think we should exceed that Canadian contribution so the reason I was willing to accept this language in the Tsongas-Wylie amendment was that the U.S. Government would not be in excess of other contributing members. I was not privy to the conversation with Mr. Lance, to which my colleague from Baltimore, Mr. MITCHELL, refers, so I do not know what ceilings or dollar limitations were established by Mr. Lance.

I do not want to leave on the record the thesis that by accepting this amendment we are, in fact, supporting the concept of \$150 million ceiling because my understanding of the wording of this amendment is that it basically will put us in concert with other participating members. In other words this amendment commits the U.S. Government to a much lower ceiling.

Mr. STANTON. Mr. Chairman, will

the gentleman yield?

Mr. SIMON. I yield to the gentleman from Ohio.

Mr. STANTON. The reason I asked the gentleman to yield is because the language the gentleman from California is concerned about is language I insisted be put in for the simple reason that, in consultation with other countries, we have pinned ourselves down to do this the same as we do in all the other institutions.

Mr. ROUSSELOT. What does that

mean to the gentleman?

Mr. STANTON. Exactly what it means to me is that there is no definite amount. The \$150 million is after consultation with other countries and the meetings they will have this fall. They will come back and go to the National Security Council on Monetary Affairs, consultation with the President and OMB. After that the President comes up in the future with the African Development Fund the same way he has come up with recommendations on these replenishments we are voting on today. We will put it on a par with other countries.

Mr. ROUSSELOT. What does the

gentleman understand the par to be for Canada? My understanding is that it is \$74 million for Canada.

Mr. STANTON. I cannot speak for Canada

The CHAIRMAN. The time of the gentleman from Illinois has expired.

AMENDMENT OFFERED BY MR. WYLIE AS A SUB-STITUTE FOR THE COMMITTEE AMENDMENT

Mr. WYLIE. Mr. Chairman, I offer an amendment as a substitute for the committee amendment.

The Clerk read as follows:

Amendment offered by Mr. WYLIE as a substitute for the committee amendment: In lieu of the committee amendment insert the following:

"SEC. 501. Section 206(a) of the African Development Fund Act (22 U.S.C. 2909-4(a)) is further amended by adding the following at the end thereof: 'In addition there is hereby authorized to be appropriated such sums as may be necessary, consistent with, and after consultation with, the other nations involved.'

"The Secretary of the Treasury is directed to begin discussions with other donor nations to the African Development Fund for the purpose of changing the voting structure within the Fund to reflect actual contributions by Fund members."

Mr. GONZALEZ. Mr. Chairman. I ask unanimous consent that the amendment offered by the gentleman from Massachusetts (Mr. Tsongas) be read once again. I have no copy of it here, and I do not think any Member would be able to gage the net effect of the amendment proposed as a substitute for the Tsongas amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

The CHAIRMAN. The Clerk will report the amendment to the committee amendment offered by the gentleman from Massachusetts (Mr. Tsongas).

The Clerk read as follows:

Amendment to the committee amendment offered by Mr. Tsongas: Strike out all after "section 501" and insert "section 206(a) of the African Development Fund Act (22 U.S.C. 290g-4(a) is further amended by adding the following at the end thereof: "In addition there is hereby authorized to be appropriated such sums as may be necessary, consistent with, and after consultation with, the other nations involved."

Mr. TSONGAS. Mr. Chairman, I ask unanimous consent that the difference between my amendment and the amendment now being considered be read, so that we would understand not what the similarities are, but what the differences are.

The CHAIRMAN. Does the gentleman want the substitute read again?

Mr. TSONGAS. No. The difference between the substitute, which was read, and the substitute now being considered, specifically, the language directing the Secretary of the Treasury.

The CHAIRMAN. Both amendments have been read and the clerk cannot be placed in the position of analyzing differences. The amendment offered by the gentleman from Massachusetts (Mr. Tsongas) is not a substitute. It is an amendment to the committee amendment.

We now have pending as an order of business before the Committee the substitute offered by the gentleman from Ohio (Mr. Wylle), which has been read. The gentleman from Ohio (Mr. Wy-

The gentleman from Ohio (Mr. Wy-LIE) is recognized for 5 minutes in support of his substitute.

Mr. WYLIE. Mr. Chairman, I will read the language which I have added to the Tsongas language again. Simply stated.

it says:

The Secretary of the Treasury is directed to begin discussions with other donor nations to the African Development Fund for the purpose of changing the voting structure within the Fund to reflect actual contributions by Fund members.

Mr. Chairman, a little while ago I mentioned that the United States contributed \$15 million last year to the Fund through the appropriation process. We only had 21/4 percent voting strength, and that voting strength was actually cast by the United Kingdom. So we really did not have any authority or power. It seems to me that if the United States is going to be asked to contribute to this Fund that we ought to have more say in how the money from the Fund is loaned. I would point out to the Members of this body that in the Board of Governors each participating country is represented by its own Governor, who casts that country's vote. The Fund's operation is actually controlled by the African Development Bank, which has 50 percent share of all of the votes cast by the Bank's Governors.

The 12-member Board of Directors consists of 6 Directors designated by the African Development Bank, and 6 of these Governors are elected by the other participating countries.

Mr. TSONGAS. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from Massachusetts (Mr. Tsongas).

Mr. TSONGAS. I thank the gentleman for yielding.

Let us see if we can arrive at an understanding at this point. Is the gentlemen saying he is directing the Secretary of the Treasury to enter into negotiations, with the end result being the U.S. participation in the African Development Fund, or is the gentleman making the statement that the U.S. contribution is conditional upon U.S. participation?

Mr. WYLIE. It is the former. It cannot be the latter. It cannot be the latter because the agreement has already been entered into.

Mr. TSONGAS. If it is the former, a statement to the Treasury to enter into negotiations toward that end, then I would have no objection to the gentleman's amendment.

Mr. WYLIE. That is all it can do—a statement to the Treasury that he attempt to negotiate.

I would say that if we negotiate, on the basis of our contribution, with the other donor nations, I think there is a pretty good chance we will get some increased participation. But at the present time it is not possible to do that except by agreement of the Board of Directors of the African Development Fund. Mr. STANTON. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from Ohio (Mr. STANTON).

Mr. STANTON. I thank the gentleman for yielding.

Mr. Chairman, I would like to have a clarification of the amendment.

The gentleman from Ohio took the exact language of the gentleman from Massachusetts and then added the language instructing the Secretary to attempt to get us a voice in that organization; is that correct?

Mr. WYLIE. That is precisely correct.
Mr. STANTON. This would make the
total amendment agreeable to the gentleman from Ohio?

Mr. WYLIE. Yes, sir.

Mr. GONZALEZ. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from Texas (Mr. Gonzalez).

Mr. GONZALEZ. I thank the gentleman for yielding.

Mr. Chairman, there is a scarcity of copies of these amendments around here.

Mr. WYLIE. Mr. Chairman, it was put together rather hurriedly, I will say to the chairman of the subcommittee.

Mr. GONZALEZ. I realize that everything has been done precipitously, but that is no excuse. That does not excuse us for doing it in this way.

Mr. Chairman, the gentleman does not mean to imply—and I ask this question because some of the other discussion seems to be headed that way—that the United States has any direct participation now in the Fund, meager as it might be?

Mr. WYLIE. No. That is correct.

Mr. GONZALEZ. We do not have membership in the Fund; we are not allowed to be a member; is that not correct?

Mr. WYLIE. That is correct.

Mr. GONZALEZ. So we have to work through our representative?

Mr. WYLIE. Through the United Kingdom. I am glad the gentleman is making that point. The gentleman is correct.

Mr. GONZALEZ. So that in effect either the gentleman's substitute or the amendment for which he is seeking to substitute is actually a directive requesting our administrative officials who have the authority or capacity to initiate negotiations in concert with the nations in question; that would be the net effect of this; would it not?

Mr. WYLIE. That is the net effect.
The CHAIRMAN. The question is on
the amendment offered by the gentle-

man from Massachusetts (Mr. Tsongas) to the committee amendment.

PARLIAMENTARY INQUIRIES

Mr. TSONGAS. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. TSONGAS. Mr. Chairman, I believe it is in order that we vote first on the substitute offered by the gentleman from Ohio (Mr. WYLIE), is it not?

The CHAIRMAN. No. The Chair will

The CHAIRMAN. No. The Chair will state that the vote on the amendment to the committee amendment will occur first. Following that there will be a vote

on the substitute for the committee amendment, as amended, if the amendment offered by the gentleman from Massachusetts (Mr. Tsongas) to the committee amendment is adopted. Following that there will be a vote on the committee amendment, as it may have been amended.

Mr. TSONGAS, Mr. Chairman, I have a further parliamentary inquiry.

If one were disposed to vote for both amendments, both the amendment and the substitute, one would simply vote "aye" twice; is that correct?

The CHAIRMAN. I believe the gentleman has stated the fact correctly.

Mr. TSONGAS. I thank the Chair. The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts (Mr. Tsongas) to the committee amendment.

The amendment to the committee

amendment was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. WYLIE) as a substitute for the committee amendment, as amended.

The amendment offered as a substitute for the committee amendment. as amended, was agreed to.

The CHAIRMAN. The question is on the committee amendment, as amended.

committee amendment, The amended, was agreed to.

The CHAIRMAN. The Clerk will read. The Clerk read as follows:

TITLE V-HUMAN RIGHTS

SEC. 501. (a) The United States Government, in connection with its voice and vote in the International Bank for Reconstruction and Development, the International Development Association, the International Finance Corporation, the Inter-American Development Bank, the African Development Fund, and the Asian Development Bank, shall advance the cause of human rights, including by seeking to channel assistance toward countries other than those whose governments engage in a consistent pattern of gross violation of internationally recognized human rights, such as torture or cruel, inhumane or degrading treatment or punishment.

(b) The Secretaries of State and Treasury shall report to the Speaker of the House and the President of the Senate progress towards achieving the goals of this title.

Mr. GONZALEZ (during the reading). Mr. Chairman, I ask unanimous consent that title V be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

COMMITTEE AMENDMENTS

The CHAIRMAN. The Clerk will report the first committee amendment.

The Clerk read as follows:

Committee amendment: Page 5, line 11, strike out "V" and insert "VI".

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: Page 5, line 12, strike out "501" and insert "601".

The committee amendment was agreed

The CHAIRMAN. The Clerk will report the next committee amendment. The Clerk read as follows:

Committee amendment: Page 6, line 1, strike out "quarterly" and insert "semiannually".

The committee amendment was agreed

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: Page 6, line 3, strike out the period and insert in lieu thereof a comma and the following: "including the reports required in subsection (c).".

The committee amendment was agreed

to.
The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: Page 6, line 4, insert the following:

"(c) The United States Government, in connection with its vote in the institutions listed in subsection (a), shall seek to chan-nel assistance to projects which address basic human needs of the people of the recipient country. The semiannual report required under subsection (b) shall include a listing of categories of aid granted, with particular attention to categories that address basic human needs."

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment, page 6, after line 10, insert the following:

(d) In determining whether a country is in gross violation of internationally recognized human rights standards, as defined by the provisions of subsection (a), the United States Government shall give consideration to the extent of cooperation of such country in permitting an unimpeded investigation of alleged violations of internationally recognized human rights by appropriate international organizations including, but not limited to, the International Committee of the Red Cross, Amnesty International, the International Commission of Jurists and groups or persons acting under the authority of the United Nations or the Organization of American States."

The committee amendment was agreed

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: Page 6, line 23, insert:

"(e) Section 28 of the Inter-American Development Bank Act (22 U.S.C. 283y) and section 211 of the African Development Fund Act (22 U.S.C. 290g-9) are repealed."

AMENDMENT OFFERED BY MR. BADILLO AS A SUBSTITUTE FOR THE COMMITTEE AMEND-

Mr. BADILLO. Mr. Chairman, I offer an amendment as a substitute for the committee amendment.

The Clerk read as follows:

Amendment offered by Mr. Badillo as a substitute for the committee amendment: In lieu of the matter proposed to be inserted by the Committee Amendment, insert the

"(e) In addition, the United States Gov-

ernment, in connection with its voice and vote in the institutions listed in subsection is authorized and directed to vote (a) against any loan, any extension of financial assistance or any technical assistance to any country which engages in a consistent pattern of gross violations of internationally recognized human rights, including torture or cruel, inhumane or degrading treatment or punishment, prolonged detention without charges, or other flagrant denial of the right liberty, and the security of person, and including providing refuge to individuals committing acts of international terrorism such as hijacking of an aircraft unless such assistance is directed specifically to programs which serve the basic human needs of the citizens of such country."

Mr. BADILLO. Mr. Chairman and members of the committee, the purpose of this amendment is to include the language known as the Harkin amendment which was approved by the last Congress for the Inter-American Bank and the African Development Fund, to all of the institutions that are covered by this bill.

The fact is that we in the Congress of the United States began in the last Congress to define what is meant by human rights and to set a standard that should apply throughout the world. In this Congress, with the language that the chairman of the committee, the gentleman from Wisconsin (Mr. Reuss) proposed, and the language that we added in the committee, we have gone further because we have provided specific instructions that the administration take steps to advance the cause of human rights, that we get reports to see to it how basic human needs are being met, and that we use as one of the standards of the constant violation of human rights whether a country is willing or unwilling to allow international inspection.

That is good language as far as it goes, and I support it. But that does not in any way justify going back on what we have approved in the past. In fact, if we repeal the previous law it will be a signal to all the countries of the world that all of the words of President Carter have no meaning, that, in fact, what we are doing is saying to the President: Go out and be a good President. But we are not putting any teeth into the mandate that Congress wants to give in promoting international human rights.

The problem is that the Harkin amendment, which is the amendment I am introducing, is being attacked on two contradictory fronts. We say at the end of this amendment that we specifically will allow assistance to the programs that serve the basic human needs of the citizens of recipient countries-yet there are those who say that the amendment is too flexible because of the requirement of helping where basic human needs are in-

But nothing in this amendment mandates the administration to approve a loan if they feel that there is a gross and consistent violation of human rights. even if basic human needs are being met. Therefore, there is no problem as far as too much flexibility is concerned:

We are also told that the amendment is inflexible because of the fact that it directs our representative not to vote for loans where there is a consistent violation of human rights. But the fact is that if we really believe what we are talking about, if we want to take firm action through the funds that we appropriate, to see to it that countries do not continue to violate international human rights, then we have to show this by requiring a specific acknowledgement by our representatives that we mean what we say.

In this bill we are beginning to move toward a more clearly defined standard of human rights. But at the same time we should not let anybody be able to misinterpret our actions and come to the conclusion that what we are doing is seeking to avoid the mandate that the

last Congress approved.

I think that the committee amendment as it stands is a disastrous expression of policy because it repeals the existing Harkin language altogether. I think that what we should be doing here is moving forward in advancing the cause of human rights, to move forward by extending the Harkin amendment to all of the institutions that are covered by this bill, and to move forward by adding the new language, which was originally proposed by the chairman of the committee, that gives further instructions to our representatives by saying that in addition to voting "no" where they find that there is a consistent violation of human rights, they should also work toward directing aid to those countries which do in fact recognize human rights.

If we put together the work of the last Congress—the Harkin amendment, and the work of this Congress, we will have a package that not only makes sense, but a package that will signify to the rest of the world that we in the Congress mean to continue defining policy, and that the fact that we have a new president in the White House does not mean that we are running away from

our responsibilities.

The CHAIRMAN. The time of the gen-

tleman has expired.

(At the request of Mr. Rousselot, and by unanimous consent, Mr. Badillo was allowed to proceed for 2 additional minutes.)

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. BADILLO. I yield to the gentleman from California.

Mr. ROUSSELOT. I appreciate my colleague's yielding.

Mr. Chairman, I appreciate what my colleague, the gentleman from New York, a member of the Committee, Finance and Urban Affairs, has stated. I know of his efforts in the committee itself to try to reestablish the Harkin amendment, which I think was appropriate, and I did vote for it; I will vote for it today.

I wish also to state that in discussions that I had with President Ford last fall, although he had originally objected to the Harkin amendment, he said once it was put in place as law, he not only was able to live with it but he felt that it was a very appropriate weapon in the hands of our U.S. representatives to the two funds to which this law now applies.

funds to which this law now applies.
So I compliment my colleague, the gentleman from New York (Mr. Badllo)

and say that even President Ford, who did not agree with this amendment when it first came up, found that he was able to work with it, found that it was not as "detrimental" as some people originally told us it would be.

I compliment my colleague on his insistence that we stay with the Harkin law, that we apply it equally to the other agencies, because it is our taxpayers' money that is involved. They are our U.S. representatives who go to participate in voting these funds. I compliment the gentleman for offering the amendment.

Mr. BADILLO. I thank the gentleman from California for his comments.

Mr. MOFFETT. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, one of the reasons that I and some other Members worked so hard for the then candidate Jimmy Carter in the spring of the primaries was because of his very strong commitment on human rights. I believe that commitment is still very much in evidence with the President and with many of his aides and that our country will benefit from it. It is also important, however, to recognize that when the pressure is on, whether it is with regard to the Soviet Union or Latin America or South Korea, there are people in the State Department, there are forces in the Treasury Department that will tell the President, that will advise the President that it is time to go easy, that it is time to back off, that it is time to compromise on our basic principles.

We had a very encouraging vote here, as my colleagues will remember, a vote of 400 to 2, not too many days ago on a resolution regarding the rights of the Soviet Jews. At that time this body was being advised to go easy, to retreat, to compromise, not to move forward so quickly. We were warned that we might foul up the diplomatic channels with the Soviets, and we went absed anyway.

Soviets, and we went ahead anyway.

This morning several of us had the pleasure of meeting with Mr. Christopher of the State Department and with Pat Derian, the new person on human rights at the State Department. One of the things that Pat Derian said, and I thought that her presentation was otherwise, quite encouraging and quite impressive, was that "no" votes in international bodies are really not worth very much, that they reflect that we fail to press our case. This was her language.

I ask my colleagues in this body who have cast "no" votes in many bills. have cast "no" votes in many bills, whether it has been a "no" vote on the HEW bill or whether it has been a "no" vote on a defense bill, whether they would like that to reflect that they had failed to press their case or that they had given up or that they were not for the concept of aid in that particular area. My colleagues who have voted against the HEW bills certainly would not want that to indicate they were against health and education and welfare, or if they voted against the defense bill they would not want that to be a signal that they are against defense, but there is a symbolic or educational value in a "no" that the Harkins amendment allows us to apply to international aid.

The charge is made by opponents of the Harkin amendment that it is an amendment which brings us to a point of inflexibility. We can understand that the administration and some people in the administration would want the elbow room and more flexibility. Of course, that is natural for unelected officials administering the laws.

But what is our responsibility and how much flexibility do they now have. They really cannot have it both ways. We know since the passage of the Harkin amendment two loans to Chile have been approved with the support of our representatives and one loan has been disapproved with the disapproval of our representatives. There is a great deal of flexibility in the current law, so they cannot say at one point there is no flexibility with the Harkin amendment and that at the other point it ties their hands.

It has been said that Harkin does not work. I know the gentleman from New York (Mr. LaFalce), who has done a great deal of work on this subject, has stated in his views in the committee report the Harkin amendment does not work. First of all I think it does work, as some of the earlier speakers have said, and secondly we have not really given it a chance yet. What has happened between September of 1975 and the present day that should change our position on Harkin? I certainly hope we have an administration that is better on human rights, but I do not think that this body of elected Representatives should assume a great deal about what is going to happen at those international bodies once they really get to the nitty-gritty details which are based more on investment decisions, financial decisions, than anything else.

A couple of my colleagues and I had the pleasure to be in Chile—if one can call it a pleasure—not too long ago and we found our participation and our loans are helping to prop up a very, very nasty government that practices torture and takes persons out of their homes in the middle of the night and holds them without charges.

The CHAIRMAN. The time of the gentleman from Connecticut has expired.

(By unanimous consent Mr. Moffett was allowed to proceed for 2 additional minutes.)

Mr. MOFFETT. Mr. Chairman, the decisions on loans to Chile all too often are made on basic investment terms. The people in the Treasury Department are not trained to think in terms of human rights, no matter what the President says, and so I think it is very important that we once again affirm our support for the Harkin amendment. We cannot simply say this administration is better and we are going to give too much flexibility and take Congress out of the ball game.

Now, we can certainly disagree, there are many views in this room over what is the best approach. The gentleman from New York may not agree that the Harkin amendment requiring a "no" vote is the best approach. I may think that is a better approach. We have differences of opinion, but at the very least

I must urge my colleagues in the committee to vote against the committee amendment. That would leave us in the following place: It would leave us with two institutions to which the Harkin amendment applies and it would leave the other institutions to which the language of the gentleman from Wisconsin (Mr. Reuss) applies. At the very least, we will have a chance to compare the Harkin approach, working on two agencies, and the other approach, the less stringent approach, as some people say.

Mr. Chairman, I intend to support the amendment of the gentleman from New York, but I am saying that at the very least let us insure that we oppose the

committee amendment.

I like the President. I worked hard for the President. I applaud the President's stand on human rights today. I believe what the President says about putting human rights at the top of our priority list and leaving them there. I think our action today should certainly reflect that.

Mr. TSONGAS. Mr. Chairman, will the gentleman yield?

Mr. MOFFETT. I yield to the gentle-

man from Massachusetts.

Mr. TSONGAS. Mr. Chairman, I was also present this morning when Mr. Christopher and Pat Derian spoke very eloquently on the issue of human rights. In fact, the comments of Pat Derian I found even moving. I think we all had a sense there was finally going to be a serious commitment, not only at the Presidential level, but in all the agencies to this principle.

The CHAIRMAN. The time of the gentleman from Connecticut (Mr. MOFFETT)

has expired.

(At the request of Mr. Tsongas, and by unanimous consent, Mr. Moffett was allowed to proceed for 1 additional minute.)

Mr. TSONGAS. Mr. Chairman, will the gentleman yield further?

Mr. MOFFETT. I yield to the gentle-

man from Massachusetts.

Mr. TSONGAS. Mr. Chairman, the one point I think I can quote it reasonably accurately, she said that each of the human rights is a very complex and sophisticated issue. What they wanted was a complex and sophisticated instrument that reflected what they were dealing with and asked that the Congress support the committee language and work and work hard for the advancement of human rights.

If, in fact, we say no to the committee amendment, what we are saying to her. despite her eloquence this morning, is,

"No, you shall not have it."

Mr. MOFFETT. Mr. Chairman, I do not know how much influence Pat Derian will have in the State Department. I know too much to forget about the Chilean deaths and the Korean deaths and I know that too many people in the State Department think human rights is a nasty word that we should not talk about.

I certainly hope the lady has the influence she deserves. But, I am not ready to assume that.

I am going to support the committee

language. if we have nothing else, but it is certainly nothing like the Harkin language. The point of the compromise is that we have a chance to compare the two approaches.

Mr. REUSS. Mr. Chairman, I move to strike the requisite number of words. I rise in opposition to the Badillo amend-

Mr. Chairman, as I said before, we are not really concerned with who is for human rights and who is against torture. What we are concerned with is a text. So let us read these texts and see where we

The committee language, overwhelmingly adopted by the Banking Committee and supported by the administration, says that the U.S. Government, in connection with its vote in the institutions listed in subsection (a), shall seek to channel assistance toward countries other those whose governments engage in a consistent pattern of gross violation of internationally recognized human rights, such as torture, or cruel, inhumane or degrading treatment or punishment.

In other words, on a 24-hour-a-day rasis, we want the administration not just to vote against aid to the torturers, but we want them to politic and to get others to join them.

Then on this basic language, the Badillo amendment seeks to put an overlay, so we have to look at that overlay. The trouble with the Badillo amendment is that it is at once too lenient and too rigid.

It is too lenient, because it says that any time a torturing dictator can clothe an aid program on which he seeks assistance in the vestment that it serves the human needs of his people—and it does not take much of a PR job to do thatthen, according to the Badillo language, we vote for it.

That is precisely what happened in Chile, and what a sad day that was when we were forced to give a dictator a pat on the back. The Badillo language, I suggest, is in that respect too lenient.

In another respect, I think it is too inflexible, because it expressly includes within its definition of human rights prolonged detention without charges. Prolonged detention without charges is something that we abhor, but the fact is, that is what is practiced by the vast majority of countries who are the recipients of the bounty of these international lending agencies, including some countries Members would be surprised to see on the list.

So, I think there is a strong case for staying with the committee language, and not putting this overlay on it.

There are those who say, "Well the Harkin amendment is already in exist-ence in two agencies." The answer is clear: There will be an opportunity to vote later on as to whether Members want 100 flowers to bloom and want the Harkin amendment on 2 agencies and the committee language on all the agencies. That is a perfectly workable world, and we will debate that later. But the immediate vote before us is the simple one; do we want to put on top of the committee language something which is in one and the same breath too lenient and too tough? I urge that the Badillo amendment be defeated.

Mr. BADILLO. Mr. Chairman, will the

gentleman yield?

Mr. REUSS. I yield to the gentleman from New York.

Mr. BADILLO. I want to say to the chairman that there is nothing in the amendment which says that any representative to the lending institution is directed to vote for aid to any country which is in violation of human rights because the loan is being used for basic human needs. If the administration does not want to vote for that loan, it does not have to. The fact is, the amendment does not say that.

I say that because the gentleman suggested that it does. The administration can find, even if the loan supports basic human needs, that the country is in such gross violation of fundamental human rights that it must instruct the representative not to vote for that loan. So, he over-flexibility the gentleman spoke of, in fact, does not exist anywhere in the

text of the amendment.

Mr. REUSS. In the beginning was the word, and the word was BADILLO's, and the word says that the U.S. Government is "authorized to vote against" any loan "unless such assistance is directed specifically to programs which serve the basic human needs of the citizens" of the subject country.

To me, that says that you are not authorized to vote "No" if the loan does serve the basic human needs. I think we are buying a very, very ambiguous overlay if we accept the Badillo amendment. I therefore hope it will be voted down.

Mr. MOORHEAD of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. REUSS. I yield to the gentleman from Pennsylvania.

Mr. MOORHEAD of Pennsylvania. I thank the gentleman for yielding to me. Is it the gentleman's position, as it is mine, that the committee language is broad and affirmative, and the amendment is narrow and negative; and therefore we should support affirmative action that is broad in scope rather than the negative?

Mr. REUSS. Yes.

Mr. MOORHEAD of Pennsylvania. I thank the gentleman.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

(By unanimous consent Mr. REUSS was allowed to proceed for 1 additional

Mr. REUSS. Mr. Chairman, I will use the few seconds remaining in the minute which I have just negotiated to say that the committee language—that which I hope remains unchanged—makes it very difficult for the administration to do anything but vote against any loan to any country that is in violation of human rights. There is a technical possibility of abstinence, but they are doing to have to come in and explain these on a semiannual basis, whatever their votes are, so that I suggest that the committee language is strong and clear, and we should leave it as it is.

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. REUSS. I yield to the gentleman from Ohio (Mr. WYLIE).

Mr. WYLIE. I thank the gentleman for yielding.

Truthfully, I am having difficulty in my position on the Reuss amendment, the Harkin-Badillo amendment. It seems to me, in reading the amendment offered by the gentleman from New York (Mr. Badillo), that there is a gigantic loophole at the very end, where it says that, "unless such assistance is directed specifically for programs which serve the basic human needs of citizens of such country. * * *"

The CHAIRMAN. The time of the gentleman from Wisconsin (Mr. REUSS) has expired.

(On request of Mr. Wylle and by unanimous consent, Mr. Reuss was allowed to proceed for 1 additional minute.)

Mr. WYLIE. Will the gentleman admit that in the year in which this amendment has been in effect for the African Development Fund and for the Inter-American Devolpment Bank, in only one instance has the amendment been used to turn down a loan, and that was in Chile, for an industrial credit loan of \$21 million?

Mr. REUSS. I agree it is a loophole, and it is odd that some of the staunchest supporters of human rights in this body—and I respect them, and I fought side by side with them in the last years—are doing what they ordinarily do not do, namely, uncritically buying language which they have not considered.

Mr. WYLIE. Has the language of the gentleman's amendment closed that loophole?

Mr. REUSS. Oh, yes. My amendment has absolutely no exception. I say "my amendment," meaning the committee text, and it has no exception for loans that benefit basic human needs.

The CHAIRMAN. The time of the gentleman from Wisconsin (Mr. Reuss) has

again expired.

(On request of Mr. Rousselor and by unanimous consent, Mr. Reuss was allowed to proceed for 3 additional minutes.)

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. REUSS. I yield to the gentleman from California (Mr. ROUSSELOT).

Mr. ROUSSELOT. I thank the gentleman for yielding.

The gentleman's amendment, which was adopted in the committee, does not direct the U.S. representatives to the respective institutions not to vote for

human need loans, does it?

Mr. REUSS. It comes about as close to it as it can. It says the U.S. Government on these agencies shall seek to channel assistance toward countries other than those whose governments engage in a consistent pattern of violat-

ing human rights.

Let me explain what that means. There are some who say, "Oh, we must have sympathy for the poor people in these countries. They did not make the torturing dictator."

The answer of the committee language, the so-called Reuss language, which I just read is that there are God's plenty of poor people in countries which do not have at their head a torturing dictator and, therefore, let us channel the aid of the World Bank system and regional banks toward countries which do not go in for torture.

Mr. ROUSSELOT. But my point is, if the distinguished chairman will yield further, as was discussed in the committee, the gentleman's amendment does not really reconstitute the language of the Harkin amendment in a much different manner?

Mr. REUSS. It emphatically does not.
Mr. ROUSSELOT. I have a further
question which I would like to discuss
with my distinguished chairman. My
distinguished chairman supported the
Harkin amendment a year ago; is that
correct?

Mr. REUSS. That is correct.

Mr. ROUSSELOT. And No. 2, the gentleman from Wisconsin (Mr. Reuss), my fine chairman, also supported in committee the effort to retain the Harkin language in the two agencies to which it now applies as law, which we passed last year?

Mr. REUSS. Let me now answer the question: "How could the distinguished chairman be so inconsistent?" Is that the question?

Mr. ROUSSELOT. If the gentleman puts it that way, can the gentleman explain why to me he has appeared to be inconsistent?

Mr. REUSS. Let me answer that there is no problem. Reason No. 1: I respect and admire the gentleman from Iowa, and I would not gladly have seen him bereft of the Harkin amendment which he put so much into last year.

Mr. ROUSSELOT. So the gentleman

Mr. ROUSSELOT. So the gentleman still supports the Harkin amendment

that now is the law?

Mr. REUSS. Yes. And, second, and an even more important reason, I do not think that I really know the total answer to this problem of how best we can solve human rights and still be able to provide some help for the developing countries.

So I say, let us see how Harkin works on the two banks, the Asian and the African, where it now exists, and then let us, overall, put in the Carter language, the language which is in the committee bill. There is really nothing inconsistent about having a two-tiered system for those agencies.

The CHAIRMAN. The time of the gentleman from Wisconsin (Mr. REUSS) has expired.

(On request of Mr. Rousselot and by unanimous consent, Mr. Reuss was allowed to proceed for 1 additional minute.)

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield further?

Mr. REUSS. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, I appreciate the gentleman's willingness to yield in order to discuss this important issue.

I cannot for the life of me understand why we would not want to test this with the other four international financial institutions. After all, they are involved in the same kind of lending in most cases.

Why should we not instruct the several Directors to follow that same procedure with respect to the other institutions?

Mr. REUSS. Mr. Chairman, the answer is that when I voted for the Harkin amendment, it was the only game in town. I did not have the parliamentary opportunity to purge it of its overstringency in one aspect and its overleniency or its loophole in the other, but it certainly was a lot better than nothing. It did succeed in stopping at least one loan, the one to Chile, and I am proud of the gentleman from Iowa, Tom Harkin, for having accomplished that.

But now we have the chance to do this thing from the beginning, not through hasty floor language. That is why the language which the administration, after much study, has approved is in this bill. If we want to put the Harkin overlay in it, we can. But I recommend that we don't.

Mr. ROUSSELOT. We should continue to support the Harkin amendment. The principles of the present Harkin law should be applied to the other international financial institutions.

I cannot believe that President Carter has a full understanding of what the Badillo-Harkin-Rousselot amendment does to strengthen H.R. 5262. This bill provides for increased participation by the United States in the International Bank for Reconstruction and Development, the International Development, the International Financial Corporation, the International Financial Corporation, the Asian Development Bank and the Asian Development Fund. President Carter has been outspoken in his intention to advance human rights.

The Harkin amendment is already included in existing law (P.L. 94-302) which governs two multilateral lending agencies and the Ford administration was able to live with it.

I urge my colleagues to support the Harkin-Badillo-Rousselot amendment.

Mr. LaFALCE. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the substitute for the committee amendment.

Mr. Chairman, all of us here today, I think, have our eye on one general target or goal, and that is this: How can we best advance the cause of human rights? How can we best advance the human condition?

I do not think there is any question but what this is the primary motive of the U.S. Congress and the primary motive of the Carter administration. The question that transcends that, though, is: How do we best achieve that goal? What means do we use?

I think we have a very fundamental problem that we should talk about and that we should address, and that is this: What is the proper relationship between the legislative branch of Government and the executive branch of Government in effecting our goals and implementing our goals?

Mr. Chairman, I think that if we have

an administration that is not compatible with our goals, that is not sympathetic to our goals, perhaps it is necessary for the legislative branch to be stronger in this joint effort to achieve the goal and to, perhaps, mandate certain courses of action, although even then that would give me difficulty. I think generally, though, when we do have compatibility of goals, the legislative branch of Government has to give a certain amount of-I hate to use the word "flexibility"let us say, discretion, to the executive branch regarding the exact tools it will or will not use. And at all times we must exercise tremendous oversight over the manner in which the executive branch exercises its discretion and implements those goals.

By the Reuss language we make an effort to codify the congressional concern and exhort the administration to use all instruments at its disposal, and in the manner it thinks best, to achieve our goals, the advancement of the cause of human rights. It is the opinion of this administration, as it was the opinion of the last administration, that it is not best to set in concrete the instruments that we can or cannot use, that it was not best to set in concrete a mandate that we must vote no under certain circumstances. That is what this debate is all about.

There is no magic to the Reuss language, there is no magic to the Badillo language, and there is no magic to the Harkin language. As a matter of fact, there are about a dozen different bills that have human rights language attached to them and that differ in their language as to the instruments.

Mr. Chairman, there are not too many of the Members here who would profess to be tremendously expert in the art of diplomacy. We do the best we can within the legislative branch. However, Under Secretary of State Cooper did testify before the International Development Institutions Subcommittee and, when asked about the Harkin language, and what he thought of it, he said:

Well, in my judgment, it is clumsy—even somewhat coarse . . . and in the long run may have the effect of worsening human rights conditions in less developed countries. . . .

There is no question then what the official position of the Carter administration is. Further we ought not be afraid that the public at large is going to confuse matters as far as means and ends and targets and instruments. It is our responsibility to make the right decisions, and then to educate our constituency. It is a difficult responsibility, but it goes with the job of being a good Congressman.

I have made the comment that the present language that exists for the Inter-American Development Bank and the African Development Fund does not work.

What do I mean by that? Well, first of all, we did not disapprove any of the loans made by the Inter-American Development Bank to Chile. There were three loans to Chile that were approved, and we just happened to vote no on one of them. It accomplished nothing of a posi-

tive nature, and may very well have been most counterproductive.

But the primary experience that we have had with the Harkin language is not with respect to the multilateral institutions, it has been in our bilateral aid with the Agency for International Development.

Now, what has the Agency for International Development done? Why was the gentleman from California able to get up and say that former President Ford changed his mind and said, "Oh, we can work with the Harkin amendment." The question is, What did he mean by the word "work"?

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. MITCHELL of Maryland, and by unanimous consent, Mr. LAFALCE was allowed to proceed for 3 additional minutes.)

Mr. LaFALCE. Mr. Chairman, I suggest that what the past President was really saying was not that they could "work with it," but that they could "circumvent it."

How could they circumvent it? Easily. Go to an interoffice memo of AID, an interoffice memo that I have in my briefcase, raising the question of how AID should interpret and implement Harkin's language. The memo said: Let us not look to what the primary effect of the loan would be, let us not ask ourselves whether the principal effect of the loan would be to go to needy people, let us simply ask the question: What is the "principal purpose"? And obviously, the "principal purpose" of every AID loan is to aid needy people. Hence, the Harkin loophole always applies.

So they have adopted the principal purpose test. And AID has come up with the formulation that if the principal purpose is to aid needy people, even though that not be the primary effect, that suffices and we would not even have to raise the question of whether or not there are violations of human rights.

So, the way they have worked with it is to totally circumvent it.

Mr. DOWNEY. Mr. Chairman, will the gentleman yield?

Mr. LaFALCE. I yield to the gentleman from New York.

Mr. DOWNEY. Mr. Chairman, the chairman and the gentleman from New York have made a rather convincing argument on the point that if we somehow can ascertain that this loan is for needy purposes, that everything else ends and that the loan can go forward.

What I would like to know is whether there are any auditing procedures, or whether there is any way we can monitor whether or not the money is being used for needy purposes. If that is the case then it would seem to me that whether in fact this loophole causes us problems or not, at least we have the checks and balances and the power of review so that at a later time we can determine whether or not it was used for needy people.

Mr. LaFALCE. Let me expand on that. I think Congress will exercise much greater oversight in the future on all these loans. I do not think Congress, however, can possibly review the loan be-

fore it is made. But I think I must take this opportunity to make a further point. The issue of human rights is of tremendous importance but there are a great many issues of tremendous importance. And in our foreign policy, we must take into consideration all of the U.S. interests, of which human rights is a great one

But we must also take into consideration our diplomatic, political, and our security interests. They too are great. I do not think it is appropriate for us to single out just one. Perhaps we should just say there should be another exception in addition to the needy, exception, for example, whether this loan would advance the security interest of the United States.

The CHAIRMAN. The time of the gentleman has again expired.

(On request of Mr. Badillo, and by unanimous consent, Mr. LaFalce was allowed to proceed for 2 additional minutes.)

Mr. GONZALEZ. Mr. Chairman, will the gentleman yield for the purpose of inquiring about time?

Mr. Laffalce. I yield to the gentleman from Texas.

Mr. GONZALEZ. I thank the gentleman for yielding.

I would like to get a feeling as to whether I could offer at the proper time a motion for limitation on this amendment and all discussion thereon. Could we agree to end the debate by 3:15? Would that be too restrictive?

Mr. BADILLO. Mr. Chairman, I would

Mr. GONZALEZ. It was just an inquiry; I was offering no motion.

Mr. BADILLO. Mr. Chairman, will the gentleman yield?

Mr. LaFALCE. I yield to the gentleman from New York.

Mr. BADILLO. I thank the gentleman for yielding.

I should like to answer the gentleman from New York because we have agreed to a committee amendment that specifically addresses itself to his question. Under the committee amendment previously adopted, we require that our representatives to the lending institutions submit semiannual reports in which they identify the the categories of loans so that we will be able to identify whether the loans that are being provided meet basic human needs, and we will be in a position to know exactly what is happening, if the Harkin amendment is agreed opon.

I want to add that if the Harkin amendment is not agreed to, there is nothing in the existing language that in any way places any restrictions whatso-ever on giving loans to people who are the most blatant violators of human rights.

Mr. DOWNEY. Mr. Chairman, will the gentleman yield?

Mr. LAFALCE. I yield to the gentleman from New York.

Mr. DOWNEY. I thank the gentleman for yielding.

It would seem to me that the distinguished gentleman from Wisconsin made two arguments against the amendment offered by the gentleman from New York: One, that it was too strict in the sense that it was a restrictive movement by requiring a "no" vote; and two, that it was too lenient. The too lenient portion of the argument falls on its face because of what the gentleman from New York said that there is a check and balance on whether or not the money is being used for human purposes.

Mr. RICHMOND. Mr. Chairman, will

the gentleman yield?

Mr. LaFALCE. I yield to the gentle-

man from New York.

Mr. RICHMOND. Mr. Chairman, I rise in strong support of the amendment offered by my colleague from New York to prohibit assistance to those countries which consistently participate in gross violations of human rights unless it can be demonstrated that that aid will directly benefit needy people in those countries.

The language in this amendment is surely as necessary as it was 2 years ago when we approved the Harkin amendment to the International Development and Food Assistance Act of 1975. At that time, we recognized the strong need for greater accountability for the billions of dollars we were channeling to developing countries through our participation in the international lending institutions. In addition, we recognized that the time had come to include our basic respect for human rights as a major consideration in our foreign policy.

The human rights situation has certainly not improved in the last 2 years. Amnesty International reports that in the past year "there has been a slight but unmistakable deterioration in the overall human rights situation," particularly in Chile, Argentina, Brazil, and Uruguay. It is estimated that approximately 30,000 political prisoners are being held by those four countries alone, despite the fact that Chile claims to have started a major amnesty program."

As this situation continues, the demand for this country to take strong, public action increases. It becomes more important that our human rights policy include the message that the United States can no longer financally support those countries whose citizens are the subject of brutal and inhumane treatment.

The Carter administration showed its willingness to make that message clear from the beginning. From the time of his inaugural address, when the President devoted significant attention to the importance of our respect for human rights, it was obvious that there was to be a new commitment to improving the lives of millions of people throughout the world. The reduction of aid to Argentina, Uruguay, and Ethiopia demonstrated that President Carter and Secretary Vance were willing to take positive public action consistent with the stated policy.

Consequently, I am astonished at the administration's support of the human rights language currently included in this bill. I do not believe that this language has the strength of the amendment we now have under consideration.

Title V, which says that our representatives to the international lending institutions shall use their voice and vote to advance the cause of human rights, in fact does not require us to do anything.

committee argues The that Harkin-Badillo amendment is considerably weaker than its own language because the provision which permits the U.S. executive directors in these institutions to vote yes on loans to human rights violators where that aid will directly benefit needy people is too big a "loophole." I disagree with the committee's assessment. The so-called loophole was included to allow us the flexibility to meet our assurances to poor people throughout the world. The three votes in the World Bank on loans to Chile showed how it could work. On two loans, the U.S. representative voted "yes, but voted "no" when it came to support for the Bank of Chile.

It is true that the amendment can be abused by simply voting no, and discharging ourselves from the obligation to do anything further. But, I do not believe the Carter administration would use the Harkin language in a mechanical way, adhering to the letter but not the spirit of the law-we have been led to expect something different from the President. When used properly, the amendment can be a most effective tool in the battle for human rights. Our required 'no" vote on certain loans, when combined with a strong effort to insure that other participants in these multilateral institutions support our positions, can be a major positive step, and can insure that we place pressure where it is needed.

Mr. Chairman, as you know, I recently visited Argentina as the House delegate to the International Water Conference. In Argentina today the question of human rights is not a question of whether or not free speech is tolerated or whether freedom of the press is allowed. The question is whether or not individuals have the right to exist at all if they disagree with the regime in power. Dissidents regularly disappear from the streets of Buenos Aires. The government is cloaked in the rusted armor of fear and repression.

While in Argentina, I was confronted by many people who asked if I could do something about "getting those human rights people off our backs." Repeal of the Harkin amendment is just the kind of action they are looking for. If we approve the current language in H.R. 5262, we are taking a step backward in our human rights policy. Therefore, I strongly urge my colleagues to approve the Badillo amendment in order to advance the cause of human rights throughout the world.

Ms. OAKAR. Mr. Chairman, I rise in support of the amendment offered by my colleague, the gentleman from New York (Mr. Badillo).

Mr. Chairman, the human rights title of H.R. 5262 is a most important measure. It adds to this already fine and necessary bill an explicit statement of our moral intent and standards in international relations. Nonetheless the lan-

guage in title VI is no more, than a toothless, unenforceable statement of policy.

The Badillo amendment gives muscle and sinew to the skeletal framework contained in this human rights section.

I supported the effort of my colleague, the gentleman from New York, in committee because I wish to see this Congress join those speaking out on the basic rights of all people under all governments. Let us carry on our commitment not only in words or rhetoric, as is frequently the case, but in action. This amendment has been characterized as a constraint on diplomatic prerogatives.

Mr. Chairman, I want to repeat the last sentence. This amendment has been characterized as a restraint on diplomatic prerogatives. This is not the case. The measure is in fact a congressionally inspired standard, which is our prerogative, by which our representatives in those international lending institutions shall carry out their duties.

We as Members of Congress must show our leadership in human rights. If this legislation, title VI, is the Carter-inspired language, then I say let us not follow the President blindly, let us talk, and let us follow our own instincts and our own inspiration when we as Members of

Congress are right.

I urge my colleagues to vote for the Badillo amendment as both a commitment to human rights and as a necessary condition for our international development efforts. Let us not regress in our efforts for human rights but progress by adopting this amendment.

Mr. GONZALEZ. Mr. Chairman, I ask unanimous consent that all discussion on this pending amendment and all amendments thereto be completed by 20 min-

utes past 3.

The CHAIRMAN. The chairman of the committee asks unanimous consent that all debate on the committee amendment and all amendments thereto terminate at 3:20 p.m. Is there objection?

Mr. ROUSSELOT. Mr. Chairman, reserving the right to object, and I do not object, will the gentleman assure us that there will be no attempt in any way to cut off people who want to speak not only to the amendment but also any aspect of the amendment? There are an awful lot of people standing. Would the chairman extend it to half an hour? There are many people standing.

Mr. GONZALEZ. Mr. Chairman, if the gentleman will yield, let us compromise and make it 3:25. I am unalterably op-

posed to cutting off anything.

The CHAIRMAN. The chairman of the committee asks unanimous consent that debate on the pending amendment and all amendments thereto end at 3:25. Is there objection?

Mr. BAUMAN. Mr. Chairman, I object. The CHAIRMAN. Objection is heard.

MOTION OFFERED BY MR. GONZALEZ

Mr. GONZALEZ. Mr. Chairman, I move that all debate on this pending amendment and all amendments thereto be completed by 3:25 p.m.

The CHAIRMAN. The question is on the motion offered by the gentleman from Texas. The question was taken; and the Chairman announced that the ayes appeared to have it.

Mr. BAUMAN. Mr. Chairman, on that I ask for a recorded vote, and pending that I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count.

The CHAIRMAN. The Chair will count. Eighty-two Members are present, not a

quorum.

The Chair announces that pursuant to rule XXIII, clause 2, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by

electronic device.

The call was taken by electronic device.

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its busi-

The pending order of business is the request for a recorded vote on the motion offered by the gentleman from Texas.

Mr. BAUMAN. Mr. Chairman, I withdraw my request for a recorded vote.

So the motion was agreed to.

The CHAIRMAN. Members standing at the time the motion was made will be recognized for 10 seconds each.

The Chair recognizes the gentleman

from Texas (Mr. Gonzalez).

Mr. GONZALEZ. Mr. Chairman, I ask unanimous consent that I may be permitted to yield my time to the distinguished gentleman from Wisconsin (Mr. Reuss).

The CHAIRMAN. Is there objection to the request of the gentleman from

Texas?

Mr. BAUMAN. Mr. Chairman, I object.
The CHAIRMAN. Objection is heard.
The CHAIRMAN. The Chair recognizes the gentleman from Iowa (Mr. GRASSLEY).

Mr. GRASSLEY. Mr. Chairman, this House seems to be on the verge of refuting action taken by the 94th Congress, action which put this House firmly on record as an advocate of human rights for citizens living in repressive regimes anywhere on the face of the globe. The full Banking Committee, in support of action taken in the International Development Institutions Subcommittee, eliminated language from the authorization we are considering today which would insure a "no" vote by the United States for any loan to a nation consistently violating the human rights of its citizens. As it stands now, our representatives to the various lending institutions have complete discretion to decide when to vote no and when to vote yes, and thus there is minimal pressure on them or countries which might receive American dollars to make a sincere effort to advance, promote, and guarantee human rights. Our vote is no longer where our mouth has been.

I am pleased, however, that the committee has realized the importance of emphasizing that American moneys must go to meet basic human needs at

the grass roots level. During the 94th Congress, I promoted an amendment to the authorization for the Inter-American Development Bank which would have directed money into cooperatives and credit unions at the local level and, while that was not adopted, I believe the emphasis of this legislation on basic human needs is a step in the same direction.

The CHAIRMAN. The Chair recognizes the gentleman from Minnesota (Mr. Fraser).

Mr. FRASER. Mr. Chairman, I hope that this amendment will be defeated. I do not think it will advance the cause of human rights.

The CHAIRMAN. The Chair recognizes the gentleman from New York (Mr. Koch).

Mr. KOCH. Mr. Chairman, I hope that this amendment is supported. It would be outrageous to scuttle the Harkin amendment after we fought so hard for it, and wrote it into law in 1975.

The CHAIRMAN. The Chair recognizes the gentleman from New York (Mr. Badillo).

Mr. BADILLO. Mr. Chairman, this amendment was overwhelmingly approved by the House in the last Congress. Let us overwhelmingly approve it in this Congress, as well.

The CHAIRMAN. The Chair recognizes the gentleman from New York (Mr. Downey).

Mr. DOWNEY. Mr. Chairman, the conditions in the world have not changed. What inspired the 1976 Harkin amendment is as true today, in 1977, as it was in 1976.

The CHAIRMAN. The Chair recognizes the gentleman from Maryland (Mr. Long).

Mr. LONG of Maryland. Mr. Chairman, I rise in support of the Harkin amendment.

The CHAIRMAN. The Chair recognizes the gentleman from Maryland (Mr. MITCHELL)

Mr. MITCHELL of Maryland. Mr. Chairman, after a great deal of thought I am forced to support the Harkin amendment without any reservations.

The CHAIRMAN. The Chair recognizes the gentleman from Pennsylvania (Mr. Moorhead).

Mr. MOORHEAD of Pennsylva ia. Mr. Chairman, I rise in opposition to the amendment.

Mr. BENNETT. Mr. Chairman, I support the Harkin amendment which restricts U.S. taxpayers' assistance to countries which protect human rights. Our country is overextended in its foreign aid efforts. This is a logical way to limit our overextension; and to strike a blow for human rights at the same time. I yield to the gentleman from Iowa.

(By unanimous consent, Messrs. Waxman, Nolan, and Bennett yielded their time to Mr. Harkin.)

The CHAIRMAN. The Chair recognizes the gentleman from Iowa (Mr. HARKIN).

Mr. HARKIN. Mr. Chairman, for the against denial of aid which will go disame reasons that the National Council rectly to oppressed people without help-

of Churches, the National Catholic Conference, the American Baptist Home Mission Society and the Friends Committee on National Legislation have stated, I urge the Members not to take a step backward. All of these groups support the Badillo amendment.

Mr. Chairman, let me read to the Members what Robert McNamara said

a couple of weeks ago.

Mr. Chairman, let me read to the Members what Robert McNamara said just 2 weeks ago, at a breakfast meeting with Members of Congress for Peace Through Law.

No. 1, he said, "Don't let the technocrats (like me) make the decisions." He said they "must be made by the politicians or elected officials."

No. 2, he said, there "must be uniform application to each international institution."

No. 3, Mr. McNamara said there "must be uniform application to each and every nation."

This is what the purpose of the Harkin amendment is, and if Mr. McNamara says it is good enough for him, it ought to be good enough for us.

The CHAIRMAN. The Chair recognizes the gentleman from Ohio (Mr.

ASHBROOK)

Mr. ASHBROOK. Mr. Chairman, we did it before, and we can do it again.

The CHAIRMAN. The Chair recognizes the gentleman from New York (Mr. LaFalce).

Mr. Lafalce. Mr. Chairman, I believe that the gentleman from Iowa (Mr. Harkin) gave the impression that Mr. McNamara favored the Harkin amendment. I believe that is incorrect. Further, President Carter favors the committee amendment, and he opposes the substitute.

The CHAIRMAN. The Chair recognizes the gentleman from New York (Mr. BINGHAM).

Mr. BINGHAM. Mr. Chairman, I rise in opposition to the Badillo amendment and support the position of the Carter administration, which has taken the lead in the advancement of human rights.

The CHAIRMAN. The Chair recognizes the gentleman from California (Mr.

PANETTA).

Mr. PANETTA. Mr. Chairman, I rise in support of the amendment.

The CHAIRMAN. The Chair recognizes the gentleman from Minnesota (Mr. Nolan).

Mr. NOLAN. Mr. Chairman, during the election campaign of 1976, Democrats and Republicans joined together in asserting the need for a foreign policy which reflects the morality, the decency, the humanity, and the idealism of the American people. We campaigned on the need for a change from the policies of the past because the American people, and the force of world opinion. demanded it. The Badillo-Harkin amendment brings the force of law to the defense of human rights by effectively denying economic aid to governments which deny their citizens dignity, justice, and basic human rights. At the same time, the amendment guards against denial of aid which will go diing the dictators who rule. The amendment carries with it a new spirit of hope for oppressed people throughout the world. I urge its adoption.

The CHAIRMAN. The Chair recognizes the gentleman from New York

(Mr. BIAGGI) .

Mr. BIAGGI. Mr. Chairman, I rise in support of the Harkin amendments to H.R. 5262. The proposals present us with a very real opportunity to demonstrate that our commitment to human rights in foreign policy is more than mere rhetoric.

The language in the committee bill regarding human rights is simply not strong enough. In reality by only encouraging the United States to oppose the providing of aid to nations who are in violation of basic principles of human rights, has no real practical force. It must be unequivocally understood and stated that this Nation will not approve any assistance to nations which show "a persistent pattern of gross violations of human rights."

The position of the administration with respect to human rights enjoys wide support among the people of this Nation. Yet despite its popularity, it is a position which is susceptible to criticism if it is applied in a weak, incomplete, or selective fashion. I consider the language of the Harkin amendments to be more in line with the policies of the Carter administration and the American people.

There are many including myself who have grave reservations about this bill and especially the magnitude of the financial commitment we are making. We continue to carry an undue amount of the financial burden for these institutions and what is worse we find ourselves in the hypocritical positions of agreeing to provide massive amounts of assistance to nations which are not alined politically with us.

Certainly if this Congress is going to approve an authorization of \$5.2 billion to fund these various international banks, we have a responsibility to the American taxpayers to insure that their funds will not be used to sanction or even support any nation which does not respect the human rights of their citizens.

It should be noted that those concerned that this amendment will dangerously tie the hands of American foreign policy are talking through their hats. Not only is the language of the Harkin amendment clear as to those nations to whom these sanctions would apply—it also provides an exception for those nations which show that the assistance is necessary to serve basic human needs in their nation.

The time has come for this Congress to tie human rights into foreign assistance moneys. Thus far we have stated our positions in resolutions which have no binding effect. Here we are talking about very substantial funds designed to aid many nations. There is absolutely no reason why millions and even billions of American dollars should be given to nations which engage in torture, detention without charges, and other violations of human rights. There is no reason why

American money should go to nations which harbor international terrorists. The days of unquestioned and unconditioned doling of U.S. foreign aid money must end. The days of morality in U.S. foreign policy must return.

The CHAIRMAN. All time has expired. The question is on the amendment offered by the gentleman from New York (Mr. Badilo) as a substitute for the committee amendment.

The question was taken; and the Chairman announced that the ayes appeared to have it.

Mr. LaFALCE. Mr. Chairman, I demand a recorded vote. A recorded vote was refused.

So the amendment offered as a substitute for the committee amendment was agreed to.

The CHAIRMAN. The question is on the committee amendment, as amended. The committee amendment, as

amended, was agreed to.

AMENDMENT OFFERED BY MR. BADILLO

Mr. BADILLO. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Badillo: In title VI, add a new section 602 to read as follows:

SEC. 602. (a) The Secretary of State and the Secretary of the Treasury shall initiate a wide consultation, beginning with the industrialized democracies, designed to develop a viable standard for the meeting of basic human needs and the protection of human rights, and a mechanism for acting together to insure that the rewards of international economic cooperation are especially available to those who subscribe to such standards and are seen to be moving toward making them effective in their own systems of governance.

(b) No later than one year from the date of enactment of this Act, the Secretary of State and the Secretary of the Treasury shall report to the President of the Senate and the Speaker of the House of Representatives on the progress made in carrying out this section.

Mr. BADILLO. Mr. Chairman, this is merely an amendment to instruct the Secretary of State and the Secretary of the Treasury to initiate international negotiations to develop a viable standard for the meeting of basic human needs and for the protection of human rights so that in the future we will have the kind of specific rules that we would have wished to have had this afternoon.

Mr. REUSS. Mr. Chairman, will the gentleman yield?

Mr. BADILLO. I yield to the gentleman from Wisconsin.

Mr. REUSS. Mr. Chairman, I have considered the amendment which the gentleman from New York (Mr. Badillo) has been kind enough to show me. I think it is a well considered and constructive amendment, and since I have just found out that I cannot beat him, I will join him. So I am pleased to accept the Badillo amendment.

Mr. BONKER. Mr. Chairman, the recent human rights uproar with the Soviet Union and the explicit application of human rights as criteria for security assistance to other countries have put an unprecedented focus on the issue of human rights and on the definition and attainment of American values in gen-

eral. Now is the time for an informed national exploration of the issue which has bedeviled this Nation since Woodrow Wilson: How do we meld our values as a people into an increasingly tough, complex, and interdependent world where other nations may not share them?

Mr. Chairman, I suggest several premises for consideration:

First, that human rights and values are an integral part of an American tradition that is two centuries old. We recognize them as essential to the quality of our lives;

Second, that other values—like the pursuit of security, prosperity, and happiness—are equally a part of our history and national fabric, despite their recurrent misuse, especially in the last decade:

Third, that, as individuals or as a nation, we cannot pursue any of our values to complete attainment without unacceptably eroding other values. The administration's decision to continue security assistance to South Korea, I believe, was an explicit recognition that we would support a nation with a dubious record in human rights in order to maintain other interests important to our security.

In short, Mr. Chairman, I believe that the nature of foreign policy is to seek the best balance possible of our values, realizing that our values inescapably conflict with each other and that other nations have the leverage to diminish our attainment of any of them. The trick is to maintain both human rights values and a deep appreciation of what can realistically be done. Human rights without regard to practical consequences may be mindless idealism, even as pragmatism without regard to human rights and similar values leads us back to Vietnam and Watergate.

With this in mind, Mr. Chairman, I must reluctantly oppose any amendments to H.R. 5262 which would, in effect, make it mandatory for U.S. representatives to international financial institutions to vote against loans to nations engaging in a consistent pattern of gross violations of human rights, regardless of the merits of the loan application itself.

Mr. Chairman, my own concern for human rights is as deep as that of any other Member of this body. I urge a negative vote to these well-intentioned amendments only because I believe they would:

Fail to achieve their objective of promoting human rights; and

Endanger other goals and values of this Nation abroad.

First, there is a problem of definition. How can we consistently decide when a human rights violation is gross enough to trigger a loan denial? And, as we are all aware, we tend to define human rights as political and civil liberties. Third World countries, looking at the blemishes in our own country, tend to see them more as social and economic rights.

Second, such amendments will threaten to cripple the effective working of the financial institutions in which they are applied. The United States protested for years, for example, the insistence of Third World nations on introducing political factors like the Palestinian problem—into the so-called nonpolitical agencies of the United Nations, like the International Labor Organization. Application of the amendments in question would tar us with the same brush.

Third, in their singleminded pursuit of human rights values, such amendments could endanger an effective and flexible pursuit of other valid objectives, including developmental ones. What do we do, for example, if analysis shows that a fishing port or technical training institute would meet all our criteria for grassroots benefits in a country whose leaders cannot be persuaded to release political opponents from jail? Such amendments would have one issue dictate all U.S. policy decisions.

Fourth, I am not aware of any instance where morality has been successfully dictated to anyone. Quite frankly, I believe the primary benefit of such amendments would be to make us, at least temporarily, feel better about ourselves.

Mr. Chairman, there are those who claim that such amendments are necessary to reassert congressional power in foreign policy. I ask what power is gained by pursuing a course which promises to be futile, if not counterproductive?

Finally, I have consistently supported efforts by the House last session to write into law language that would guarantee consideration of human rights in our diplomatic relations with other countries. I have encouraged efforts to this end as a member of the House International Relations Committee.

These initiatives were necessary because the Ford administration displayed little or no concern about human rights in the conduct of foreign policy. Congress, therefore, had a responsibility and role to play to see that these values were not ignored; this required explicit language as was the case with the Harkin amendment.

But these overtures are not, or should not, be necessary with the Carter administration. Both as candidate and President, Jimmy Carter has affirmed his commitment to human rights as a cornerstone of our foreign policy. In fact, few will disagree that he has carried this banner way beyond what was expected a year ago, and some feel to a fault in international diplomacy.

The fact remains that President Carter has an unequivocal commitment to human rights, has repeatedly spoken out on the issue, and he will undoubtedly make it an integral part of this country's foreign policy. Why then press the issue through legislation and unnecessarily tie his hands? If President Carter cannot be trusted to address human rights, who can? I believe that legislative action to force the issue may not only be unwise and unnecessary, but it is clearly an insult to President Carter.

Mr. Chairman, I fully share the determination of the sponsors of such amendments to proclaim the Nation's belief in human rights and commit myself to their advancement. The problem is too tough and complex, however, to be solved through mandated inflexible or automatic responses. This Nation, at long last, is headed the right way on human rights. We have a President who has advanced this cause at every opportunity. Now is the time to give President Carter a chance to promote human rights, trusting that his ability and determination may in the end be more successful.

Mrs. CHISHOLM. Mr. Chairman, I will support the amendment by Congressman Bablilo.

I think that it is important in this discussion that all of us recognize that consideration of basic human rights as a matter of foreign policy is not something that began with the Carter administration

During the past 2 years, Congress has made great strides in making the acknowledgement of human rights an integral part of foreign policy considerations. What the Harkin amendment did was attempt to integrate moral—not just political—considerations into our lending and aid packages. That amendment affected two of our multilateral lending institutions, and it has been a successful effort. What Mr. Badillo is proposing is a reasonable expansion of that concept to include other lending commitments which this body makes.

That is, in my estimation, a reasonable request, and it is essential that we not only acknowledge the importance of human rights as a matter of policy, as this bill does, but that we give some enforcement power to Congress to make this commitment more than congressional lipservice to what is an important part of the administration's foreign policy.

Since this House has the responsibility to the taxpayers to carry out our lending capabilities in the most honest and humane way, then it is not enough to merely state policy and leave the enforcement of that policy to the State Department. What results is that any administration can make arbitrary decisions about who violates human rights and who does not; what Mr. BADILLO is suggesting is that Congress take its appropriate role in making sure that this policy is carried out. Without this amendment, we will be taking a step backward by disassociating ourselves with the successful measures passed last year by this House, and we will be abdicating our role in shaping American foreign policy.

I do not think anyone can argue with the need to make the consideration of human rights a cornerstone of American relations with the underdeveloped and the developing nations of the world. But if we are going to do it, let us do it in a way so that we demonstrate we are serious. The Badillo amendment, by writing in enforcement power in a policy that has already been approved by the committee, will further the cause of human rights as it has been espoused by the Carter administration and, in the process, make Congress an active partner in the effort to approach our foreign commitments in a more humane and consistent way

Mr. DODD. Mr. Chairman, I rise in

support of the Badillo amendment to H.R. 5262, legislation authorizing increased U.S. participation in international lending institutions. My colleague's amendment very simply directs the U.S. representative on the board of directors of each of these institutions to vote against any loan, credit, or guarantee to any government which engages in a consistent pattern of gross violations of human rights.

To insure that the innocent and the needy in the Third World are not forced to pay too high a price for the mistakes of their governments, an exemption is provided for financial or technical assistance which is directly targeted to the poor in a recipient country.

Thus, the amendment affords us some flexibility while eliminating any doubts as to the seriousness of our position on human rights. I strongly approve of this attempt to bring financial backing to what is already the stated will of the Congress. Turning our intent into enforceable policy can only increase the strength of our position and make it a more effective one. I urge all of my col-

leagues to vote to put our money behind

our words, and to adopt today the Badillo amendment to H.R. 5262.

Mrs. BURKE of California. Mr. Chairman, I rise in support of the Badillo amendment. This amendment would demonstrate to the world that the House of Representatives, as representative of the American people, is genuinely concerned about the cause of human rights. A concern raised not in rhetoric, but in a forthright manner as contained in this amendment.

It is ironic that recent Presidential and congressional proclamations about human rights are welcomed and yet viewed with some suspicion by the international community. For it is indeed a fact that the record of the United States in support of the cause of universal human rights has to date been less than admirable. The United States has not been a moral leader in advocating the cause of universal human rights, particularly within international organizations, such as the United Nations.

In 1948, the United Nations General Assembly issued the Universal Declaration of Human Rights. It was proclaimed as the first step in the formulation of an "international bill of human rights" that would have legal as well as moral force. The enactment of an international bill of human rights was completed only in December 1966, when the General Assembly adopted the International Covenant on Economic, Social, and Cultural Rights, the International Covenant on Civil and Political Rights and the Optional Protocol Thereto.

Another decade elapsed before the covenants were ratified by a sufficient number of countries to bring them into force. Twenty-eight years after this comprehensive undertaking, it became a reality.

Today as we debate the merits of this amendment, 37 nations have ratified and 51 nations have signed the International Covenant on Economic, Social, and Cultural Rights. The United States, to date has neither signed or ratified this cove-

nant. Thirty-five nations have ratified and 50 nations have signed the International Covenant on Civil and Political Rights. The United States, to date, has neither signed or ratified this covenant.

I was heartened, as I am sure you were, to hear President Carter in his March 17 address to the United Nations General Assembly, state that the United States would soon sign both of the aforementioned covenants.

Two other international covenants which focus on human rights bear mentioning. The Convention on Racial Discrimination was signed by President Kennedy and submitted to the Senate for ratification in 1962. To date, it has not been ratified. The Genocide Convention was signed by President Truman in 1947 and submitted to the Senate the same year. To date, it has not been ratified

What better way to demonstrate to the international community that we are concerned and intend to give full force and meaning to our commitment than the adoption of the Badillo amendment? His amendment would simply direct the U.S. representatives in the international financial institutions—IFI's—to vote against the extension of financial or technical assistance to any country which engages in a consistent pattern of gross violations of human rights.

The President has voiced his concern and his intent to sign two major human rights documents. The House now has an opportunity to likewise demonstrate its concern. By adoption of this amendment, it would enhance its credibility and the creditability of the U.S. Government around the world, by the simple act of mandating to our IFI representatives to vote "no."

I urge its adoption.

Mr. WEISS. Mr. Chairman, I will support the Badillo-Harkin amendment to H.R. 5262—the International Lending Institution Authorization-when it is offered in the House today. This amendment requires the U.S. representative to six international lending institutionsthe International Bank for Reconstruction and Development, the International Development Association, the International Finance Corporation, the Asian Development Bank and Fund, the Inter-American Development Bank, and the African Development Fund-to cast a "no" vote on new loans to countries whose governments engage in flagrant violations of human rights.

I believe that this amendment, introduced by Mr. Badillo and Mr. Harkin, and supported in a letter to the House membership by myself and eight of our colleagues, demonstrates that our Nation intends to take an active stand on violations of human rights such as torture and arbitrary imprisonment of individuals.

The Badillo-Harkin amendment assures that President Carter's bold commitment to human rights becomes an effective tool in shaping international development policy. It gives life to that partnership the President mentioned so often during his Presidential campaign: A partnership and openness between the

American people and their Government in formulating our foreign policy.

I applaud the distinguished gentlemen, Mr. Badillo of New York and Mr. Harkin of Iowa, for their keen insight into America's role in international lending institutions by offering this amendment. This amendment will begin to establish a foreign policy for this country which will be consistent with our Nation's political and moral values.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. Badillo).

The amendment was agreed to.

COMMITTEE AMENDMENT

The CHAIRMAN. The Clerk will read the next committee amendment.

The Clerk read as follows:

Committee amendment: Page 7, line 1, insert:

TITLE VII—LIGHT CAPITAL TECHNOLOGY
